# TABLE OF CONTENTS

**MEND**

A Decade of Technology Improvement to the Challenge of Acid Drainage - A Canadian Perspective  
*D.G. Feasby, G.A. Tremblay, C.J. Weatherell*  .................................................. 1

**MAJOR SPONSORS SHOWCASE SESSION**

**BC - Ministry of Employment and Investment**

Guidelines for the Prediction of Acid Rock Drainage and Metal Leaching for Mines in British Columbia: Part I. General Procedures and Information Requirements  
*William A. Price, John Errington, Victor Koyanagi*  .................................................. 1

Guidelines for the Prediction of Acid Rock Drainage and Metal Leaching for Mines in British Columbia: Part II. Recommended Procedures for Static and Kinetic Testing  
*William A. Price, Kevin Morin, Nora Hutt*  .................................................. 15

Waste Rock Weathering, Sampling and Analysis: Observations from the British Columbia Ministry of Employment and Investment Database  
*William A. Price, Y.T. John Kwong*  .................................................. 31

**Cominco Ltd.**

Application of ARD Abatement Technology in Reclamation of Tailing Ponds at Cominco Ltd., Sullivan Mine  
*Robert T. Gardiner, Bruce B. Dawson, Gray G. Gibson*  .................................................. 47

Mark Creek Improvement Project - Control of ARD in the Lower Mine Yard, Kimberley, British Columbia  
*David G. Thomson, J.K. (Ken) Manly, Roger F. Kitchin, Norman E. Eenkooren, Michael P. Davies, Gray G. Gibson, Bruce B. Dawson*  .................................................. 65

Waste Rock Management Planning for the Kudz Ze Kayah Project, Yukon Territory: 1. Predictive Static and Kinetic Test Work  
*Stephen Day, George Hope, Walter Kuit*  .................................................. 81

Waste Rock Management Planning for the Kudz Ze Kayah Project, Yukon Territory: 2. Waste Management Strategy  
*George Hope, Walter Kuit, Stephen Day*  .................................................. 99
Noranda Technology Centre

Considerations in the Use of Shallow Water Covers for Decommissioning Reactive Tailings
*Michael G. Li, Bernard Aubé, Luc St-Arnaud* ................................................................. 115

Field Studies of Biologically Supported Water Covers at Two Noranda Tailings Ponds
*P. St-Germain, H. Larratt, R. Prairie* .................................................................................. 131

Neutralization Potential versus Observed Mineral Dissolution in Humidity Cell Tests for Louvicourt Tailings
*Michael G. Li* ...................................................................................................................... 149

The Geco Process: A New High Density Sludge Treatment for Acid Mine Drainage
*Bernard Aubé, Serge Payant* .................................................................................................. 165

Placer Dome Inc.

Equity Silver Mine - Integrated Case Study
*M.L. Aziz, K.D. Ferguson* ....................................................................................................... 181

The Cover Research Program at Equity Silver Mine Ltd.
*G.W. Wilson, L. Newman, S.L. Barbour, M. O’Kane, D.A. Swanson* ................................. 197

Shallow Water Cover Design Methodology and Field Verification
*R.J. Atkins, D. Hay, J. Robertson* .......................................................................................... 211

Voisey’s Bay Nickel Company Ltd.

Planning for an Environmental Assessment: Voisey’s Bay Mine and Mill
*David Lemon, William A. Napier, William C. Ferguson, Mike Filion* ................................. 229

A Predictive Quantitative Geochemical Assessment of the Subaqueous Stability of Acid-Generating Mine Tailings
*Robert K. Mugo, Darcy McDonald, Derek Riehm, William A. Napier* ................................. 237

Approach Used to Model Pit Filling and Pit Lake Chemistry on Mine Closure - Voisey’s Bay, Labrador
*G.G. Bursey, J.J. Mahoney, J.E. Gale, S.E. Dignard, W. Napier, D. Riehm, B. Downing* ........ 255

Site Selection Considerations for the Disposal of Potentially Acid Generating Tailings and Mine Rock Voisey’s Bay Project - A Case Study
*A. Cole, D. Welch, W. Kross, W. Napier* .................................................................................. 277
PREDICTION

Applications of Geological Block Models to Environmental Management
Meridan W. Bennett, J. Houston Kempton ......................................................... 291

Acid Mine Drainage: Comparison of Laboratory Testing to Mine Site Conditions
K.J. Bethune, D.A. Lockington, D.J. Williams .................................................. 305

Pyrite Oxidation Measured by Oxygen Consumption and Carbon Dioxide Production in Laboratory Respirometer Tests
Gudmann Eidsa, Tormod Briseid, Harald Ese .................................................. 319

Quantifying the Spatial Dependence of the Sulfide Oxidation Rate in a Waste Rock Dump at Mt Lyell, Tasmania
A.M. Garvie, J.W. Bennett, A.I.M. Ritchie ...................................................... 333

Acid Rock Drainage from the Samatosum Waste Dump, British Columbia, Canada
M. Ghomshei, A. Holmes, E. Denholm, R. Lawrence, T. Carriou .......................... 351

Vertical Transport in Brenda Mines Pit Lake
P.F. Hamblin, C.L. Stevens, G.A. Lawrence .................................................... 367

ARD Assessment Program from Exploration to Operation: Case Studies from the Eskay Creek Mine
T.W. Higgs, F.M. Murphy, C.J. Stewart ............................................................ 385

The Role of Enhanced Particle Surface Area, Crystal Structure and Trace Metal Content on Pyrrhotite Oxidation Rates in Tailings
Michael P. Janzen, Ronald V. Nicholson, Jeno M. Scharer .................................. 399

Estimating Reservoir Nickel Loading from Subaqueous Tailings Using a Mass Balance Approach
T.A. Kessler, R. Weimer, B. Scarffe ................................................................. 417

Mineralogical Changes During NP Determinations and their Implications
Y.T. John Kwong, Keith D. Ferguson .............................................................. 435

Determination of Neutralization Potential in the Prediction of Acid Rock Drainage
R.W. Lawrence, Y. Wang ..................................................................................... 449

Hydrogeochemistry of Secondary Mineral Dissolution: Column Leaching Experiment Using Oxidized Waste Rock
Michael G. Li, Luc St-Arnaud ........................................................................... 465

A Three-dimensional, Three-phase Geochemical Kinetic Model for Acid Rock Drainage
Cheng-Kuo Lin, Edward M. Trujillo, William W. White III ................................. 479

Modeling Water Flow in Waste Rock Piles Using Kinematic Wave Theory
D.L. López, L. Smith, R. Beckie ............................................................................ 497
