Stochastic Structural Dynamics

Edited by
B. F. Spencer, Jr & E. A. Johnson
Department of Civil Engineering and Geological Sciences, University of Notre Dame, Indiana, USA
# Table of contents

## Preface

Non-Gaussian and nonlinear response analysis

Averaging a nonlinear stochastic oscillator

*P. Bernard & A. Rachad*

Strongly nonlinear system under non-white random excitations

*G.Q. Cai, Y.K. Lin & W. Xu*

Response and reliability of nonlinear systems under non-Gaussian excitations

*G.Q. Cai, Y.K. Lin & W. Xu*

Extreme-value prediction for nonlinear stochastic beam vibrations

*J.F. Dunne & M. Ghanbari*

A multi-variate non-Gaussian simulation algorithm

*K.R. Gurley & A. Kareem*

Response of dynamic systems under Poisson/delayed-Poisson processes

*S.-L.J. Hu, H. Li & Z. Hou*

Energy and spectral density in nonlinear random response

*S. Krenk*

Stochastic response to additive Gaussian and Poisson white noises

*S.F. Wojtikiewicz, E.A. Johnson, L.A. Bergman, B.F. Spencer Jr & M. Grigoriu*

Unilateral average scheme and its application to turbulent flow

*Y. Yong, G. Gao & X. Pu*

Linearization and nonlinearization

Cascade linearization of nonlinear systems subjected to Gaussian excitations

*G. Chen*

Zero and non-zero mean analysis of MDOF hysteretic systems via direct linearization

*L. Duval, S. Dobson, M.N. Noori, Z. Hou & H. Davoodi*

On the computational implementation of EQL in FE-analysis

*H.H. Emam, H.J. Pradlwarter & G.I. Schueller*
Dynamic behavior of duffing oscillators under a disordered periodic excitation
ZHou, M.N.Noori, Y.Wang & L.Duval

Application of probabilistic metrics to the non-linearization analysis
L.Socha

Some remarks on equivalent linearization of stochastic dynamic systems
L.Socha & M.Pawleta

Energy-based stochastic equivalent linearization with optimized power
X.Zhang & R.Zhang

**Stochastic control**

Reliability aspects in actively controlled structural systems
F.Casciati, A.Cobelli & L.Faravelli

Tuned vibration absorbers for vibroimpact systems
M.F.Dimentberg & S.Chen

Vibration control of airborne equipment using a circular steel ring
J.F.Ellison, G.Ahmadi & M.W.Kehoe

Optimal nonlinear feedback control of structures under random loading
W.Q.Zhu, Z.G.Ying & T.T.Soong

**Stochastic finite elements**

Stochastic finite element analysis of dynamically loaded rods
S.Du, J.V.Cox & B.R.Ellingwood

Stochastic finite element analysis of composite structures with random imperfections
L.L.Graham & S.C.Baxter

Calculation of stress intensity factors with fuzzy loading
R.Muhanna, R.Mullen & R.Ballarini

Micromechanics, random fields, and mesoscale finite elements
M.Ostoja-Starzewski

**First passage and structural reliability**

Treatment of multiple design points in reliability methods
S.K.Au, C.Papadimitriou & J.L.Beck

Pseudo analytical method for stochastic nonlinear systems
M.Hoshiya, K.Komiya & A.Sutoh

Adaptive importance sampling for stochastic nonlinear systems
M.Hoshiya, O.Taniguchi & A.Sutoh

Comments on importance sampling for time variant reliability problems
A.Naess
Reliability of redundant systems subject to Markovian type load combinations
S.A. Timashev

Structural redundancy under stochastic loads
Y.K. Wen, C.-H. Wang & S.H. Song

Stochastic differential equations and wave propagation

A local solution of Schrödinger equation by Monte Carlo simulation
M. Grigoriu & S. Mukherjee

Stochastic Doppler shift and encountered wave height and period in Gaussian waves
G. Lindgren, I. Rychlik & M. Prevosto

Acceleration waves in random nonlinear elastic/dissipative media
M. Ostoja-Starzewski & J. Trebicki

Stationary probability density functions for nonlinear SIDEs
C. Sobiechowski

Spectral analysis of non-smooth dynamical systems
W. W. Wedig

On the existence of maximum entropy distributions for stochastic systems
S. Wedrychowicz & K. Sobczyk

Stochastic modeling of fatigue

Crack growth in stochastic microstructures
S. Arwade, M. Grigoriu, A.R. Ingraffea & M.P. Miller

CDM analysis of fatigue crack initiation under random loading
B. Bhattacharya & B.R. Ellingwood

Rainflow matrix for switching random loads
P. Johannesson

An application of the cumulative jump model for random fatigue
D.J. Kirkner, K. Sobczyk & B.F. Spencer Jr

Rainflow cycles, Markov chains and electrical circuits
I. Rychlik

Effects on randomness and microstructure on material degradation
K. Sobczyk & B.F. Spencer Jr

A simple closed-form solution for stochastic crack growth analysis
J.N. Yang & S.D. Manning

Stochastic stability and bifurcation

Stochastic stability of viscoelastic plates in supersonic gas flow
S.T. Ariaratnam & N.M. Abdelrahman

</table>
On the random eigenvalue problem of large FE-models
G.I. Schueller & H.J. Pradlwarter

Effects of service inspections and flaw sizing errors on the reliability of vessels
F.A. Simonen & M.A. Khaleel

Analysis of stochastic systems with stiffness degradation
J. Trebicki

The role of risk and reliability in engineering education
J.T.P. Yao, C.B. Brown & F.S. Wong

Ocean and bridge structures

Environmental loads on compliant offshore towers
S. Daneshvaran & R. Morden

Subharmonic response of moored systems to ocean waves
M.F. Dimentberg, D.V. Iourtchenko & O. van Ewijk

Failure probabilities of multiple mooring dolphin systems of very large floating structures in waves
S. Kato & M. Saito

Influence of uncertainty of vehicle dynamics on the dynamic response of minor highway bridges
P.H. Kirkegaard & S.R. K. Nielsen

Influence of surface irregularities on the dynamic response of minor highway bridges
S.R.K. Nielsen & P.H. Kirkegaard

Nonuniform bridge piers subjected to random seismic excitation
J. Peng & G. Fu

Response analysis of ocean systems via moment-based Hermite polynomialization
M.A. Tognarelli & A. Kareem

Dynamic analysis of train-bridge system under random excitations
H. Xia, G. De Roeck & H. Zhang

Applications in earthquake engineering

Some remarks on the drift of elasto-plastic oscillators under stochastic excitation
F. Casciati, M. Domaneschi & L. Faravelli

Stochastic approach for damage assessment using neural network
M.Q. Feng & E.Y. Bahng

A new method for nonlinear and nonstationary time series analysis
N.E. Huang, Z. Shen, S.R. Long & M-J. Huang
Modeling of environmental loads

Analysis of non-Gaussian stochastic field of wind pressure
*M.Gioffrè, V.Gusella & M.Grigoriu*

Approximations for extremes of combinations of stochastic load effects
*A.Naess & J.Ø.Røyset*

Stochastic process model of snow load in Japan
*T.Takahashi*
