Contents

Introduction

**Deterministic Optimal Control**

Sufficient conditions and sensitivity analysis for economic control problems  
*H. Maurer*  
3

Optimal advertising with a continuum of goods  
*E. Barucci and F. Gozzi*  
15

A multiperiod production and advertising problem for a seasonal product  
*D. Favaretto and B. Viscolani*  
31

Fiscal policy in a Lucasian general equilibrium model with productive government spending  
*D.A. Wöhrmann*  
47

An endogenous growth model with public capital and government borrowing  
*A. Greiner and W. Semmler*  
65

Optimal firm investment in security  
*P.M. Kort, J.L. Haunschmied and G. Feichtinger*  
81

Optimal investment facing possible accidents  
*R.F. Hartl, P.M. Kort and A.J. Novak*  
99

**Stochastic Optimal Control**

Optimal consumption and exploration: A case study in piecewise-deterministic Markov modelling  
*M. Farid and M.H.A. Davis*  
121

Application of the impulsive control of piecewise deterministic processes to multi-item single machine stochastic scheduling  
*A. Jean-Marie and M.M. Tidball*  
139

Almost sure optimality and optimality in probability for stochastic control problems over an infinite time horizon  
*P. Dai Pra, G.B. Di Masi and B. Trivellato*  
161

Sustainability in small open economies under uncertainty  
*S. Katayama and H. Ohta*  
173

Fractal steady states in stochastic optimal control models  
*L. Montrucchio and F. Privileggi*  
183

On one aspect of science policy based on an uncertain model  
*C.S. Lee and G. Leitmann*  
199
Contents

Dynamic Games

Optimal open loop cheating in dynamic reversed Linear–Quadratic Stackelberg games
T. Vallée, Ch. Deissenberg and T. Başar 217

Dynamic games of fiscal and monetary policies for Austria
R. Neck 233

The (in)finite horizon open-loop Nash LQ game: An application to EMU
J.C. Engwerda, B. van Aarle and J.E.J. Plasmans 251

Inter- and intragenerational renewable resource extraction
S. Jørgensen and D.W.K. Yeung 275

The dynamics of the strategic capital accumulation
C. Figuères, P. Gardères, P. Michel and F. Rychen 291

Capital accumulation subject to pollution control: Open-loop versus feedback investment strategies
M. Stimming 309

Control synthesis in grid schemes for Hamilton–Jacobi equations
A.M. Tarasyev 337

Dynamics in divide the money game with bribing
V. Pasetta 361
