5th International Conference on Air Distribution in Rooms

Yokohama, JAPAN July 17 - 19, 1996

Vol. 2

Edited by Shuzo Murakami
## CONTENTS

### Vol. 2

#### ROOM A

</table>
Experiments on Direct Control of Indoor Air Quality Using Chemical Adsorption Filter
Tetsuaki Otomo, Kensuke Tokunaga, Yasuo Mizushima
 Takenaka Corporation (Japan) ................................................................. 97

Aerosol Deposition on Internal Building Surfaces: Experimental Validation of a Computational Model
A.J.H. Goddard, M. A. Byrne, F. C. Lockwood, M. Nasrullah, C. K. Lai
Imperial College at Silwood Park (UK) .................................................. 105

Fresh Air Intake, Contaminant Exhaust and Air Distribution: Monitored Criteria for Buildings
M. A. Haque, John F. Halldale
National University of Singapore (Singapore) ........................................... 113

Influence of Ventilation Way on Modelling of CO, CO2, O3 and NOx Concentration in Gas Stove Room Surrounding
Stanislaw Gumula
University of Mining and Metallurgy Cracow (Poland) .......................... 121

Modelling and Simulation of Room Air Convection
Numerical Analysis of Contaminant Distribution around a Human Body
Shinsuke Kato, Shuzo Murakami, Jie Zeng
Institute of Industrial Science, University of Tokyo (Japan) ...................... 129

CFD Models of Persons Evaluated by Full-Scale Wind Channel Experiments
Henrik Brohus, Peter V. Nielsen
Aalborg University (Denmark) ............................................................... 137

The Interaction of the Infrared Radiation from the Room Boundaries with the Humidity Content of the Enclosed Air
Matti Brändli, Gabriel Schenker, Bruno Keller
Swiss Federal Institute of Technology (Switzerland) .............................. 145

Shia-hui Peng, Lars Davidson, Sture Holmberg
Chalmers University, National Institute for Working Life (Sweden) ......... 153

Large Eddy Simulations of the Flow in a Three-Dimensional Ventilated Room
Lars Davidson, Peter V. Nielsen
Chalmers University of Technology (Sweden) ......................................... 161

Numerical Simulation of Turbulent Airflow in Livestock Buildings
Jens Chr. Bennetzen, Jens N. Sorensen, Henning T. Seggaard, Peter L. Christiansen
Research Centre Bygholm (Denmark) .................................................. 169

Use of a Zonal Model for the Prediction of Air Temperature Distribution in Large Enclosures
C. Inard, A. Meslem, P. Depecker
Institut National das Sciences Appliquees de Lyon (France) ..................... 177

CFD Analysis of an Atrium, Using a Conjugate Heat Transfer Model Incorporating Long-Wave and Solar Radiation
Peter G. Schild
The Norwegian University of Science and Technology (Norway) ............ 185

Indoor Climate CFD-Simulation of an Underground Icehockey Stadium: Strategy and Results
Frode Frydenlund, Hans Martin Mathisen, Per Olaf Tjellflaat, Peter G. Schild
SINTEF Energy - Indoor Environmental Technology (Norway) ............... 195

Application of CFD to a New Process of Heating and Cooling Termed the “Diffusion Ceiling”
Alain Triboix, Y. Lénat, N. Donnains
Ecole Nationale Superieure des Arts et Industries de Strasbourg (France) .... 201
Cohabitation in Cyberspace to Experience Indoor Air Conditions on Internet
Masatoshi Aoki
Kume Sekkei Co. (Japan) ................................................................. 209

Investigation and Application of Coupled Building and Room Air Flow Simulation
Volker Fischer, Markus Rössler
Dresden University of Technology (Germany) .................................. 215

Flowdynamic Simulation of Free Jets with the Macro-elements Method
Gian Vincenzo Fracastoro, Enrico Mondani, Marco Perino
Polytechnic of Turin (Italy) ............................................................. 223

A New Method to Describe the Diffuser Boundary Conditions in CFD Simulation
Yan Huo, Jianshun Zhang, C. Y. Shaw, Fariborz Haghighat
Concordia University (Canada) ....................................................... 233

Experimental and Numerical Simulations of Ventilation in a Painting Area
Serge Collineau, J.-C. Sérieys, J.-R. Fontaine, G. Aubertin
Institut National de Recherche et de Securite INRS (France) ............. 241

Numerical Computation of Airflow in Air-Conditioning Automobile Compartment
Sun Xuejun, Chen Zhijiu, Que Xongcai
Shanghai Jiao Tong University (China) ............................................ 249

Room Air Convection in Large Space

Work Environment CFD-Simulation of a Fiberglass Factory
Per Olaf Tjelflaat, Dagfinn Bell
Norwegian University of Science and Technology (Norway) ............. 255

Field Measurement on Indoor Climate of Passenger Terminal Building of Kansai International Airport under Two Different Operation Modes of Its Air Conditioning System
Takashi Sugiyama, Shuzo Murakami, Shinsuke Kato, Takeo Takahashi, Ryuzo Ooka, Kiyotaka Deguchi, Hirokazu Ikezawa
Nikken Sekkei Ltd. (Japan) ............................................................ 263

Indoor Climate Measurement Methods and Results for a Concert and Ice-hockey Situation in an Underground Stadium
Hans Martin Mathisen
SINTEF Energy-Indoor Environment Technology (Norway) ............... 271

A Study on the Prediction of the Thermal Environment in the Atrium
2-D Simulation of Atrium with No Air Cooling System in Summer
Lee Kyung-Hoi, Kim Byungsun, Kim Taeju
Yonsei University (Korea) ............................................................. 279

Study on the Control of the Thermal Environment inside a Huge Glass-Covered Atrium
Kazuhiro Sumi, Eiichi Taniyama, Kosuke Nishibata, Noriyuki Takahashi, Hisaaki Higuchi
Takenaka Corporation (Japan) ......................................................... 283

Room Air Convection in Large Space / Natural Convection

Natural Ventilation in an Auditorium: The Role of Thermal Storage in the Energy Consumption and Comfort de Montfort University Auditorium
D. Aiulfi, Koos van der Maas
SORANE SA (Switzerland) ......................................................... 291

Natural Ventilation Caused by Stack Effect in Large Courtyard of High-Rise Building
Hisashi Kotani, Masaya Narasaki, Ryuji Sato, Toshio Yamanaka
Osaka University (Japan) ............................................................. 299
Numerical Analysis of Flow and Temperature Fields with Local Air-Conditioning by Supply Jets from the Seats in Hall
Katsumi Niwa, S. Murakami, S. Kato, Y. Kondo, N. Kitamura
Nikken Sekkei LTD. (Japan) .......................................................... 307

SYDNEY OPERA HOUSE-Uniform Air Distribution A Case Study
Paul Ghete, Ashak Nathwani
Norman Disney & Young Consulting Engineers (Australia) .................................................. 315

Simple Design Tools Applied to an Underground Stadium and Compared with Indoor Climate Measurements
Koos van der Maas, Kjell Kolsaker
Ecole Polytechnique Federale de Lausanne (Switzerland) .................................................. 321

Study of the Thermal Environment of a Large-Scale Multipurpose Arena
Tamayuki Matsuda, Kaoru Takigasaki, Dajii Takahashi
Maeda Corporation (Japan) .......................................................... 329

Directing of the Air Flow in Industrial Hall during Fire Ventilation Operation
Bogdan Mizielinski, Jecek Hendiger
Warsaw University of Technology (Poland) .......................................................... 337

Predicting Method of Wind-Forced Ventilation in a Void of High-Rise Building
Makoto Nakamura, Ryuji Sato, Toshio Yamanaka, Hisashi Koltani, Noriyuki Takahashi, Masaaki Higuchi
Takenaka Corporation (Japan) .................................................. 343

Natural Ventilation in a Long-Span Wooden Dome with Membrane Roof
Yuichi Takemasa, Shin Hayakawa, Satoshi Togari, Isamu Sakura
Kajima Technical Research Institute (Japan) .................................................. 351

Simulation of Temperature and Wind Velocity, System Planning, and Measurement in a Large-Scale Dome with Retractable Roof
Hiroaki Takai, Ichiro Arakawa, Noriyuki Takahashi, Minoru Sato
Takenaka Corporation (Japan) .................................................. 359

Modelling of Paulownia Coupled Solar Chimney Assisted Wind Tower System for Natural, Pollution Free Ventilation
Sanjay Kumar, Nirmal Kumar, S. Sinha
Indian Institute of Technology (India) .................................................. 367

Measurement of Room Air Convection

Air Movement and Stratification in Rooms with Localised Heating of a Wall or Floor
Paul Cooper, Ratnakar Kulkarni
University of Wollongong (Australia) .................................................. 373

Non-Steady Three Dimensional Smoke Motion Driven by a Natural Convection in a Room
Tatsuya Shiono, Toshihisa Ueda, Akiko Matsuo, Masahiko Mizomoto
Keio University (Japan) .................................................. 381

Experimental Studies on the Air Flow Characteristics of Air-Conditioned Office Rooms
A. Meslem, C. Inard, P. Barles
Institut National des Sciences Appliquees de Lyon (France) .................................................. 387

Heat Transfer from Room Surfaces
Andrew Hatton, H. B. Awbi
The University of Reading (UK) .................................................. 395

Evaluation of the Thermal Comfort Level Perceived by a Passenger in a Bus Compartment
E.Z.E.Conceicao, M. C. G. Silva, D. X. Viegas
Universidade do Algarve (Portugal) .................................................. 403
Measurement of Room Air Convection / Displacement and Raised Floor Ventilation

Determination of All Airflow Velocity Components by a Particle-Image-Velocimetry System (PIV)
Dirk Müller, Ulrich Renz
Rheinisch-Westfälische Technische Hochschule Aachen (Germany) ........................................... 413

PIV System for Airflow Measurement Using Smoke Particles
Akikazu Kaga, Katsuhiro Yamaguchi, Yoshio Inoue, Akira Kondo, Shinichi Kamoi, Taro Yamaguchi
Osaka University (Japan) ............................................................................................................... 421

Flow Visualization in Livestock-Buildings by Means of a Laser Light Sheet
Hans-Joachim Müller
Institute of Agricultural Engineering (Germany) ................................................................. 427

Combined Technique of Image Processing and Computational Fluid Dynamics for Flow Field
Understanding
Katsuhiro Yamaguchi, Akikazu Kaga, Akira Kondo, Yoshio Inoue, Shinichi Kamoi, Taro Yamaguchi
Osaka University (Japan) ........................................................................................................ 435

Simplified Models of Displacement Ventilation Systems
Dominique Manzoni, F. X. Rongère
Electricité de France EDF (France) .................................................................................. 443

Zonal Model for Displacement Ventilation Design
Eugene O. Shilkrot, Alexander M. Zhivov
Central Research Institute for Industrial Buildings (Russia) ............................................ 449

Environmental Measurement and Numerical Analysis of an Air Conditioning System Employing
Displacement Ventilation in Building K of the Head Office in Tokyo
Keiji Fukumoto, Toshio Murata
Nikken Sekkei LTD. (Japan) ....................................................................................... 459

Modelling Approaches for Displacement Ventilation in Offices
Jan L. M. Hensen, M. J.H. Hamelinck, M. G. L. C. Loomans
University of Strathclyde (UK) .................................................................................. 467
