Steven L. Sauter and Joseph J. Hurrell, Jr.
National Institute for Occupational Safety and Health, Cincinnati, OH 45226, U.S.A.
CONTENTS

I. COMPUTERS IN ORGANIZATIONAL SETTINGS

   Diffusion and Impact of Computers in Organizational Settings: Empirical Findings from a Hospital
      James G. Anderson, Stephen J. Jay, Harlan M. Schweer, and Marilyn M. Anderson

   Organizational Barriers to the Diffusion of Computer Technology
      H. P. Lundsgaarde and J. W. Williamson

   Job-Related Responses to a Clinical Laboratory Computer Information System Seven Months Post Implementation
      Bonnie Kaplan and Dennis Duchon

   Computerization of Psychiatric Case Registers: Public Peril vs. Hazards to Confidentiality
      Michael Rahav

II. ORGANIZATIONAL DEMANDS AND STRESS

   Electronic Monitoring and Job Stress
      Michael J. Smith, Pascale Carayon and Kathleen Miezio

   A Concept of Control: Implications for Stress and Performance in Human-Computer Interaction
      Michael Frese

   Psychosocial Factors in the Introduction of Computerized Technology: Experiences from the Finnish Engineering Industry
      P. Seppälä, E. Tuominen, and P. Koskinen

   Job Performance and QWL in a Data Entry Task
      Paul T. Cornell

   Responses of Type A and Type B Individuals Performing a Supervisory Control Simulation
      S. G. Hart, V. Battiste, M. A. Chesney, M. M. Ward, and M. McElroy

   Personalized Recognition of Mental Workload in Human-Computer System
      M. Nowakowski

   VDT Work: An Occupational Health Hazard?
      B. G. Knave

III. SOFTWARE ERGONOMICS

   The Benefit/Cost of VDT Highlighting
      D. W. Martin, D. R. McDonald, and C. R. Patton

   Icons in Everyday Life
      William T. Wood and Susan K. Wood

   Small Windows on a Large System
      Dwight P. Miller
Is Bigger Better? The Effects of Display Size on Program Reading
J. F. Reisel and B. Shneiderman

The Modelling of Information Processing on Chinese VDT
S.-L. Hwang and C.-C. Ho

Making Customer-Oriented Variety Feasible for CIM: Customer-Oriented Product Design Software
Robert A. Karasek

A Notation for the Input and Storage of Mathematics: An Application of SGML
James R. Roesser

IV. ERGONOMIC DEMANDS

Counterintuitive Criteria for Visual Displays
Harry L. Snyder

Development of a Work-Rest Schedule for VDT Work
Helmut T. Zwahlen and Charles C. Adams, Jr.

Some Issues Related to Seated Posture and Workstation Design
M. J. Dainoff

Development and Evaluation of a Risk Based Interactive Decision Aid
James P. Jenkins and James C. Glynn

Feedback Content During Complex Skill Acquisition
Jean McKendree

Study on VDT Display Color and Readability
S. Fukuzumi, I. Yamamoto and Y. Hayashi

Quantitative Evaluation of VDT Operations Through the Analysis of Spatio-Temporal Characteristics of Eye Movements
Susumu Saito

Noise Problem in Japanese Automated Office
Yoshio Tominaga and Naoki Maehara

V. COGNITIVE DEMANDS

Occupational Health and the Computer-Mediation of Information Work: Research Needs
Steven L. Sauter and Joseph J. Hurrell, Jr.

Problems of a Novice: Some Introspective Observations
A. F. Sanders

Development of a Scale to Assess Occupational Cognitive Demands
Daniel C. Ganster, Joseph J. Hurrell, Jr., and Linda T. Thomas

Motor Feedback Control of Human Cognition: Implications for the Cognitive Interface
Thomas J. Smith and Karl U. Smith

Cumulative Fatigue Symptoms of Dialogue and Data Entry VDU Operators
T. Marek and C. Noworol
VI. SOCIO-TECHNICAL ASPECTS

Human-Interface Architecture: Its Significance for Office Automation System
Hitoshi Watanabe

Changing Roles in an Electronic Industry: Engineers Using CAD System and Secretaries Using Word-Processing System
Gunilla Bradley

The Interactive Computer as a Social Stimulus in Human-Computer Interactions
Leo R. Quintanar, Charles R. Crowell, and Patrick J. Moskal

Examining the Silent Majority: A Current Perspective on Predictive Variables Associated with Managerial and Clerical ADP Users
Stephen R. Ruth and Ella P. Gardner

Skills Analysis in Human-Computer Interface: A Holistic Approach
Lillian G. Malt

Management of Communications in Customer/System Interface Training
W. S. Leicht

Questionable Assumptions and Misconceptions in Ergonomic Research on Human-Computer Interaction: A Discussion
Jack Litewka

"80/20 OA" Measurement of White Collar Workers
David L. Shay

Cognitive Press in Computer-Mediated Work
T. K. Bikson

Working Conditions and Health Complaints of Women Office Workers
Barbara G. F. Cohen, Chaya S. Piotrkowski and Kevin E. Coray
