Proceedings of the
1998 Powder Metallurgy World Congress & Exhibition
Granada, Spain, October 18-22, 1998
Contents

Powder Production

Design of a New Type of Atomiser for Metal Powder Production ................................................... 2
Cengiz Dogan, Nihat Yildirim, Suleyman Sanitas

Physical Simulation and Computer Modelling of Centrifugal Atomization of Liquid Metals ................ 8
Y Y Zhao, A L Dowson, R M Ward, M H Jacobs

Simulation of Robust Production of Water Atomized Powder .......................................................... 14
Bjarne Bergquist, Torsten Ericsson

On-line Control of Molten Metal Atomization on the Basis of PDA Measurements in Inert-Gas, Liquid-Gas and Water Atomization ............................................................. 21
Jürgen Raimann, G Wolf, M S Cabot, Correia Brito

Particle Size Distribution of Gas-Atomised Copper produced by Confined Atomisers ..................... 27
L A Nuñez, A Levy, A Sepulveda, T Lobel, R H Palma

Experience of Tuning Gas Atomising Nozzles using the Water Bench Technique ............................ 33
James Shone, John J Dunkley

Nitrogen Atomisation and Characterisation of Duplex Stainless Steel Powders .................................. 40
Dr Andrea Zambon, B Badan, E Ramous

Porosities and Gas Concentrations in Argon and Helium Gas atomised TiAl Alloy Powders ............... 46
Dr Rainer Gerling, Dr F-P Schimansky, U Feddersen

Progress in Inert Gas Atomised Powder for Hydrogen Storage Materials ........................................ 52
Michael Hohmann, Harald Scholz, Franz Hugo

Platinum Powders for Dispersion Hardened Materials ........................................................................ 58
Dr Christian Edtmaier, Dr Gerhard Schreier

Numerical Simulation of Atomisation Gas Flows .............................................................................. 66
Dr Pedro I Espina, Dr Stephen D Ridder, Prof Ugo Piomelli, Francis S Biancianiello

Iron Powder with Low Oxygen Content ............................................................................................ 72
Erik V Axmin

Innovative Carbonyl Iron Powder Materials ....................................................................................... 76
A W Friederang, R Schlegel

Characterisation of Water Atomised Steel Particles by Scanning Electron Microscopy ...................... 81
Jose Luis Estrada, Hector Herrera, David Jaramillo, Fernando Juarez
Characterisation of a Mechanically Alloyed Ag-Al System .............................................................. 87
R Esquival, G D Jaramillo, J L Estrada

Influence of Mixing Technology on the Manufacturing and Performance of some PM Parts ........ 94
Jesus Penafiel, Joan Antonio Bas, Cesar Molins

High Green Strength Copper Powders for Friction and Other PM Applications .................. 100
Neal Blossom, Harold Kelley, Kim Klatt, Jeff Poole, Pierre Taubenblat

Cold Forming of Powder Metal Wires ....................................................................................... 106
Prof Wlodzimierz Bochniak

Explosion-Proof Production of Metal Powders ........................................................................ 112
Os Neikov, G I Vasiiliyeva, P B Rabin, V G Tokhtuyev

Size Control of Tungsten Powder Synthesised by SHS (Self-Propagating High Temperature Synthesis) Process ............................................................ 118
Chang-Whan Won, Joong-Chai Jung, Seog-Kwon Ko, Jong-Hyeon Lee, Seong-Seok Cho, Byong-Sun Chun

Surface Chemistry of Water-Atomised High-Alloyed Al-Zn-Mg-Cu Base Powders .......... 123
Dr Oleg Neikov, A V Krajnikov

Rapidly Solidified Aluminium Alloy Powders ......................................................................... 129
Dr Oleg D Neikov

Investigation of the Factors affecting Metal Powder Production by Electric Arc Atomisation 135
Cengiz Dogan, Necip Fazil Yilmaz, Suleyman Saritas

Structure Model of Light Amorphisation of Ni-Nb-(Ta, V) Alloys by Using the Melt Quenching Process ............................................................. 141
Valery Savin, Eugenie Kostenko, Andrey Vagin

Production of Femanal Powders by Plasma Rotating Electrode Process ............................ 145
Andres Ozols, P D Bilmes, C L Llorente, H R Sirkin

Dr Elena L Muraviiova

Structural Characteristics in Rapidly Solidified Iron Base Ledeburitic Type Powders ........ 157
Dr Peter Jurci, Stolar Pavel

Optimisation of Good-to-Bad Powder Size Ratio Output in Atomisation Processes ........... 163
Prof Lev N Belyanchikov, Prof Vouli A Grigoryian

Plasma Rotating Electrode Atomisation and Drop Remelting of Chromium Alloys in Rotating Ingot Moulds: Comparison of Structure and Properties ........................................... 168
Prof Lev N Belyanchikov, Prof Vouli A Grigoryian

Gas Atomisation of Nickel Aluminides Powders ................................................................. 173
A Zambon, B Badan, E Ramous

Solidification Rates in Centrifugal Atomisation .................................................................... 179
Andres Ozols, E Sancho

Hollow Copper and Bronze Powder Particles for Manufacturing of Cellular Structures .... 185
Herbert Danninger, Susanne Strobl, Richard Guertenhofer

Microstructure and Morphology of ZnO Powders derived by Freeze-Drying Method ....... 191
Zorica Zakula, Bojan Marinkovic, Natasa Nikolic, Olivera Milosevic
Production of Boron-Containing Iron Powders by the Rotating Electrode Process
Prof Irina Spiridonova, Dr Yelena Sukhovaya

Quantitative Evaluation of Solidification Microstructures in Centrifugally Atomised Powders
Ms Rita Bonetto, A Ozols, J Ladaga, E Sancho

Production of Ultrafine High Purity Tungsten Powder from Scheelite by Self-Propagating High-Temperature Synthesis
Dr Curcic Radovanka, V Jokanovic, G Djurkovic, P Zivanovic, D Uksokovic

Brass Powder Production by the Displacement from Saline Solutions
Prof Hanna Frydrych, Jerzy Frydrych, Jan Lezanski, Marek Sowa

Crystal Structure of Rapid Cooled Aluminium Powders
Prof George Arghir, Emil Abrudan

Influence of Degree of Homogenisation on the Apparent Density of a Binar Mixture of Powders
Prof G Matei, Prof R Orban, M Mangra

Crucible Free Gas Atomisation of Special Metals and Alloys
N Hort, K U Kainer

New Method for Producing Ultrafine Powder of Titanium Dihydride
K Deletang, D Even, J L Bobet, C Arvieu, J M Quenisset

Electrolytic Copper Powders - A New Lease of Life
Dr B Mais, G A Mowbray

Diffusion Bonding of Nickel Metal Powders on Iron Powders: a Microstructural Study
F Miani, A Zambon, E Ramous

Some Characteristics of Stabilised Electrolytic Copper Powder
Ms L Radisavljevic, D Dumi\v{r}askovic, M G Pavlovi\v{c}, N D Nikoli\v{c}, I D Doroslovacki

Composite Materials on the Basis Powders Fe-S making in Vibrating Layer
S A Hlevunov, V G Lyulko, D V Oleinikov, D V Necrasov

Alloy Powder 'with coral-like' Particles and its Properties
E Pioro, N Pioro, O Katrus

Bistructural Iron Powder
N Pioro, E Pioro, Y Lipuchin, S Solonin

Production and Applications of Low Cost Titanium Powders
V Moxson, O N Senkov, F H Froes

**Mechanical Alloying**

Mechanical Alloying as a Processing Route for Nb₃Al - Base Alloys
S Dymek, M Dollar, K Leonard

Mechanical Milling Studies in the Ni-Fe-W System and their Sintering Behaviours in Heavy Alloys
Burak Ozkal, Prof L O\v{c}eoglu

Improved Mechanical Alloying Techniques for Oxide Dispersion Strengthened Chromium Base Alloys
J Hegels, W K\öck, R F Singer, Dr M Janousek
Fe-TiN Composites prepared by Mechanical Alloying and Spark Plasma Sintering .......................... 402
J M Herrera-Ramirez, Prof J Cabanas-Moreno, T Tsuchiya, M Umemoto, H Balmoni-Ramirez,
R Reta-Trigos

Structure and Properties of Ag₃Sn Intermetallic Compound prepared by Mechanical Alloying .......... 408
Prof T Dobra, O Radu, L Brandusan, D Bota

Preparation and Characterisation of Fe-Ni-P-Si Alloys obtained by Mechanical Alloying .............. 414
J J Sunol, M T Mora, N Clavaguera, T Pradell

Simoloyer(R) CM100s, Semi-Continuously Mechanical Alloying in a Production Scale using
Cycle Operation - Part II .................................................. 420
H Zoz, D Ernst, R Reichardt, T Mizutani, M Nishida, H Okouchi

Copper Matrix Strengthening by Internal Oxidation of Al-Prealloy ............................................. 432
V Rajkovic, I Nenad, M Mtkov

Preparation of Mg₂Co Alloy by Mechanical Alloying, Effect of Partial Replacement of Co by
Ni and Fe ........................................................................ 438
J-L Bobet, S Pechev, B Chevalier, B Darriet

Iron-Nickel-Copper-Molybdenum Alloy obtained by Mechanical Alloying .................................... 444
L Salgado, F A Filho

Concentration Fluctuation in Mechanically Alloyed Fe-Ni Invar ....................................................... 449
F Ono, K Hayashi, S Wei, H Maeta

Microstructural Characterisation of a WC Powder Alloy Synthesised from Elemental W and
C Powders by Mechanical Alloying ........................................ 455
Prof M Lutfi Ovecoglu, Hudai Kara, Burak Özkal

Mechanical Alloying of Cu-Al-Ni Shape Memory Alloys .............................................................. 461
J San Juan, P Rodriguez, R B Pérez-Sáez, V Recarte, M L Nó

Reactive Synthesis

Diamond Tools with Reaction Sintered Ni₃Al Matrix ................................................................. 468
S C Hu, K S Hwang

Comparison of the Formation of FeAl Intermetallic Compound in the Process of Reactive
Sintering and of Mechanical Alloying ............................................................ 474
M Hashii, Y Hosoi

Reaction Synthesis of NiAl/50%SiCp Composites ................................................................. 480
Ms M H Carvalho, T Marcelo

Fundamental Aspects of Reactive Synthesis of Al Matrix Composites ........................................ 486
H J Brinkman, J Duszczyk, L Katgerman

Reaction Synthesis of Nb-Ni-Al Alloys ............................................................... 492
R Mendes Leal Neto, P Iris Ferreira

Reactive Synthesis of Porosity Composition Material ............................................................... 498
A Makarov, V Antsiferov
Thermal Spraying & Spray Forming

Potential of the Phase-Doppler-Anemometry for the Analysis and the Control of Spray Forming Processes .......................................................... 501
K Bauckhage

Structural Characterisation of WC+12Co/NiCrBSi Free Standing Forms obtained by HVOF Thermal Spray .......................................................... 507
Prof J M Guilemany, D R Franch, C Lorenzana

High Velocity Oxy - Fuel Spraying .................................................................. 513
Prof J Koutsy

On the Optimal Velocity and Temperature of Stainless Steel Powder Particles during Plasma Spraying .......................................................... 519
Prof V Sobolev, Prof J M Guilemany, A J Martin

Studies of New Applications of Ni-based Powders for Hardfacing Processes .................. 524
Prof M Rosso, A Bennani

Plasma Sprayed Tungsten Carbide Coatings after Laser Surface Treatment .................. 531
J Mateos, J M Cuentos, E Fernández, M Cadenas

Characterisation of the Spray Cone of a Free Fall Atomiser and its Influence on the Spray Forming Process .................................................. 537
Dr V Uhlenwinkel, M Buchholz, C Kramer, K Bauckhage

Microstructure and Properties of High Strength and High Conductivity Cu-Cr-Zr-Mg Alloy prepared by Spray Forming .................................. 543
J Shen, Z Li, F Cao, Q Li

Effects of Spray Deposition on the Microstructures and Properties of Al-Li Alloy .............. 549
C Cui, F Cao, Q Li

Numerical Simulation of Heat and Momentum Transfer in Spray Forming Process ............. 555
C Cui, Z Li, Q Li

A Novel High Strength and Heat Resistant Aluminium Alloy produced by Spray Forming .......... 561
J Shen, H Fan, F Cao, Q Li

Nanocrystalline Materials

Metal Nanopowders for Polymer Matrix Composites ............................................ 567
B Günther, H Schäfer

Ultra Grain Refining of Iron by Mechanical Milling Process .................................. 573
Y Kimura, S Takaki

Grain Growth and Densification of the Nanocrystalline W-Cu Powder prepared by Mechanical Alloying ......................................................... 579
Prof Young Do Kim, J C Kim, S S Ryu, I H Moon

Computer Simulation of Intercalation Processes in Application to Nanotechnology of Layered Materials ......................................................... 585
K Efimova, V V Kartuzov, I V Krasikov, L M Kulikov, A A Semjonov-Kobzar

Consolidation of Nanocrystalline Alumina ....................................................... 591
R Prümmer, P Weimar
Effects of Addition of Third Alloying Elements on the Formation of Cu-C Nanocomposite Powder Particles ................................................................. 596
Prof K M Lee, H S Kim

Behaviour of Ultrafine Powders if Iron Block Metals produced by Salt Pyrolysis during Low-Temperature Pressing ................................................................. 602
A V Laptev, S S Ponomarev

Synthesis and Characterisation of Titanium Aluminide based Compound with Nanocrystalline and Bimodal Structures ................................................................. 609
O N Senkov, N Srisukhumbowornchai, M L Ovecoglu, F H Froes
