1999 IEEE International Conference on Acoustics, Speech, and Signal Processing

PROCEEDINGS

Volume III of VI
Signal Processing Theory and Methods I

March 15-19, 1999
Civic Plaza, Hyatt Regency
Phoenix, Arizona, U.S.A.

Sponsored by
The Institute of Electrical and Electronics Engineers
Signal Processing Society
Feature Selection Using General Regression Neural Networks for the Automatic Detection of Clustered Microcalcifications ................................................................. 1101
Songyang Yu; Ling Guan

Texture Edge Detection by Feature Encoding and Predictive Model ................................................................. 1105
Jyh-Charn Liu; Gouchol Pok

Edge Characterization Using a Model-Based Neural Network ................................................................. 1109
Hau-san Wong; Terry Caelli; Ling Guan

License-plate Localization by Using Vector Quantization ........................................................................ 1113
Stefano Rovetta; Rodolfo Zunino

Neural Network based Person Identification Using EEG Features. ................................................................. 1117
Marios Poulos; maria Rangoussi; Nikolaos Alexandris

Sonar Discrimination of Cylinders from Different Angles Using Neural Networks ................................................................. 1121
Lars N. Andersen; Whitlow W. Au; Jan Larsen; Lars K. Hansen

A Neural Network Based Transcoder for MPEG2 Video Compression ................................................................. 1125
Hsin C Fu; Z. H Chen; Yeong Y Xu; C. H Wang

Volume III

SPTM1: FILTER DESIGN AND STRUCTURES

Adaptive Iterative Reweighted Least Squares Design of LP Fir Filters ................................................................. 1129
Ricardo A Vargas; Charles S Burrus

Quantization Noise Analysis of Wave Digital and Lossless Digital Integrator Allpass/Lattice Filters ............. 1133
Johnny Holmberg; Lennart Harnefors; Svante Signell

A New Normalized Relatively Stable Lattice Structure ........................................................................ 1137
Chris W Schwarz; Soura Dasgupta

Tunable Digital Heterodyne IIR Filters ........................................................................ 1141
Karl E Nelson; Michael A Soderstrand

Optimal Design of Real and Complex Minimum Phase Digital FIR Filters ................................................................. 1145
Niranjan Damera-Venkata; Brian L Evans

A Multiple Exchange Algorithm for Constrained Design of FIR Filters in the Complex Domain ............. 1149
Mathias C Lang

Robust Envelope-Constrained Filter Design with Laguerre Bases ................................................................. 1153
C.H Tseng; K. L Teo; Antoni Cantoni; Z Zang

A Contribution to the Stability Test for One Dimensional Discrete Time Linear Systems ............................. 1157
Anthony Constantinides; Tania Stathaki
**SPTM2: DETECTION**

A Computationally-Efficient Two-Step Implementation of the GLRT Detector .......................... 1161
*Nicholas B Pulsone; Michael A Zatman*

Coherent Detection of Radar Signals in G-Distributed Clutter ............................................. 1165
*George Mamie; Nathan Stitt; Robert Iskander*

Direct Joint Source Localization and Propagation Speed Estimation ..................................... 1169
*Chris W. Reed; Ralph Hudson; Kung Yao*

Source Detection and Localization Using a Multi-Mode Detector: A Bayesian Approach .............. 1173
*Douglas Cochran; Dana Sinno; Axel Clausen*

Asymptotic Non-Null Distribution of the Generalized Coherence Estimate ............................. 1177
*Axel Clausen; Douglas Cochran*

New Methods of Radar Detection Performances Analysis ....................................................... 1181
*Jean-Philippe Ovarlez; Emmanuelle Jay*

An Undecimated Wavelet Transform Based Detector for Transients in 1/f Noise ......................... 1185
*Thomas T Liu; Antony C Fraser-Smith*

Detecting Multipath Signals with the Matched-Lag Filter .................................................... 1189
*John L Spiesberger*

Performance of the Optimal Nonlinear Detector/Tracker in Clutter ....................................... 1193
*Marcelo G Bruno; Jose M Moura*

Robust Signal Detection Using the Bootstrap ............................................................................. 1197
*Hwa-Tung Ong; Abdelhak M Zoubir*

**SPTM3: WAVELETS**

A Discrete-Time Wavelet Transform Based on a Continuous-Dilation Framework ..................... 1201
*Wei Zhao; Raghuveer M Rao*

Multiwavelet Systems with Disjoint Multiscaling Functions .................................................. 1205
*Felix C Fernandes; Charles S Burrus*

Cardinal Multiwavelets and the Sampling Theorem .................................................................... 1209
*Ivan W Selesnick*

Theory of Wavelet Transform Over Finite Fields ...................................................................... 1213
*Faramarz Fekri; Russell M Mersereau; Ronald W Schafer*

Least and Most Disjoint Root Sets for Daubechies Wavelets .................................................. 1217
*Carl Taswell*

Shift Invariant Properties of the Dual-Tree Complex Wavelet Transform ................................ 1221
*Nick G Kingsbury*

A Special Class of Orthonormal Wavelets: Theory, Implementations, and Applications ............. 1225
*Lixin Shen; Jo Yew Tham; Seng Luan Lee; Hwee Huat Tan*
## A New Multifilter Design Property for Multiwavelet Image Compression

Jo Yew Tham; Lixin Shen; Seng Luan Lee; Hwee Huat Tan

### SPTM4: ADAPTIVE FILTERING: APPLICATIONS AND IMPLEMENTATION

</table>
Performance Analysis of the Mutual Information Function for Nonlinear and Linear Signal Processing
Hans-Peter Bernhard; Georges A. Darbellay

A Novel Channel Equalizer for Chaotic Digital Communications Systems
Mahmut Ciftci; Douglas B. Williams

A Recursive Prediction Error Algorithm for Identification of Certain Time-Varying Nonlinear Systems
Anders E. Nordsjö; Lars H. Zetterberg

Nonlinear System Identification of Hydraulic Actuator Friction Dynamics Using a Finite-State Memory Model
Byung-Jae Kwak; Andrew E. Yagle; Joel A. Levitt

Nonlinear Filtering by Kringing, with Application to System Inversion
Jean-Pierre Costa; Luc Pronzato; Eric Thierry

SPTM6: TIME/FREQUENCY AND TIME/SCALE ANALYSIS

Adaptive Window in the PWVD for IF Estimation of FM Signals in Additive Gaussian Noise
Braham Barkat; Boualem Boashash; Ljubisa Stankovic

Filter Design for CWT Computation Using the Shensa Algorithm
Y T. Chan; K C. Ho

Gabor's Signal Expansion on a Quincunx Lattice and the Modified Zak Transform
Arno J. van Leest; Martin J. Bastiaans

On Analytic Signals with Nonnegative Instantaneous Frequencies
Xiang-Gen Xia; Leon Cohen

Minimax Robust Time-Frequency Filters for Nonstationary Signal Estimation
Gerald Matz; Franz Hlawatsch

Spatial Averaging of Time-Frequency Distributions
Yimin Zhang; Moeness G. Amin

Optimization of Time and Frequency Resolution for Radar Transmitter Identification
Bradford W. Gillespie; Les E. Atlas

New Time-Frequency Symbol Classification
Byeong-Gwan Iem; Antonia Papandreou-Suppappola; G. Faye Boudreaux-Bartels

An Inverse Signal Approach to Computing the Envelope of a Real Valued Signal
Ramdas Kumaresan

Frames in Rotated Time-Frequency Planes
Aykut Bultan; Ali N. Akansu

SPTM7: SIGNAL MODELING AND REPRESENTATION

An Optimal Generalized Theory of Signal Representation
J. S. Goldstein; Joseph R. Guerci; Irving S. Reed
Symbolic Signal Processing ................................. 1361
Don H Johnson; Wei Wang

Using a New Uncertainty Measure to Determine Optimal Bases for Signal Representations .......... 1365
Tomasz Przebinda; Victor DeBrunner; Murad Ozaydin

Detection of Extra Solar Planets Using Parametric Modeling ............................................. 1369
Andre Ferrari; Jean-Yves Tourneret; Francois-Xavier Schmider

A DSB-SC Signal Model for Nonlinear Regression-Based Quadrature Receiver Calibration .... 1373
Roger A Green

Model Selection: A Bootstrap Approach ................................................................. 1377
Abdelhak M Zoubir

Color Texture Synthesis with 2-D Moving Average Model ................................................. 1381
Glen Andrews; Kie B Eom

Sampling Theorems for Linear Time-Varying Systems with Bandlimited Inputs ................ 1385
Soonman Kwon; Daniel R Fuhrmann

SPTM8: FILTERBANK AND WAVELET APPLICATIONS

The Detection of Radar Pulse Sequences by Means of a Continuous Wavelet Transform ........ 1389
Douglas E Driscoll; Stephen D Howard

Analysis of Spectral and Wavelet-Based Measures Used to Assess Cardiac Pathology .......... 1393
Conor J Heneghan; Steven B Lowen; Malvin C Teich

Optimal DMT Transceivers Over Fading Channels ......................................................... 1397
Yuan-Pei Lin; See-May Phoong

Narrowband Channel Extraction for Wideband Receivers ................................................. 1401
Matthew L Welborn

Performance Analysis of Multicarrier Modulation Systems Using Cosine Modulated Filter Banks 1405
Subbarao S Govardhanagiri; Tanja Karp; Peter Heller; Truong Nguyen

Optimal Ladder-Based Biorthogonal Coder .......................................................... 1409
See-May Phoong; Yuan-Pei Lin

The Predictive Embedded Zerotree Wavelet (PEZW) Coder: Low Complexity Image Coding with Versatile Functionality .............................................................. 1413
Jie Liang

A New Directional Filter Bank for Image Analysis and Classification ............................... 1417
Sang-il Park; Mark J T Smith; Russell M Mersereau

A Modulated Complex Lapped Transform and its Applications to Audio Processing ..... 1421
Henrique S Malvar

Time-Frequency Mapping Based on Non-Uniform Smoothed Spectral Representations ...... 1425
Panagiotis D Hatziantoniou; Dionysis Tsoukalas; John N Mourjopoulos; Soterios Salamouris
SPTM9: SOURCE AND SIGNAL SEPARATION

Separation of a Class of Convolutive Mixtures: A Contrast Function Approach .......................................................... 1429
Carine Simon; Philippe Loubaton; Christophe Vignat; Christian Jutten; Guy d'Urso

A New Time-Domain Deconvolution Algorithm And Its Applications ............................................................... 1433
T. Engin Tuncer

Blind Signal Separation for Convolutive Mixing Environments Using Spatial-Temporal Processing ..................... 1437
James P Reilly; Lino Coria Mendoza

Dynamic Signal Mixtures and Blind Source Separation ...................................................................................... 1441
Dragan Obradovic

On Underdetermined Source Separation .............................................................................................................. 1445
Anisse Taleb; Christian Jutten

Single Channel Signal Separation Using Linear Time Varying Filters: Separability of Non-Stationary Stochastic Signals ............................................................... 1449
James R Hopgood; Peter J.W. Rayner

Blind Source Separation Without Optimization Criteria? .................................................................................. 1453
Vicente Zarzoso; Asoke K Nandi

Lahouari Ghouti; Chi Hau Chen

SPTM10: FILTERBANKS

Block-Recursive, Multirate Filterbanks with Arbitrary Time-frequency Plane Tiling .............................................. 1461
Unto K. Laine

Boundary Filters Without DC Leakage for Paraunitary Filter Banks .................................................................. 1465
Wolfgang Niehsen

Lossless Filter Banks Based on Two Point Transform and Interpolative Prediction .............................................. 1469
Kunitoshi Komatsu; Kaoru Sezaki

Non-Uniform Filterbank Bandwidth Allocation for System Modeling Subband Adaptive Filters ..................... 1473
Jacob D Griesbach; Tamal Bose; Delores M Etter

Eigenfilter Design of Real and Complex Coefficient Prototypes for Uniform and Nonuniform Filter Banks ............................................................... 1477
Fabrizio Argenti; Enrico Del Re

Processing Finite Length Signals via Filter Banks Without Border Distortions: A Non-Expansionist Solution ............................................................................. 1481
Elena Domínguez Jiménez; Nuria Gonzalez Prelic

A Polyphase and FFT Realization of Modulation Sub-Band Adaptive Filter with Minimum Sampling Rate ................................. 1485
Kenji Nakayama; Akihiro Hirano; Hiroaki Sakaguchi

Optimum Subband Coding of Cyclostationary Signals ...................................................................................... 1489
Soura Dasgupta; Chris W Schwarz; Brian D Anderson

Optimal Generalized Sampling Expansion ............................................................... 1637
Daniel Seidner; Meir Feder

Sampling on Unions of Non-Commensurate Lattices Via Complex Interpolation Theory ............ 1641
Stephen D. Casey; Brian M. Sadler

Interpolation and Denoising of Nonuniformly Sampled Data Using Wavelet-Domain Processing .... 1645
Hyeokho Choi; Richard G Baraniuk

Reproducing Kernel Structure and Sampling on Time-Warped Kramer Spaces ...................... 1649
Shahrnaz Azizi; Douglas Cochran

Selection of Regularisation Parameters for Total Variation Denoising ................................ 1653
Victor Solo

Irregular Sampling with Unknown Locations ............................................................. 1657
Pina Marziliano; Martin Vetterli

SPTM15: ADAPTIVE FILTER ANALYSIS

Statistical Analysis of the LMS Algorithm with a Zero-Memory Nonlinearity After the Adaptive Filter ... 1661
Marcio H Costa; Jose C. M Bermudez; Neil J Bershad

Convergence Properties of the Block Orthogonal Projection Algorithm .......................... 1665
Kazushi Ikeda; Hideaki Sakai

Exact Convergence Analysis of Affine Projection Algorithm: The Finite Alphabet Inputs Case .... 1669
Hichem Besbes; Yousra Ben Jemaa; Meriem Jaidane

On the Stability of the Inverse Time-Varying Prediction Error Filter Obtained with the RWLS Algorithm .................................................. 1673
Roberto López-Valcarce; Soura Dasgupta

Stability Bounds on Step-Size for the Partial Update LMS Algorithm ................................ 1677
Mahesh Godavarti; Alfred O Hero III

Adaptive Parameter Estimation Using Interior Point Optimization Techniques: Convergence Analysis .................................................. 1681
Kaywan H Afkhamie; Zhi-Quan Luo

Affine Projection Methods in Fault Tolerant Adaptive Filtering .................................. 1685
Robert A. Soni; Kyle A. Gallivan; W. K. Jenkins

Performance Analysis of Third-Order Nonlinear Wiener Adaptive Systems ...................... 1689
Shue-Lee Chang; Tokunbo Ogunfunmi

SPTM16: TRANSFORMS AND STATISTICAL ESTI

Deterministic Regression Smoothness Priors TVAR Modelling ..................................... 1693
Jari P Kaipio; Marko T Juntunen
An Extension of an Interior-Point Method for Entropy Minimization ............................................... 1697
Irina F Gorodnitsky

A Krylov Subspace Method for Large Estimation Problems .............................................................. 1701
Michael K Schneider; Alan S Willsky

Estimating the Entropy of a Signal with Applications ........................................................................ 1705
Jean-françois Bercher; Christophe Vignat

The Filter Bank Approach for the Fractional Fourier Transform ....................................................... 1709
Der-Feng Huang; Bor-Sen Chen

The Discrete Fractional Fourier Transform .......................................................................................... 1713
Cagatay Candan; M. Alper Kutay; Haldun M Ozaktas

A Data-Driven Scheme for the Approximated Computing of Alias-Free Generalized Discrete Time-Frequency Distributions ................................................................. 1717
Thuyen Le; Manfred Glesner

Periodically Nonuniform Bandpass Sampling as a Tapped-Delay-Line Filtering Problem ..................... 1721
Dan Scholnik; Jeffrey O Coleman

New Realization Method for Linear Periodic Time-Varying Filters .................................................... 1725
Alban Duverdier; Bernard Lacaze

Wavelet Based Estimator for the Self-Similarity Parameter of Alpha-Stable Processes ....................... 1729
Patrice Abry; Lieve Delbeke; Patrick Flandrin

SPTM17: Markov and Bayesian Estimation and Classification

Bayesian Separation and Recovery of Convolutively Mixed Autoregressive Sources ....................... 1733
Simon J Godsill; Christophe Andrieu

Estimation of Nonstationary Hidden Markov Models by MCMC sampling ..................................... 1737
Petar M Djuríc; Joon-Hwa Chun

A Bayesian Multiscale Framework for Poisson Inverse Problems ...................................................... 1741
Robert D Nowak; Eric D Kolaczyk

Bayesian Framework for Unsupervised Classification with Application to Target Tracking ................ 1745
Rangasami L Kashyap; Srinivas Sista

Structure and Parameter Learning via Entropy Minimization, with Applications to Mixture and Hidden Markov Models .......................... 1749
Matthew E Brand

Marginal MAP Estimation Using Markov Chain Monte Carlo ............................................................ 1753
Christian P Robert; Arnaud Doucet; Simon J Godsill

Gibbs Sampling Approach for Generation of Multivariate Gaussian Random Variables .................. 1757
Jayesh H Kotecha; Petar M Djuric

Efficient Computation of the Bayesian Cramer-Rao Bound on Estimating Parameters of Markov Models ........................................................................................................... 1761
Joseph Tabrikian; Jeffrey L Krolik
