<td>Optimisation of the spray drying of the enzyme polyphenol oxidase by response surface methodology</td>
<td>H.O. Okello, J.G. Brennan, M.J. Lewis, S. Gilmour</td>
<td>1713</td>
</tr>
<tr>
<td>The elaboration of labile bioproducts optimal drying technology</td>
<td>R.A. Sadykov</td>
<td>1723</td>
</tr>
<tr>
<td>Dynamic behavior and process control of the primary and secondary drying stages of freeze drying of pharmaceuticals in vials</td>
<td>P. Sheehan, H. Sadikoglu, A.I. Liapis</td>
<td>1727</td>
</tr>
</tbody>
</table>
Role of sucrose-LDH hydrogen bond for thermal stabilizing effect of sucrose on freeze-dried LDH
T. Suzuki, K. Imamura, H. Fujimoto, M. Okazaki ................................. 1741

Application of supercritical drying to the preparation of YBCO superconductor
T. Tachiwaki, Y. Takase, S. Kawanaka .................................................. 1748

Preparation of organic mesoporous gel by supercriticalfreeze drying
H. Tamon, H. Ishizaka .......................................................... 1756

Structure formation during drying of coating layer of magnetic particulate
H. Tamon, M. Okazaki .......................................................... 1764

Drying of polymeric solvent coatings
G. R. Wagner, E.-U. Schlünder .................................................. 1772

Diffusion of ethanol-liquid CO₂ in low temperature supercritical drying of silica gel
P. Wawrzyniak, G. Rogacki, J. Pruba, Z. Bartczak ................................. 1780

Heat and mass transfer during the drying of guarana extracts in spouted bed
L.A.P. Freitas, J.K. Bastos, R.S. Pagliarussi ........................................... 1786

Experimental investigations of a spray drying process relating to buckthorn bark’s water extract
K. Maletskaya, G. Moseychuk, E. Pereyaslavtseva .................................. 1794

Drying kinetics of organic solvents in pharmaceutical coating
N.M. Panagiotou, A.K. Stubos, G. Bamopoulos, Z.B. Maroulis,
D. Marinos-Kouris, S. Fotinos .................................................. 1801

Hydration state of enzymes: An important factor in the design of reactors for non aqueous biocatalysis
H. Stamatis, V. Sereti, F.N. Kolisis .................................................. 1807

Yeast viability (Saccharomyces cerevisiae) dried by fluidized bed and spray drying
G. Luna-Solano, M. Salgado-Cervantes, M.A. Garcia-Alvarado,
G. Rodriguez-Jimenes .................................................. 1815
Optimization of single-zone drying of polymer solution coatings to avoid blister defects

P.E. Price Jr., R.A. Cairncross

Section XI. Miscellaneous Drying Processes

Heat pump fluidized bed drying for lactic acid suspensions using inert particles and freeze drying

P. Alves-Filho, I. Strømmen, A. Aasprong, A.K. Torsveit, H.C. Boman, W. Hovin

An experimental investiation of quartz sand-bentonite mixture drying kinetics in combined contact convective drying process

D. Antonijević, D. Voronjec

Dynamic multi-dimensional models of the atmospheric freeze-drying process that can occur during the low temperature archaeological find storage in the museum: A study on the conservation conditions of the man of similaun

R. Bruttini

Drying techniques for wet-stored and particulate spent nuclear fuel

J.C. Crepeau, S.J. Reese, H.M. McIlroy Jr.

High temperature drying by means of highly humidified heat carrier

A. Dolinsky

Laboratory-scal edrying with coupled TGA-DSC

J.H. Ferrasse, J.P. Puaux, D. Lecomte

Steam drying of porous materials in packed beds

J. Hager, R. Wimmerstedt

Effect of infrared irradiation on drying characteristics of wet porous materials

A. Hashimoto, T. Kameoka

Application of open adsorption systems for special drying processes

A. Hauer, W. Dallmayer, L. Keil
Influence of the drying process on biofiltration: modeling and experimental approach

M. Morales, S. Hernández, S. Revah, R. Auria ................................. 1906

Simulation of hydration/dehydration of CaO/Ca(OH)₂ chemical heat pump reactor for cold/hot heat generation

H. Ogura, R. Shmojyo, H. Kage, Y. Matsuno, A.S. Mujumdar ............................................. 1914

Effects of the structure of a porous material on drying kinetics in a microwave vacuum laboratory scale dryer

C. Pére, E. Rodier, J. Schwartzentruber .................................................. 1922

Drying radioactive wastewater salts using a thin film dryer

D.E. Scully .................................................. 1930

Analysis of the effect of paste on the behavior of a spouted bed with inerts

P.I.N. Spitzner, J.T. Freire .................................................. 1936

Airless drying - developments since IDS’94

T.J. Stubbing .................................................. 1944

Effect of added CaO on drying characteristics of RDF

Y. Tatemoto, K. Yasuda, Y. Bando, M. Nakamura, M. Azegami ............................................. 1952

Experimental investigations on pulse combustion drying process

I. Zbicinski, I. Smucerowicz, C. Strumillo, J. Kaszniea, J. Stawczyk ............................................. 1960

A novel ratio frequency assisted heat pump dryer

M.G. Marshall, A.C. Metaxas .................................................. 1967

Simultaneous drying and pyrolysis in fixed bed combustion of wet biomass

J. Saastamoinen, P. Haukka .................................................. 1975

Dispersed materials combined drying method

R.A. Sadykov, V.A. Labutin, D.G. Pobedimsky ............................................. 1983

Influence of particle size and operating conditions on coating criteria and particle morphology during fluidized-bed coating

K. Saleh, M. Hemati .................................................. 1987
Thermal kill of hessian fly [Mayetiola destructor (Say)] pupae in baled timothy (Phleum pratense L.) in a commercial forage dryer
S. Sokhansanj 1995

Upward and downward airflow-pressure drop and minimum fluidization velocity for chopped alfalfa at several moisture contents

Evaluation of models on the drying of pastes in spouted beds with inerts
P.I.N. Spitzner, J.T. Freire 2009

The optimal selection of drying process parameters of formed clay
H. Songtao, L. Guodan, Y. Jianjun 2017

Exergy balance of a pulp drier utilizing superheated steam
P.A. Christodoulou 2023

Drying behavior in a continuous vertical annular static mixer dryer
F.E.P. Cornejo, K.J. Park, L.F.T. Alonso 2032

Section XII. Supplementary Papers

Determination and analysis of desorption isotherms and isosteric heats of annatto (Bixa orellana L) seeds
L.J.G. de Faria, S.C.S. Rocha, C.M.L. Costa 2041

The characteristic drying equation of the Tunisia deglet nour dates
N. Kechaou, M. Mââalej 2049

The effect of pretreatments on mass transfer rates during low temperature osmotic dehydration
G. Donsi, G. Ferrari, R. Nigro 2057

Application of spout-fluid bed drier in industrial production
D.S. Povrenović 2065

Aerodynamic aspects of flat materials drying
P. Stankov, S. Nevenkin 2072
