5th International Conference on Air Distribution in Rooms

Yokohama, JAPAN  July 17 - 19, 1996

Vol. 1

Edited by Shuzo Murakami
CONTENTS

Vol. 1

July 17 (Wed.)

1-1 MAIN HALL (1F)

Invited Lectures I

Designing for Climate Control in Large Volumes
Alistair Guthrie
Ove Arup & Partnership (UK) ......................................................... 1

Enclosing Exterior
Rafael Vinoly
Rafael Vinoly Architects P. C. (USA) ............................................. 9

Wind, Machine and Architecture
Eiji Maki
Nikken Sekkei Ltd. (Japan) .......................................................... 11

1-2 ROOM A

Air-Tightness, Ventilation Rate and Inter-Room Convection

A Feasibility Study on Passive Ventilation in Airtight Houses in Cold Regions
Masamichi Enai, N. Aratani, M. Miyaura, A. Fukushima, Y. Honma
Hokkaido University (Japan) ......................................................... 21

Measuring Technique of Leakage Area of Houses by AC-Pressurization Method
Yasuo Utsumi, Hiroshi Kobayashi, Terunori Kadoya, Hiroshi Yoshino
Miyagi National College of Technology (Japan) .......................... 29

Air Flow Measurements in New Houses
M. M. Eftekhari
Loughborough University (UK) ..................................................... 35

Experimental Evaluation of Simulated Domestic Ventilation Systems
Takao Sawai, Yoshinori Taniguchi, Shigeki Ohnishi, Haruki Ohsawa, Hironao Seto
Building Research Institute, Ministry of Construction (Japan) .......... 41

Estimation of Airflow in Livestock Buildings Using Image Analysis
Rasmus Larsen
Technical University of Denmark (Denmark) ............................... 49

Measurement of Multi-Zone Airflow in Experimental House
Satoshi Doi
Hokkaido Electric Power Co., Inc. (Japan) ..................................... 55

A Zonal Model to Simulate a Room Heated by a Gas Heat Pump (GHP) BTHEBES
M. Gschwind, G. Fonnes, Ph. Loiseau, J. J. Bezian, T. Hasebe, S. Fujita, I. Takeda
IMRA Europe S.A. (France) .......................................................... 61

The Analytical Accuracy of Multiple Tracer Gas Techniques for Measuring Interzonal Airflows
Masamichi Enai, N. Aratani, C. Y. Shaw, J. T. Reardon
Hokkaido University (Japan) ......................................................... 69

Development of Ventilation and Air-Conditioning System for Highly Airtight and Insulated Houses
Hideki Tani
Osaka Gas CO., LTD. (Japan) .......................................................... 77
Task Air-Conditioning and Thermal Environment

Study on Thermal Comfort and Energy Conservation of Task-Ambient Air Conditioning System
Yasuhiro Nakamura, Minoru Mizuno, Yoshitaka Sekimoto, Kenji Akagi, Yozo Kuninatsu, Kazuhiro Otaka, Makoto Kohyama
Osaka University (Japan) ........................................ 91

The Introduction of the Desk Displacement Ventilation Concept
Marcel G.L.C. Loomans, F. J. R. van Mook, P. G. S. Rutten
Eindhoven University of Technology (The Netherlands) ......................... 99

Measurement of Indoor Airflows Applying the PTV-Technique
Exposure Due to Interacting Air Flows between Two Persons
Erik Bjørn, Peter V. Nielsen
Aalborg University (Denmark) ........................................ 107

The Variable Volume of Air Supply and Room Thermal Comfort
M. B. Ullah
National University of Singapore (Singapore) ................................ 115

A Simulated Indoor Thermal Environment of the CHONAN Railway Station
Jae-Ock Yoon, Byungseon S. Kim, Kyung-Hoi Lee
Hoseo University (Korea) ........................................ 125

An Improvement on Thermal Environment by Intermittent Air Move
Rong-Yi Zhao, Jing Dong
Tsinghua University (China) ........................................ 133

Field Measurements of the Indoor Environment of an Office with a Task-Ambient Air Conditioning System
Makoto Kohyama, Minoru Mizuno, Yasuhiro Nakamura, Yoshitaka Sekimoto, Kenji Akagi, Yozo Kuninatsu, Kazuhiro Otaka, Nikken Sekkei Ltd. (Japan) ........................................ 141

Locally Ventilated Industrial Building with Heat Recovery: Environmental Temperature Influence to Thermal Comfort and Energy Consumption
Milorad Bojic, N. Lukic, M. Babic, D. Milovanovic
University u Kragujevcu (Yugoslavia) ...................................... 149

Study on Occupied Zone Air Conditioning System Using Seats
Hirotaka Konishi, Hisashi Hanawa, Masaaki Higuchi
Takenaka Corporation (Japan) ........................................ 155

Thermal Safety of Workers in Warm and Hot Work Conditions
Jan Drenda
Technical University of Silesian (Poland) .................................. 163

The Effect of Ceiling Radiant Heating System on Indoor Thermal Environment and Energy Consumption
Mariko Nakano, Yu Seshimo, Shigeki Onishi
Mitsubishi Electric Corp. (Japan) ........................................ 171

Application of a Human Thermal System to Unsteady, Non-uniform Environments
Toshikazu Takemori, Yuko Shoji, Tsugoshi Nakajima
Fundamental Research Laboratories Osaka Gas Co., Ltd. (Japan) .................. 177

The Thermal Condition at the Changing Room before Taking a Bath in Winter
Hideo Ohno, N. Kawano, S. Kano, M. Okumiya, H. Yamaguchi, Y. Koide
Sugiyama Jogakuen University (Japan) ...................................... 183

</table>
Air Distribution Design for Realistic Rooms
Alexander M. Zhivov, J. B. Priest, Leslie L. Christianson
University of Illinois (USA) .......................................................... 295

Jet Drop Models for Control of Cold Air Jet Trajectories in Ventilated Livestock Buildings
Guoqiang Zhang, Jan S. Strem, Svend Morsing
Danish Institute of Animal Science, Research Centre Bygholm (Denmark) ........................................... 305

Ventilation Control Strategies for Buildings with Hydronic Radiant Conditioning in Hot Humid Climates
Corina Stetiu, Helmut E. Feustel, Yukio Nakano
Lawrence Berkeley National Laboratory (USA) .................................................. 317

Energy Savings of Off-Hour Accelerated Ventilation in Office Buildings
Ahmed C. Megri, Fariborz Haghighat, Paul Fazio, Gilbert Achard
Concordia University (Canada) .............................................................. 325

Development of a Qualitative Reasoning Based Learning Controller for HVAC System to Minimize the
Energy Consumption Rate
Yasuyuki Shintani, Shigeaki Matsubayashi, Masataka Iwasaki
Matsushita Electric Industrial Co., Ltd. (Japan) ............................................. 333

Design of Air Systems with Concrete Slab Cooling
Markus Koschenz, V. Dorer
Eidgenossische Materialprüfungs-und Forschungsanstalt EMPA (Switzerland) ....................................... 341

Moisture-Absorbent Coating on Outdoor Air Ducts for Preventing Dripping of Condensate
Yan Liu, Gudni A. Johannesson, Lars Skogström
Royal Institute of Technology KTH (Sweden) .................................................. 349

A Study on the Air-Conditioning System Using the Outlet on the Floor and the Current of Supply Air
along the Back of Seat in Theater
Akihiro Doi, Yoshiaki Nagasawa, Masaaki Higuchi
Takenaka Corporation (Japan) .................................................................. 357

Fan Optimization for Effective Ventilating System
Tatyana S. Solomakhova
MovenCo. (Russia) .................................................................................. 365

Present Tendencies of Air Quality Control in Ventilation and Air Cleaning Systems
N. Z. Bikolov
Research Institute of Industrial and Marine Medicine (Russia) ................. 369

Inlet and Outlet Coefficients  A Theoretical Analysis
Karl Terpager Andersen
Danish Building Research Institute (Denmark) .............................................. 379

Aerodynamic Properties of Slot Outlets and Exhaust Hoods Engineering
E.P. Vishnovskii
Petrospek Climate Maker Co. (Russia) ........................................................ 391

Method of Aerodynamic Design of Axial Fans
Yury Moskeevko, Ludmila Popova, Joseph Brussilovskii, Victor Mitrofovich
Moven Co. (Russia) .................................................................................. 397

The Effect of Air Leakages on Jet Momentum in Negative Pressure Ventilation Systems
Svend Morsing, Jan S. Strem
Danish Institute of Animal Science Research Centre Bygholm (Denmark) ........ 401

Effect of Cooling Loads on Warm Plane Air Jet
Shahnaz Amiri, M. Sandberg, B. Mosfeghi
University College of Gävle/Sandviken, Royal Institute of Technology KTH (Sweden) ......................... 407

Archimedes Number and Jet Similarity
Tor-Göran Malmström
Kungl Tekniska Högskolan KTH (Sweden) ..................................................... 415
Decay Laws in the Case of 3D Vertical Free Jets with Positive Buoyancy
P. Vialle, D. Blay, B. Lionnet
Ecole Nationale Superieure de Mecanique et d' Aerotechnique (France) .................................................. 423

Experimental Study of Local Space Air Conditioning by Applying the Coanda Effect to a Real Size Model
N. Yamada, H. Kubota, K. Kurosawa, Y. Yoshida, Y. Hanaoka, T. Ijichi
Shinryo Corporation (Japan) ........................................... 431

Aerodynamic Sealing through a Double Jet Curtain: A Parametric Numerical Study
Luís A. Oliveira, F. Penot, J. J. Costa
Universidade de Coimbra ( Portugal) .............................. 437

Measurement of Room Air Convection
An Analysis of Velocity and Temperature Fields in a Room Heated by a Room Air-Conditioner
Haruo Hanibuchi, Shuichi Hokoi
Sekisui House, Ltd. (Japan) ........................................... 445

Experimental Study of the Exchange Flow through a Horizontal Ceiling Vent in Atrium Fires
- Criteria of Supply Air and Pressure Necessary for Uni-Directional Flow-
Tokiyoshi Yamada
National Research Institute of Fire and Disaster (Japan) ............. 453

Obstacles, an Energy-Efficient Method to Reduce Downdraught from Large Glazed Surfaces
Claus Topp, Per Heiselberg
Aalborg University (Denmark) ........................................ 461

Experimental Survey of Ventilation in a Reinforced Plastic Factory
Hannu Koskela, R. Niemelä, S. Collineau, J.-C. Seriys
Finnish Institute of Occupational Health (Finland) .................. 469

Dynamic Response of Thermal Anemometers for Low Velocity Measurements Indoors
Z. Popiolek, A. K. Melikov, F. E. Jergensen
Silesian Technical University (Poland) ................................ 477

Determination of Air Distribution Patterns in Large Premises
- Application Examples of the Homogeneous Emission Tracer Gas Technique
Hans Stymne, CarlAxel Boman
Royal Institute of Technology (Sweden) ............................ 485

Experimental Study of Indoor Environment in a Cold Air Distribution System
Shih Cheng Hu, C. M. Chiang, C. Chiang, C. H. Tsai
Industrial Technology Research Institute (Taiwan China) ........... 493

Comparing Isothermal Airflow Parameters in a Slot Inlet Ventilation System between a Full and a 1/10 Scale Model of a Pig Housing Room
Larry D. Jacobson, Svend Morsing
University of Minnesota (USA) ....................................... 501

Measured Base Evaluation on Thermal Environment in a Main Building of Coal-Fired Thermal Power Plant
Hirofumi Yuya, Shuji Takeuchi
Electric Power Development Co., Ltd. (Japan) .................... 509

Air Velocities in Spaces Air-Conditioned by Cooled Ceilings or Mixed Flow as a Function of the Cooling Capacity
Klaus Fitzner
Technical University Berlin (Germany) ............................ 517

Study of Thermal Environment in Experimental Real-Scale Atrium
Tetsuya Hiramatsu, Takeshi Harada, Shinsudo Kato, Shuzo Murakami, Hiroshi Yoshino
Research Center, Asahi Glass Co., Ltd. (Japan) .................... 523
A Computerized Multi-Point Temperature and Velocity Measurement System
Guoqiang Zhang, Svend Morsing, Jan S. Strøm
Danish Institute of Animal Sciences, Research Centre Bygholm (Denmark) ........................................ 531

Measurement Techniques for Ventilation of Large Enclosures
Claude-Alain Roulet, Dirk Müller
Ecole Polytechnique Federale de Lausanne (Switzerland) ................................................................. 539

Velocity Field Created by Moving Objects in Rooms
Magnus Mattsson, M. Sandberg
Royal Institute of Technology KTH (Sweden) ......................................................................................... 547

Three-Dimensional Particle Streak Velocimetry for Room Air Flows with Automatic Stereo-
Photogrammetric Image Processing
Frank Scholzen, A. Moser
Energy System Laboratory ETH (Switzerland) ...................................................................................... 555
