The 1999 International Coalbed Methane Symposium is Sponsored by

The University of Alabama
College of Continuing Studies
College of Engineering

Advanced Resources International

Coalbed Methane Association of Alabama

Geological Survey of Alabama

GeoMet Operating Company, Inc.

Sonat Exploration Company, Inc.

U.S. Environmental Protection Agency
## TABLE OF CONTENTS

### RESOURCE ASSESSMENT/EXPLORATION I

<table>
<thead>
<tr>
<th>Page</th>
<th>Title</th>
<th>Authors/Institutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>9911</td>
<td>Status for the Exploration of Coalbed Gas in China; Li Wuzhong, Wang Yibing and Sun Bin, New Area Exploration Board, China National Petroleum Corporation</td>
<td></td>
</tr>
<tr>
<td>9912</td>
<td>Coalbed Methane Resource and Its Exploration and Development Prospects in Yunnan-Guizhou-Guangxi Region; Gui Baolin, Zou Shaochun, and W.S. Dou, Dian-Qian-Gui Petroleum Exploration Bureau, Dian-Qian-Gui Petroleum Institute, Guanshang</td>
<td></td>
</tr>
<tr>
<td>9923</td>
<td>Coalbed Methane Potential of the Southern Coal Basin of Belgium; M. Mostade, Institution pour le Développement de la Gazéification Souterraine, Belgium</td>
<td></td>
</tr>
<tr>
<td>9959</td>
<td>Analysis of Data Source and Design of Coalbed Methane Resource Database; Guo Xina, Xi'an Branch of China Coal Research Institute</td>
<td></td>
</tr>
</tbody>
</table>
### RESERVOIR PROPERTIES I

<table>
<thead>
<tr>
<th>Page</th>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>63</td>
<td>Adsorption and Desorption of Methane on the Coals Under High Pressure; T. Yamazaki, Waseda University, Advanced RES-CENT; S. Yamaguchi, Akita University; Y. Tazaki, Kanto Natural Gas Co. Ltd.; and S.A. Roces, De la Salle University</td>
<td></td>
</tr>
<tr>
<td>77</td>
<td>Critical Assessment of Coalbed Reservoir Gas-in-Place Analysis Methods; C.R. Nelson, Gas Research Institute</td>
<td></td>
</tr>
<tr>
<td>91</td>
<td>Binary Gas Adsorption/Desorption Isotherms: Effect of Moisture and Coal Composition Upon Component Selectivity; C.R. Clarkson, Burlington Resources, Inc.; and R.M. Bustin, Department of Earth and Ocean Sciences, The University of British Columbia</td>
<td></td>
</tr>
<tr>
<td>117</td>
<td>Modelling Methane Adsorption Isotherms Using Pore Filling Models: A Case Study on Indian Coals; C. Laxminarayana and P.J. Crosdale, Coalseam Gas Research Institute, School of Earth Sciences, James Cook University, Australia</td>
<td></td>
</tr>
<tr>
<td>129</td>
<td>Numerical Analysis of the Effect of Pore Pressure Depletion on Productivity of Horizontal Coalbed Methane Wells; J.Q. Shi and S. Durucan, T.H. Huxley School of Environment, Earth Sciences and Engineering, Imperial College of Science, Technology and Medicine</td>
<td></td>
</tr>
<tr>
<td>141</td>
<td>A New Laboratory Technique to Estimate Gas Diffusion Characteristics of Coal; S. Harpalani and S. Ouyang, Department of Mining and Geological Engineering, College of Engineering and Mines, The University of Arizona</td>
<td></td>
</tr>
<tr>
<td>153</td>
<td>Types and Division on Coalbed Methane Accumulating Districts and Zones in China; Jianping Ye, Wei Yue, Exploration Branch No. 1, Coalbed Methane Research Institute, China National Administration of Coal Geology; Yong Qin, China University of Mining and Technology; and Dayang Lin, China Administration Bureau of Coal Geology</td>
<td></td>
</tr>
</tbody>
</table>
Evaluation of Coalbed Methane Potential of Ishikari Coal Field, Japan; K. Ohga, Department of Mineral Development Engineering, Hokkaido University; and S. Shimada, Department of Geosystem Engineering, School of Engineering, The University of Tokyo

Coalbed Methane Well Drilling and Production Operations in the Powder River Basin, Wyoming; T.E. Doll, Barrett Resources Corporation

Booming Coalbed Methane Industry in China; Wang Shenyan and Zhang Suian, China United Coalbed Methane Corporation, Ltd.

Methodology of Optimum Seeking for the Potential Exploring and Mining Areas of Coalbed Methane Resources in China; Qin Yong, College of Resources and Environment Science, China University of Mining and Technology; Ye Jianping and Lin Dayang, China National Administration of Coal Geology

Free Gas Storage in Matrix Porosity: A Potentially Significant Coalbed Resource in Low Rank Coals; R.M. Bustin, Department of Earth and Ocean Sciences, The University of British Columbia; and C.R. Clarkson, Burlington Resources, Farmington, New Mexico

Ukraine Opens Door to Coalbed Methane; A.E. Filippov, I.V. Kurstak, S.W. Lambert, V.V. Berezhnoy, Alternative Fuel Center, Kiev, Ukraine

Status and Outlook for Development of Portable Mine Methanometers; E.F. Karpov, B.I. Bassovsky and A.K. Petrov, The National Mining Research Center, Skochinsky Institute of Mining

Gob Well Flaring: Design and Impact Analysis, D.J. Brunner, Resource Enterprises; and K.H. Schultz, Coalbed Methane Program, U.S. Environmental Protection Agency

Methane Drainage at the Minerales Monclova Mines in the Sabinas Coal Basin, Coahuila, Mexico, D.J. Brunner, Resource Enterprises; and J. R. Ponce, Minerales Moncolova, S.A. de C.V.

Economic Heat Recovery and Greenhouse Gas Elimination from Ventilation Air of Underground Coal Mines; R. Trottier, H. Sapoundjiev, F. Aubé, S. Hosatte, CANMET Energy Diversification Research Laboratory; and J.E.D. Gauthier, CANMET Energy Technology Centre, Natural Resources Canada
ENHANCED RECOVERY/TECHNOLOGY

9905 .................................................................................................................................................. 279
Laboratory Experiments and Simulations on the Environmentally Friendly Improvement of Coalbed Methane Production by Carbon-Dioxide Injection; K-H A.A. Wolf, R. Hijman, O.H. Barzandji, and J. Bruining, Applied Earth Sciences, Delft University of Technology

9920 .................................................................................................................................................. 291

9900 .................................................................................................................................................. 301
Problems of Coalbed Methane Recovery and Utilization; L.A. Puchkov, S.V. Slastounov, and N.N. Krassiouk, Moscow State Mining University, Russia

9934 .................................................................................................................................................. 309

9945 .................................................................................................................................................. 319
Appalachian Coals: Potential Reservoirs for Sequestering Carbon Dioxide Emissions from Power Plants While Enhancing CBM Production; C.W. Byrer and H.D. Guthrie, Federal Energy Technology Center, U.S. Department of Energy

9955 .................................................................................................................................................. 329
History Matching of Hydraulic Fracture and Production Data from a Vertical CO₂ and CH₄ Gas Drainage Test Well; R.G. Jeffrey, CSIRO Petroleum; K.T.A. Meaney, SOPHOS Plc; and R.P. Doyle, Dartbrook Coal Pty, Ltd.

Reservoir Sequences in the Coal Beds of Southern West Virginia; *J.R. Staub*, Department of Geology, Southern Illinois University at Carbondale

Mixed Methane/Carbon Dioxide Sorption by Coal: New Evidence in Support of Pore-filling Models; *P.J. Crosdale*, Coalseam Gas Research Institute, School of Earth Sciences, James Cook University

Fracture Geometry and Relative Permeabilities: Application to Multiphase Flow Through Coal; *J.P. Morris, N.J. Giordano, Jiangtao Cheng*, Department of Physics; *L.J. Pyrak-Nolte*, Department of Earth and Atmospheric Science, Purdue University; and *J. Tran and A. Lumsdaine*, Department of Computer Science and Engineering, University of Notre Dame

Reservoir Characterization of the Hedong Coalbed Methane Prospect, Ordos Basin, China; *C.D. Jenkins*, ARCO Exploration and Production Technology; *C.M. Boyer, II, S.A. Holditch and Associates; R.D. Fisher*, Texaco Exploration and Production Technology; *B.D. Gobran*, Reservoir Technology Consultants; *Sheng Jian Bo*, ARCO China Inc.; and *Zhang Shengli*, North China Bureau of Petroleum Geology, CNSPC

Geological Controls and Their Mechanisms of Coal Reservoir Petrography and Physics to Coalbed Methane Occurrence in China; *Qin Yong, Fu Xuehai*, China University of Mining and Technology; *Ye Jianping, Lin Dayang, and Tang Shuheng*, China National Administration of Coal Geology
ECONOMICS/UTILIZATION

9902 .................................................. 417
Appraisal of Coalbed Methane Resources in an Underground Mining Environment; C.D. Haynes, College of Engineering, The University of Alabama

9903 .................................................. 429
International Finance and Coalbed Methane Projects; K.H. Schultz, Coalbed Methane Programs, U.S. Environmental Protection Agency

9907 .................................................. 439
Economic and Ecological Assessment of Coalbed Methane Recovery and Utilization Projects in Kuznetsk Coal Basin of Russia; O.V. Tailakov, G.Ya. Polevshikov, A.A. Bykov, I.L. Abramov, T.A. Panchisheva and A.V. Sinelnikova, Russian Coalbed Methane Center, Institute of Coal & Coal Chemistry SB RAS

9914 .................................................. 449
Recovery of Coalbed Methane from the Abandoned Golden Eagle Mine Property; K.L. Hupp, KLH Consulting; C.J. Bibler and R.C. Pitcher, Raven Ridge Resources, Incorporated

9917 .................................................. 461
Financial Analysis Model for Coalbed Methane Projects at Chinese Coal Mines; Zhu Chao, Liu Xin, and Wan Wanxing, China Coalbed Methane Clearinghouse

9926 .................................................. 467
Coalbed Methane in Energy Sector: Mines of Coal Mining Stock Companies “Belovougol” and “Leninskugol”; N.N. Krasyuk, MGGU, Moscow; S.S. Zolotykh and A.I. Zharov, Belovougol Coal Mining Joint Stock Company; and D.I. Zhmurovsky, Coal Mining Stock Company, Leninskugol

9950 .................................................. 475
