Contents

The influence of bond defects on the fatigue strength of adhesive bonded steel sheet 1339
Arne Melander, Jan Linder, Hanna Stensjö and Anders Gustavsson

Fretting Fatigue

Fretting fatigue behavior of surface-treated aluminum alloys 1347
K. Kondoh, Y. Mutoh, M. Mabuchi and T. Kobayashi

High cycle fretting fatigue behavior of Ti-6Al-4Vc 1353
C. Lykins and S. Mall

Fatigue and fretting fatigue of austenitic and ferritic stainless steels in pseudo-body fluid 1359
K. Nakazawa, M. Sumita and N. Maruyama

Experimental investigation on fretting fatigue of a high strength steel at ultrasonic frequency 1365
Z. D. Sun, Q. Y. Wang and C. Bathias

Study on the contact fatigue property of 35CrMoA steel 1371
J. S. Zhang, G. X. Pang and W. Z. Song

Author Index

VOLUME III

Fatigue of New Advanced Materials MMCs, CMCs and Intermetallics

Keynote Lecture
Characterisation, assessment and modeling of fiber reinforced TiMMCs under fatigue loading
P. Bowen

Keynote Lecture
Life prediction of titanium matrix composites under thermomechanical loading
W. S. Johnson, O. Jin and J. R. Calcaterra

Fiber strength degradation and its effects on fatigue crack growth in Ti MMCs
J. Liu and P. Bowen

Transverse fatigue crack propagation in unidirectional fiber reinforced SM1140+/Ti-6-4 composites
X. H. Wu and P. Bowen

Damage evaluation under fatigue loading in TiMMCs using acoustic emission
S. Zamperini, H. Mori, H. C. D. Whitlow and P. Bowen
Contents

Effects of fiber ends on the fatigue crack initiation of TiMMCs components 1411
W. Ding and P. Bowen

Effects of fiber orientation on the fatigue crack growth resistance of 1417
Ti-6Al-4V/SCS-6 laminates
A. Yasmin, T. J. A. Doel and P. Bowen

Effects of processing parameters and environmental factors on the fatigue properties 1423
of titanium-graphite
L. D. Neo, S. H. Teoh, R. Thampuran and K. T. Tsai

Effects of heat treatment on fiber bridging and fatigue crack growth in a metastable 1429
Ti β 21S/SCS-6 composite
F. Kaya, J. Liu, K. M. Fox and P. Bowen

Enhanced fatigue and tensile mechanical properties of nanostructured titanium 1435
processed by severe plastic deformation
V. V. Stolyarov, I. V. Alexandrov, Yu. R. Kolobov, M. Zhu, Y. Zhu, T. Lowe, R. Z. Valiev

Keynote Lecture
Fatigue of metal-matrix composites: microstructural and mechanical effects 1441
J. Llorca

Keynote Lecture
Fatigue thresholds of discontinuously reinforced aluminum alloys 1449
Keisuke Tanaka, Yashiaki Akiniwa and Kenichi Shimizu

Keynote Lecture
Mechanisms of fatigue crack propagation in an aluminum matrix composite 1457
J. -P. Bailon and Zhao-Xiong Tong

Elevated temperature tensile and fatigue behavior of particle reinforced metal 1465
matrix composites
N. Chawla, J. W. Jones and J. E. Allison

Effects of the addition of toughening ligaments on the fatigue of composites 1471
J. J. Lewandowski

Resistance curves for the-threshold of fatigue propagation: the influence of 1477
microstructure
B. Tabernig and R. Pippan

Keynote Lecture
Cyclic deformation of metal matrix composite copper single crystal containing 1483
a tungsten monofilament
Jieping Zhang and Campbell Laird

Fatigue crack initiation and growth in SiC fiber reinforced SiC composites at 1491
room and high temperatures
Shijie Zhu, Mineo Mizuno, Yutaka Kagawa and Yasuo Ochi
Contents

Failure analysis and fatigue behavior of HP-Si$_3$N$_4$ ceramics at high temperature 1497
Y. Bao, Y. Wang and Z. Jin

Transformation and fatigue behaviour of a 9 mol% Ce-TZP ceramic under Hertzian contact 1503
B. A. Latella and T. Liu

The influence of microstructure on fatigue short crack-growth behavior in SiAlON at room temperature 1509
Dan-Yu Jiang, Jian-Lin Shi and M. J. Reece

Residual stress relief and crack closure during fatigue of continuous fibre reinforced ceramic matrix composites 1515
M. L. Steen

Effect of anelasticity on fatigue behavior in Y-TZP ceramics 1521
S. Horibe

Fatigue resistance of yttria-stabilised zirconia ceramics: influence of microstructure 1527
D. Casellas, L. Llanes and M. Anglada

Static and cyclic fatigue behavior of alumina ceramics 1533
Kazuaki Ohira and Hideaki Nakayama

Fatigue Degradation of Ti-Ni shape memory alloy 1539
A. Sakaida, T. Tanaka, H. Nakayama and T. Oomoto

Effect of surface treatment upon corrosion characteristics and fatigue behaviors of shape memory alloy 1545

Effect of Cu content on cyclic behaviors and fatigue lives of Ti-Ni-Cu shape memory alloys 1551

Intermetallics

Keynote Lecture
Tailoring TiAl intermetallic alloys to satisfy damage tolerance requirements for high performance turbine engines 1559
J. M. Larsen, A. H. Rosenberger, K. Li, W. J. Porter and R. John

Mixed mode crack growth in a gamma titanium aluminide 1567
Reji John, Dan DeLuca, W. John Porter and Andrew H. Rosenberger

Study on fatigue crack growth resistance of Ti-24Al-14Nb-3V alloy at ambient and elevated temperatures 1573
S. Q. Li, J. W. Zhang, D. X. Zou and Z. Y. Zhong

XVIII
Contents

Fatigue crack growth in a Ti-48Al-2Mn-2Nb alloy produced by centrifugal spray deposition
W. -Z. Chen, K. -W. Qian, H. -C. Gu and Z. -G. Wang

Fatigue crack growth in lamellar microstructures of a γ -TiAl based intermetallic alloy
Z. W. Huang and P. Bowen

An investigation on fatigue failure of a plate-type TiAl alloy
M. Fu, Y. Hong and S. Q. Li

Defects in wrought gamma titanium aluminides
K. Li, W. J. Porter, A. H. Rosenberger and J. M. Larsen

Effect of microstructures on fatigue crack growth behavior of TiAl-based alloy
Y. Li and S. H. Ai

Fatigue crack growth in bonded dissimilar bimaterials of $\alpha/\beta$-γ, $\alpha/\beta-\alpha_2$
and $\alpha_2$-γ titanium based-alloys
N. Yang, X. Wu and P. Bowen

Substructure evolution during low cycle fatigue in a centrifugal spray deposition Ti-48Al-2Mn-2Nb alloy
W-Z. Chen, B. Qu, K-Peng and K-W Qian

Influence of loading waveform on high temperature creep-fatigue crack growth of Ni$_3$Al(B) alloys
G. P. Zhang and Z. G. Wang

Fatigue of Polymer and Polymer Matrix Composites

Keynote Lecture
Damage mechanics for fatigue life prediction of composite materials
Ramesh Talreja

Keynote Lecture
Fatigue life prediction of fiber reinforced metal laminates under constant and variable amplitude loading
X. R. Wu and Y. J. Guo

Concept of fatigue strength in brittle polymer and ceramic composites
Ken Reifsnider and Jeremy Duthoit

Statistical analysis and experiments on fatigue of fiber composite laminate
Xiaoxue Diao, Yiu-Wing Mai and Lin Ye

Modelling of multilayer ply cracking in composite laminates under cyclic loading
J. Zhang and K. P. Herrmann
Contents

A unified failure criterion for off-axis unidirectional fiber reinforced composites 1669  
G. X. Cheng and A. Plumtree

Fatigue damage of notched glass fiber-reinforced polycarbonate 1675  
H. Hyakutake and T. Yamamoto

Experimental study of plasticized silicon acrylic films fracture 1681  
L. Cousin-Cornet, N. Boudeau, M. Nait Abdelaziz, G. Mesmacque and C. Cazeneuve

Fatigue behavior of composite sandwich panels after low energy impact 1687  
X. Q. Cheng, N. Ye and L. J. Gui

The fatigue propagation behavior of blends of polyethylene and polystyrene 1693  
M. N. Bureau, J. Denault and J. I. Dickson

The influence of bonding strength and residual stresses on delamination growth in FML 1699  
Per Hofslagare and Sten Johansson

Cyclic fatigue and fiber/matrix interface degradation 1705  
Akbar Afaghi-Khatibi and Yiu-Wing Mai

Post-impact fatigue behavior of an IM7/PETI-5 cross-ply laminate 1711  
S.W. Park, C. Cao, M. Zhou and R. Talreja

Fatigue-life prediction methods for fiber composites in the undamaged and damaged conditions 1719  
B. Harris, D. P. Almond, T. Adam, M. H. Beheshty and J. A. Lee

Fatigue crack growth properties of a fiber/metal laminate GLARE 1725  
T. Takamatsu, T. Matsumura, N. Ogura, T. Shimokawa and Y. Kakuta

Damage dissipation and localization during fatigue in unidirectional glass/carbon fiber hybrid composites 1731  
E. K. Gamstedt and P. Brondsted

Fatigue behaviour of glass/vinyl ester composites 1737  
Ho Sung Kim and Jianping Zhang

Fatigue life modeling of composite laminates 1743  
N. Bonora and G. M. Newaz

Dynamic response and damage evolution of CFRP on impact fatigue 1749  
W. A. Morais, J. R. M. D’Almeida and L. Godefroid

Investigation of some microstructural changes in the products from composite foamed thermoplastics by fatigue 1755  
N. L. Piperov

XX
Contents

The mechanisms of striation formation in poly (methyl methacrylate) (PMMA) 1761
C. Ishiyama, T. Asai, M. Shimojo and Y. Higo

Fatigue of Biomaterials

Fatigue of biomaterials 1769
S. H. Teoh

Fatigue in bone: predictions of adaptation 1777
D. Taylor

Effects of microstructure and simulated body environment on fatigue crack growth behavior of implant material Ti-5Al-2.5Fe alloy 1783
Kei-Ichi Fukunaga, Akira Saga, Mitsuo Niinomi and Lei Wang

Fatigue and corrosion fatigue properties of metallic biomaterials 1789
M. Papakyriacou, H. Mayer and S. Tschegg

Corrosion fatigue characteristics of bio-ceramics sapphire in isotonic sodium chloride solution 1795
Yuji Kimura and Satoko Takubo

Sintered Materials and P/M Alloys

Keynote Lecture
Fatigue behaviour of iron based sintered materials: a review 1803
B. Weiss and A. Hadrboletz

On fatigue lifetimes and crack growth behavior of cemented carbides 1811
S. Ishihara, T. Goshima, T. Yoshimoto and T. Sabu

Statistical distribution of powder sizes and fatigue strength of powder metal 1817
H. Matsunaga, O. Mars, B. Johannesson and Y. Murakami

Fatigue life behavior of a sintered steel: heat treatment effects 1823
H. D’Armas, L. Llanes, B. Altaba, J. Bas and M. Anglada

Fatigue crack growth behavior of P/M alloys 1829
Akihiko Hirano, Hideaki Nakayama, Jun Funakoshi, Hiroaki Okano and Akira Kosaka

Fatigue of Microelectronics Devices and Packaging

Keynote Lecture
Fatigue testing of materials used in microelectro-mechanical systems 1837
W. N. Sharpe, Jr. and K. T. Turner
Contents

Keynote Lecture
Roles of microstructure during interfacial fatigue of solder interconnects
Jianku Shang, Chunsheng Zhang, Pilin Liu and Daping Yao

Keynote Lecture
Electric fatigue crack growth in ferroelectrics: theory and experiment
W. Yang, T. Zhu and F. Fang

Fatigue crack growth behaviour of thin metallic foils
A. Hadrboletz, G. Kathibi, B. Weiss and R. Stickler

A new fatigue testing machine for micro-sized specimens
K. Takashima, T. Kimura, M. Shimojo, Y. Higo, S. Sugiura and M. V. Swain

Structural fatigue crack detection by using admittance of embedded piezoelectric patches
Feng Gao, Dejun Wang, Zhongwei Jiang and Seiji Chonan

A crack closure model of electric-field-induced fatigue in ferroelectric ceramics
D. N. Fang and Z. K. Zhang

Fatigue for AlN/Cu plate jointed by DBC method for semiconductor substrate
Nagatoshi Okabe, Xia Zhu, Yutaka Abe and Toranosuke Kajiwara

Fatigue of Advanced Coating Systems and Films

Keynote Lecture
Fatigue of thermal barrier coatings
W. A. Kaysser and M. Bartsch

Keynote Lecture
Cyclic deformation and fatigue of plasma sprayed thermal coatings
Darrell Socie and Edwin Rejda

Keynote Lecture
Effect of coating thin film on fatigue strength of materials
K. Shiozawa

Fatigue failure of titanium biologically coated by hydroxyapatite
K. W. Xu, H. Li and J. Lu

Life prediction of thermally cycled thermal barrier coatings

Influence of HP/HVOF WC coatings and electrodeposited chrome plating on fatigue strength of AISI 4340 steel
Renato C. Souza, Walter L. Pigatin and Herman J. C. Voorwald
Contents

Evaluation of fatigue strength of thermal sprayed materials
Takeshi Ogawa and Keiro Tokaji 1939

Thermomechanical fatigue of coated superalloy
Y. H. Zhang, P. J. Withers and D. M. Knowles 1945

Fatigue strength improvement of high strength martensitic stainless steels by
dynamic ion mixing process
Hideaki Nakayama, Satoshi Fukui and Tsuneshichi Tanaka 1951

Fatigue crack growth beneath prestressed coatings
A. A. Zalounina and J. H. Andreasen 1957

Fatigue of Niuckle-Base Superalloys

Keynote Lecture
High-temperature fatigue of monocrystalline nickel-base superalloys: microstructural
effects and damage mechanisms
H. Mughrabi 1967

Crack growth behaviour of a single crystal superalloy at high temperatures
H. Döker, Y. Pan and D. Goldschmidt 1977

LCF behaviour and microstructural analysis of single crystal nickel base
superalloy SC16

Fatigue in-service cracks growth in rotor blades of aircraft engines
A. A. Shaniavski 1989

Deformation modelling of single crystal turbine blade materials
S. X. Li, S. L. Han and D. J. Smith 1995

Fatigue and creep of single crystal blade alloys
D. W. MacLachlan and D. M. Knowles 2001

The high temperature low cycle fatigue behavior of cast nickel based
superalloy K417

Low cycle fatigue life prediction model for nickel-base single crystal superalloys
under multiaxial stress states
Z. F. Yue and Z. Z. Liu 2013

Fatigue of Castings

Keynote Lecture
Microstructural influences on the fatigue of cast aluminum
Contents

Fatigue of austempered ductile cast iron 2029
T. J. Marrow, H. Guo, G. Ivanishvili, H. Bayati and R. Elliott

Effects of microstructures on the fatigue life of A356.2-T6 alloy 2035
W. Chen, B. Zhang and D. R. Poirier

Measurement of fatigue damage of ductile cast iron with ultrasonic 2041
J. H. Liu, D. B. Zeng and Zh. H. Sun

Low cycle fatigue and fatigue crack growth in semi-liquid die casting processed Al-Si-Mg alloys 2047
K. Katsumata, S-W Han, S. Kumai, A. Sato and R. Shibata

On the use of high cycle fatigue initiation criteria applied on a nodular cast iron component 2053
R. Lindqvist and B. Johannesson

Fatigue properties of high pressure die cast magnesium alloys at high numbers of cycles 2059
H. Mayer, Hj. Lipowsky, M. Papakyriacou, R. Rösch, A. Stich, B. Zettl and S. Stanel-Tschegg

A probabilistic approach to predict failure of cast components subjected to HCF 2065
I. Chantier, V. Bobet, R. Billardon and F. Hild

Fatigue of nodular cast iron 2071
Jan Zuidema, Lieke Wijnmaalen and Cees van Eldijk

High cycle fatigue properties of ductile cast iron 2077
S. Véchet, J. Kohout and J. Švejcar

Author Index

VOLUME IV

Creep-Fatigue Interaction

Keynote Lecture
Application of time dependent fracture mechanics in the analysis high temperature turbine rotor failure 2085
Ashok Saxena

The features of cyclic creep and cyclic plastic deformation of high-strength spring steels at room temperature 2093
Zhi’an Yang and Zhirui Wang

Cyclic creep behaviour of a stainless steel at 300K 2099
Gaudin and X. Feaugas
