Proceedings of the

1998 Powder Metallurgy
World Congress
& Exhibition

Granada, Spain, October 18-22, 1998
Proceedings of  
**1998 Powder Metallurgy World Congress & Exhibition**  
Granada, Spain, October 18-22, 1998

**CONTENTS**

**Hard Materials**

Measurements of Fracture Toughness in a Micrograined Tungsten Carbide using two Different Methods .......................................................... 2  
L G Rosa, J C Fernandes

Fracture Toughness-Microstructure Relationships in Ultrafine Tungsten Carbide-Cobalt Alloys ........ 8  
N Sacks, C Allen, I Northrop

Reliability Characteristics of Hardmetals ........................................................................... 15  
Dr H Reshetnyak, Dr J Kübarsepp

A New Method of Evaluation on the Quality of Cemented Carbides in Cyclic Contact  
Compression Loading ............................................................................. 21  
L I Alexandrova, V P Bondarenko, M G Loshak

Comparison of Plastic and Elastic Behaviour of Submicron and Micron-sized WC-Co Grades at Temperatures between 20 to 1000°C .................. 27  
Prof S Luyckx, I T Northrop, Yu V Milman, V A Goncharuck

Preparation of Ultra Fine TiC Dispersed Ni-based Cermet by Mechanical Alloying ........ 40  
Dr A Sugiyama, Dr K Kobayashi, D K Ozaki

Synthesis of TiC-Ni(-Mo) Cermet via Mechanical Alloying ............................................. 45  
C J Choi, B G Moon, W W Park

Use of Computer Simulation in the Measurement of WC Grain Size .............................. 51  
Dr B Roebuck, N McCormick

Development of the Microstructure in Cemented Carbides between 25-1000°C and the Relationship to their Properties in Technical Applications .......... 57  
P Kindermann, Dr U Schleinkofer, H-G Sockel, W Heinrich, K Gorting

Influence of the Manufacture Process to obtain WC+Co Thermal Spraying Powders. Effects on the Powder Characteristics and Coating Properties ........................................ 63  
Prof J M Guilemany, J M P Sanchez

Non-Destructive Phase Composition and Cutting Properties Control of Cemented Carbide Tool Inserts ........................................................................ 69  
E Dudkin, A Plotnikov, M Diperstain

Features of Wear of TiC-Base Hardmetals .................................................................... 75  
J Kübarsepp, H Reshetnyak, J Pirso, H Annuka
Effect of Coated Whiskers on the Mechanical Properties of SiC Whisker Reinforced Silicon Nitride Ceramic Composite ......................................................... 191
Prof W-S Cho, B I Kyung, K W lung

Quantification of the cBN - hBN Transformation and Production of cBN Based Cermets by HIP ................................................................. 197
E J Otegui, Dr I ñigo Iturriza, V Ayala, J Martin, F Castro

Preparation of Niobium Carbide from an Organometallic Precursor ................................................. 203
C P Souza, F F P Medeiros, U Umbelino Gomes, C Ciaravino, P Satre, M Roubin

Characterisation of Hot Pressing Behaviour of Diamond Cutting Tools ................................................. 208
Prof S Karagoz, M Zeren

Effects of Various CuSn-Alloying Systems as Selected Bonding Material in Hot Pressing Processing Diamond Tools .................................................................. 213
J-M Borel, B Gartner

Processing and Properties of Metal-Bonded Coated Diamond Composites ........................................... 217
Dr J Karwan-Baczewska, D I Gotman, Prof E Y Gutmamas

Features of Structure and Mechanical Properties of Hardmetal produced by Low-Temperature Pressing of Submicron WC/Ni Powder ........................................... 223
Dr A Laptev, Dr S S Ponomarev

Hot Pressed Binder-Diamond Type Composites ..................................................................................... 229
J Vukoman, R Curcic, G Djurkovic, P Zivanovic, D Uskokovic

Surface Processing of Ultrahard Materials used for Embedding in Resin or Metallic Matrices ........... 234
M Musu-Coman, M Fecioru, Gh Baluta, N Arnici

Application of Pressure Swing Granulation to Hardmetal Granulation Process ................................... 240
K Nishii, H Sonoda, H Kamiya, M Horio

Tribology/Friction

Tribology of High Speed Steel Base Composites .................................................................................... 247
Dr M Oliveira, I M Martins, J D Bolton, C Jouanny-Trésy

Wear Behaviour of M3/2 High Speed Steel Reinforced with NbC and TaC ........................................ 253
E Gordo, N Antón, N Candela, J M Ruiz-Prieto, J M Torralba

Development of a Powder Metal Stainless Steel for High Temperature Tribological Applications ......... 259
I Whitaker, P Maulik, C G Purnell

Tribological Investigations of PM Stainless Steels mixed with HCX23 against Al2O3 & SiC ................. 265
P Kjeldsteen

Wear/Corrosion Behaviour of Reactively Hot Pressed Nickel Aluminides ........................................... 284
Prof D J Stephenson, J H Jin

Pseudo-Pitting Process in Powder Metallurgy Materials ......................................................................... 290
Dr B Kubicki, M J Kubicki

Tribological Behaviour and Characteristics of Sintered Iron Based Composites with Additions of Cu3P and Ceramic Particles ...................................................... 296
Dr C Peytour-Chansac

</tbody>
</table>
Characterisation of the Inner Volume of PM Parts by Micro Computer Tomography .............................................. 409
Dr K Pischang, Dr J Goebbels, Dr B Illerhaus

Direct Current Potential Drop Method Applied to Green Compacts ................................................................. 415
P Luukkanen, T Ericsson

Application of Ultrasonics to Metal Powder Separation ....................................................................................... 421
R Usherwood

Bulk Calibration Standards by Powder Metallurgy for ICP-AES-Analysis ...................................................... 427
Dr C Edtmaier, P Lehrner, Dr J Zbiral, Dr J Disam

New Recommendations for the Particle Size Testing of Powders and the Homogenisation of Powder Mixtures ........................................................ 431
Prof S Domsa, Prof I Vida-Simiti

Non-Homogeneous Density Distribution within Pressed Iron Samples ........................................................... 437
S Prokic, B Zivanovic

Methodics to Correct the Data of Mercury Porosimetry ....................................................................................... 443
V V Maziuk, L P Pilinevich, A L Rak

Research of Iron Powders Behaviour in Magnetovibrating Layer ................................................................ 448
Y A Gordin

Resonant Separation of Grinding Slimes .............................................................................................................. 453
Y A Gordin, Y M Vergnigorov

Specific Control of Impurity Inclusions in Powder Materials ............................................................................. 458
G S Burkhanov, V M Kirillova

Utilisation of Powder Metallurgy for Standards Preparation ........................................................................... 465
Prof I Spiridonova

Porosity of Aluminium Powder Green Compacts ............................................................................................. 468
R A Tolosa, J Diaz, H Parra

Superhard/Refractory Metals

Sintering/HIPing of Cobalt Powders for Diamond Tools ..................................................................................... 475
M del Villar, J Echeberria, I Iturriza, F Castro

Densification of Diamond Tools with Co, Ni and Fe Based Metallic Binders ...................................................... 481
Dr R G Ojeda, M del Villar, P Muro, I Iturriza, F Castro

Coated Powder Approach for Tungsten Alloys .................................................................................................... 487
A Bose, A J Sherman, A Biswas

Morphological Effect of Grains on Deformation Mechanism Maps of PM Tungsten Fine Wires ............. 492
K Tanoue

Work Hardening of Powder Sintered Mo-Re Alloys ............................................................................................ 498
J L Garin, R L Mannheim

Bohemian Wolframite and Tungsten Discovery ................................................................................................. 504
Dr V Dufek, P Mitrov, J Palme, L Sarman

Sintering of Ternary Mo-W-Re Alloys at Medium Temperatures ................................................................. 509
Prof R Mannheim, J L Garin
Fracture Toughness of Tungsten Heavy Alloys .......................................................... 515
Z Ludynski, J J Bucki

Microstructural Control of Mechanically Alloyed Tungsten Heavy Alloy by Two Step Sintering ....... 520
H J Ryu, S H Hong, W H Baek

Low-Temperature Oxidation of Industrial Molybdenum Surfaces .............................................. 526
A Schintlmeister, H P Martinez, P Wilhartz, F P Netzer

Research into Tungsten Powder Processing .................................................................................. 532
I Pascu, D Tarata

Tantalum Silicide Sputtering Target Material for Amorphous Ta-Si-N Layers ................................... 537
Dr E Ivanov

Coatings

New Developments of Powder Metallurgy Research Institute in the Field of Composite Materials, Products, Coatings and Production Technologies .......................................................... 544
Dr G Kletsko, P A Vityaz, E V Zvonarev

Effect of the Physical Characteristics and Properties of Powder Particles on the Structural and Mechanical Characterisation of Cr$_2$C$_2$-NiCr Coatings obtained by HVOF ........................................ 548
Prof J M Guilemany, J A Calero, V V Sobolev

Production of Coatings containing selected Diamond, Nitrides and Carbides by APS and UPS Processes .................................................................................................................. 554
A Ilyuschenko

Production of Productive Coatings and Discrete Structure ............................................................. 560
V Ivashko, A F Ilyuschenko, E A Doroshkevich, V A Okovity

Thermal and Mechanical Treatment of Self-Fluxing Alloys .......................................................... 565
A Ilyuschenko, E A Doroshkevich, V A Ivashko, A I Shevtsov, V A Okovity

Thermal Coatings from New Iron-Base Alloys .............................................................................. 570
Dr S A Revun, Dr E L Muraviyova

Interaction between Components under Thermal Spraying Fusion and Welding of Composite Coatings ......................................................................................................................... 572
Dr E L Muraviyova, Dr S Revun

Formation of Thin-Film Tribological Coatings by Electro-Contact Sintering of Powder Composites ............................................................................................................................. 577
Dr V A Kovytn, Y M Pleskachevsky

Effect of Technological Parameters of Laser Fusion and Chemical Composition on Structure and Properties of Ni-Cr-B-Si-C Powder Coatings ......................................................... 583
M Kardapolova, O Devoino, N Spiridonov

Improvement of Antifriction Properties of Bronze Powder Coatings by Chemical and Thermal Treatment ......................................................................................................................... 587
Dr O Devoino, M Kardapolova, G Panich, A Rak

Wear Resistant and Graded Powder Coatings produced by Vacuum Electron-Beam Facing ............. 591
Dr G Pribitkov, V Panin, S Beljuk, V Durak

Formation of Coating at the Plasma Alloying .................................................................................. 596
Prof I Spiridonova, Dr T Svetlana
Experience in Development and Commercial Implementation of New Zinc-Rich Coatings for Protection of Steel against Corrosion

Prof I Frishberg, L P Yurkina, O Y Subbotina, N V Kishkoparov, V Nicolay
