ISOTOPES AND RADIATION TECHNOLOGY IN INDUSTRY

Proceedings of the International Conference on Applications of Radioisotopes and Radiation in Industrial Development (ICARID-94) February 7-9, 1994, Bombay, India.

EDITORS:

S. M. RAO and K. M. KULKARNI

Isotope Division
Bhabha Atomic Research Centre
Bombay 400085. INDIA.

Organised by
National Association for Applications of Radioisotopes and Radiation in Industry (NAARRI), Bombay, India

In Co-operation with
International Atomic Energy Agency (IAEA), Vienna, Austria

Co-sponsors
Department of Atomic Energy (DAE), Government of India
Indian Nuclear Society (INS), Bombay, India
Indo-French Technical Association (IFTA), Bombay, India
CONTENTS

RADIATION PROCESSING

Industrial Applications of Electron Accelerators ........................................1
   A. Singh, H. Singh

Radiation Sterilisation of Tissue Allografts for Transplant Surgery .............23
   G.O. Phillips

Recent Developments in Electron Beam Machine Technology .....................53
   T. Sadat, A. Ross, H. Leveziel

State of the Art in Electron Beam Processing of Industrial Off-Gases ..........69
   H. -R. Paur

Gamma Irradiators - Developments in India ............................................89
   K. Venkatacharyulu, M.R. Shah

ELV-Type (Rectifier) Accelerators and Their Applications ..........................97
   R.A. Salimov

Dosimetry for Radiation Processing ......................................................103
   A. Kumar, A.R. Reddy

Radiation Processing in India - Status and Future Prospects .....................113
   A.B. Majali

The EB Treatment - Current and Future Applications ................................123
   V. L. Auslender

Radiation Processing Activities in The Islamic Republic of Iran: Ten Year Review ..................................................137
   M. Sohrabpour

Crosslinked Flexible PVC: Structure - Property Relationships .......................145
   D.A. Dabholkar, K.K. Jain, N.K. Gupta, G.N. Mathur

Salmonella and Spoilage Bacteria in Chicken Parts: Irradiation with Low Energy Electrons .................................................................153
   H. Singh, I. George, K. Mehta

Status of Radiation Preservation of Foods in India ....................................169
   S.R. Padwal-Desai, A. Sharma

Food Irradiation - A Global Scenario ....................................................177
   T. Sadat, A. Ross, H. Leveziel
Effect of Urea Addition on the Radiation Vulcanisation of Natural Rubber Latex .................................................................185
S. Sabharwal, C.V. Chaudhari, B.R. Dhanwade, Y.K. Bhardwaj, A.B. Majali

Development of Processing Techniques with Industrial Electron Beam Accelerator .........................................................191
K. S. S. Sarma, R. S. Deshpande, A. R. Kalurkar, S. A. Khader

Radiation Disinfestation of Basmati Rice ............................................203
V. S. Rao, A. S. Gholap, H. R. Adhikari, P. M. Nair

**TRACER TECHNOLOGY**

Application of Tracer Techniques to Industrial Troubleshooting and Environmental Pollution Control ..................215
J. F. Easey

Radioactive Tracers in Process Industry ...........................................231
J. C. Mishra

Tracer Applications in Process Control ...........................................237
J. Thyn

Estimation of Shell Thickness in A Continuously Cast Steel Billet Using Radiotracers .........................................251
A. S. Prasad, J. C. Pandey, G. Kaur

Isotope Applications for Effective Management of Indian Oil Fields .................................................................261
Prabuddha Jain

Industrial Applications of Radiotracers in Indonesia ..........277
Wandowo

Radiotracer Application in Bedload Transport - Case Studies at Calcutta Port ................................................287
A. S. Pendharkar, V. N. Yelgaonkar, H. J. Pant,
U. Saravana Kumar, G. N. Mendhekar, S. V. Navada

Radioisotope Tracer Study in Indirect Rotary Dryer ........301
C. V. Manian, H. P. Dedhia, H. J. Pant

A $^{172}\text{Lu}$ Generator for Radiotracer Applications in Industry ....309

Radiotracer Study of Dispersion of Sewage in Malad Creek ..........317
V. N. Yelgaonkar, U. Saravana Kumar, S. V. Navada
NUCLEONIC CONTROL SYSTEMS, NON-DESTRUCTIVE TESTING AND NUCLEAR ANALYTICAL TECHNIQUES

Recent Developments in Nucleonic Control Systems and On-stream Analysers for the Mineral and Coal Industries ........................................323
P. J. Mathew

Recent Developments in Nucleonic Control Systems for Steel Industry .................................................................337
H. Amano

Nuclear Analytical Techniques in Industry and Environment .................................................................345
S. Gangadharan

Total Reflection XRF and X-ray Microfluorescence Analysis ...............................................................355
A. Markowicz, G. Bernasconi, N. Haselberger, M. Nagj, V. Valkovic

Ionisation Detectors as Monitors of Toxic Compounds in Air ...............................................................365
J. W. Leonhardt

Status and Prospects of Nucleonic Control Systems: Applications in India ................................................379
K. S. Murthy

Radiation Applications in NDT in Space Program ..........................................................385
K. Viswanathan

Neutron Transmutation Doping of Silicon: Some Experiments at the IEA-R1 Research Reactor ..................................................395
A. W. Carbonari, W. Pendl Jr., R. N. Saxena

Standardisation of Methodology for Characterisation of Leak Sources and Notches by Microfocal Radiography ........................................407
C. Babu Rao, B. Venkatraman, Baldev Raj

The Benefits and Industrial Experience from Spectrometric Borehole Logging Technology in the Pilbara Iron Ore Deposits ........................................415
J. Charbucinski, P. L. Eisler

Assessment In Situ of Physical Characteristics of Subsoill by Nuclear Logging of Boreholes at Kachchh Tidal Power Project, Gujarat ........................................437
R. K. Kamble, S. D. Vaidya, P. J. Desai

A Gamma-ray Computed Tomographic Imaging System for Industrial NDT Application ..................445
Umesh Kumar, S. S. Datta, G. S. Ramakrishna
Separation and Analysis of Hydrogen Isotopes by Gas Chromatography .................................................. 455
Y. P. Naik, P. V. Joshi, M. Subramanian

Development of Gamma Scanning Technology for Industrial Columns: An Overview .................................. 463

Radioisotope Aided Switching Speed Enhancement of Low Pressure Miniature Spark Gaps ......................... 469
A. Sharma, P. H. Ron, M. S. Naidu

Evaluation of Air-scatter Exposure Rates Outside the Boundary of a Radiography Enclosure of a High Energy Electron Accelerator ................................................................. 479
A. Sharma, Arun Kumar, C. P. Raghavendran, G. Venkataraman

Rapid and Non-destructive Analysis of Alloys by Radioisotope Excited X-ray Fluorescence .......................... 485

An Expert System to Aid Radiography Testing of Components ................................................................. 491
C. Rajagopal, B. Venkatraman, Baldev Raj

INTERNATIONAL COOPERATION

International Cooperation Through Nuclear Science and Technology: An Australian Perspective .................. 497
P. L. Airey

Regional Cooperation in Nuclear Technology Transfer .................................................................................. 507
J. F. Easey

Author Index .................................................................................................................................................. 515
