The Third International Symposium on Refractories

November 3-6, 1998
Beijing, China

Symposium Chairman
Zhong Xiangchong

Edited by
Wang Jinxiang        Li Maoqiang
Dai Longda           Xu Yanqing

Organized by
THE CHINESE SOCIETY FOR METALS
THE CHINESE CERAMIC SOCIETY
# Table of Contents

## Opening Lecture

50 Years Evolution of China’s Refractories Industry ........................................... (1)
Zhong Xiangchong, China

## Plenary Lecture

Progress in Testing Methods for Refractories during the Last Half-Century ...................... (6)
Kiyoshi Sugita, Japan

Alumina-enriched Spinel-carbon Brick for Continuous Casting Ladle ................................ (15)
Yuan Gongquan, Yang Lin, Liu Xingping and Yu Jie, China

Developments in Installation Technology of Monolithic Refractories ................................ (18)
Alan Hey, Iain J. Hoyland, David M. Pickard and David B. Tomlinson, England

Preparation of Ultrafine Powders ................................................................. (25)
Li Maoqiang, China

Relationship of Thermal Conductivity and Strength to the Pore Diameter in Thermal Insulating Refractory Materials ................................................................. (29)
Schulle, Wolfgang, Germany

The Present Situation and Development of Carbon-containing Castables .............................. (33)
Zhu Boquan, China

EAF Slag vs. Refractory Consumption ........................................................................ (37)
Paul E. Scheerer, U. S. A.

## Refractories for Metallurgical Industry

Development of Graphite Containing Alumina Castable and Its Application to BF Trough .......... (47)
Keiichiro Isomura, Masato Kumagai, Masato Takagi, Shigeaki Goto, Makoto Nomura, Katsufumi Jono, Yasunobu Toritani and Seijiro Tanaka, Japan

Development of Self-flow Al₂O₃-SiC-C Castable and Its Application to Troughs of Large Blast Furnaces ................................................................. (53)
Li Wenzhong, Cheng Benjun, Huang Zhaohui, Lu Baosen and Chen Ruifeng, China

Research of Self-flow Castable Used for Iron Runner of BF ........................................... (58)
He Zhiyong, Zhu Dezhi and Li Lin, China

Development and Application of Quick-Solidification Castable for Blast Furnace Trough ........ (62)
Wang Xitang and Cai Jingmin, China
Development of Customised Zoned Lining for 110T BOF in Durgapur Steel Plant (SAIL) ............................................. (65)
S.K. Garai, N.K. Ghosh, S.R. Bharadwaj, D.P. Dutta and D.P. Chakraborti, India
Progress in Steel Ladle Refractories Techniques ................................................................................................................. (71)
M. Kamo, M. Nambu, M. Yoshida and R. Asahoe, Japan
Development and Application of Corundum-spinel Castables for Large Size Ladles of Con-Casting ........................................ (76)
Wang Xizhang, Cui Jian, Zhang Wenjie, Wang Houzhi, Gu Huazhi, Zhao Huizhong, Ma Jinguang, Liao Shoukuan, He Baizheng and Zhang Qiye, China
Development and Application of Alumina-magnesia Castable for Medium and Small-sized Ladles ............................................. (81)
Liu Fengping, Liu Xiuyun and Jiang Shan, China
Factors Affecting Performance of T-Type Tundish Castable Refractory in China Steel .......................................................... (86)
Yu-Chen Lee, Taiwan, China
Study on MgO-CaO Coating Material Used for Tundish ............................................................................................................ (91)
Zhu Dezhui, He Zhilyong and Zhang Xiaoqun, China
Development and Application of Magnesia Based Dam Block ................................................................................................. (95)
Rong Wei and Yin Jianshu, China
Chemical Relationship between Components of Mold Powder and Partially Stabilized Zirconia on the Corrosion of Submerged Entry Nozzle .................................................................................................................. (99)
Hak Dong Lee and Sik Sunwoo, Korea
Anti-Alumina Build-up Properties of O'-Sialon-ZrO$_2$-C Composite ....................................................................................... (106)
Ke Changming, Li Nan, Li Yongquan and Sun Chengxu, China
Improvement of Strand Qualities by Newly Developed Submerged Entry Nozzles and Mold Powders ........................................... (111)
Yoichiro Kawabe, Tetsuro Tsuru, Akihiro Morita and Osamu Nomura, Japan
The Development of Slide Gate for Ladles in Recent 10 Years in China .................................................................................. (119)
Shi Kai and Sun Jianlin, China
Manufacture of CaO Rich Fused Magnesia-Graphite Bricks and Their Application to Slagline of 150t LF-VD Refining Ladle .......................................................... (124)
Wang Qingxian and Yu Ping, China
Complete Solutions for the Lining of Secondary Metallurgical Ladles ....................................................................................... (128)
K. Dösinger and G. Kunz, Austria
Study on Mechanism of Reaction between AOD Slag and Reboned Magnesite-Chrome Brick ........................................... (140)
Yu Yanwen, Zhao Yuxi and Gong Bo, China
Corundum-spinel Castable for CAS-OB DIP Pipe ................................................. (144)
Liu Xingping, He Huiping and Sun Xianfeng, China

Improvement of Microstructure of Magnesia-chrome Bricks for the Secondary Steelmaking Furnaces ................................................................. (147)
Masanori Ogata, Osamu Nomura, Ryosuke Nakamura and Minoru Suto, Japan

Development of Refractory Gunning Mixes and Their Applications in Iron and Steel Industry ............................................................... (153)
Wang Shouye, Wang Zhanmin, Zhu Cunliang, He Xia and Li Zaigeng, China

Research and Application of Precast Arched Furnace Top with Low-stress for Preheating Furnace ............................................................... (159)
Xue Naiyan, Mei Minghua, Wang Xudong and Chu Xiaoyan, China

Current Situation and Development for Application of Refractories in AISC ................................................................. (164)
Yuan Zhenghe, China

Trends and Development of Refractories for Baotou Iron and Steel Company ................................................................. (169)
Xing Siming, Ding Tiemin and Du Ping, China

Development and Application of “Dry Insulation Barrier” for Aluminium Reduction Cells ................................................................. (174)
Zhang Hong and Gan Yiren, China

Refractories for Cement, Glass, Porcelain and Other Industries

Research on New Type of Special High Alumina Brick Used in Cement Industry ................................................................. (179)
Wang Jiezeng, Xia Xiayun, Liu Xijun, Chen Zhufu and Wang Xiaogang, China

Chrome-free Bricks for High Temperature Zone of Cement Kilns ................................................................. (182)
Qin Feitao, Ren Dehe, Zhang Yongbin, Cheng Zhaokan and Chen Feng, China

Development of Multifunctional Light Weight Castable ................................................................. (186)
Yuan Lin, Chen Shengling, Zhao Hongliang and Zeng Luju, China

Investigation on High Property Refractory Castable ................................................................. (189)
Yuan Lin, Zhao Hongliang, Chen Shengling and Zeng Luju, China

High Performance Fused Cast AZS Adapted for Sidewall Blocks ................................................................. (194)
Mao Limin and Zhang Xiaobo, China

Castables for Kiln Furniture ................................................................. (197)
Aase M. Hundere, Bjørn Myhre, Bjørn Sandberg and Cecilie Ødegård, Norway

Development of Mullite-corundum Pushed Slab Brick ................................................................. (202)
Zheng Zhu and Cheng Quolin, China

Investigation on Dry Synthesis Technique of Cordierite and Its Application to Cordierite-mullite Deck ................................................................. (206)
Zhang Xiaofeng, Si Quanjing and He Shengping, China
Development of Mullite Bonded SiC Material ........................................... (210)
Si Quanjing, Zhang Xiaofeng and Zhang Jianfang, China

The Development of Bubble Zirconia Castables ........................................ (214)
Qi Xiaoqing, Wang Yufan and Ruan Bo, China

Raw Materials for Refractories

The Influence of Compositional Variables on the Performance of Alumina Based Castables ........ (217)
Xinyu Liu, China; Juergen O. Laurich, Germany

Manufacture and Application of Fused Zirconia ....................................... (227)
Wang Cun, Xue Fei and Li Chunyan, China

Recovery of MgO from Dolomite by Novel Dissolution Method Using Ion Exchange Resin .......... (230)
Tadashi Nishino, Japan

Carbothermal Reduction-Nitridation Method for Preparation of O'Sialon-SiC-ZrO2 Composites .......... (235)
Zhang Haijun, Li Wenchao and Zhong Xiangchong, China

Applications of Vermiculite and Vermiculite-based Materials in Metallurgy ....................... (238)
Akhtiamov Rachid Yakubovitch, Russia

Recent Development of Alumina Cement in China ....................................... (240)

Calcium Aluminate Cements for Refractory Gunning Applications ............................. (245)
Christopher Parr, Catherine Revais and Thomas Bier, France

Analysis and Improvement Measures of Chinese High Alumina Cement Quality .................... (252)
Xie Guogang and Zhang Songmao, China

Effects of Incorporating Fine Aluminas on the Properties of Low Cement Castables ............... (257)
Tathagata Basu and N. Kapuri, India

Equipment and Testing Method

Innovation in the Production of Shaped and Unshaped Refractories ........................... (260)
Andreas Batton and Jan Viesel, Germany

Three Phase Magnetic Separator with Cylindrical Type .................................... (266)
Gu Jidong, Cui Xinyi, Yan Zhian, Lei Jishou and Gu Yankang, China

A Testing Method on Tin Bath Bottom Brick ............................................. (269)
Katsumi Yoneyama, Noboru Fujiwara and Tateo Sindo, Japan

Study on Measuring the Thermal Strain of the Precasting Castable Refractory .................. (274)
Wang Xudong, Xue Naiyan, Mei Minghua and Chu Xiaoyan, China

**Fundamental and Technological Studies**
