New Design Concept For The High Voltage Distribution System For ESE Red Line: A Combination Of Improved Operational Performance And Significant Cost Reductions ....................................... 209
Philip Dinets and Frank Castro

Prefabricated Traction Power Substations: Completely Self-Housed Power Solutions .......................................................................................................................... 217
Tom Young

Deregulation Of The Electric Industry And Its Effects On The Transit Industry .......................................................................................................................... 220
James Perkins

Port Authority Of Allegheny County Stage II Light Rail Transit Program: Embedded Track Alternatives Study ................................................................. 226
Arthur J. Keffler, P.E.

Direct Fixation Rail Pad Anchorage Testing At MARTA ........................................................................................................ 236
Mark A. Rhodes, P.E.

Concrete Tie Replacement ........................................................................ 243
Navin P. Patel and Harry R. Jordan

Accessibility Improvements At A 100-Year Old Subway Station In Downtown Boston ................................................................. 250
Paul D. Smith, P.E.

Andrew C. Joosten

Design Variables: Architectural Character And Scale, Accessibility, And Public Safety-MTDB's Stadium And Fashion Valley Stations .................................. 266
Gerald L. Butler

Newark City Subway: Emergency Ventilation System ................................................................. 274
Kelly A. Giblin, P.E.

Structural Design Of Underground Stations For Eastside Extension Of Los Angeles Metro Rail System ................................................................. 284
Nayan P. Pandya, P.E., Cheng C. Lai, S.E. and Laura J. Mohr, P.E.

Experience With Design And Construction Of Segmental Post-tensioned Aerial Structures On Two Recent WMATA Metro Rail Projects .................................. 291
John Rudolf, P.E.
