Eurojoin 3

including a Special Seminar: Quality Management with EN 729

Bern 30th March to 1st April 1998

Welding technology at work
Part 1
Part 1

Oral Presentations

Special Seminar: Quality Management with EN 729

Monday 30.3.1998, 15.30–18.00
1. Quality management with EN 729 – an Overview (including the link to EN 287, 288 and 719), D. von Hofe, Germany 3
2. Use of EN 729 for welding steel structures, R. Zwätz, Germany 13
3. Die EG-Richtlinie «Druckgeräte» und die EN 729, P. Tschesche, Germany 23
4. The EWF Certification Scheme according to EN 729, M. Scasso, Italy 29

Tuesday 31.3.1998, 8.30–10.30
1. Subcontracting Welding Activities, C.G. Lindewald, Finland 41
2. EN 729 certification in Denmark, U. Larsen, Denmark 47
3. The Use of EN 729 in the Machine Industry, A. Graichen, Sweden 49
4. Improving the Productivity and Quality of Welding by Implementing EN 729, K. Leino, Finland 51

Tuesday Morning/Afternoon: Session A

Quality Management

11.00–11.25  E. Engh, Norway 63
Quality Systems for fabricators requiring compliance with EN 729
11.25–11.50  A. Kinzel, Germany 75
ISO 9000 – Chance or Curse for Laser Job-Shops?
Computer aided parameters selection in view of arc welding quality assurance
13.55–14.20  D. Rehfeldt, R. Wittkopf, Germany 89
How Calibration of Welding Power Sources Becomes Efficient for Quality Management
Cancelled  H. Scheermann, Germany 97
Vollständige bautechnische Unterlagen – eine Voraussetzung für die qualitätsgesicherte Fertigung geschweisster Bauteile
15.15–15.40  G. Solomon, G. Marina, G. Iacobescu, V. Nicloși, Romania 107
Aspects of the Quality Assurance concerning cracking at heat in welding
15.40–16.05  G. Weber, Germany 113
New Methods of Quality Assessment of Resistance Spot Welds
16.05–16.30  R. Zwygart, Switzerland 137
Schweissarbeiten in engen Räumen
Wednesday Morning: Session A
Quality: Personnel Qualification

08.30–08.55  J. L. Breat, France
Welding Education and training: International Harmonization
and Situation in France

08.55–09.20  J. Quéré, C. Desfertilles, France
Personnel Qualification and Certification in France

09.20–09.45  H. Schenker, Switzerland
New European Welder Education

10.15–10.40  A. Gross, O.D. Hennemann, Germany
Is the Personnel Qualification Necessary for the Transfer

10.40–11.05  H. G. Gross, P. Seyffarth, Germany
The way and job function for personnel of operational quality management
in enterprises including welding production

11.05–11.30  J. K. Martikainen, H. Eskelinen, R. Suoranta, Finland
A hypermedia based program module for education of total quality
management in welding technology

Monday Afternoon, Session B
Economics in Production: General

15.30–15.55  K. Blome, Netherlands
The V-max Concept

15.55–16.20  M. Dvorak, H. Seifahrt, P. Heimgartner, Switzerland
GMAW Welding of Super Duplex Stainless Steel using Cored Wires

16.20–16.45  U. Diltzey, U. Reisgen, H. Bachem, Germany
Increased Productivity, as a Result of Higher Deposition Rate
and Higher Welding Speed by Using Two-Wire-GMAW Processes

16.45–17.10  J. K. Martikainen, Finland
Cost comparision of arc welding methods in the welding of austenitic
stainless steel

17.10–17.35  K. I. Johnson, United Kingdom
Recent Developments in Joining Processes

Tuesday Morning, Session B
Design

08.30–08.55  H. Cerjak, B. Buchmayr, Austria
Mathematical Modelling of Weld Phenomena

08.55–09.20  M. Clerge, J. J. Janosch, France
Numerical Simulation of Manual Arc Welding of Fillet Welds (Monopass
and Multipass) – Influence of the Welding Sequence on the Residual Stress State

09.20–09.45  J. J. Janosch, S. Debiez, M. Clergé, France
A local approach for optimising the fatigue strength of welded assemblies

10.15–10.40  H. Herold, M. August, R. Wersuhn, N. Woywode, Germany
Steifigkeit, Schwingungs- und Dämpfungsverhalten konventionell
und laserstrahlgeschweisster Leichtbaukonstruktionen
10.40-11.05  G. Iacobescu, G. Solomon, Romania
The humidity of the coating electrodes important factor of the welded joint cold cracking

11.05-11.30  S. Gao, L. Budde, Germany
Determination the strength of self-piercing riveting Joints

11.30-11.55  G. Walt, Switzerland
Choosing the Best Coating System

Tuesday Afternoon: Session B
Economics in Production: Applications

13.30-13.55  M. Harzenmoser, Switzerland
Electroslag welding – a possible way to manufacture the endcaps of the new CMS magnet

13.55-14.20  M. Chtrikman, Russia
Perspective gas-shielded arc welding processes for manufacturing intricate panels for aerospace structures

14.20-14.45  T. Widder, L. Budde, J. Bischoff, Germany
Fügen von Magnesiumlegierungen

15.15-15.40  B. Czwornog, Poland
Welding of the Polish section of Russia-Germany transit gas pipeline

15.40-16.05  L. Mráž, P. Bernasovsky, J. Orszaghova, A. Simon, J. Zaboj, Slovakia
Girth welding of steel pipes clad with thin layer of stainless steel

16.05-16.30  K. Iversen, Germany
Modern Automatic Welding Procedures in Fabrication of Pressure Vessels

Wednesday Morning: Session B
Quality: Testing

08.30-08.55  A. Koruk, M. Aksoy, N. Orhan, Turkey
Mechanical Testing of C22 with 24CrMoV55 Welded Materials by Means of GMAW

08.55-09.20  D. Chauveau, M. Barberi, France
Fast ultrasonic testing of welds

09.20-09.45  F. Rustichelli, G. Albertini, G. Bruno, F. Fiori, M. Rogante, Italy
Non destructive determination of residual stresses by neutron diffraction in welded structures

10.15-10.40  I. Rak, Slovenia
Planar faults acceptability assessment detected in HSLA weld joint of severe loaded constructions

10.40-11.05  J. C. Suárez, H. Murakawa, Y. Ueda, Spain
Numerical Simulation of Crack Tip Opening Displacement Testing in Multipass Welds with Residual Stresses

11.05-11.30  W. Scheel, K. Wittke, M. Nowottnick, U. Pape, Germany
Testing of High Temperature Characteristics of Solders and Solder Joints
Part 2

Monday Afternoon, Session C
Economics in Production: Processes

15.30-15.55 **U. Dilthey**, A. Brandenburg, M. Möller, Germany 451
Study on optimization of adhesive spread and development of a new controlling concept for velocity controlled coating

15.55-16.20 **F. López**, J. Suarez, A. Güemes, F. Molleda, Spain 463
Characterization and Failure Modes in Hybrid Adhesive/Spot Weld Joints

16.20-16.45 **L. Dorn**, A. De, O. P. Gupta, I.S. Chang, Germany 471
Advanced Electrode Design for Resistance Spot Welding of Galvanized Steel-a Numerical and Experimental Study

16.45-17.10 **O. Hahn**, J.R. Kurzok, A. Rohde, Th. Thesing, Germany 481
Simulation of the mechanical properties of spot welds and mechanical joints

17.10-17.35 **H. Mecke**, R. Döbbelin, D. Heyder, R. Brinckmann, Germany 483
Simulation aided analysis and synthesis of electronic power sources on the example of inverters for resistance welding

Tuesday Morning, Session C
Economics in Production: Processes

08.30-08.55 **H. Bartuch**, K. Kaschlik, E. Knorre, S. Schundau, G. Kühler, Germany 499
Applications of Diffusion Bonding in Joining of Microsystems

08.55-09.20 **A. Guelman**, Russia 503
The application of HIP diffusion bonding for production of new types of products from dissimilar metals

09.20-09.45 **R. Pascu**, M. Pascu, Romania 511
The study of heterogeneous joints metal-metal and ceramic-metal

10.15-10.40 **H. Gouveia**, A. Cabral, S. Estanislau, Portugal 521
Laser surface structural modifications without fusion on Niobium

10.40-11.05 **J. K. Kristensen**, Denmark 529
What does Laser Welding offer to Structural Steels?

11.05-11.30 **A. Ludovico**, T. Lucchese, G. Casalino, Italy 539
Rastered electron beam influence on the welding process of an AISI 316 stainless steel

11.30-11.55 **A. Ludovico**, G. Daureilio, G. Casalino, Italy 553
AISI 420, AISI 440 martensitic stainless steels, laser welded by a sandwich austenitic or ferritic thin sheet technique

11.55-12.20 **M. Pascu**, Romania 561
Considerations about the electron beam welding of titanium

Tuesday Afternoon: Session C
Economics in Production: Materials

The effect of simulated cycles of welding and repair welding on the properties of duplex stainless steels

Modelling of ferrite content in the HAZ of duplex stainless steel
Wednesday Morning: Session C
Economics in Production: Processes

08.30 - 08.55  E. Blumschein, Germany
Towards more regular short arc welding

08.55 - 09.20  G. Cannet, France
Advances in Oxycutting: What's new in the good old process?

09.20 - 09.45  W. Kielczynski, W. Walczak, Poland
Calculation and measurement of post-welding residual stress in butt welding joints

10.15 - 10.40  P. Jernström, J. Martikainen, Finland
Influence of base material on the selection of weld gases in plasma arc keyhole welding

10.40 - 11.05  D. Dragulescu, M. Toth-Tascau, Romania
Dynamic comparative study of the welding robot Cloos

11.05 - 11.30  M. Emonts, France
Einrichtungen zum automatisierten Schweissen im Energieanlagenbau

11.30 - 11.55  M. Veikkolainen, I. Naams, J. Martikainen, Finland
Increasing of the power of the welding robot to the high-power area

Tuesday Afternoon: Session D
Economics in Production: Aluminium

13.30 - 13.55  J. M. Fortain, E. Verna, France
Plasma Arc Welding of Aluminium and Aluminium Alloys

13.55 - 14.20  J. M. Gómez de Salazar, A. Urena, S. Manzanedo, M.I. Barrena, Spain
TIG Welding of Aluminium Matrix Composites Reinforced with Alumina Particles: Microstructure and Mechanical Properties

14.20 - 14.45  G. Marina, G. Solomon, G. Iacobescu, Romania
The effect of weld speed on microstructures of the alloys AlSi12Fe

14.45 - 15.15  U. Füssel, J. Husner, K. Wittke, O. Scheffler, Germany
Choice of bonding-joints for using in light-constructions of aluminium

15.15 - 15.40  M. Pinto, H. Gouveia, A. Valente, Portugal
Evaluation of the Mechanical Behaviour of Hybrid Joints of Aluminium Alloys
Poster Sessions

E. Constantin, D. Iordachescu, Romania  
Equipment and technologies for antigravitational  
729

D. Dehelean, P. Fogarassy, Romania  
Expert System for Resistance Welding  
739

V. Georgescu, D. Iordachescu, Romania  
Magnetizing Systems for ROTARC welding  
751

K. Grubic, Croatia  
Physical Relationships between the shielding gas and process stability at MAG welding  
759

M. Harzenmoser, Switzerland  
Interesting aspects when welding high nitrogen stainless steels  
769

I. Juraga, K. Grubic, Croatia  
Effects of welding conditions upon the pitting corrosion in the weld zone of the joints made in high alloyed-corrosion resistant steels  
777

S. Kasch, G. Köhler, H. Müller, Germany  
Die Anwendung von Diodenlasern zum Löten  
785

Z. Kozuh, S. Kralj, N. Sakic, Croatia  
Effects of design factors on the strength of a single LAP adhesive joint  
789

S. Kralj, Z. Kozuh, B. Bauer, Croatia  
Analysis of joining of flanges to the billow tubes  
801

A.V. Liousshinsky, Russia  
Low-temperature diffusion bonding through ultradisperse metal powders  
811

I. Pires, L. Quintino, Portugal  
Analysis of the influence of shielding gas mixtures on features of MIG/MAG welding  
819

S. Spauszus, G. Köhler, M. Neuhäuser, T. Furche, Germany  
Grünfolien – ein neues Material zum Fügen von Keramik, Glas und Glaskeramik  
831

W. Walczak, W. Kielczynski, Poland  
The application of transition joints to welding of ship steel-aluminium structures in Poland  
833

F. Weber, M. Harzenmoser, Switzerland  
The Characterization of laser welded joints at EMPA  
839

E. Zimmermann, J. Unangst, St. Reglin, G. Köhler, Germany  
Diffusionsschweissen- ein Fügeverfahren für hohe Präzision und Festigkeit, für verschiedene Materialien, für optische Anwendungen  
847
