Members of the National Organising Committee iv  
List of Sponsors v  
Reviewers of 2ndIHEMCE vi  
Remarks from the Co-chairs ix  
Preface xi

## PLENARY LECTURES

1. Non-Intrusive Measurement Methods Applied to Energetic Material Regression Rate Determination  
   Franck Cauty  
   3

2. Some Issues in the Development and Production of HTPB Propellants  
   V. N. Krishnamurthy  
   18

3. Studies on Reactive Solid Combustion Behavior - Are Any New Approaches Possible?  
   H. S. Mukunda  
   28

4. Development of Large Solid Propulsion Systems for Launch Vehicles  
   Rajaram Nagappa  
   33

   E. V. S. Namboodiry  
   40

6. Disposal of Munitions and Explosives: A Eco-Friendly Approach  
   Haridwar Singh  
   50

## BALLISTICS

7. Ordnance Systems Ballistic Effectiveness Increase by the Charge Combustion Progressivity Programming  
   Alexey M. Lipanov and Alexander N. Lukin  
   59

8. Thermodynamic Considerations of Steel Erosion with Application to Gun Barrels  
   V. Rosenband, Y. Schneebaum, and A. Gany  
   64

9. Development of Scarfed Nozzle for Booster for Anti Tank Missile  
   70

10. Development of Supersonic Blast-Tube for Sustainer for Anti Tank Missile  
    74

11. High Muzzle Velocity Guns  
    78
COMBUSTION

12. Combustion of High Energy Heterogeneous Condensed Systems
   Yurii Frolov

13. Fractal Analysis of Heterogeneous Condensed System Combustion
   A. Pivkina, Yu. Frolov, and M. Yablokov

14. Study of Combustion Instability in Gas Turbine Afterburner
   Venkata Raghavendra, A. P. Haran, and B. S. Samaga

15. Non-Simultaneous Burnout of Energetic Material Components: Theory and Experiment
   Nikolai M. Pivkin

16. Particle Size Distribution of Aluminium Oxide Droplets in Propellant Combustion Residue

17. Ignition and Combustion of Aluminium Particles in an Oxidising Stream
   V. Suresh, Job Kurian, and K. A. Bhaskaran

19. Performance Evaluation of Glycidyl Azide Polymers as Integrated Ram Rocket Propellants
   S. K. Sahu, Madhuri V. Chavan, Jyotsna V. Thakur, S. G. Kulkarni, and S. P. Panda

20. Aluminum Agglomeration in Solid Propellants: Formulation Effects
   O. G. Glotov, V. E. Zarko, V. V. Karasev, and M. W. Beckstead

21. Energetic Ballistic Modifier for Double Base Propellants - Lead Salt of Trinitronilinoacetic Acid
   T. Mukundan, R. R. Soman, V. K. Bhat, and Haridwar Singh

22. Start Transient Phase of a Pressure-fed Cryogenic Engine

23. Effect of Burning Rate Modifiers on Surface Features of Composite Solid Propellants
   R. D. Swami and S. Krishnan

   R. Bhaskara Rao, V. Rajaveni, M. R. Somayajulu, and A. K. Mondal

25. Prediction of Effect of Agglomeration on Burning Rate of Mg-NaNO₃ Propellant
   R. Bhaskara Rao, P. Srinivasa Rao, and Harihar Singh

26. Propellant of High Pressure Exponent for Variable Flow Ducted Rocket
   M. R. Somayajulu, K. R. Meghsyam, M. V. V. Char, and A. K. Mondal

27. Behaviour of Ammonium Perchlorate Propellants with Glycidyl Azide Prepolymer
   A. N. Nazare, S. N. Asthana, and Haridwar Singh

28. High Burn Rate Energetic Extruded Double Base Propellants
   S. N. Bailur, S. M. Pundalik, Usha Meshram, K. S. Mulage, and S. N. Singh

29. Performance of Indigenous Hydroxyl Terminated Poly Butadiene in Solid Booster Production
30. Experimental Investigation of Supersonic Combustor  
V. K. Saraswat, Sathish Kumar, Manoj Kumar, P. K. Sinha, and D. N. Reddy

31. Revisiting the Combustion Model of Ammonium Perchlorate  
P. A. Ramakrishna, P. J. Paul, and H. S. Mukunda

32. Nonlinear Intrinsic Instability of Solid Propellant Combustion including Gas-phase Thermal Inertia  
K. R. Anil Kumar and K. N. Lakshmisha

ENERGETIC MATERIALS CHEMISTRY

33. Modified Polyvinyl Chloride-Based Propellants Series Flexolit  
Vladica S. Bozic and Djordje Dj. Blagojevic

34. Processing Technique of Rocket Propellants Based on Modified Polyvinyl Chloride  
Djordje Dj. Blagojevic and Vladica S. Bozic

35. Processing of Liquid Propellants by Membranes Separation Techniques  
R. Ravindra, S. Sridhar, A. A. Khan, and A. Kameswara Rao

36. Extraction Studies of Monomethylhydrazine Liquid Propellant by Pervaporation  
R. Ravindra, A. A. Khan, and A. Kameswara Rao

37. Time-Temperature Dependence of Viscoelastic Behaviour of a Composite Solid Propellant  
V. R. Sanal Kumar, Lolit George, Susamma Jacob, V. J. Saji, and K. B. M. Nambudiripad

38. Burn Rate and Performance Studies on Solid Propellants Having Energetic Binders  
S. R. Jain, C. Oommen, and S. Amanulla

39. Low Temperature Behaviour of Polymeric Systems Used in Rocket Motors  
S. S. Bhagavan, N. Prabhakaran, N. Muralidharan, S. Someswara Rao, and K. N. Ninan

40. Effect of Binder Composition on the Properties of Composite Solid Propellants  
V. Sekkar, M. Rama Rao, V. N. Krishnamoorthy, and S. R. Jain

41. Solid Composite Propellant Modification Using A-B-A Triblock Copolymers  
V. Vasudevan and G. Sundararajan

42. Preparative Methods for Some High Energy Oxidisers and Binders  
S. Venkatachalam, Solomon Thomas, A. U. Francis, R. Ramaswamy, and K. N. Ninan

43. Synthesis and Evaluation of Hydroxyl Terminated Glycidyl Azide Polymer  
A. U. Francis, S. Venkatachalam, and K. N. Ninan

44. Rheological Characteristics of Ammonium Perchlorate – Hydroxyl Terminated Polybutadiene Propellants  
with Different Curatives  

45. Effect of Antioxidants on Thermo Oxidative Ageing of Hydroxyl Terminated Polybutadiene Binder  
A. Muthu, A. Hariharasubramanian, K. G. Kannan, and K. N. Ninan

46. A Redox Method for the Estimation of Nitrogen in Glycidyl Azide Polymer  
A. Madhavan, T. S. Ramasubramanian, A. Hariharasubramanian, K. G. Kannan, and K. N. Ninan

47. Analysis of Pyrotechnic Compositions for Oxidiser Content by Ion Chromatography  
Salu Jacob, B. Sivakumar, C. Muthu, K. G. Kannan, and K. N. Ninan
48. Thermal and Mechanical Characteristics of Chain-modified Hydroxyl Terminated Polybutadiene

Korah Bina Catherine, Benny K. George, K. Krishnan, and K. N. Ninan

273

49. Performance of Extended Hydroxyl Terminated Polybutadiene Based Propellants in Large Boosters

277

G. C. Pant, S. C. Mishra, and V. Ramanujachari

282

51. High Burn Rate Propellant Development Using Different Techniques

287

52. Process Parametric Studies on High Solid Loaded Hydroxy Terminated Polybutadiene Propellants

A. I. Mathew, V. A. Thomas, T. L. Varghese, A. J. Kurian, and S. S. Rao

291

53. Developmental Studies on Very Highly Solid Loaded Hydroxy Terminated Polybutadiene Propellant

A. J. Kurian, T. L. Varghese, V. A. Thomas, A. I. Mathew, and K. N. Ninan

294

54. Evaluation of New Generation Hydroxyl Terminated Polybutadiene Propellants of Longer Pot-life

298

55. Development of a New Generation High Pot-life Hydroxyl Terminated Polybutadiene Propellant

T. L. Varghese, N. Prabhakaran, S. S. Rao, K. N. Ninan, and K. S. Sastri

302

56. Submicron Powders by Pneumatic Processing of Electric Corundum and Solid Propellant Combustion Products

Yuri Biryukov, Alexander Vorozhtsov, Alexander Roslyak, and Leonid Bogdanov

307

57. Structure Property Relations of Chemically Modified Hydroxyl Terminated Polybutadiene

K. Ambika Devi, Sreelatha S. Panicker, and K. N. Ninan

312

58. Effect of Hydrocarbons on the Aging Behavior of Composite Solid Propellant

315

59. Theoretical Investigations on 2, 4, 6, 8-Tetranitro-1, 3, 5, 7-Tetrazacyclooctane – A High Energy Molecule

Shridhar P. Gejji, Sudhir A. Kulkarni, M. B. Talawar, T. Mukundan, and E. M. Kurian

320

60. Performance of Metallised Liquid Propellants

K. Aisha Beevi and K. Ramamurthi

324

61. Studies on Antioxidants for Hydroxy Terminated Polybutadiene Based Composite Propellants

Javed Athar, J. S. Chhabra, J. P. Agrawal, and Haridwar Singh

330

62. Factors Affecting Pressure Index of Solid Rocket Propellants

A. R. Kulkarni, K. S. Dalal, P. A. Phavade, and J. M. Joshi

335

63. Synthesis and Thermal Studies of Metal Salts of 2,4,6 – Trinitroanilinobenzoic Acid

R. S. Palaiah, N. R. Bulakh, S. Singh, M. B. Talawar, and T. Mukundan

338

64. Detailed Studies on Orange Coloured Pyrotechnic Smoke Composition

Amarjit Singh, U. G. Phapale, and Haridwar Singh

341

65. Radiometric Studies of Pyrotechnic Red and Green Coloured Smoke Compositions

Amarjit Singh, S. A. Joshi, and Haridwar Singh

344

66. Glycidyl Azide Polymer Based High Energy Gun Propellant

R. S. Damse and Haridwar Singh

346
67. Studies on Cellulose Acetate Binder Based Low Vulnerability Gun Propellant
C. R. Dayanandan, R. R. Sanghavi, K. M. Dhulekar, M. M. Joshi, and A. G. S. Pillai

68. Role of Glycidyl Azide Polymer as Plasticiser in Low Vulnerable Ammunition Propellant
R. R. Sanghavi, C. R. Dayanandan, S. P. Velapure, A. G. S. Pillai, and J. S. Karir

69. Phase Stabilised Ammonium Nitrate Composite Propellants Using Rare Earth Oxides
Shyamala Ramamurthy and S. N. Asthana

70. Hydroxy Terminated Polybutadiene Based Insulator for Case Bonded Composite Propellant Motors
M. Gupta, S. D. Kakade, P. K. Divekar, T. John, and P. G. Shrotri

EXPLOSIVES AND IGNITERS

71. A Ballistic Explanation of Ignition Peak of Low Velocity Transient Motors
V. R. Sanal Kumar and B. N. Raghunandan

72. Studies on Ignition Characteristics of Boron-Potassium Nitrate Pellets
C. Jasper Lal, L. Sampath, C. R. Thomas, Desh Deepak, and M. S. Padmanabhan

73. Mathematical Modelling and Computer Simulation of a Pyrovalve
V. Suresh, V. Dilip, Ani Daniel Kurien, and K. Krishnadas

74. Electrostatic Discharge Sensitivity of Electro Explosive Devices – A Case Study
H. Kumar, R. Manoj, M. Ravindran, C. B. Kartha, and V. V. Babu

75. Development of Thin Layer Explosive Transfer Line
M. Nallaperumal, Zacharia Koshy, K. Jeyaprakash, C. B. Kartha, and V. V. Babu

76. Studies on a Few Potassium Perchlorate Based Pyrotechnic Formulations
A. G. Rajendran, C. B. Kartha, and V. V. Babu

77. Performance Characteristics of an Oxy-hydrogen Spark Torch Igniter
M. Aiyappan Pillai, M. P. Assiz, and K. Ramamurthi

78. Synthesis, Characterization and Evaluation of Explosive Properties of 5-Picrylamino-1,2,3,4-Tetrazole
V. K. Bapat, R. N. Surve, and J. P. Agrawal

79. A Comparative Study on Explosive and Thermal Properties of Less Sensitive Initiatories
Javed Athar, J. S. Chhabra, and J. P. Agrawal

80. Effect of Moisture/Water Content on the Performance of Gun Powder Based Igniters
H. J. Gandhi, A. Muttalib, V. S. Bhingarkar, A. G. Dugam, and B. K. Athawale

81. Demolition of Unexploded Explosive Ordnance

82. Study of Acceleration of Metal Plate under Explosive Loading
H. S. Yadav

83. Spatial Positioning of Initiator for Fuel Air Explosive Detonation
B. S. Sihota, A. Apparao, C. P. Achuthan, M. M. Lavalekar, A. M. Karanjkar, and M. Balaji
85. Amine Sensitization of Secondary Explosives Using Laser Induced Ignition  
A. L. Ramaswamy, T. Mukundan, and M. M. Chaudhri

86. Optimisation of Charges Used for Explosively Formed Projectiles  
Eugeniusz Milewski, Maciej Miszczak, Jan Szymanowski, Karol Jach, Maciej Mroczkowski, and Krzysztof Rutyna

HAZARDS, SAFETY, AND IMPLEMENTATION

87. Fault Tree Analysis of Powder Compaction in Fuel Rich Propellant Processing  
Chitra Rajagopal and P. S. Rao

88. Hazard Characteristics of Ammonium Perchlorate Based Hydroxy Terminated Poly Butadiene Propellants  
Ramu and V. N. Krishnamurthy

89. Safety Aspects during Manufacture of Propylene Glycol Dinitrate  
A. S. Murthy

90. Quality Control and Surveillance in the Manufacture of Solid Propellant  

91. Raw Materials Processing: Meeting the Needs of Future Large Solid Boosters  

92. Experiences in Processing Maiden Large Sized Motor  
P. P. Singh, K. K. Radhakrishnan, B. Bhattacharya, and V. L Narasimhan

MEASUREMENT TECHNOLOGY

93. Viscoelastic Characterization of Solid Propellant using Tubular Test  
V. R. Sanal Kumar and G. Sunil

94. Determination of Propellant Burning Rate Law from Specimen Tests using Ultrasonic Technique  
Desh Deepak, R. Jeenu, P. Sridharan, and M. S. Padmanabhan

95. Determination of Very Slow Burning Velocity Using Microgravity Technique  
S. Okajima, T. Kawakami, and B. N. Raghunandan

96. Transition in Merging and Separation of Coaxial Jets  
C. Sivakumar, B. N. Raghunandan, and S. Nagaraj

97. Assessment of Solid Propellant Mechanical Behaviour in Multibatch Booster Segment Production  
Lakshmi Raman, V. Krithivasan, P. Chandrasekaran, R. N. Bhattacharya, and S. K. Athithan

98. Neutron Radiography of Pyrodevices Used in Spacecraft  

REACTIVE SYSTEMS MODELING

99. Effect of Oxidiser Slab Thickness on Temperature Field in a Sandwich Propellant  
B.T.N. Sridhar and G. Padmanabham
100. Mathematical Modeling of the Solid Propellant Rocket Ignition System Charge Ignition Delay
   Alexander N. Lukin and Alexey M. Lipanov
   513

101. Combustion of Propellant Grain Reinforcing by Elements with Memory Effect
   Vladimir A. Arkhipov, Alexander A. Milanchenko, and Dmitry A. Zimin
   521

102. Mathematical Modelling and Numerical Simulation of Titanium / Carbon Ignition
   Asdin Aoufi and Valery Rosenband
   525

103. Underwater Ignition of a Solid Propellant System
   S. S. Bondarchuk, A. B. Vorozhtsov, and V. P. Zima
   531

104. Initial Distributions of Droplet Sizes in Sprays
   Sushanta K. Mitra and Xianguo Li
   535
