JOINT CIB WORKSHOPS
ON
COMPUTERS AND INFORMATION IN CONSTRUCTION

W57
Working Commission on Building Documentation and Information Transfer

W74
Working Commission on Information Coordination in the Building Process

W78
Working Commission on Computer Integrated Construction

TG10
Task Group on Computer Representations of Design Standards and Building Codes

EDITORS
Dana J Vanier
J Russell Thomas
National Research Council
Institute for Research in Construction

MAY 1992
MONTREAL, CANADA
Table of Contents

The papers in the *Joint CIB Workshops on Computers and Information in Construction* are listed according to the working commission number and within this grouping they are listed alphabetically on the first author. W78 / TG10 is the first workshop presented as it forms the majority of the technical papers. These are followed by the technical papers from W57 and the formal presentations at W74. An alphabetical author list and list of participants are included at the end of the proceedings.

W78 / TG10 Workshop

Robert Amor, John Hosking, Rick Mugridge, John Hamer, Mike Williams, Department of Computer Science, University of Auckland
ThermalDesigner: an Application of an Object-Oriented Code Conformance Architecture

Ali Arlani, Building Branch, Ontario Ministry of Housing
Application of Information Technology in the Building Regulatory Environment

Claude Bédard, Centre for Building Studies (CBS), Concordia University
The Validation of Integrated CAD in Building Engineering Design

John R Bedell, Niklaus Kohler, EPFL & LESO-PB
A Hierarchical Model for the Life Cycle Costs of Buildings

I Bellot, C Barrobés, A Isamat, M P Belinchón, A Martinez, ITEC
Integration of Knowledge and Data: Results of the BECOC Prototype

Bo-Christo Björk, Technical Research Centre of Finland
The Topology of Spaces, Space Boundaries and Enclosing Structures in Building
Product Data Models

Jane Blackmore, Frank Leong, Ron Sharpe, Paul Williams, CSIRO DBCE
CSIRO - Building the Future Down Under

Peter Brandon, Ian Watson, Department of Surveying, University of Salford
An Expert System for Strategic Maintenance Planning

Andrew Casson, David Stone, University of Edinburgh & The Scottish Office
An Expertext System for Building Standards

Per Christiansson, Lund University
Dynamic Knowledge Nets in a Changing Building Process

Felip Costa, ITEC
The S:ITEC Model. An Integrated System of Treatment of Data and Knowledge in Construction

William F Danner, Yuhwei Yang, Kent A Reed, NIST
STEP Integration and Interpretation Methods

Marcel de Waard, Delft University of Technology
Computer Aided Conformance Checking
Martin Fischer, Thomas Froese, Stanford University
Integration through Standard Project Models ............................................. 189

Avi Friedman, Liza Medek, McGill University
Evaluation of Existing CAD Programs used by Clients in Housing Design and Marketing ................................................................. 206

M John Frye, D M Olynick, R B Pinkney, University of Manitoba

Edward Gibson, Lansford C Bell, The University of Texas at Austin & Clemson University
The Status of Construction EDI in North America .................................. 227

Krishnan Gowri, SIRICON
Building Codes and Performance Standards as Knowledge-Bases for Design ................................................................. 235

M Maher Hakim, James H Garrett, Jr., Carnegie Mellon University
Issues in Modeling and Processing Design Standards .................................. 242

Matti Hannus, Technical Research Centre of Finland
Information Models for Performance Driven Computer Integrated Construction ................................................................. 258

Kalle Kähkönen, Bo-Christer Björk, Poivi Arola, Sven Hult, Technical Research Centre of Finland
Building Regulations as a Part of a Digitalised Building Information Service ................................................................. 271

Jan Karlshøj, Lars Damkilde, Technical University of Denmark
CONIM - a prototype for Integration between Design and Technical Analysis in AEC ................................................................. 277

Jarmo Laitinen, HAKA R&D
The use of CIC in Construction Business ................................................................. 287

Kincho H Law, Nobuyoshi Yabuki, Stanford University
An Integrated System for Design Standards Processing .............................. 293

Hans Lindgren, Chalmers University of Technology
A Framework for Computer-Aided Reuse of Architectural Design Solutions ................................................................. 308

Bart Luiten, Frits Tolman, Delft University of Technology
Computer Aided DfC (Design for Construction) in the Building and Construction Industries ................................................................. 318

Krishan Mathur, Martin Betts, National University of Singapore
Strategic Information Technology Planning for Computer Integrated Construction ................................................................. 330

Bernard Moulin, Université Laval
Automated Generation of Rules from the National Building Code Text ................................................................. 343

Ivan Petrovic, Igor Svetel, The IMS Institute
Architectural Computer-Aided Design Systems: An Example .......................... 359
Jens Pohl, Leonard Myers, Arthur Chapman, California Polytechnique
The ICADS Model in Retrospect........................................................................369

Richard Quadrel, Michael R Brambley, Rex Stratton, Pacific Northwest Laboratory
An Automated Tool for Evaluating Compliance and Providing Assistance with Building Energy Standards during Design.......................................................381

Victor Sanvido, The Pennsylvania State University
Penn State Computer Integrated Construction Research Program..........................394

Janet Spoonamore, Richard Schneider, Prameela Reddy, US Army Corps of Engineers
Computer Aided Long Range Planning of Real Property Investments....................401

J Russell Thomas, Jamie Worling, National Research Council Canada

Pat Toms, Glasgow, Scotland, UK
Categorisation of Design Information in terms of Design Process and Product Specifications for a Standard for Computer Representation of Specifications.............420

RDBM vs OODBM in Support of Integrated Data Bases for Computer Aided Building Design............................................................................................447

Ziga Turk, Department of Civil Engineering, University of Ljubljana
Object Oriented Modelling Techniques and Integrated CAD......................................471

Dana J Vanier, National Research Council Canada
Details of a Classification System to extract Project-Specific Building Codes.............483

Harry Wagter, Geert Smeltzer, Walter Roelen, Technical University Eindhoven
A Realistic View to Virtual Reality: New Possibilities in Construction.....................495

Rob Woodbury, Department of Architecture, Carnegie Mellon University
What's in a Part?..................................................................................................502

Les Woolsey, Innovative Technology Incorporated
An Integrated Approach to Codes, Standards and Products........................................510

W57 Workshop

Jean-Jacques Chailloux and Colin H. Davidson, Université de Montréal
Cognitive Maps, Visual Cues and Convivial Indexing..............................................522

Colin H Davidson, Université de Montréal & Cibât
Cibât - the Montreal International Building Center..................................................530

R Gifford, Centre technique du bois et de l'ameublement
EURODOC - The Information Centre of the Centre Technique du Bois et de l'Ameublement.................................................................542
John H Hunt, John D Sutherland, Building Industry Authority
The New Zealand Building Code: An Industry Driven Initiative ........................................... 547

Cveta Kovacic, Central Technical Library, University of Ljubljana
Cooperation between Building Science and Building Industry in Slovenia ............................. 549

T McGivern, The Building Centre
Europe Centre - A Major New Initiative to Spearhead the Interests of all in the
Building and Civil Engineering Industries .............................................................................. 554

Dana J Vanier, National Research Council Canada
Canadian Thesaurus of Construction Science and Technology: A Hypercard Stack ............... 559

Mira Vovk Avsic, Central Technical Library, University of Ljubljana
Information Transfer between Computer Systems in the Construction Industry in
Slovenia ....................................................................................................................................... 565

Jamie L Worling, B Scott Mellon, Dana J Vanier, National Research Council Canada
Electronic Technical Information: An Access and Distribution System ............................ 572

W74 Meeting

Ingvar Karlén, Sweden
A First Sketch: Recommendations for Building Information ................................................. 583

Henry Karlsson, The Swedish Building Centre
W74 Minutes of Meeting ........................................................................................................ 587

Next Meeting of W78 and W74 in Singapore

Invitation by National University of Singapore, K Mathur, M Betts
The Management of Information Technology for Competitive Advantage in Construction
First International Conference .................................................................................................. 595

List of Participants .................................................................................................................. 599

Authors List ............................................................................................................................ 609
