1999-01-1741 An Efficient Procedure for Visualizing the Sound Field Radiated by Vehicles During Standardized Passby Tests .................681
H. Kook, G.B. Moebts, P. Davies and J.S. Bolton
School of Mechanical Engineering, Purdue Univ.

1999-01-1742 The Design and Evaluation of Microphone Arrays for the Visualization of Noise Sources on Moving Vehicles ..................693
H. Kook, P. Davies and J.S. Bolton
Ray W. Herrick Laboratories, Purdue Univ.

1999-01-1743 Motorsports Sound Abatement in the USA..........................701
Charles A. Kulmann
Sports Car Club of America

Volume 2

1999-01-1744 NVH Optimization of the 1.2L DIATA Engine .........................707
Enio Gomes and Mary Breida
Ford Motor Co.
Philipp Kley
FEV Motorentechnik
Mark Ratliff
FEV Engine Technology

1999-01-1745 Key Steps Methods in the Design and Development of Low Noise Engines ........................................713
C. V. Beidl, A. Rust and M. Rasser
AVL LIST GmbH

1999-01-1746 Concept Level Powertrain Radiated Noise Analysis ..................723
Joseph L. Stout
Ford Motor Co.

1999-01-1747 The Influence of Diesel Engine Architecture on Noise Levels ..........729
Helin (Alan) Zhao and Thomas E. Reinhart
Cummins Engine Co.

1999-01-1748 Experiment and Computation Analyses for Torsional Vibration of Crankshaft System with Viscous Torsional Damper on Diesel Engine ..................................737
Takahiro Yamauchi, Yukimi Yamazaki and Jouji Kimura
Isuzu Motors Ltd.

1999-01-1749 Modeling Fully-Coupled Rigid Engine Dynamics and Vibrations ......745
Deanna M. W. Hoffman and David R. Dowling
Dept. of Mechanical Engineering and Applied Mechanics, University of Michigan
1999-01-1750 Analytical Investigation of Crankshaft Dynamics as a Virtual Engine Module .......................................................... 757
   Jonathan Raub and Jeffrey D. Jones
   Cummins Engine Co., Inc.
   Philipp Kley
   FEV Motorentechnik
   Martin Rebbert
   RWTH, Aachen

1999-01-1751 Conditioned NExT Analysis, A Technique for Estimation of Modal Damping Ratios of Operating Piston Engines ...................... 763
   Kiran Govindswamy and Michael F. Albright
   Roush Anatrol

1999-01-1752 Simulation of Flexible Rotating Crankshaft with Flexible Engine Block and Hydrodynamic Bearings for a V6 Engine ..................... 777
   H.Y. Isaac Du
   Synthesis and Analysis Dept., GM Powertrain

1999-01-1753 Suspension Force Optimization Using Quarter-Car Model with Elastomeric Elements ...................................................... 785
   James L. Swayze and Benjamin I. Bachrach
   Ford Motor Co.
   S. Ravi Shankar
   Mechanical Dynamics Inc.

1999-01-1754 Engine Induced Vibration Control for a Motorcycle Chassis Frame by Right Combination of Finite Element Method and Experimental Techniques ..................................................... 797
   D. J. Kalsule, R. R. Askedkar and P. R. Sajanpawar
   The Automotive Research Association of India

1999-01-1755 Incorporation of Boundary Conditions into Finite Element Analysis and the Physical Verification ............................................ 805
   Dennis Shimmell and Paul Hollenbeck
   Nelson Metal Products

1999-01-1757 Empirical Noise Model for Power Train Noise in a Passenger Vehicle ................................................................. 809
   Ralf Bocksch and Gerhard Schneider
   DaimlerChrysler
   James A. Moore
   Noise and Vibration Consultant
   Istvan Ver
   BBN Technologies

1999-01-1758 Alternate Fueled Powertrain – An Insight into its Combustion Related NVH Issues ....................................................... 821
   T. N. Patro and D. A. LaRue
   Raytheon Systems Co.

1999-01-1792 Reduction of Surface Vibrations of a Cup-Shaped Rotor in a Brushless DC Motor Using FEA ................................................... 1087
Devendra Kumar, Mohamad Qatu and Mike L. Dougherty, Sr.
Fluid System Products, DANA Corp.

1999-01-1793 Coupling of Finite Element and Energy Finite Element Solutions for Calculating the Vibration of Co-linear Beams in the Mid-Frequency Range ..................................................... 1091
Xi Zhao and Nickolas Vlahopoulos
Dept. of Naval Architecture and Marine Engineering,
The University Of Michigan

1999-01-1794 FEM/BEM Vibroacoustic Evaluations / Validations on Plain and Ribbed Motorcycle Transmission Top Covers ....................... 1103
Paul N. Liang
Harley-Davidson Motor Co.

1999-01-1795 Integration of Finite Element and Boundary Element Methods for Simulating the Noise Radiated from a Flexible Panel Subjected to Boundary Layer Excitation ........................................... 1109
Michael J. Allen and Nickolas Vlahopoulos
Dept. of Naval Architecture and Marine Engineering,
The University of Michigan

1999-01-1796 Computer Synthesis of Light Truck Ride Using a PC Based Simulation Program ............................................................... 1117
University of Michigan Transportation Research Institute
L. A. Stevenson, T. A. Johnson and A. M. Brown
General Motors Corp. Truck Group
1999-01-1797 Validation of Automotive Component FE Models by Means of Test-Analysis Correlation and Model Updating Techniques ..........1129
Marc Brughmans, Jan Leuridan and Tom Van Langenhove
LMS International
Faruk Turgay
ROVER Group Ltd – Vehicle Refinement

Shung H. Sung and Donald J. Nefske
General Motors Corp.
Hung Le-The and Frank Bonarens
Adam Opel AG

1999-01-1799 Application of Soap Film Geometry for Low Noise Floor Panels ......1141
Tomohisa Kato, Kunihiro Hoshi and Eiji Umemura
Toyota Motor Corp.

1999-01-1800 Application of Computer Simulation using FEM and Experimental Techniques for the Reduction of Noise in Air Cooled Engine and Crankcase Cover of Motorcycle........................................1149
A. R. Askhedkar, R. R. Askhedkar and P. R. Sajanpawar
The Automotive Research Association of India

1999-01-1801 Energy Finite Element Analysis Methods for Mid-Frequency NVH Applications ..........................................................1159
Yuksel Gur, David A. Wagner and Kenneth N. Morman
Ford Motor Co.

1999-01-1802 The Importance of Sealing Pass-Through Locations Via the Front of Dash Barrier Assembly ..........................................1169
John J. Blewett
General Motors Corp.
Richard L. Brouckaert
Sound Alliance, LLC

Stephen M. Long and H. Carl Walther
DuPont KrytoxTM Group
Andrew W. Lewis and Robert B. Lewis, Jr.
Lewis Research, Inc.

1999-01-1804 Sound Transmission Analysis of Vehicle Door Sealing System ......1187
Yuksel Gur and Kenneth N. Morman
Ford Motor Co.

1999-01-1805 Idle Comfort of Passenger Cars ........................................1197
Norbert Alt, Klaus Wolff, Peter van den Eijkel
FEV Motorentechnik GmbH
1999-01-1806 Interior Noise Analysis Based on Acoustic Excitation Tests at Low-Frequency Range ................................................................. 1203
Shinichi Maruyama, Akihiko Hasegawa and Yoshihiko Hyoudou
Nissan Motor Co. Ltd.

1999-01-1807 Computation of Sound Propagation in an Automotive Air Handling System ................................................................. 1211
Morris Y. Hsi
Visteon Automotive Systems

1999-01-1808 The Design of Vehicle Interior Noise Using Binaural Transfer Path Analysis ................................................................. 1217
K. Genuit and J. Poggenburg
HEAD acoustics GmbH

1999-01-1809 A Sound Simulation Technique Used for the Prediction of Passenger Compartment Noise ................................................................. 1223
Brian K. Wilson
MTS Systems Corp.
Mark L. Clapper
Ford Motor Co.

1999-01-1810 Wind Noise Spectral Predictions Using a Lattice-Based Method ................................................................. 1231
Laurine Leep-Apolloni, Gary S. Strumolo and William Gulker
Ford Motor Co.

William B. Coney
BBN Technologies, an Operating Unit of GTE
Jen Y. Her
Ford Motor Co.
James A. Moore
Noise and Vibration Consultant

1999-01-1812 Experimental Evaluation of Wind Noise Sources: A Case Study ...... 1247
William B. Coney
BBN Technologies, and Operating Unit of GTE
Keith Tomaszewicz, Kevin Y. Zhang and Jen Y. Her
Ford Motor Co.
James A. Moore
Consultant

1999-01-1813 Control of Interior Pressure Fluctuations Due to Flow Over Vehicle Openings ................................................................. 1257
L. Mongeau and M. A. Franchek
School of Mechanical Engineering, Purdue Univ.
H. Kook
Kookmin Univ.
1999-01-18 14 Study of Whistles with a Generic Sidebranch ................................................. 1267
   A. Selamet, D. Kurniawan, and B. D. Knotts
   The Ohio State Univ.
   J. M. Novak
   Ford Motor Co.

1999-01-18 15 Quantification of Sound Quality for Engine in Stationary
   and Run-Up Conditions ................................................................. 1277
   Lucille Lamotte and Bernard Beguet
   MICROdБ

1999-01-18 16 Sound Quality Engineering for RV Generator Sets ........... 1281
   Daniel J. Kato
   Onan /Cummins Power Generation
   W. Chris Eaton
   HEAD Acoustics

1999-01-18 17 A Generalized Psychoacoustical Model of Modulation
   Parameters (Roughness) for Objective Vehicle Noise
   Quality Evaluation ................................................................. 1287
   Robert Hoeldrich and Martin Pflueger
   Institute of Applied Systems Technology,
   Joanneum Research Forschungs-GmbH

1999-01-18 18 A Sensory Approach to Develop Product Sound
   Quality Criterion ................................................................. 1291
   Lijian Zhang
   Delphi Automotive Systems

1999-01-18 19 Sound Quality Metric for Diesel Engines ..................... 1295
   Ron Ingham, Norm Otto and Toya McCollum
   Ford Motor Co.

1999-01-18 20 Consideration of the Age Related Hearing Ability
   (Presbycusis) in the Definition of Vehicle Interior Noise
   Targets ................................................................. 1301
   David G. Fish
   Consultant, MIRA

1999-01-18 21 Subjective Quantification of Wind Buffeting Noise .......... 1309
   Scott Amman, Jeff Greenberg, Bill Gulker and Sanjay Abhyankar
   Ford Motor Co.

1999-01-18 22 Guidelines for Jury Evaluations of Automotive Sounds .... 1315
   Norm Otto and Scott Amman
   Ford Motor Co.
   Chris Eaton
   HEAD Acoustics Inc.
   Scott Lake
   General Motors Corp.
1999-01-1824 Extraction/Filtration of Transients Embedded in Stationary Signals Using Wavelets; Focus on Extraction of Frequency Response Functions
Myles Dexter, Harold Evensen, Chuck Van Karsen and Jason Blough
Center for Applied Research in Dynamic Systems, Michigan Technological Univ.

1999-01-1825 Alternative Approaches to Fourier-Based Frequency Tracking
A. Petniunas
Ford Motor Co.

Jia Li
The Ohio State Univ.
Telk C. Lim
The University of Alabama

1999-01-1827 Post-Processing Analysis of Large Channel Count Order Track Tests and Estimation of Linearly Independent Operating Shapes
Jason R. Blough and Geoff Gwaltney
Keweenaw Research Center, Michigan Technological Univ.

1999-01-1828 Development of an FRF Based Order Tracking Technique to Separate Close and/or Crossing Orders
Jason R. Blough and Geoff Gwaltney
Keweenaw Research Center, Michigan Technological Univ.
