Contents

Preface

Planning under uncertainty
G.B. Dantzig

Duality and optimality in multistage stochastic programming
R.T. Rockafellar

The use of discrete moment bounds in probabilistic constrained stochastic programming models
A. Prékopa

Stochastic integer programming: General models and algorithms
W.K. Klein Haneveld and M.H. van der Vlerk

Stochastic programs and statistical data
G.Ch. Pflug

Statistical estimation from an optimization viewpoint
R.J-B Wets

Bound-based approximations in multistage stochastic programming: Nonanticipativity aggregation
N.C.P. Edirisinghe

Gains and costs of information in stochastic programming
Z. Artstein

Some advances in decomposition methods for stochastic linear programming
A. Ruszczyński

Statistical approximations for stochastic linear programming problems
J.L. Higle and S. Sen

Growth versus security tradeoffs in dynamic investment analysis
L.C. MacLean and W.T. Ziemba

Scenario modeling for the management of international bond portfolios
A. Beltratti, A. Consiglio and S.A. Zenios

Linking strategic and tactical planning systems for asset and liability management
J.M. Mulvey, C. Madsen and F. Morin

The practice of portfolio replication. A practical overview of forward and inverse problems
R. Dembo and D. Rosen

Author index
