<tbody>
<tr>
<td>The interaction between soil and groups of small diameter bored piles</td>
<td>3</td>
</tr>
<tr>
<td>H.Brandl</td>
<td></td>
</tr>
<tr>
<td>Bored piles in residual soil and weathered rocks in Singapore</td>
<td>17</td>
</tr>
<tr>
<td>Bengt B.Broms, M.F.Chang &amp; A.T.C.Goh</td>
<td></td>
</tr>
<tr>
<td>L’expérience des LPC en matière de pieux vissés moulés et tarières creuses</td>
<td>35</td>
</tr>
<tr>
<td>M.G.Bustamante &amp; L.Gianeselli</td>
<td></td>
</tr>
<tr>
<td>Different behaviour of bored and driven piles</td>
<td>47</td>
</tr>
<tr>
<td>E.De Beer</td>
<td></td>
</tr>
<tr>
<td>Group action between vertical piles under horizontal loads</td>
<td>83</td>
</tr>
<tr>
<td>E.Franke</td>
<td></td>
</tr>
<tr>
<td>Large cast-in-place piles in Japan</td>
<td>95</td>
</tr>
<tr>
<td>Masami Fukuoka</td>
<td></td>
</tr>
<tr>
<td>Relevance of in-situ test results for evaluation of allowable base resistance of bored piles in sands</td>
<td>107</td>
</tr>
<tr>
<td>M.Jamiolkowski &amp; R.Lancellotta</td>
<td></td>
</tr>
<tr>
<td>Short- and long-term behaviour of axially loaded bored piles in permafrost</td>
<td>121</td>
</tr>
<tr>
<td>B.Ladanyi</td>
<td></td>
</tr>
<tr>
<td>Some problems in predicting behaviour of bored pile foundations</td>
<td>133</td>
</tr>
<tr>
<td>G.G.Meyerhof</td>
<td></td>
</tr>
<tr>
<td>Field load tests of drilled shafts</td>
<td>145</td>
</tr>
<tr>
<td>L.C.Reese &amp; M.W.O’Neill</td>
<td></td>
</tr>
<tr>
<td>Considerations on the auger pile design</td>
<td>193</td>
</tr>
<tr>
<td>W.F.Van Impe</td>
<td></td>
</tr>
<tr>
<td>Cast-in-situ piles – Installation methods, soil disturbance and resulting pile behaviour</td>
<td>219</td>
</tr>
<tr>
<td>A.F.Van Weele</td>
<td></td>

</tbody>
</table>
1. **Settlement behaviour of bored and auger piles**

   Prediction of the load-settlement characteristics of bored piles  
   *I.Luker*  
   229

   Analysis of non-linear behaviour of reinforced concrete diaphragm walls under horizontal load  
   *A.Mazzucato & A.Natali*  
   239

   Load transfer along bored piles in stiff clays  
   *J.M.Rogel, C.S.Oteo & A.Soriano*  
   245

   Settlement of the base of large diameter bored piles in preconsolidated clay  
   *Arinos Xavier Tavares*  
   253

2. **Case studies / New developments**

   Experiences with pile foundations in lake-clay  
   *P.Amann, R.Bahn & H.Wollenhaupt*  
   261

   Methods to improve the quality of auger piles  
   *K.F.Brons & A.F.Kool*  
   269

   Some experiences with bored and auger piles in Naples area  
   *V.Caputo & C.Viggiani*  
   273

   Deepening of heavily loaded building foundations  
   *Chester Carville*  
   283

   A new method of static pile load test system VUIS-P  
   *B.Černák, J.Hlaváček & K.Klein*  
   291

   Performance of bored piles in residual soils and weathered rocks  
   *M.F.Chang & A.T.C.Goh*  
   303

   Bored piling in Bombay region  
   *K.R.Datye & D.V.Karandikar*  
   315

   Starsol Enbesol procedure  
   *G.Y.Fenoux & G.de Buysere*  
   325

   Displacement auger piles with compacted base  
   *K.Rainer Massarsch, Werner Brieke & Eric Tancré*  
   333

   Procedures most frequently used in Mexico for construction of piles in the presence of the phreatic level  
   *José Antonio Ponce Serrano*  
   343

   Barrettes de forte capacité en zone d’anciennes carrières souterraines  
   *B.Simon, F.Schlosser & J.Morey*  
   349

   Foundations on drilled and grouted mini piles – A case history  
   *Nassef Soliman & George Munfakh*  
   363

   A new pile foundation composed of soil cement and steel pipe  
   *Takashi Okamoto, Kimitoshi Takano, Hiroaki Nagaoka, Tetsuzo Hirose & Syohe Chida*  
   371
Tubex-grout-injected piles for the Parenco paper mill in Renkum (Netherlands) 377
A.J.Verstraeten, S.Doornbos & E.Dupont

3. Soil testing related to bored and auger piles

Effective stresses on the shafts of bored and cast-in-situ piles in clays 387
W.F.Anderson

Axial cyclic loaded piles
H.-W.Koreck & P.Schwarz

A direct assessment of pile-soil interaction coefficients in buried piles 401
Kanakapura S.Subba Rao & K.H.Venkatesh

4. Bearing capacity of bored and auger piles

The shaft friction of bored piles in terms of effective strength 411
J.B.Burland & D.Twine

Skin bearing capacity of piles
Emöke Imre

Loading tests of bored piles inserted nodular and cylindrical piles 429
S.Kanai & S.Yabuuchi

Development of skin friction and base resistance of instrumented large bored piles under working load conditions 435
J.Kruizinga

The load bearing capacity of bored piles, a problem not yet satisfactorily solved – Some proposals 443
F.Lizzi

The ultimate bored pile load capacity in granular soils: A case history against the current effective stress design theory in comparison to a penetration based design method 451
C.Mordhorst

Analysis of bored piles in seismically active zones 457
H.B.Poorooshab, L.V.Medeiros & E.A.Vargas, Jr.

Bearing capacity of bored short piles
O.Pula & Cz. Rybak

Comparison of predicted and measured bearing capacity of auger piles 471
V.Rizkallah

Vertical load bearing capacity from the soil strength parameters 477
J.Šimek, J.Očenášek & O.Sedlecký

Measurement of horizontal thrust on piles of a bridge abutment 481
B.R.Thamm & A.Wolf

End and shaft bearing capacity of piles evaluated separately out of static pile loading test results 489
W.F.Van Impe, K.Thooft & M.Van den Broeck
Experimental research on end bearing capacity of bored and drilled piles
Yi-Ming Gong, You-Nian Zhang, Chun Liu & Guo-Dong Ma

Examination of some common rules for bored piles against hydraulic gradient models results
A.Zelikson

5. The use of in-situ testing related to bearing capacity

The effect of vertical unloading on cone resistance $q_c$, a theoretical analysis and a practical confirmation
N.W.A.Broug

Vertical loading tests of large bored piles and their estimation
Masahiro Koike, Tamotsu Matsui & Kenji Matsui

On the prediction of the bearing capacity of bored piles from dynamic penetration tests
Francisco R.Lopes & Hugo Laprovitera

Prediction of behaviour of bored piles by pressuremeter tests
B.J.Mehta

Pile tests on bored piles in Greece
K.Pitilakis, St.Tsotsos & T.Hatzigogos

Comparative analysis of bearing capacity of large diameter bored pile
A.Tejchman & K.Gwizdala

Corrélation entre les mesures et les prévisions de la capacité portante et du tassement de pieux forés chargés axialement par application des méthodes pressiométriques
A.Van Wambeke & J.d'Hemricourt

6. Pile testing

Load and integrity testing of the deep bored piles under the Jeddah port tower
A.Candoğan

Integrity tests on various types of piles
J.De Jaeger, M.Van den Broeck, A.Holeyman & Ch.Legrand

Integrity control of bored piles using SID
J.C.Holden

Particular aspects of integrity control of screw piles
J.Vyncke
