NA - Not Available
Advanced Microfabrication Techniques of Small, Low Cost Silicon Inertial Sensors
A. Kourepenis ........................................ NA

Description and Performance of a SIFORS Gyro
H. Califano ........................................ NA

A Proposed System Architecture for Estimation of Angle-of-Attack and Sideslip Angle
R. Colgren, M. Frye, and W. Olson ...................... 743

The Accuracy of the GPS-Derived Acceleration Vector, A Novel Attitude Reference
M. Psiaki, S. Powell, and P. Kintner Jr .................. 751

Flight Vehicle Artificial Intelligence Applications

Closed-Loop Model Following and Control Allocation for Transport Aircraft Using an Ordered Neural Network-Based Approach
D. Henderson and E. Lavretsky .......................... 761

Design of an Air to Air Interceptor Using Genetic Algorithms
M. Anderson, J. Burkhalter, and R. Jenkins .............. 772

Design of a Pilot-Activated Recovery System Using Genetic Search Methods
G. Sweriduk, P. Menon, and M. Steinberg ................. NA

Decentralised Adaptive Neuro-Fuzzy Longitudinal Control of High Performance Aircraft
P. Willis ............................................... 781

Parameter Optimization via Genetic Algorithm of Fuzzy Controller for Autonomous Airvehicle
M. Perhinschi ............................................ 790

Nonlinear and Adaptive Control

Multiple On-Off Solenoid Valve Control for a Launch Vehicle Propellant Tank Pressurization System
P. Stout and S. Snell .................................... 798

Adaptive Flight Control Using Dynamic Inversion and Neural Networks
C. Schumacher .......................................... 811

Robust Stability of Unified Singularly Perturbed Feedback Systems
H. Singh, R. Brown, D. Naidu, and J. Heinen ............ 820

Tracking MIMO Nonlinear Nonminimum Phase Systems Using Dynamic Sliding Manifolds
I. Shkolnikov and Y. Shtessel ............................. 826

Nonlinear Aeroservoelastic Control Using Euler-Lagrange Theory
R. Prasanth and R. Mehra ................................ 837

About Absolute Stable Synthesis of Electrohydraulic Servo
I. Ursu, F. Ursu, and T. Sireteanu ........................ 848

Hypersonic Air Vehicle Guidance, Navigation and Control

Flight Dynamics and Feedback Guidance Issues for Hypersonic Airbreathing Vehicles
D. Schmidt and J. Velapoldi .............................. 859

Multi-Loop Aeroservoelastic Control of a Hypersonic Vehicle
R. Lind, J. Buffington, and A. Sparks ..................... 872

Flight Control Laws for NASA's Hyper-X Research Vehicle
J. Selmon, D. Bose, J. Davidson, F. Lallman, J. Pahle, and M. Stephenson ...................... NA

Session 24-GNC-18

Session 31-GNC-19

NA - Not Available
| AIAA-99-4125 | Optimal Control of Singularly Perturbed Systems with Inequality Constraints | D. Naidu, S. Banda, and J. Buffington | 883 |

**Session 32-GNC-20**

**Applied Control Design to Aerospace Systems**

| AIAA-99-4129 | Low Cost Space Imaging System Dynamics and Active Vibration Study | Y. Lee and M. Balas | 906 |
| AIAA-99-4130 | Passive Nutation Control of Spinning Spacecraft Through The Use of Multiple Booms | F. Eke, A. Harvey, and E. Eke | 914 |

**Session 33-GNC-21**

**Adaptive/Reconfigurable Control I**

| AIAA-99-4133 | Flight Control of a Tailless Aircraft via Linear Parameter-Varying Techniques | J. Barker and G. Balas | 941 |
| AIAA-99-4134 | Reconfigurable Flight Control Designs with Application to the X-33 Vehicle | J. Burken, P. Lu, and Z. Wu | 951 |
| AIAA-99-4136 | Tailless Aircraft Flight Control Using Multiple Time Scale Re-configurable Sliding Modes | Y. Shtessel, J. Buffington, and S. Banda | 966 |
| AIAA-99-4137 | Control Law Reconfiguration Using Robust Linear Parameter Varying Control | S. Bennani, R. van der Stuils, G. Schram, and J. Mulder | 977 |
| AIAA-99-4138 | LPV Controller Design for the Lateral-Directional Motion of Re-entry Vehicle | F. Terui, T. Tsukamoto, and H. Kajiwara | 988 |
| AIAA-99-3964 | Retrofit Systems for Reconfiguration in Civil Aviation | J. Wohletz, J. Paduano, and A. Annaswamy | 995 |

**Session 34-GNC-22**

**Missile Guidance II**

| AIAA-99-4139 | Comparison of Aerodynamically Dominated and Inertially Dominated Precision Strike Guidance | J. Bain | NA |
| AIAA-99-4140 | An Optimal Explicit Guidance Scheme for Ballistic Missiles with Solid Motors | R. Padhi | 1006 |
| AIAA-99-4141 | Using a Multiple Model Adaptive Estimator in a Random Evasion Missile/Aircraft Encounter | Y. Oshman, J. Shinar, and S. Weizman | 1017 |

NA - Not Available
AIAA-99-4142  Determination of Time-to-Go Distributions with Maximal Average Miss Distances
K. Rinat and J. Ben-Asher ................. 1028

AIAA-99-4143  Practical Time-to-Go Estimation Methods for Optimal Guidance
C.-K. Ryoo, M.-J. Tahk, and H. Cho ................. 1039

Session 35-GNC-23  Analysis Methods in Air Traffic Control Systems

AIAA-99-4144  A Probabilistic Framework for Aircraft Conflict Detection
M. Prandini, J. Lygeros, A. Nilim, and S. Sastry 1047

AIAA-99-4145  Calculating Dependent Surveillance Update Rates by Modeling the Time-Dependence of Information Value
S. Atkins and R. Hansman Jr. ................. 1058

AIAA-99-4146  A Non-Parametric Method for Automated Flight Data Classification
M. Anderson and I. Mugtussidis ................. 1069

AIAA-99-4147  En Route Climb Trajectory Prediction Enhancement Using Airline Flight-Planning Information
R. Coppenbarger ................. 1077

AIAA-99-4148  Conflict Resolution & Alert Zone Estimation in ATM
V. Kuo and Y. Zhao. ................. NA

AIAA-99-4149  Air Traffic Management Using Probability Function Fields
M. Innocenti, P. Gelosi, and L. Pollini ................. 1088

Session 36-GNC-24  Spacecraft Artificial Intelligence Applications

AIAA-99-4150  Experimental Study of Synchronized Rotation of Multiple Autonomous Spacecraft with Rule-Based Controls
P. Wang, J. Yee, and F. Hadaegh ................. 1098

AIAA-99-4151  Low-Thrust Orbit Transfer Optimization Using Genetic Search
L. Dewell and P. Menon ................. 1109

AIAA-99-4152  Genetic Algorithm Based Parameter Optimization of a Fuzzy Logic Controller
C.-F. Lin, P.-A. Bao, S. Braasch, and M. Whorton ................. 1117

L. Crawford, V. Cheng, and P. Menon ................. 1123

AIAA-99-4154  Toward A Vision Based Autonomous Planetary Lander
S. Strandmoe, T. Jean-Marius, and S. Trinh ................. 1134

Session 37-GNC-25  Control Theory and Applications

AIAA-99-4155  A Methodology for Model Validation and Uncertainty Modeling for Linear Multivariable Robust Control
K. Lim ................. 1145

AIAA-99-4156  An Output Feedback Design for a Linear System with Amplitude-Constrained Actuator
A. Ngo and U.-L. Ly ................. 1156

AIAA-99-4157  New Methods for Structured Uncertainty Modeling for Flexible Aircraft
D. Schmidt and S. Lee ................. 1166

AIAA-99-4158  Optimal Closed-Loop Analytic Relationships Via Cost Function Imbedding
A. Kassem and B. Newman ................. 1180

AIAA-99-4159  Flight Control Systems Using Passivity-Based Control: Disturbance Rejection and Robustness Analysis
R. Akmeliawati and I. Mareels ................. 1190
Session 46-GNC-26

Application of Advanced Control Methods to the NASA Dryden F/A-18 Research Aircraft

AIAA-99-4203

Initial Flight Test of the Production Support Flight Control Computers at NASA Dryden Flight Research Center
J. Carter and M. Stephenson ........................................... 1199

AIAA-99-4204

Robust Lateral-Directional Control Design for the F/A-18
K.-Y. Tu, A. Sideris, K. Mease, J. Nathan, and J. Carter .................. 1213

AIAA-99-4205

Gain-Scheduled Approximations to H-Infinity Controllers for the F/A-18 Active Aeroelastic Wing
R. Lind ................................................................. 1220

AIAA-99-4206

Application of Gain-Scheduled, Multivariable Control Techniques to the F/A-18 System Research Aircraft
G. Balas ................................................................. NA

AIAA-99-4207

Close Formation Flight Control
A. Proud, M. Pachter, and J. D’Azzo .................................. 1231

Session 47-GNC-27

Guidance and Control of the Kistler K1 Launch Vehicle

AIAA-99-4208

Overview of the Kistler K1 Guidance and Control System
P. Hattis and R. Bailey .................................................. 1247

AIAA-99-4209

Autonomous On-Orbit Targeting and Guidance for a Reusable Launch Vehicle
S. Shepperd and A. Staugler ............................................ 1255

AIAA-99-4210

On Orbit Flight Control Design for the Kistler K-1 Reusable Launch Vehicle
D. Zimpfer ............................................................. 1266

AIAA-99-4211

Adaptive Atmospheric Reentry Guidance for the Kistler K-1 Orbital Vehicle
D. Fuhry ................................................................. 1275

AIAA-99-4212

Kistler Launch Assist Platform Return Burn Control
F. Boelitz ................................................................. 1289

AIAA-99-4213

Control of the Kistler K-1 First Stage Reorientation Prior to Entry
B. Persson ............................................................. 1300

Session 48-GNC-28

Adaptive/Reconfigurable Control II

AIAA-99-4214

Computationally Efficient Control Allocation
W. Durham .................................................................. 1310

AIAA-99-4215

Fast Control Allocation Using Spherical Coordinates
J. Petersen and M. Bodson ............................................ 1321

AIAA-99-4216

Model Predictive Variable Structure Control with Model Following for Forebody Vortex Flow Control
D. Ito and J. Valasek .................................................. 1331

AIAA-99-4217

Linear Parametrically Varying Integrated Flight and Structural Mode Control for a Flexible Aircraft
C. van Etten, G. Balas, and S. Bennani ................................. 1342

AIAA-99-4218

Non Linear Adaptive Auto-Pilot for Uninhabited Aerial Combat Vehicles
M. Akella, K. Subbarao, and J. Junkins ............................... 1353

AIAA-99-4219

A Neural Adaptive Autopilot for a Nonlinear Helicopter Model
P. Gili and M. Battipede .............................................. NA

Session 49-GNC-29

Control Applications III

AIAA-99-4220

Solving an Inverse Control Problem using Predictive Methods with Application to an Aircraft Accident
C. Davis and S. Heise ............................................... 1364

NA - Not Available XI
