Wednesday 6th October 1999 - Volume 2
M-WeE1, Room 3, Millimeter-Wave Switches
Microelectromechanical K-Band Switching Circuits - S. Pacheco, L. P. B. Katehi, Univ. Michigan, USA .......................................................... 45
Design of Micromachined RF Switch - S. Chen, K. Suzuki, T. Marumoto, Y. Arai, R. Iwata, NEC Corp., Japan ..................................................... 49
A Smart K-Band 4-Port Resonant Switch Based on Photonic Band Gap Engineering - O. Vanbesien, J. Danglot, D. Lippens, Univ. Lille, France .... 57

M-WeE2, Room 5, Microwave Measurements and Measurement Aided Design
X-Band Resistive Sensors for Short High-Power Microwave Pulse Monitoring - M. Dagg1, Z. Kanclerz1, R. Szymiski2, E. Schambiloglu2, F. J. Agee3, Semiconductor Physics Inst.3, Lithuania, Univ. of New Mexico2, USA, Air Force Office of Scientific Research, USA3 .................................................. 65
Advanced Filter Generation Using Time Domain Transforms - J. Dunsmore, Hewlett-Packard, USA .......................................................... 72
Power Amplifier Linearisation Using a Straightforward Technology Independent Method Based on Vectorial Large-Signal Measurements - D. Schreurs1, T. Visn1, S. Vandenberghe1, K. van der Zande2, B. Nauwelaers2, R. Boettio3, K. U. Leuven1, Belgium, Polygromes Research Center2, Canada, IMEC3, Belgium .............. 76

MF-WeE2, Room 2, Microwave Education
From the Diplom Ingenieur to the Bachelor and Master Degrees - A German Prospect - W. Wiesbeck, Univ. Karlsruhe, Germany ....... 80
Globalisation in Engineering Education: the German Experience - H. Schumacher, M. Hoffmann, Univ. Ulm, Germany ..................... 82
The Effective Use of Computer Modelling and Visualization in Microwave - W. J. R. Hoefer, Univ. Victoria, Canada .................. 86
Multimedia and Computer-Based Engineering Education - M. R. Iksander, Univ. Utah, USA .......................................................... 90
Wireless and Microwave Education: From Circuits to Systems - T. Weller, L. Dunleavy, Univ. South Florida, USA ......................... 93

M-WeE2, Room 3, Millimeter-Wave Mixers and Multipliers
RF - and Low Frequency Noise Behavior of Balanced Resistive W-Band-Mixers - V. Breuer, L. Klapproth, A. Schada, G. Böck, TU Berlin, Germany .......................................................... 97
High Efficiency Planar Frequency Multiplier at Millimetre Waves and Quasi-Optical Investigations for (Sub) Millimetre Applications - J. L. Le Bras1, M. Le Goff1, B. Deschamps1, F. Le Penne1, A. Péden1, D. Bouneau1, S. Touil1, LEST/ENST1, France, INRETS2, France .................. 105
Harmonic Power Generation of GaAs IMPATT Devices up to 240GHz - H. Böhme, J. Frayer, M. Claassen, TU München, Germany ....... 109
State-of-the-Art Performance for a Heterostructure Barrier Varactor Tripler Operating at 250GHz - X. Méziat1, A. Maestrini2, J. M. Goutoule3, P. Goy3, P. Mountz3, M. Trier3, O. Vanbesien1, G. Beaudin2, D. Lippens1, Inst d'Electronique1, France, Observatoire de Paris Meudon DEMIRM1, France, Matra Marconi Space2, France, AB Millimetre1, France .................. 113

M-WeF2, Room 4, Bipolar Devices
Large Signal Characterization of HBTs for Microwave Applications, Including Self-Heating Effects - A. Carapatt1, S. Frasad, Northeastern Univ, USA .......................................................... 121
Electro-Thermal Large-Signal Modelling of SiGe HBTs - P. X. Sinnesbichler, C. R. Olbrich, TU München, Germany .................. 125
Noise Characteristics of 0.5µm / 50GHz Si and 0.5µm / 70GHz Si / SiGe Bipolar Technologies - K. Auflinger, H. Knopp, R. Gohb, T. F. Meister, J. Böck, H. Schäfer, M. Pohl, L. Freisinger, Infineon Technologies, Germany .......................................................... 129
Simulation of Substrate Coupling with Special Regard to Shielding in High-Speed Si/SiGe Bipolar ICs - M. Ploet1, H.-M. Hain2, W. Stein1, A. Stürmer3, Infineon Technologies AG1, Germany, Ruhr-Univ. Bochum2, Germany, Temic Semiconductor3, Germany .................. 133

M-WeP1, First Floor Balcony Poster session
1) Dual GSM/DCS-1800 Fiber Radio Repeaters: A Practical Implementation - A. Galindo1, L. Cucala1, D. Fillmore1, W. Warzanskyi, X. Cabedo2, E. Alonso3, Telefonica I+D1, Spain, IKUSI2, Spain, Telefonica Móviles3, Spain .......................................................... 137
2) A Prototype Digital Beamforming Antenna for Future Satellite Communications - L. Kuehnek1, J. Heltminger1, F. Kienzle1, A. Dreher1, Univ. Hannover1, Germany, TU München2, Germany, German Aerospace Center2, Germany .......................................................... 141
3) Non Linearities Modelling Method Influence in High Power Amplifier on the CDMA Spectral Analysis - L. Lacheminoux, M. Villepas, ESIEE, France .......................................................... 145
4) An Indoor Planning Tool with Both Antennas’ Placement and Wiring Optimization - B. Gloria1, J.-F. Legendre2, V. Antunes1, B. Uge1, Bousquets Telecom1, France, Siradel2, France, L.C.S.T, France .......................................................... 149
Reduction of DOA-Estimation Errors Caused by Antenna Array Imperfections - G. Sommerkom, D. Hampicke, R. Klukas, U. Ilmenau, Germany, TU Dresden, Germany
A GSM900/1800 Dual-Band MMIC Power Amplifier Using Outside Base / Center Via Hole Layout Multi-Finger HBT - M. Maeda, H. Sakai, Matsushita Electronics Corp., Japan
A GSM/GPS Receiver with a Bandpass Sigma-Delta Analog to Digital Converter - T. Muller, K. Boehm, T. Hentschel, Daimler Chrysler Research Ctr., Germany, TU Dresden, Germany
Low cost highly integrated S-band receiver - P. Deborgies, T. Lemoine, R. May M. Oudart, THOMSON-CSF, France
Millimeter-Wave Flip-Chip Power Amplifiers and Small-Signal ICS Using MBB Technology - M. Maeda, H. Sakai, Matsushita Electronics Corp., Japan
RF-Front end architectures in Millimeter-Wave Systems: from analogue to digital concepts - J.-F. Luy, T. Muller, Daimler Chrysler, Germany
Theoretical and Numerical Aspects of the Hybrid MOM-FDTD, TLM-IE and ARB Methods for the Efficient Modelling of EMC Problems - L. Pierantoni, G. Cerri, S. Lindenmeier, P. Russer, Univ. di Ancona, Italy, TUM in Munich, Germany
Transient Full Field Simulation of ESD Test Site - P. Leuchtmann, R. Vahldieck, ETH Zurich, Switzerland
Mixing Statistical and Deterministic Electromagnetic Fields - P. Corona, G. Ferrara, M. Migliaccio, Ist. Univ. Navale Napoli, Italy, Univ. di Cagliari, Italy
The Quasi-Fractal Microstrip Resonator - P. Pribetich, Y. Combet, G. Giraud, P. Lepage, Univ. de Bourgogne, France
A Novel Type of 0-dB Directional Coupler for Microwave Integrated Circuits - D. V. Kholodniak, I. B. Vendik, SL-Petersburg Electrotechnical Univ., Russia
A 2-40GHz PHEMT MMIC Active Balun Frequency Doubler - F. van Raay, G. Kompa, Univ. Kassel, Germany
A Low-Power Ku-band GaAs Monolithic Frequency Quadrupler - H. Okazaki, T. Nakagawa, K. Araki, Wireless Systems Lab., NTT, Japan
Second Harmonic Beam Scanning of Active Antenna Array - M. Sanagi, T. Tsukizawa, S. Nogi, Okayama Univ., Japan
A look at optimized laser processing for the manufacturing of passive microwave modules - H. Eskelinen, Lappeenranta University of Technology, Finland
Linearized Mixer System Using a Simplified feedforward Technique for Digital Mobile Communication - M. Chongcheawchamnan, I. D. Robertson, University of Surrey, UK
Low Noise Considerations in SiGe BICMOS Technology for RF Applications - M. Borgarino, S. Kovacic, H. Lafontaine, Z. Feng Zhou, R. Piana, LAAS-CNRS, France, SiGe Microsystems Inc., Canada
Functional Multilayer Ceramic Substrate for Power Amplifier Module - T. Shirasaki, K. Tagami, T. Kubo, C. Makihara, KYOCERA Corporation, Japan

Nonlinear Design of Low Phase Noise Voltage Controlled Oscillator for Mobile Communication System - M-Q. Lee1, S. Nam2, Electronics and Telecommunications Research Institute1, Korea, Seoul National Univ.2 Korea

M-WeD4, Room 2, Microwave Remote Sensing

Wireless Passive Remote Sensing with SAW Resonators and a New Solution for Identification Problems in Multiple Sensor Systems - W. Bufl, M. Gollot, S. Kleit, M. Ruslack, M. Birkach, J. Ehrenford, TU Ilmenau, Germany, SenTEC-Elektronik, Germany

Parameter Estimation of the Resonant Model in Passive and Active Radar Systems by Using Third-Order Statistics - Y. Kuzenkov, A. Baev, V Chichkalev, Moscow State Aviation Inst., Russia

A Hankel-Transform Reconstruction Technique for Radially Permittivity Profiles in Cylindrical Objects - A. S. Omar, M. J. Askar, Univ. of Magdeburg, Germany

M-WeE4, Room 3, Novel Structures
A Micromachined Evanescent Mode Resonator - T. Schwartz, L. P. B. Katehi, Univ. Michigan, USA

A Micromachined Low-Phase Noise K-Band Planar Oscillator - A. R. Brown, G. M. Rebeiz, Univ. Michigan, USA

SIMMWIC Capacitive RF Switches - D. Stotz, S.-D. Friize, H. Downar, J. Wenger, DaimlerChrysler Research Ctr., Germany

Thermally Controlled Coplanar Microwave Switch - M. Binhack, J. Ehrenp. DaimlerChrysler Research Ctr., Germany

M-WeF4, Room 4, Electromagnetic Theory
Efficient Finite-Difference Description of 3D Edge Singularities for Coplanar MMICs Including Metalization Thickness - N.-H. Huynh, W. Heinrich, Ferdinand-Braun-Inst, Germany

Modified PD Formulation for Conductor-Loss Calculation in MMIC Coplanar Waveguides - M. Kanze, W. Heinrich, Ferdinand-Braun-Inst, Germany

Application of the Matched Model Source Algorithm to the Efficient FDTD Modelling of Waveguide Components - P. Aliment, R. Messanotte, L. Roselli, R. Sorrentino, Univ. Perugia, Italy

Thursday 7th October 1999 - Volume 3

M-ThB1, Room 13a, Microwave Radio Antennas

Planar Microstrip Antennas for MMDS Application at 40GHz - D. Mansen, G. Villino, Robert Bosch GmbH, Germany

Industrialization of a 58GHz High Gain Flat Panel Antenna design using Injection Molding Technique - B. Delp, W. Mayer, W. Grabherr, DaimlerChrysler Aerospace AG, Germany

M-ThC1, Room 13b, Network Analysis Techniques
A MM-Wave D-Band Vector Network Analyzer of High Dynamics - A. Arnol, O. Braz, O. Schindel, H. R. Kanke, M. Thumm, Univ. Karlsruhe, Germany, FZK/IHM, Germany

Accuracy Enhancement for Hilbert Transform Network Analyzers - T. Hauschild, R. Kniech, TEWS Elektronik, Germany, Christian Albrechts Univ. zu Kiel, Germany

A New Broadband Calibration Method for Cryogenic Temperatures - T. Reuss, J. Richard, CRTBT, France

Comparing the Accuracy and Repeatability of On-Wafer Calibration Techniques to 110GHz - A. Lord, Cascade Microtech Europe, UK

M-ThD1, Room 11, Microwave Electromagnetic Compatibility
Radiation of Localized Defect on Transmission Line: Theoretical and Experimental Transient Approaches - E. Martinod, N. Feix, M. Lalande-Guionie, B. Jecko, IRCOM, France

Analysis of the Electromagnetic Isolation Using Several Cascaded Metallic Holes for Applications in Microwave Circuits - A. Zeid, H. Baudrand, ENSEEIH, France

A Numerical Hybrid Procedure for the Detailed EMC Modelling of a RF Transmitter - P. Tognolatti, G. Marrocco, G. Ocera, Univ. L'Aquila, Italy, Univ. of Roma "Tor Vergata", Italy
