Powder Injection Molding Technologies

Edited by

Dr. Randall M. German
The Pennsylvania State University

Dr. Helmut Wiesner
BASF AG

Mr. Robert G. Cornwall
Innovative Material Solutions, Inc.

Proceedings of PIM98
# Table of Contents

**Chapter 1 - General Topics**
- A Vision of the PIM Industry - Yesterday, Today and Tomorrow
  R. M. German

  Starting Point for PIM - Powder or Feedstock?
  H. Wiesner

  A New Production Method for High Value Parts
  R. Van Gestel

**Chapter 2 - Powders**
- New Atomization Process Developed By PAMCO
  Y. Kato

  Potential of Coated Powders for Powder Injection Molding
  A. Bose, A. Biswas and A. J. Sherman

**Chapter 3 - Binders and Feedstocks**
- Rheology of Thermoplastic Polymer-Ceramic Mixtures
  J. Cihlar and Z. Racl

  Rheological Characterization of PIM Feedstocks at Low Shear Rates
  B. O. Rhee, Y. C. Jung, J. H. Lee and H. Jang

  Powder Injection Molding Using Corn-Based Bioploymer Binders
  B. Lograsso

  Twin-Screw Technology for Making Pellets from Powdered Metal
  W.C. Thiele

  Deformation Mechanism of MIM Green Parts using Polyacetal/Polyethylene Polymer-Alloy as an Organic Binder during Thermal Debinding Process
  Y. Kankawa, S. Takamori, and N. Tsukamoto

  Powder Injection Molding of the BASF 316L Feedstock - Numerical Simulations and Experimental Verification of the Process
  L. Kowalski, J. Duszczyk, L. Katgerman, and M. Blomacher
Chapter 4 - Molding Technology
The Effect of Advanced Controls on Precision MIM Components
K. Hens, J. Grohowski, K. Bauer, and C. Bader

New Advances in Binder-Assisted Forming
R. Iacocca

The Role of Freeform Fabrication in PIM Production
D. Kupp, H. Eifert, M. Greul and M Kunstner

Chapter 5 - Debinding and Sintering
Overview of Debinding Fundamentals and Practices
Dr. K. S. Hwang

Issues in Thermal Processing of PIM Parts
D. Whychell, Sr.

The Master Debinding Curve
T. S. Shivashankar, G. A. Shoales, S. V. Atre, A. Cardamone, A. Griffio, and R. M. German

Vacuum/Hydrogen Batch Furnace for one Step Debinding/Sintering of MIM Parts
C. Joens,

Strength Evolution During The Thermal Debinding of PIM Components
S. V. Atre, G. A. Shoales, A. Lal, K.K. Comstock, D.M. Errick, and R. M. German

Supersolidus Liquid Phase Sintering of Low Carbon PIM M2 Tool Steels
N. Myers, T. Weaver, A. Lal and R. M. German

Role of Microstructure on Compact Shape Retention during Liquid Phase Sintering
A. Upadhyaya and R.M. German

Sintering Optimization Through On-Line Monitoring
J. G. Zhang, T. B. Yen and I. E. Pinwill

Chapter 6 - Metal Processing
Stainless Steel Produced by Powder Injection Molding
T. McCabe

Powder Injection Molding of P.A.N.A.C.E.A. Nickel-Free Austenitic Stainless Steel
M. O. Speidel, H. Wohlfromm, P. J. Uggowitzer and R. Magdowskia

Production of Nickle Aluminide Powder for Injection Molding in
J. Duszczyk and N. Adkins

PIM for Microwave Packaging
F. Rehme, K. H. Wichmann, and W. Hager
