

BRITISH CERAMIC PROCEEDINGS NO. 60

**The Sixth
Conference and Exhibition
of the
European Ceramic
Society**

20–24 June 1999
Brighton Conference Centre, UK

**Abstracts
Volume 2**

UNIVERSITÄTSBIBLIOTHEK
HANNOVER
TECHNISCHE
INFORMATIONSBIBLIOTHEK

VOLUME 2 CONTENTS

ENGINEERING/TECHNICAL CERAMICS	1
<i>Innovative processing for silicon nitride and aluminium nitride ceramics</i> K. Komeya and T. Meguro	3
<i>Nucleation affecting microstructure development of Si_3N_4 ceramics</i> W. Lehner, H.-J. Kleebe and G. Ziegler	5
<i>Grain growth mechanisms in in-situ reinforced Si_3N_4</i> P. Brännvall and K. Rundgren	7
<i>Properties of high density α-Si_3N_4 ceramics, sintered at high static pressure</i> V.S. Urbanovich, Y.G. Gogotsi, K.G. Nickel, M. Backhaus-Ricoult, V. Guerin, V. Shipilo and K.I. Yanushkevich,	9
<i>Novel developments in α-SiAlON ceramics</i> H. Mandal and M.J. Hoffmann	11
<i>Sr-doped sialons</i> Z. Shen, J. Grins, S. Esmaeilzadeh and M. Nygren	13
<i>Intergranular structure and fine scale chemistry of rare earth sialons</i> L.K.L. Falk	15
<i>Microstructural design of pressureless liquid phase sintered SiC powders</i> S. Baud and F. Thevenot	17
<i>Densification of zirconium diboride</i> D.N. Øvrebø and F.L. Riley	19
<i>Thermal residual stresses in alumina-based ceramics and their influence on mechanical properties</i> R.I. Todd	21
<i>Thermal mismatch effects on the mechanical behaviour of alumina-based materials</i> C. Baudín, A.J. Sanchez-Herencia and R. Moreno	23
<i>Damage tolerance and R-curve behaviour of alumina ceramics</i> S. Sakaguchi	25
<i>Advanced X-ray analysis of grinding residual stresses in AlN and in Al_2O_3</i> A. Kämpfe, B. Eigenmann and D. Löhe	27

<i>Second phase formation and properties of AlN ceramics</i> T. Joyeux, J. Jarrige and J.P. Lecompte	29
<i>Metal-like superplasticity in yttria-stabilized zirconia polycrystals</i> M. Jiménez-Melendo, A. Domínguez-Rodríguez and A. Bravo-León	31
<i>Processing and properties of porous ceramic bearings</i> C.J. Roach, J.R. Alcock, J. Corbett and D.J. Stephenson	33
<i>Microstructural optimization of silicon nitride for rolling element bearings</i> V.K. Pujari, M. Abouaf, W.T. Collins, C. Theron and M. Condemine	35
<i>Microstructure and properties of hard carbon derived from fullerene</i> M.H. Lewis, M.G. Cain, T. Steer, S. Bennington and N. Kitamura	37
<i>A fractographic study of cyclically deformed alumina and zirconia</i> L. Carlsson, O.T. Sørensen and A.P. Nikkliä	39
<i>Applications of aluminium titanate ceramics in non-ferrous metallurgy</i> I.D. Alecu and R.J. Stead	41
<i>The influence of granule structure on the strength of pressed and sintered Si₃N₄</i> L. Carlinger and E. Carlström	43
<i>Sintering of Si₃N₄/celsian composites</i> S. Boskovic, D. Kosanovic, V. Dondur and R. Dimitrijevic	45
<i>Colouration and decolouration processes in gas pressure sintered silicon nitride ceramics</i> M. Herrmann, O. Goeb and S. Siegel	47
<i>Processing and properties of porous ceramic bearings</i> C.J. Roach, J.R. Alcock, J. Corbett and D.J. Stephenson	49
<i>Effect of seeding rod-like β-Si₃N₄ particles on the microstructure and the toughness of dense silicon nitride</i> F. Cluzel and F. Thevenot	51
<i>Nitridation of silicon powder studied by XPS, ²⁹Si MAS NMR and surface analysis techniques</i> K.J.D. MacKenzie, C.M. Sheppard, K. Okada and Y. Kameshima	53
<i>The role of yttria in the pressureless sintering of β-sialon ceramics</i> M. Sopicka-Lizer	55

<i>Impulse excitation tests to determine the high temperature elastic and damping properties of Si_3N_4 and other ceramics</i>	57
G. Roebben and O. Van Der Biest	
<i>Microwave sintering of Si_3N_4-based ceramics with various contents of oxide additives</i>	59
Yu.V. Bykov, S.V. Egorov, A.G. Ereemeev, V.V. Holoptsev, H.-J. Ritzhaupt-Kleissl and A.I. Rachkovskii	
<i>Development of new sialon-materials by slip casting</i>	61
M. Bruno and J.L. Holm	
<i>Effect of nitrogen content on sintering behaviour of oxynitride spinels</i>	63
O. Morey and P. Goeriot	
<i>Aqueous processing of SiAlON powders</i>	65
A. Kudyba-Jansen, R. Linke, H.T. Hintzen and R.R. Metselaar	
<i>Rheological studies of aqueous silicon nitride slips for low pressure injection moulding</i>	67
A.J. Millán, R. Moreno and M.I. Nieto	
<i>Fabrication of silicon nitride sheets by non-aqueous tape casting</i>	69
C.A. Gutiérrez and R. Moreno	
<i>Microstructure and creep properties of polycrystalline Si_3N_4 fabricated by different techniques</i>	71
J. Martinez-Fernandez, F.M. Valera-Feria, M. Singh and A.R. de Arellano-López	
<i>Properties of pressureless-sintered TiC ceramics and TiC/SiC composites</i>	73
J. Adler, C. Sand and M. Herrmann	
<i>High temperature neutron diffraction study of $\text{Y}_4\text{Al}_2\text{O}_9$</i>	75
M. Shimada, H. Yamane and B.A. Hunter	
<i>Effect of iron oxide on hot-pressing and deformation of fine-grained alumina</i>	77
A. Bataille, V. Martin, F. Falga, E. Leriche, C. Courtois, R. Duclos and J. Crampon	
<i>Development of alumina-aluminium nitride materials for thermal shock applications</i>	79
R. Martínez, C. Baudín and M.I. Nieto	
<i>Sintering of mullite prepared from local kaolin</i>	81
A. Harabi, M. Heraiz and S. Achour	
<i>Preparation of corundum via diasporite or via compounds with diasporite-like structures</i>	83
G. Werner, B. Mönch, M. Loogk and G. Tomandl	

<i>Investigation of the wettability of Al_2O_3-Y_2O_3 stoichiometric compounds on AlN</i>	85
M. Medraj, M. Entezarian and R.A.L. Drew	
<i>Stable versus metastable formation mechanism of mullite studied by transmission electron microscopy</i>	87
H.-J. Kleebe, F. Siegelin and G. Ziegler	
<i>Influence of iron oxide additives on Al_2TiO_5 synthesis and sintering behaviour</i>	89
M. Preda, A. Ianculescu and M. Zaharescu	
<i>Spinel glass-ceramic glazes for porcelain stoneware</i>	91
I. Nebot-Diaz, L. Sánchez-Muñoz, J. Bakali and J.B. Carda	
<i>Mineralisation and calcination of gibbsite</i>	93
I.J. Bennett and R. Stevens	
<i>Microstructure and mechanical properties of reaction-sintered calcium hexaluminate</i>	95
C. Dominguez, R. Torrecillas, J. Chevalier and G. Fantozzi	
<i>Interactions in the systems Al_2O_3-ZrO_2-rare earth oxides</i>	97
S.M. Lakiza and L.M. Lopato	
<i>Mechanical properties of glass sintered alumina</i>	99
M.C. Leite, M.E.V. Costa, P.M. Vilarinho and D. Dias	
<i>Effect of some dopants on the structure and morphological characteristics of zirconia powders</i>	101
E. Volceanov, A. Volceanov, M.A. Pantea and A. Apostol	
<i>Electrophoretic deposition – a successful wet shaping technique for nanosized zirconia powders</i>	103
K. Moritz and E. Müller	
<i>Reaction sintering of zircon-alumina amorphous powders prepared by high energy ball milling</i>	105
C. Baudín, L. Mazerolles and D. Michel	
<i>Possibilities of controlling mechanical properties of alumina ceramics by MgO and ZrO_2 addition</i>	107
E. Gregorová, J. Havrda and W. Pabst	
<i>Cr_2O_3-doped Y-TZP composites</i>	109
J. Babiarz and K. Haberko	
<i>Posibility of application of sepiolite in production of technical ceramics</i>	111
B. Matovic and D. Kosanovic	

<i>Structural aspects of the system $\text{Na}_2\text{B}_4\text{O}_7\text{-Na}_3\text{AlF}_6\text{-TiO}_2$ used as the electrolyte in TiB_2 electrosynthesis</i>	113
E.M. Anghel, E. Pavlatou and R. Marchidan	
<i>Surface charge properties of clay minerals used in whiteware industries</i>	115
G. Tari, A.T. Fonseca and J.M.F. Ferreira	
<i>Material removal by spalling during EDM of ceramics</i>	117
C.S. Trueman and J. Huddleston	
<i>Monolithic adsorbent bodies from activated carbon</i>	119
L. Kotsis and A. Kozar	
<i>Fracture properties of nuclear graphites</i>	121
P. Ouagne, G.B. Neighbour and B. McEnaney	
<i>Mechanical properties and oxidation of nuclear graphites</i>	123
J.M. Vidal and T.J. Mays	
<i>The effect of P_2O_5 additive on the transformation of cordierite in sol-gel-derived powders</i>	125
S. Mei, J. Yang and J.M.F. Ferreira	
<i>Synthesys of CaO.TiO_2 from melted salts</i>	127
M. Preda, A. Meghea, I. Rau and M. Zaharescu	
<i>Particle size determination of kaolins and clays</i>	129
K. Kunes, W. Pabst, J. Havrda and E. Gregorova	
<i>Separation of Weibull's families composing a bi-modal population</i>	131
J. C. Glandus and J. Absi	
<i>Direct characterization of detrimental flaws in ceramics with novel methods</i>	133
T. Satoh, Y. Zhang, N. Uchida and K. Uematsu	
<i>New method for the testing of porous ceramic materials</i>	135
S.H. Lee and S.C. Choi	
<i>High temperature fatigue crack growth in structural ceramics</i>	137
P. Hvizdas, D.-Y. Jiang and M.J. Reece	
REFRATORIES	139
<i>A new generation of high alumina castables with micronized andalusite</i>	141
M. Rigaud, L. Rebouillat, P. Daniellou and P. Dubreuil	

<i>Synthesis of alumina based self flowing castables</i> C. Durmas, Y. Sonmerzler and S. Ozgen	143
<i>Study of the fine particle system in alumina-spinel castables</i> M. Rivenet, F. Abraham, J.C. Boivin, E. Delattre, N. Ruchaud and P. Hubert	145
<i>Influence of grain phase on slag corrosion of castable refractories</i> H. Sarpoolaky and W.E. Lee	147
<i>Ultrasonic investigation of refractory castables</i> E. Nonnet, N. Lequeux and P. Boch	149
<i>Corundum growth and related reactions caused by contact between alumino-silicate refractories and liquid aluminium</i> A.G. Furness and D.E.V. Talbot	151
<i>Slip cast spinel and spinel/zirconia components for continuous steel casting</i> C.G. Aneziris, E.M. Pfaff and H.R. Maier	153
<i>Direct and indirect corrosion of refractories</i> W.E. Lee and S. Zhang	155
<i>Refractories for handling aluminium alloys</i> D.A. Bell	157
<i>Mechanical behaviour of Al₂O₃/C shaped refractories used in continuous casting</i> S. Vaudez, M. Huger and C. Gault	159
<i>Numerical study of the in-service behaviour of refractory parts used in continuous casting</i> S. Peruzzi, J.C. Glandus, M. Huger and J. Poirier	161
<i>Development of chemical bonding systems for refractories/ceramics</i> L.A. Shaw, A.S. Holmes, K. Kendall and B.R. Heywood	163
<i>Thermal shock behaviour of some industrial refractories to be used as nuclear core-catcher</i> M. Fritz, M. Boussuge and J. Rodriguez	165
<i>Conditioning of mechanical properties and microstructure (texture) for alumina–zirconia–silica (AZS) refractories</i> G. Toma, I. Teoreanu and N. Toma	167
<i>Stability and microstructural evolution of carbon-coated magnesia–alumina spinel at high temperature and under strongly reducing conditions</i> M.A. Sainz and A. Caballero	169

<i>Production of fused quartz for refractories in semi-industrial plant</i> S.P. Martinovic, P.R. Martinovic, L.M. Pavlovic and D.N. Krstic	171
<i>Study of a fused silica brick after 4 years of service in a coke oven wall</i> J.M. Leroy, J. Poirier, A. Zymła, V. Zymła and J. Heintzen	173
<i>A process for morphology change of MgO particles</i> S. Achour, M.T. Soltani and A. Harabi	175
<i>Xonotlite based materials as refractory</i> M.M. Komljenovic and B.M. Zivanovic	177
<i>Zirconium phosphates bonded refractory composites</i> E Volceanov, M. Georgescu, F. Mihalache, A. Volceanov, M.A. Pantea and A. Apostol	179
<i>Thermal diffusivity/conductivity of alumina-zirconia-silica refractory</i> S. Fayette, D.S. Smith, C. Martin and M. Huger	181
<i>Influence of residual stresses on thermal stress resistance of refractory ceramics</i> A. Lanin and I.I. Deryauko	183
<i>Synthesis of alumina based self flowing castables</i> N. Burtan, C. Adamut and D. Becherescu	185
NOVEL CHEMISTRY/PROCESSING	187
<i>Chemical preparation of Pb (Co_{1/3}Nb_{2/3})O₃ powders</i> Y. Yoshikawa	189
<i>Preparation of ceramic non-oxide nanopowders by laser evaporation</i> E. Müller, Ch. Oestreich, G. Michel, U. Popp and G. Staupendahl	191
<i>Y-TZP nanostructured materials obtained by seeding-assisted chemical coprecipitation</i> J. Tartaj, J.F. Fernández, C. Moure, E. Lachowski and P. Durán	193
<i>Synthesis of nanophased carbides Mo₂C and WC by low temperature reduction and carbidization with the use of controlled gas medium as a reagent for reaction</i> I. Uvarova, T. Babutina and L. Konchakovskaya	195
<i>Zirconia nanopowders and thin films obtained by hydrothermal reactions from a peroxide complex</i> R.R. Piticescu, C. Monty, T. Velea, F. Sibieude and D. Taloi	197
<i>Synthesis of nanometric Si/C/N/B preceramic powders by laser spray pyrolysis</i> X. Armand, N. Herlin-Boime, M. Mayne and M. Cauchetier	199

<i>Mechanical alloying: a novel technique to obtain oxide solid solutions</i>	201
F. Bondioli, A. Bonamartini Corradi, A.M. Ferrari and T. Manfredini	
<i>Structural characterisation of silicon carbonitride ceramics from polymeric precursors</i>	203
S. Traßl, G. Motz, G. Ziegler and E. Rößler	
<i>Directions for processing electroceramics</i>	205
N. McN Alford	
<i>Colloidal route for synthesis of powder by solid state reaction with synthesis of barium titanate as a model case</i>	207
N. Chigira, Y. Zhang, N. Uchida and K. Uematsu	
<i>Thermal decomposition of reaction compounds between aluminium halides and amines to produce AlN powder</i>	209
F. Porte, J.P. Lecomte and J. Jarrige	
<i>Complex ceramic oxide synthesis from aerosol</i>	211
L. Mancic, B. Marinkovic and O. Milosevic	
<i>Particle orientation in injection moulded alumina compact</i>	213
K. Uematsu, S. Ohsaka, N. Shinihara and M. Okumiya	
<i>Colloidal shaping: a comparison between pressure casting and injection moulding of aqueous suspensions</i>	215
A. Salomoni, E. Rastelli and I. Stamenkovic	
<i>Ceramic fabrication by gel-bonding</i>	217
M.E. Bowden, K. Machen and I.W.M. Brown	
<i>Novel water-based shaping of ceramic components</i>	219
O. Lyckfeldt	
<i>Processing of three dimensional ceramic parts by stereolithography</i>	221
T. Chartier, C. Hinczewski and S. Corbel	
<i>Adsorption of electrolytes onto alumina surface in aqueous media influence of the counter ion</i>	223
C. Pagnoux, R. Laucournet, T. Chartier and J.F. Baumard	
<i>Stability of alumina suspensions for aqueous tape casting using latex binders</i>	225
A. Kristoffersson and E. Lidén	
<i>Influence of seed nature and content on the microstructure development of sol-gel α-Al₂O₃</i>	227
C. Kermel, C. Courtois, A. Leriche, B. Thierry and P. Moeltgen	

<i>High purity submicron materials synthesized by spray pyrolysis method</i>	229
L. Mancic, Z. Marinkovic, B. Marinkovic and O. Milosevic	
<i>Controlled precipitation process: formation mechanism of ZnO nanoparticles</i>	231
J.E. Rodríguez-Páez, A.C. Caballero, C. Moure, P. Durán and J.F. Fernández	
<i>Tialite based ceramics in the ternary pseudosystem</i>	233
$MgO \cdot Al_2O_3 - Al_2O_3, TiO_2 - 3Al_2O_3, 2SiO_2$	
M. Preda, M. Crisan, D. Crisan, A. Jitianu and M. Zaharescu	
<i>Interaction of Si_3N_4 nanopowders with biochemical media</i>	235
N.V. Boshitaskaya, T.S. Bartnitskaya, V.A. Lavrenko and G.N. Makarenko	
<i>Production of nanocrystalline powders in the system $ZrO_2 - Y_2O_3 - CeO_2 - Al_2O_3$</i>	237
A.V. Shevchenko, A.K. Ruban, E.V. Dudnik and L.M. Lopato	
<i>PLSnZT nanoceramics obtained by a sol-gel colloidal process</i>	239
R.M. Piticescu, M. Preda, D. Taloi and V. Badilita	
<i>Microwave sintering of ZrO_2-based functionally graded composites</i>	241
C. Zhao, L. Vandeperre, J. Vleugels and O. Van Der Biest	
<i>Microwave-assisted sintering of $ZrO_2 - 8 \text{ mol}\% Y_2O_3$: enhancement of densification</i>	243
S.M. Rathbone, R. Freer and F.R. Sale	
<i>Sintering of thin ceramic layers with a graded pore structure</i>	245
T. Moritz, G. Werner, G. Tomandl, M. Mangler and H. Eichler	
<i>Drying of electroporcelain with high content of alumina</i>	247
L. Pavlovic, Z. Acimovic, S. Martinovic and D. Krstic	
<i>Synthesis and characterisation of the solid solutions formed in the system</i>	249
$Eu_2BaNiO_5 - Nd_2BaNiO_5$ and $Eu_2BaNiO_5 - Eu_2BaZnO_5$	
M.E. Villafuerte-Castrejón and S. Medrano Mejía	
<i>Influence of thioacetamide on the growth of cadmium sulphide particles</i>	251
J. Yang, J.M.F. Ferreira, W.J. Weng and Y. Tang	
<i>Centrifugal slip casting of alumina tubes</i>	253
L. Willems, K. Keizer, J. Luyten and R. Leysen	
<i>Effect of the processing route in the role of additives during sintering</i>	255
M.C. Greca, C. Moraes and A.M. Segadães	
<i>Synthesis and characterization of iron oxide powder for better processing of ceramics</i>	257
S. Yamashiro, Y. Zhang, N. Uchida, K. Uematsu and T. Kurita	

<i>Influence of adsorption on the rheological behaviour of aqueous alumina slurry with polyelectrolyte</i>	259
L. Yu, L.C. Guo, Y. Zhang, N. Uchida and K. Uematsu	
<i>Novel characterization techniques for analyzing the formation process of fracture origin in ceramics</i>	261
M. Naito, K. Nakahira, T. Hotta, N. Shinohara, M. Okumiya and K. Uematsu	
<i>SiOC foams from a preceramic polymer and polyurethanes</i>	263
P. Colombo and M. Modesti	
<i>Evidence of suspension structure and particle network in the light of established rheological models</i>	265
R.A. Lopes and A.M. Segadães	
<i>Effects of moisture and temperature on the forming process and structure of alumina compact</i>	267
Y. Saito, Y. Zhang, N. Uchida and K. Uematsu	
<i>Electrokinetic behaviour of alumina–zirconia ceramic suspensions</i>	269
I. Teoreanu and L. Raut	
<i>Exploitation of zeta potential in the study of high solid ceramic suspension properties</i>	271
J. Michael, B.R. Heywood and P.R. Jackson	
<i>Optimisation of industrial pastes using electrochemical and rheological measurements</i>	273
N. Vancaster, V. Vandeneede, G. Moortgat and F. Cambier	
<i>Capillary rheometry for characterization of ceramic pastes by extrusion</i>	275
J. Graczyk	
<i>The press moulding of ceramic components with respect to paste formulation</i>	277
O. Draper, S. Blackburn and D. Pearce	
<i>Barium zirconate and calcium zirconate ceramic materials slip cast from non-aqueous suspensions</i>	279
I.D. Alecu, R.J. Stead, D.N. Phillips and S. van Bruchem	
<i>Adsorption behaviour of polyacrylic acid (PAA) on alumina surfaces</i>	281
K. Yamashita, Y. Zhang, N. Uchida and K. Uematsu	
<i>Thermochemistry of organic additives adsorption on alumina powder surface</i>	283
H. Gondoh, Y. Zhang, N. Uchida and K. Uematsu	
<i>Characteristics of alumina powders prepared via the urea formaldehyde polymeric: route 1 effect of ultrasonic treatment</i>	285
D.M. Ibrahim, A.A. Mostafa, T. Khalil, G. Bossert and G. Schnapp	

	XV
<i>(NH₄)₂SnBr₆ in a sol-gel precursor for Sn(IV)</i>	287
P.C. Piña and S. Bernès	
<i>TEM- and EELS-investigations on monolithic polymer-derived SiCN-ceramics</i>	289
H. Müller, H.-J. Kleebe and G. Ziegler	
<i>Heteropolynuclear complexes precursors used in mixed oxides synthesis</i>	291
C. Guran, P. Diaconescu, C. Palivan, M. Barboiu, V. Iluc and C. Stan	
<i>Nonconventional methods for oxide precursors synthesis from diluted aqueous systems</i>	293
L. Stoica, I. Jitaru, O. Micu, C. Plapcianu, A. Razvan, V. Popescu, A. Novac and A.M. Roman	
<i>Synthesis of carbonates of magnesium and calcium using urea</i>	295
M. Fukuhara, T. Suzuki, N. Imai, A. Doi and Y. Kusano	
<i>The synthesis and microstructure of zirconia iron oxide nano-ceramic composites</i>	297
T.P. Raming, A.J.A. Winnubst and H. Verweij	
<i>Reactivity in the synthesis of YAG by the Pechini method.</i>	
<i>Stabilising influence of Cr on the garnet structure</i>	299
R. St. Pavlov, J.B.Cardá and V.B. Marzá	
<i>Effect of different organic additives on the preparation of TiO₂ by a sol-gel method</i>	301
J.C. Zhang, M.E.V. Costa and J.L. Baptista	
<i>X-ray adsorption spectroscopy (XAS) analysis of iron zircon pigments</i>	303
I. Gair, R. Jones, A. Airey and G. Sankar	
WHITEWARES	305
<i>Importance of clay properties to the rheology and casting behaviour of vitreous sanitaryware formulations</i>	307
N.P. Glasson and D.J. Stockley	
<i>Investigation of polyelectrolyte adsorption using D.R.I.F.T spectroscopy</i>	309
J. Mitchell, B.R. Heywood, M.E. Twentymán and C. Armstrong
