1999 PROCEEDINGS BELTWIDE COTTON CONFERENCES

Volume 1
- Cotton Production Conference
- Tillage, Nutrition and Soils Workshop
- Sticky Cotton Progress
- New Developments from Industry
- Cotton Disease Council
- Cotton and Other Organic Dusts Conference
- Cotton Economics and Marketing Conference
- Cotton Engineering-Systems Conference
- Cotton Ginning Conference
- Cotton Improvement Conference
- Cotton Physiology Conference
- Cotton Quality Measurements Conference
- Cotton Weed Science Research Conference

Volume 2
- Cotton Insect Research and Control Conference
- Cotton Soil Management and Plant Nutrition Conference
- Cotton Textile Processing Conference
- Joint: Engineering/Physiology Conferences
- Joint: Engineering/Ginning Conferences

Editorial Coordinators: Paul Dugger, Debbie Richter

### Beltwide Cotton Production Conference

- **Food Quality Protection Act’s (FQPA’s) Impact And Pesticide Availability**, William T. Lovelady | 12 |
- **Marketplace Insights**, William B. Dunavant, Jr. | 13 |

### Tillage, Nutrition and Soils Workshop

- **Comparison Among Different Types of Spatially Distributed Field Information of Possible Use in Precision Farming**, S.J. Maas, G.J. Fitzgerald and W.R. DeTar | 19 |
- **Plant Nutrition and Soil Fertility**, M. Wayne Ebelhar | 20 |
- **Foliar Fertilization**, Derrick Oosterhuis | 26 |
- **Environmental Considerations for Cotton Fertilization**, J.C. Silvertooth and E.R. Norton | 29 |
- **Cotton Conservation Tillage Studies in Arkansas**, J.S. McConnell and R.C. Kirst, Jr. | 32 |
- **The Effects of Winter Cover Crops on Cotton Yield and Soil Fertility After 40 Years**, E. P. Millhollon and A. D. Braud | 33 |

### Sticky Cotton Progress

- **Cotton Aphid Management - Status and Needs**, L. D. Godfrey and J. F. Leser | 37 |
- **Whitefly Management in Arizona Cotton - Status and Needs**, Peter C. Ellsworth | 41 |
- **Dynamics of Resistance to Novel Insecticides in Whiteflies**, I. Denholm, T.J. Dennehy and A.R. Horowitz | 44 |
- **Sugar Composition of Cotton Aphid and Silverleaf Whitefly Honeydews**, D. L. Hendrix | 47 |
- **Bemisia Whiteflies, Sticky Cotton and Sticky Cotton Sampling**, T. J. Henneberry and S. E. Naranjo | 51 |
- **Prospects for Rapid Measurement of Stickiness in Cotton**, M. Dean Ethridge and Eric F. Hequet | 56 |

### New Developments from Industry

- **DP 388 and DP 675, Deltapine Seed’s New Conventional Varieties**, D. L. Keim and L. P. Burdett | 63 |
- **PSC 57 Pima, the New Yield Leader for the San Joaquin Valley**, John C. Palmer, John W. Pellow, H. B. Cooper, Jr., Joel F. Mahill and David M. Anderson | 66 |
- **PM 1215 BG/RR, PM 1218 BG/RR, and PM 1560 BG/RR; New Cotton Varieties**, David W. Albers and Curtis Williams | 68 |
- **Sure-Grow 747, a New Early-Maturing Picker Variety**, K.E. Lege' | 69 |
- **Super Start, SUL-15, GS-48, and GS-70. Plant Growth Regulators Carried with Foliar Fertilizers for Cotton Production**, Barry Aycock | 71 |
- **Steward® - a New Broad Spectrum Insect Control Agent from Dupont**, Walt Mitchell | 73 |
- **Terraclor 15G a New High Concentrate Granular In-Furrow Fungicide**, A. W. Mitlehner | 74 |
NEW DEVELOPMENTS FROM INDUSTRY, CONTINUED

Dyne-Amic with Tracer for Cotton Insect Control, James M. Thomas, III and Robert E. Mack .................................................. 75
Hel-ID: a Tool for Bollworm and Budworm Management, C. L. Suwalka, W. W. Bryan and J. Xia ........................................... 77
Securalink™-G Closed Transfer System, John Backscheider ................................................................................................. 79
Redball® Lay-By Hooded Sprayer, Steve Claussen ............................................................................................................ 80
Copper Ionization on Airboom Sprayers, Dale Schaal ........................................................................................................ 81
The Lummus Sentinel™ Lint Cleaner, R. D. Rutherford, D. W. Van Doorn and M. D. Cory ................................................ 81

COTTON DISEASE COUNCIL

Minutes of the 1998 Cotton Disease Council Business Meeting, January 6, 1999 Orlando, FL, Patrick D. Colyer ........................................... 89
Report of the Educational and Public Relations Committee, K. M. El-Zik ................................................................................ 89
Cotton Disease Loss Estimate Committee Report, Don Blasingame and Mukund V. Patel ......................................................... 90
Report of the Soil Fungicide Committee, G. L. Sciumbato ........................................................................................................ 96
Reniform Nematode- an Introduction, C. Overstreet .................................................................................................................. 100
Managing the Reniform Nematode with Nematicides, G. W. Lawrence and K. S. McLean ......................................................... 100
Crop Rotation for Managing Reniform Nematodes in Cotton, William S. Gazaway ................................................................. 101
Resistance to the Reniform Nematode (Rotylenchulus Reniformis) in Upland Cotton, A. F. Robinson ............................................... 101
Reniform Nematode - Overall Management, J. D. Mueller .................................................................................................... 102
Efficacy of Biological Agents as Seed Treatments for Cotton Stand Establishment, W. E. Batson, Jr.,
J. Caceres, Michael Benson, Phillip M. Brannen, Marc A. Cubeta, Kenneth Conway, M. L. Elliott,
Julius Fajardo, D. M. Huber, Anthony P. Kelnath, Melvin Newman, Bonnie Ownley, Craig S. Rothrock,
Raymond W. Schneider, C. E. Molsenbocker, Donald R. Sumner and Peggy Thaxton .............................................................. 103
Biological and Chemical Control of Cotton Seedling Disease in Alabama, J. E. Fajardo, W. S. Gazaway,
B. E. Norris, Jr. and L. W. Wells ........................................................................................................................................ 104
Transfer of Heat Tolerance and Other Characteristics by Protoplast Fusion in Trichoderma Species, L. E. Hanson and C. R. Howell .......................................................... 105
The Effect of Pythium Ulitum on Cotton Lines with Partial Pythium Resistance, T. A. Wheeler and J. R. Gannaway .................................................. 106
Managing Seedling Diseases Using Post Emergence Fungicides, G. B. Padgett and E. Burris .......................................................... 106
Protégé™ – a Unique Product for Cottonseed Treatments of the Future in Controlling Rhizoctonia Damping-Off, K. S. Arthur ................................................................. 106
Allegiance™-FL: a Cottonseed Treatment for the Control of Pythium Seed and Seedling Blight, J. L. Riggs and K. S. Arthur ................................................................. 107
Interaction of Seedling Rate, Seed and In-Furrow Treatment on Cotton Seedling Diseases and Yields, G. L. Sciumbato .......................... 107
Atoxigenic Strains of Aspergillus Flavus Have Been Applied to Commercial Cotton Fields for Three Years, P. J. Cotty .......................... 108
Use of Fumigant Nematicides and a Fungicide to Control Root-Knot (Meloidogyne Incognita) and Black Root
Rot (Thielaviopsis Basidicola) on Cotton - a 2 Year Summary, N. R. Walker, C. S. Rothrock and T. L. Kirkpatrick .................................................. 108
A Four Year Summary of Vydate @ C-LV Foliar Applications for Cotton Nematode Control
Root-Knot and Reniform Nematode Suppression with Selected Nematicides in Arkansas, Gus Lorenz,
T. L. Kirkpatrick, Cliff Coker, R. T. Robbins and Claude Bonner ............................................................................................ 109
Post-Emergence Nematicide Applications for Columbia Lance Nematode Management, H. L. Crooks, J. D. Mueller and M. J. Sullivan ......................................................... 110
An Economic Analysis of Telone II (1,3-D)and Temik 15G (Aldicarb) to Manage Reniformnematode
(Rotylenchulus Reniformis) in Cotton, D. Zimet, J. R. Richm, A. LaColla and R. A. Kinloch .......................................................... 111
Integrated Nematode Control on Cotton in South Africa: Present Status, M. S. Botha-Greeff and E. R. van Biljon ................................................................. 112
Plant Parasitic Nematodes Associated with Cotton Production in the Ouachita Delta and Macon Ridge
Areas of Louisiana, K. S. McLean, G. W. Lawrence and R. Prince ............................................................................................ 117
Agrobacterium Bronzing and Wilt: Cultivar Reactions and Effects of Temperature, Alois A. Bell ................................................................. 117
Determination and Control of Cotton Black Root, Richard Baird, Forrest Connelly, James Clark and Johnny Whiddon ................................................................. 121
Reniform Nematode Resistance Ratings for 288 Soybean Cultivars to Help Select Rotational Crops
for Reniform Infested Fields, R. T. Robbins, L. Rakes and L. Jackson ...................................................................................... 121
Development of Economically Feasible Approaches to Selectively Sample and Control Cotton Nematodes in Georgia,
Richard Baird and Debbie Waters ........................................................................................................................................ 121
Ascend™ 30 – a Broad Spectrum Fungicide Seed Treatment with Activity Against, Fusarium Solani,
J. L. Riggs and W. G. Hairston ........................................................................................................................................ 122
Reproduction by Root-Knot and Reniform Nematodes on Transgenic Cotton Cultivars Grown Commercially in 1998,
A. F. Robinson and A. C. Bridges ........................................................................................................................................ 122
COTTON AND OTHER ORGANIC DUSTS CONFERENCE

Bioaerosol Assessment: an Overview of the ACGIH Guidelines for Assessing Bioaerosols, Robert R. Jacobs ........................................... 129
Second Collection of Uniform, Card Generated, Vertically Elutriated Dust for Interlaboratory Comparison
of Dust Endotoxin Assays, D.T. Chun, R.E. Harrison and V. Chew ........................................... 129
A Quick Summary of the Highlights of Parts 1 and 2 of the First Round Robin Endotoxin Assay Study
and a Brief Preview of the Next Round, D.T. Chun ........................................... 132
Physical Characteristics of Particulate Matter and Health Effects Standards, C. B. Parnell, Jr., B. W. Shaw,
P. J. Wakelyn and B. W. Auvermann ........................................... 139
Comparison of Dust Sampling in the Personal Breathing Zone with Area Sampling Using the Vertical Elutriator
in Lancashire Spinning Mills, S.N. Raza, A.M. Fletcher, C.A. Cpickering, L.A. Oldham, H.C. Francis,
G.D. Fletcher and R. Mcl Niven ........................................... 144
The Evaluation of Aerosol Sampling and Analytical Methods for Aerosol Concentrations of Man-Made Organic Fibers,
D.B. Warheit, M.A. Hartsky, K.L. Reed and G.L. Kennedy, Jr ........................................... 147
Mechanisms by which Fibers Cause Pathology, Val Vallyathan and Vince Castranova ........................................... 148
Human Health and Cellulose Dust Exposure, G.M. Adamson ........................................... 151
National Toxicology Program Studies of Cellulose Insulation, Daniel L. Morgan, Cynthia S. Smith, Yin-Fong Su,
Jeffrey A. Dill and R. Bruce Westerberg ........................................... 153
Workplace Exposure Assessment of Cellulose Insulation Applicators, R. E. McClery ........................................... 156
Pulmonary Toxicity Studies of Synthetic Organic Fibers: Para-Aramid RFP and Cellulose Respirable Fibers,
D.B. Warheit and M.A. Hartsky ........................................... 157
On the Nature of Dust Exposure Associated with Nylon Flocking, William Jones, Chris Piacitelli and Joseph Burkhart ........................................... 158
Occupational Respiratory Disease in Nylon Flock Workers, Robert M. Castellan, William L. Eschenbacher,
Feroza Darowall and Kathleen Kreiss ........................................... 158
Acute Response of Rats to Intratracheal Instillation of Airborne Dust Collected at a Nylon Flocking Plant,
Vincent Castranova, Dale Porter, Ann F. Hubbs, Travis Goldsmith, Michael Whitemer, Victor A. Robinson,
Diane Schwegler-Berry, Lori Battelli, Rina Washko, Joe Burkhart, Chris Piacitelli, Robert R. Mercer,
James Scabilloni and William Jones ........................................... 164
Lung Function Decline in Lancashire Textile Workers. A Provisional Analysis of a Five Year Longitudinal Study,
D. Fishwick and J. C. G. Simpson ........................................... 166
Evaluation of the Effects of 12 Hour Workshifts on the Pulmonary Function of Cotton Textile Workers, Robert R. Jacobs
and Brian Boehlecke ........................................... 170
Followup Study of Respiratory Symptoms, Ventilatory Function and Personal Breathing Zone Dust Levels in Lancashire
Agricultural Safety and Health: A National Program Perspective, S. A. Olenchock ........................................... 174
Receptor Binding of Fungal Cell Wall (1-3)-β-D-Glucan to Human Macrophage and Neutrophil Cell Lines,
David L. Williams, Antje Mueller, John Raptis, Peter Rice and John Kalbfleisch ........................................... 176
Observation of a Partially-Opened Triple-Helix Conformation in 1-3-β-Glucan by Fluorescence Resonance Energy
Transfer Spectroscopy, Shih-Houng Young, Robert R. Jacobs and Wen-Ji Dong ........................................... 180
Cell Wall Constituents and Enzyme Activities in Cotton Dust, Allen K. Murray ........................................... 184
An Investigation into the Effect of Lipopolysaccharide and (1-3)-β-D-Glucan Either in Combination or Separately
on the Degranulation of Mast Cells Isolated from the Guinea Pig Lung and the Rat Peritoneal Cavity,
C.J. Gregory and P.J. Nichols ........................................... 185
The Effect of (1→3)-β-D-Glucan from Bakers Yeast on Bronchial Responsiveness and Induction of Inflammation
in the Guinea Pig Airway, R.S. Young and P.J. Nichols ........................................... 190
The Effect of (1→3)-β-D-Glucan on the Arachidonic Acid Cascade in Guinea Pig Isolated Trachea and Perfused Lung,
A. Jones and P.J. Nichols ........................................... 192
Characterization of Organic Dusts from the Tobacco Industry, E. Schachtner, E. Zuskin, N. Rienzi, S.K. Goswami,
Vincent Castranova, Michael Whitmer, Paul Siegel and Harsh Singh ........................................... 195
The Effect of Smoking on Cytokine Release after Exposure to Organic Dust Components in a Whole Blood Assay,
T. Sigsgaard, E. van der Maarl, N. Bak, E.C. Bonefeld-Jørgensen, Ø. Omland and G. Doekes ........................................... 197
The Wrecking of the Wrapping: the Airway Epithelium, a Prime Target for Inhaled Organic Dusts, P.J. Nichols
Molds, Agents and Disease, Ragnar Rylander ........................................... 202
The Role Arachidonic Acid Metabolites in the Response of Guinea Pig Lung and Dermal Vasculature to Extracts

COTTON ECONOMICS AND MARKETING CONFERENCE

Washington Update, Wayne Bjorlie ........................................... 215
Forecasting U.S. Cotton Production, Fred A. Vogel ........................................... 217
COTTON ECONOMICS AND MARKETING CONFERENCE, CONTINUED

The U.S. and World Cotton Outlook, Carol Skelly ......................................................... 220
Global Outlook for ELS Cotton Consumption, Matthew S. Laughlin ......................................... 222
International Cotton Flows: Changing Structure and Prospects for the Future,
Olga Isengildina, O.A. Cleveland and Cary W. Herndon .............................................. 227
Process Technology and Markets of Eco-Labelled Cotton Products, Marion Tobler ............... 232
Cost and Return Comparisons of Roundup Ready and Boligard Cotton Varieties,
K.J. Bryant, C.T. Allen, F.M. Bourland and L.D. Earnest ........................................... 236
The Effect of Expected Price on the Management of Cotton Production,
John R. C. Robinson, Fred T. Cooke, Jr. and D. W. Parvin, Jr. ....................................... 238
A Cluster Analysis Approach to Identifying Shifts in U.S. Cotton Production, G. A. Mumma and D. Hudson ............................................................ 240
Cotton Consumption and the Financial Crisis in Asia, Carlos Alberto Valderrama Becerra ........ 244
Economic Feasibility of Variable Rate Application Systems for Cotton, L. A. Ribera and J. A. Landivar .......................................................... 247
Financial Viability and Profitability of Cotton Farms in the Texas High Plains Region
After the Fair Act of 1996, Kent Durham and Phillip Johnson ........................................ 248
Comparative Analysis of Producing Transgenic Cotton Varieties
Versus No Transgenic Variety in Delicias, Chihuahua, Mexico, Jose Eduardo Magaña
Gonzalez, Arturo J. Obando Rodríguez and Jesus Miguel Olivas Garcia ................................ 255
Cotton Quality Price Differentials From Textile Mills' Perspective: an Update, Kalyan Chakraborty and Don Ethridge ............................................................ 256
The Effect of Fiber, Yarn, and Fabric Prices on Mill Cotton Fiber Consumption, V.S. Plassmann and E. Jones ................................................................. 259
Perceptions of the Fair Act from Northeast Arkansas: Implications for Cotton, Julienne Pollard Penter and Darren Hudson ......................................................... 268
Foreign Import Demand for Cotton, Stephen MacDonald ..................................................... 272
Quality of the 1998 Crop, Mack Bennett ................................................................. 274
Cotton Price Interdependence in the Developed and Developing Countries, Jian Yang and David J. Leatham ................................................................. 284
Analyzing the Expansions Abilities of Mid-Sized Farms in Texas Southern High Plains, DeDe Beaty and Phillip Johnson ......................................................... 286
The Association Between Nearby Cotton Futures Price and Net Bale Commitments of Speculative Traders,
Avuthu R. Reddy, Carl G. Anderson, David A. Bessler and Carl E. Shafer ......................... 294
Economic Evaluation of Insecticide Termination by Cotman, Kelly J. Bryant, Diana M. Danforth, Mark J. Cochran, Ray Benson and Mi Sha ........................................ 298
Spatial Utilization of Phosphorus: Implications for Precision Agriculture Practices,
Man Yu, Eduardo Segarra and Douglas Nesmith ......................................................... 299
Factors Affecting Regional Cotton Acreage Shifts, Steven W. Martin, Darren Hudson and Gerald Mumma ................................................................. 302
Developments and Outlook for Cotton in Francophone West Africa, Andrew Levin ................ 304
Results of Extension Recommendations and Integration of New Technologies into Tennessee Cotton Verification Trials, Chuck Danehower ............................................ 309
Maximizing Net Producer Returns to Gin Lint Cleaning, Jeannie Nelson, Sukant K. Misra and Blake K. Bennett ................................................................. 310
The Effects of Raw Fiber Prices on Mill and Retail Demand, D. McLaren ................................. 315
Economic Analysis of Ultra-Narrow-Row Cotton Production in the Coastal Plain Region of Georgia,
S. Gibbs Wilson, W. Don Shurley, Craig Bednarz and Michael J. Bader ......................... 317
Structural Changes to Consider in the Valuation of Boll Weevil Eradication Programs, John R. C. Robinson and Oscar Vergara ......................................................... 321
Adoption of Advanced Irrigation Technology: Lepa Vs. Drip in the Texas High Plains, E. Segarra, L. Almas and J. Bordovsky ......................................................... 324
Price Volatility in Cotton, Darren Hudson and Keith Coble .............................................. 328
An Analysis of the Cottonseed Pricing Structure in Texas, Jane A. Bondurant and Sukant K. Misra ................................................................. 334
Modeling of U.S. Men's Apparel Consumption Trends and Its Implication on Textil Mill Cotton Consumption, Moon W. Suh and Eun-Kyung Lee .......... 339
Whole Farm Analysis of Continuous Cotton Versus a Cotton/Corn Rotation: an Introduction, D. W. Parvin and F. T. Cooke ......................................................... 343
An Estimated 1998 Texas-Oklahoma Pre-Season Price Schedule Based on Market History,
Kevin Hoelscher, Sukant Misra and Don Ethridge ......................................................... 346
Economic Comparisons Between Ecologically-Based & Traditional Cotton Pest Management Systems,
C.R. Stark, Jr., K.J. Bryant, J.R. Ruberson and S.C. Phatak and W.J. Lewis ....................... 348
Economic Evaluation of Boligard Cotton in Arkansas, K. J. Bryant, W. C. Robertson and G. M. Lorenz, III ............................................................. 349
Texas-Oklahoma Producer Cotton Market Summary: 1997/98, Kevin Hoelscher, Don Ethridge and Sukant Misra ............................................................. 350
An Economic Analysis of Nitrogen Levels and Rotation Systems in Cotton,
D. Zimet, D.L. Wright, F.M. Rhoads and P.J. Wiatrak ..................................................... 354
COTTON ENGINEERING-SYSTEMS CONFERENCE

Cotton Yield Monitor Evaluation, South Carolina – Year 2, F.J. Wolak, A. Khalilian, R.B. Dodd, Y. J. Han, M. Keshkin, R.M. Lippert and W. Hair .................................................. 361

WinPET Irrigation Software, S. Hicks, R. Lascano and S. Orr .................................................. 372

Evaluation of Irrigation Interval on High Plains Cotton Production With LEPA Systems, James P. Bordovsky and William M. Lyle .................................................. 372

Cotton Response to Abrupt Change in Water Application, D. F. Wanjura and D. R. Upchurch .................................................. 380

The Effects of Tillage and Tape Depth Placement in Drip Irrigation System, A. Khalilian, M. J. Sullivan, R. R. Hallman and W.B. Smith .................................................. 384

Cotton Tillage Trials - Terrell County Georgia Stale Bed Planting, E. H. Wilson, M. Bader, T. Trice and P. Roberts .................................................. 387

Effects of Lowering Aerial Spray Boom on Spray Drift and Swath Width, W. C. Hoffmann and H. H. Tom .................................................. 388

Spray Droplet Penetration in Cotton Canopy Using Air-assisted and Hydraulic Sprayers, H.R. Sumner and G.A. Herzog .................................................. 390

Virtual Cottons, the Firstborn of the Next Generation of Simulation Model, E. Jallas, R. Sequeira, P. Martin, M. Cretenet, S. Turner and J. McKinion .................................................. 393

Integrating GIS into Precision Crop Management, D.C. Akins, J.L. Willers, J.M. McKinion, S.B. Turner, F.D. Whisler and J. Varco .................................................. 395

Computerized System in Cotton Harvester for Measurement of Seedcotton Yield, C.J. Fernandez .................................................. 399

COTTON GINNING CONFERENCE

Continental's Vertical Flow Drier and Replaceable Insert Rib, Jonathan L. Hackett .................................................. 406

Cotton Gin Technology and Consolidated, Russell M. Sutton .................................................. 409

Steamroller Lint Conditioner and Electric Banjo, Neil Turner and Samuel Jackson .................................................. 410

Overview of UNRC Situation from a Ginner's Perspective, William Mayfield .................................................. 414

Bale Packaging Materials and Standards, Shay L. Simpson .................................................. 416

Third in an Annual Series My Gin Management Philosophy, Sid Brough .................................................. 418

Cost of Ginning Cotton, William Mayfield, Herbert Willcutt, Kelley Green, Lee Todd, Roger Isom and Dusty Findley .................................................. 419

Status of EPA and OSHA Regulations Affecting Cotton Gins, P.J. Wakelyn .................................................. 429

COTTON IMPROVEMENT CONFERENCE

Update of the Cotton Genome Mapping, John Yu and Russell J. Kohel .................................................. 439

Segregation for Gus Gene in Transgenic Cotton, Carmen McCutcheon and O.L. May .................................................. 439

Pollination Studies after Transgenic Production - a Search for Recombination in Nectarless Genotype, Claude Rhyne and William L. Tietjen, Jr. .................................................. 442

Analysis of Gossypol and Related Terpenoids in Antisense Transgenic Cotton Plants, K. S. Rathore and R. D. Stipanovic .................................................. 445

Analysis of Transgenic Cotton and Tobacco Expressing Lytic Peptide Genes, Jeffrey W. Cary, Kanniah Rajasekaran, Kurt Stromberg and Thomas E. Cleveland .................................................. 445

A Novel Nonheme Haloperoxidase Gene for Disease Resistance in Transgenic Cotton and Tobacco, Kanniah Rajasekaran, Jeffrey W. Cary, Thomas J. Jacks, Thomas E. Cleveland and Kurt Stromberg .................................................. 446

Oviposition, Growth, and Development of Sweet Potato Whitefly, Bemisia Tabaci (Genn) (Homoptera: Aleyrodidae) on Transgenic Tobacco, T.Y. Li, M. Harris, C. Nessler, J. Gould and W. Smith .................................................. 446

Analysis of Semigamy Expression in Cotton (Gossypium Barbadosense), Zhang Jinfa, James McD. Stewart and R. B. Turley .................................................. 446

Introgression of PIMA into Upland, L.I. Decanini, C.W. Smith, A.H. Paterson and C.X. Jiang .................................................. 447

Allelic and Linkage Analyses of the CMS-D8 Restorer Gene of Cotton, James McD. Stewart, Jinfa Zhang and Gwen Coyle .................................................. 447

Molecular Mapping of CMS-D8 Restoration and Gene Expression Specific to D8 Restoration, Jinfa Zhang, James McD. Stewart and Rickie B. Turley .................................................. 448

Genetic Association among Yield and Fruiting Traits in F2Hybrid Cotton, Russell W. Hayes, Johnie N. Jenkins and Jack C. McCarty .................................................. 448

Hybrids Produced Very Economically with Transgenic Cotton, J. B. Weaver, Jr. .................................................. 448

Progress Report on Hybrid Cotton, R. F. Holland and C. G. Cook .................................................. 450

Cross-Pollination in Cotton Winter Nurseries, Bruce E. Greenhagen and Laval M. Verhalen .................................................. 453

Cotton Physiology Conference

Growth of Cotton Leaves and Bracts and Their Carbon Contribution to Developing Squares,
*Duli Zhao and Derrick Oosterhuis* .................................................................................. 505

Fiber Development Potential Is Related to Seed Location within a Boll, Boll Location and Boll Load,
*G. Davidson, A. Johnson and K. Hood* ........................................................................... 508

Impact of Drought on High Temperature Protection Systems of Cotton Seedlings, *John J. Burke and Bobbie L. McMichael* ................................................................. 508

Membrane Dynamics During Fiber Development: an Ultrastructural Analysis, *Robert W. Seagull, Mark J Grimson, Trina C. Muehring and Candace H. Haigler* ..................... 509

Expression of α-Tubulin Genes During Cotton Fiber Development, *David J. Whittaker and Barbara A. Triplet!* ......................................................................................... 509

How Genotype and Temperature Modify Yarn Properties and Dye Uptake, *J.M. Bradow and P.J. Bauer* ......................................................................................... 510

Hormonal Regulation of Fiber Elongation, and the Enzymatic Hydrolysis of Abscisic Acid Conjugate in Developing Cotton (Gossypium Arboreum L.) Fibres, *Bir Singh, C.P. Malik and A.S. Basra* ........................................................................................................ 516

myo-Inositol, Sucrosyl Oligosaccharide Metabolism and Drought Stress in Developing Cotton Fibers, in Vivo, in vitro and in Planta, *A. K. Murray, Daniel S. Munk, Jonathan Wroble and Gretchen F. Sassenrath-Cole* ......................................................... 518

Agronomic Differences in Growth and Yield Between Bt and Conventional Cotton, *S. M. Underbrink, J. A. Landivar and J. T. Cothren* ............................................................. 521

Response of Transgenic Cotton to Oxidative Stress, *Paxton Payton, A. Scott Holaday, Randy D. Allen and Robert P. Webb* ................................................................. 523

Compensatory Growth after Early Season Fruit Removal in Cotton, *J.M. Moss and C.W. Bednarz* ......................................................................................... 524

Evaluation of Variable Rate Pix (Mepiquat Chloride) Application by Soil Type, *Mary E. Thurman and Ronnie W. Heiniger* ................................................................. 526

Mepiquat Chloride Applications with a Canvas Wick, *A. M. Stewart, K. L. Edmisten and R. Wells* ......................................................................................... 526

Yield Response of BT-Transgenic Cotton to Early Termination of Irrigation, *C.J. Fernández* ......................................................................................... 526

Utilizing Cotman for Defoliation Timing and the Management of Micronaire Values, *Dan D. Fromme* ......................................................................................... 529

Relationship Between Lint Yields and Selected Plant Mapping Data, *Lowell J. Zelinski and Marc Bates* ......................................................................................... 530

Effect of Late-Season Fruit Removal on Cotton Yield and Quality: Implications in Insecticide Termination, *D.M. Oosterhuis, C.A. Allen, F.M. Bourland, R.S. Brown and M. Kim* ......................................................................................... 532

Comparative Field and Greenhouse Studies of Tfluralin and Pendimethalin on Cotton Growth, Development, and Nutrient Uptake, *J. A. Gordon and C. J. Green* .................. 536

Harvest Dates and Treatments Affect Stickiness and Sugars in West Texas Cotton Varieties, *Steve Hague, Robert Nichols, John Gannaway and Bobby Wyatt* .......................... 540

Flowering Responses to Mepiquat Chloride and PGR-IV, *Stephen P. Biles, Tom Cothren, Juan Landivar and George Teetes* ......................................................................................... 547

Evaluation of Cotton Height Measurement Techniques, *J. H. Stewart, S. W. Searcy and J. A. Landivar* ......................................................................................... 547

Effect of Management Treatment on Cotton Growth, Development and Yield - Three Year Results, *Timothy C. Sharp* ......................................................................................... 554

Five Years Experience with Mep Plus Versus PIX, *D. W. Parvin* ......................................................................................... 554

Efficacy of Mepiquat Chloride When Foliar Application Is Followed by Precipitation, *D. Zhao, D. Oosterhuis and T. Daniel* ......................................................................................... 557

Evaluation of Ultra Narrow Row Cotton in North Carolina, *N. Cowley, K. Edmisten, R. Wells and A. Stewart* ......................................................................................... 558

Planting Date and Plant Growth Regulator Influences on Cotton Growth and Yield, *T.K. Witten, P.H. Jost and J.T. Cothren* ......................................................................................... 559

Ultra-Narrow Row and Conventionally Spaced Cotton: Growth and Yield Comparisons, *Philip H. Jost and J. T. Cothren* ......................................................................................... 559

Drought Tolerance and Foliar Sprays of Glycine Betaine, *C.R. Meek, D.M. Oosterhuis and A.T. Steger* ......................................................................................... 559

Evaluation of Chemical and Physical Means of Removing Late-Season Cotton Fruit to Improve Yields and Control Boll Weevils, *R.S. Brown, D.M. Oosterhuis and F.M. Bourland* ......................................................................................... 561

Fatty Acid Composition of Lipid Fractions in Germinating Cotton as Affected by Temperature, *B. Lauterbach, D.R. Krieg and G. Jividen* ......................................................................................... 564

Cotton Fibre Quality Evaluation and Research in South Africa, L. Hunter, H. Schröder and C. J. Steenkamp ................................................................. 704
Development of Optimal HVI Strength Index for Prediction of Yarn Tensile Strength, Moon W. Suh, Hyoung-Inn Koo and Michael D. Watson ................................................................. 706
Effect of Adsorbed Water on the Specific Surface Area of Some Standards Cotton, C. Kaepratsis, N. Abidi and J.P. Gourlot ................................................................. 710
Rapid Conditioning 102, Frederick M. Shofner ................................................................. 712
Accelerated Sample Conditioning for HVI Testing Laboratories, Russell J. Crompton and Frank Bottomley ................................................................. 713
Toward a Gold Standard for NEP Calibration, C. Kyle Shofner, Jean-Pierre Caux, Kipp W. Julius, Donald W. Daniel, Jr., William T. Floyd, David A. Hinkle and Frederick M. Shofner ................................................................. 715
Pre-Harvest Spatial and Temporal Variability in Short Fiber Content in Relation to Processing Success, J. M. Bradlow, R. M. Johnson, P. J. Bauer and G. F. Sassenrath-Cole ................................................................. 716
Short Fiber Content of Cotton And Its Measurement, Xiao Liang “Leon” Cui, Timothy A. Calamari, Jr., Keamy Q. Robert and Michael D. Watson ................................................................. 718
Malcom Systems Total Quality Ginning Control System, Avi Shabthai and Joel Uzan ................................................................. 720
Seed Coat Fragments, a Major Source of Cotton Yarn Imperfections, Mourad Krifa, Jean-Paul Gourlot and Pr. J-Y. Drea ................................................................. 722
Histological Examination of Seeds and Seed Coat Fragments in Cotton (Gossypium Hirsutum L.), Bruno Bachelier and Jérôme Desplans ................................................................. 724

COTTON WEED SCIENCE RESEARCH CONFERENCE

Report of the 1998 Cotton Weed Loss Committee, J. D. Byrd, Jr. ................................................................. 727
Effect of Postemergence Topical Applications of Roundup on Roundup Ready Cotton, T. A. Baughman, E. P. Webster, J. W. Sij, Jr. and D. G. Bordovsky ................................................................. 731
The Effect of Roundup on Roundup Ready Cotton, D. B. Reynolds, S. L. File, R. E. Blackley and C. E. Snipes ................................................................. 732
Tolerance of Roundup Ready™ Cotton to Multiple Postemergence Applications of Glyphosate, E. C. Murdoch ................................................................. 732
Roundup Ready Cotton Weed Control Systems in West Texas, P. A. Dotray, J. W. Keeling and T. S. Osborne ................................................................. 733
Weed Control Programs in Roundup Ready Cotton, J. A. Kendig ................................................................. 733
Conservation Tillage with Roundup Can Decrease Cotton Production Costs, J. R. Smart and J. M. Bradford ................................................................. 735
Evaluation of Herbicide Program in Strip-Tilled Roundup Ready Cotton, P. J. Wiatrak, D. L. Wright, W. Koziara and S. Reed ................................................................. 738
Weed Management in No-Till Cotton in North Carolina and Tennessee, W. A. Bailey, J. W. Wilcut and R. M. Hayes ................................................................. 738
COTTON WEED SCIENCE RESEARCH CONFERENCE, CONTINUED

Weed Control in Ultra-Narrow Row Roundup Ready™ Cotton, J.T. Fowler, Jr., E.C. Murdock, J.T. Staples, Jr. and J.E. Toler ........................................... 739
Comparing Ultra-Narrow Row and Conventional Row Cotton Cropping Systems, S.B. Belcher
M.G. Patterson, C.H. Burmester, W.H. Faircloth and D.O. Stephenson IV ................................................................. 739
Weed Management Challenges in UNR Cotton, R.M. Hayes and C.O. Gwathney ................................................................. 740
Weed Management in Ultra Narrow Row Cotton in North Carolina, A.S. Culpepper and A.C. York ................................................................. 740
Weed Management in BXN Cotton with Buctril and Reduced Rates of Staple, J.W. Wilcut, S.D. Askew and M.D. Paulsgrove ................................................................. 741
Pre/Post Staple Combinations in Texas High Plains Cotton, J.W. Keeling, T.S. Osborne and P.A. Dotray ................................................................. 742
Evaluation of Roundup Ultra/Staple Combinations for Total Postemergence Weed Control in Roundup Ready Cotton, D.K. Miller, C.F. Wilson and J.L. Milligan ................................................................. 742
Utilizing Staple and Roundup Ultra for Weed Control in Roundup Ready Cotton, C.Steven Williams, K.A. Patterson, W.H. Mitchell and L.B. Gillham ................................................................. 743
Economics of Weed Management Systems in BXN, Roundup Ready, and Conventional Cotton, A.C. York and A.S. Culpepper ................................................................. 744
Systems Comparison: Staple, Buctril, Roundup, C.B. Guy and J.D. Hopkins ................................................................. 745
Weed Control in Okra-Leaf and Conventional Cotton, J.T. Staples, Jr., E.C. Murdock and J.T. Fowler, Jr ................................................................. 746
Application Temperature Influences Pyrithiobac (Staple®) Efficacy in a Semi-Arid Environment, Ginger G. Light, Peter A. Dotray and James R. Mahan ................................................................. 747
Perennial Weed Control with Roundup Ready and BXN Cotton, J.D. Everitt, J.W. Keeling, P.A. Dotray and T.S. Osborne ................................................................. 749
Rhizome Johnsongrass (Sorghum Halapense) Control with Conventional and Transgenic Herbicide Programs, James W. Smith, Paul A. Baumann and Gaylon D. Morgan ................................................................. 749
Yellow Nutsedge Control Programs in Cotton, W.K. Vencilt ................................................................. 750
Purple Nutsedge Management in Roundup Ready Cotton, M.W. Edenfield, B.J. Brecke, D.L. Colvin and D.G. Shilling ................................................................. 751
Redvine Control on Clay With No-Till, Harold R. Hurst ................................................................. 751
Competition and Seed-Rain Dynamics of Velvetleaf in Cotton, W.A. Bailey, J.W. Wilcut and S.D. Askew ................................................................. 753
Redvine Control with Roundup Ultra® in Roundup Ready® Cotton, Harold R. Hurst ................................................................. 754
