PROCEEDINGS

SPE/ICoTA Coiled Tubing Roundtable

25–26 May 1999
Houston, Texas

SOCIETY OF PETROLEUM ENGINEERS INC.
INTERNATIONAL COILED TUBING ASSOCIATION
CONTENTS

SPE 47847  Slickline Power Unit on Coiled Tubing Provides Innovative Solution for Setting a Nippleless Lock in a Multilateral Completion ........................................ 7
  Jack Hall, Halliburton Worldwide Ltd., and B.M. Wijngaards, Petroleum Development of Oman

SPE 50654  Coiled-Tubing Technology: An Application of High-Pressure Jet Cleaning in a Deep, High-Temperature, Sour Marine Environment ........................................ 21

SPE 52840  The Buckling Behavior of Pipes and Its Influence on Axial Force Transfer in Directional Wells ........................................ 35
  E. Kuru, A. Martinez, and S. Miska, U. of Tulsa, and W. Qui, Baker Oil Tools

SPE 53297  Successful Application of Coiled-Tubing-Conveyed Perforating Techniques in Egyptian Wells ........................................ 45
  Sharifudin Salahuddin and Bruce Conrad, Halliburton Energy Services Inc., and Rein Maatjes, Badr Petroleum Co.

SPE 54327  Development of a Wireless Coiled Tubing Collar Locator ........................................ 53

SPE 54456  The Science and Economics Behind Coiled Tubing String Design and Optimization ........................................ 61
  Lance Portman, BJ Services

SPE 54458  Coiled-Tubing Stretch and Stuck-Point Calculations ........................................ 69
  K.R. Newman

SPE 54461  The Varying Modulus of Elasticity for Coiled Tubing Material ........................................ 79
  S.M. Tipton, U. of Tulsa

SPE 54462  ICoTA’s CT Drilling Training and Competence Guidelines—How To Use Them ........................................ 89
  A.F. Bijleveld, Shell Intl.

SPE 54467  New Downhole Gas Separator Enhances Coiled Tubing Jetting and Stimulation Procedures ........................................ 95

SPE 54469  The All Electric BHA: Recent Developments Toward an Intelligent Coiled-Tubing Drilling System ........................................ 105
  D.R. Turner and P.F. Head, XL Technology Ltd.; M.A. Yuratich, TSL Technology Ltd.; and Gerald Cameron, Amerada Hess Ltd.

SPE 54472  Coiled Tubing Milling and Temporary Plug and Abandonment Operations ........................................ 115
  Eirik Språgård and Egil Østvik, Norsk Hydro; Njål Grønnerød, Transocean Petroleum Technology; Grete Svanes, M-I; John Villar, Schlumberger Dowell; Tom Salvesen, Weatherford; and Lars Tjåland, BJ

SPE 54475  Utilizing 4½-in. Monobores and Rigless Completions to Develop Marginal Reserves ........................................ 129
  J.R. Sanford, JRS Ltd.; T.R. Webb, Amoco Production Co.; Seb Patout and Hugo Morales, Schlumberger Dowell

SPE 54476  Through-Tubing Inflatables: Isolation and Guidelines for Coiled-Tubing Applications ........................................ 151
  G.R.J. MacKenzie and M.E. Plante, Baker Oil Tools

SPE 54477  Scale Removal From the Recesses of Side-Pocket Mandrels ........................................ 165
  R.J. Tailby, Elf Petroleum Norge AS, and C.B. Amor and A. McDonough, Schlumberger Dowell

SPE 54478  Coiled Tubing Failure Statistics Used to Develop Tubing Performance Indicators ........................................ 173
  W.P. van Adrichem, Schlumberger Dowell

SPE 54480  High-Pressure Coiled-Tubing-String Design ........................................ 183
  A.S. Zheng and H.A. Larsen, Schlumberger Dowell
No manuscript received for the following:

SPE 54463  Finite-Element Modeling Applies to the Investigation of Barefoot Well Stability vs. Different Depletion and Production Flow Rate Scenarios  
M. Pourjavad, Femengineering Ltd., and K. Pedersen, Saga Petroleum A.S.

SPE 54465  Coiled-Tubing Disconnects: State of the Art  
L.J. Leising, Dowell

SPE 54471  The First Successful Coiled-Tubing Drilling Job in the Gulf of Mexico  
M.W. DeRouen, Dowell Schlumberger Inc., and T. Webb and J.K. Aslakson,  
Amoco Production Co.

SPE 54473  A Unique Solution to Zonal Isolation Utilizing Foam-Cement and Coiled-Tubing Technologies  
T.J. O’Rourke and D.L. Crombie, Nowisco Well Service

SPE 54474  Selective Hydraulic Fracturing of Multiple Perforated Intervals With Coiled-Tubing Conduit: A Case Study of The Unique Process, Economic Impact, and Related Production Improvements  
W.M. Zemlak, Dowell; R.P. Marcinew, Dowell Schlumberger Inc.; and R. McCollum,  
Alberta Energy Co. Ltd.

SPE 54479  Deformation Imposed on Coiled-Tubing Samples in Fatigue-Test Machines  
J.R. Sorem and S.M. Tipton, U. of Tulsa; D.S. Rhodes, Halliburton Energy Services; and B. Draeger and M. Bulatowicz, U. of Tulsa

SPE 54486  Coiled-Tubing Testing With Rotation and Axial Load  
K.R. Newman, CTES L.C.

SPE 54487  How To Select Candidate Wells for Coiled-Tubing Drilling  
L.D. Skinner and N.J. Adams, Cudd Pressure Control Inc.

SPE 54490  Coiled-Tubing Fatigue-Life Variation and String Size Factor  
V.A. Avakov, Halliburton Energy Services; J.R. Martin, Quality Tubing Inc.; and T.H. McCoy and R.S. Rosine, Halliburton Energy Services

SPE 54497  Successful Underbalanced Drilling by Pumping Nitrogen Through Coiled-Tubing and a Vane Motor in the Low-Pressure Pettic Lime Formation  
H.E. Barney, Seagull Energy Corporation, and C.C. Overstreet, Cudd Pressure Control Inc.

SPE 54500  Directional Coiled-Tubing Drilling With Percussion Hammer  
T. Eriksen and P.E. Berger, Baker Hughes INTEQ

SPE 54507  Applications Engineering for Composite Coiled Tubing
