METEC Congress 99

International Conference on New Developments in Metallurgical Process Technology

Proceedings

Düsseldorf, June 13–15, 1999
## Contents

**Welcoming remarks**

**IRON AND STEEL**

1. Direct Reduction Processes

1.1 Current status of FINMET process & technology development  
A. Hassan, O. Dam, R. Whipp

1.2 Experiences with two new fine ore reduction processes – Circored and Circofer  

1.3 Self-reforming HyL technology for producing highly metallized high carbon DRI: operating experience and results  
F. Garza Medina, J. Becerra Novoa

1.4 Relocation and initial performance of Mobile DRI Midrex units  
M. G. Sexton, M. J. Corbett

1.5 Technological advances in rotary hearth furnaces for coal-based direct reduction  
M. D. Osmundson, H. Lehmkuhler, G. De Marchi

1.6 The AlIMet process for the recovery of metal values from steel making oxide by-products  
J. K. Pargeter

2. Smelting Reduction

2.1 The Corex process for hot metal production without coke  
H.-K. Lee, S. Joo, Ch.-O. Kang

2.2 The DIOS process – the advanced smelting technology for the 21st century  
T. Kitagawa, K. Iwasaki, M. Kawakami, K. Takahashi

2.3 REDSMELT: An alternative ironmaking technology to improve economics and environmental compatibility for pig iron production  
R. L. Shultz, P. Fontana, H. Lehmkuhler

2.4 Hlsmelt – competitive hot metal from ore fines and steel plant wastes  
R. J. Dry, C. P. Bates, D. P. Price
3 Blast Furnaces

3.1 The most modern blast furnace in Brazil: . . . 66 design, features and operational results
C. A. Klein, J. L. R. Oliveira, J. I. Gushiken,
A. P. Alves

3.2 Modernization and upgrading of . . . . . . . 74 Rogesa's No. 5 blast furnace in Dillingen
F. Bordemann, D. Labar, H. Weiler.
P. Heinrich

3.3 Low cost operation with high pulverized . . . 79 coal injection at the Sidmar blast furnaces:
a global approach
L. Bonte, M. Depamelaere, R. Vervenne,
K. Huysse

3.4 Practical operation at an ultra high coal . . . . 87 injection rate over 250kg/THM in
Kakogawa No. 1 blast furnace
K. Nozawa, K. Shibata, T. Gotoh, T. Maki,
R. Hori

3.5 The SACHEM experience with BF control . . . 91 C. Thirion, J.-M. Steller, J.-L. Lebonvallet,
B. Metz, D. Lao, J.-C. Lachat

3.6 Advanced signal processing methods . . . . 98 and expert system development for
predicting and assessing blast furnace
instability within British Steel
A. G. Taylor, P. W. Warren

4 Continuous Casting - Flat Products

4.1 Productivity improvements in the . . . . . . 103 production line BOF - continuous casting
of slabs
F. Haers

4.2 New vertical caster for thick slabs at . . . . 112 Dillinger Hüttenwerke
K. Harste, J. Klingbeil
4.3 Conversion of CC No. 2 from curved to straight mould at SOLLAC-Fos sur Mer
J. F. Marioton, G. Zurita, A. Eichinger, R. Kasmader, H. Hoedl

4.4 Conditions for slag drag-off and entrainment in the continuous casting mould of slabs: experimental and numerical approaches

4.5 Advances in applied MHD technology for continuous casting process
E. Takeuchi, T. Toh, H. Harada, K. Miyazawa

5 Continuous Casting - Long Products

5.1 Recent improvements for the control of segregation in high carbon steel blooms at Sollac-Florange
C. Lopes, J. Jolivet, R. Kraemer, B. Lefebre, J. Jacquot, M. Borsenberger

5.2 Operational results on casting of round strands using a resonance mould
H.-J. Ehrenberg, H. P. Kaiser, J. Kluge, K. Wünnenberg

5.3 Operational results of Saarstahl AG using the convex mould casting technology for 150 mm x 150 mm squares
J. Bohnenberger, D. Rubensdörffer

5.4 High-speed billet casting by NS Hyper Mould
S. Kittaka, M. Uehara, T. Sato, H. Higashi

5.5 New high productivity SBQ billet caster at Von Moos Stahl AG
W. Hess, W. Fuchs, Ch. Herrmann, U. Urlau, H.-U. Burgunder, S. Kohl
6 Strip Casting

6.1 The „Direct Strip Casting“ process . . . . . . . 156
J. Kroos, T. Evertz, M. Dubke, U. Urlau,
W. Reichelt, W. Trakowski, K.-H. Spitzer,
K. Schwerdtfeger, R. Nyström

6.2 Twin roll casting at Ugine Isbergues – . . . . 164
an overview on Myosotis
J.-M. Damasse, D. Themines, L. Vendeville

6.3 Development of strip casting process . . . . . 168
at POSCO
Y.-G. Lee, C. M. Park, H.-T. Chung,
W. S. Kim, H.-K. Moon, T. Kang

6.4 Recent developments in project "M" – . . . . 176
the joint development of low carbon steel
strip casting by BHP and IHI
W. Blejde, H. Fukase, R. Mahapatra

7 Thin Slab Casting

7.1 Start-up experience of the high . . . . . . . . . 182
production CSP-plant SDI
M. Millet

7.2 Production of thin gauge hot strip . . . . . . . 183
by I.S.P.
L. Manini, A. Mantova

7.3 An examination of mould flux film . . . . . . . 188
structures and mould gap behaviour using
mould thermal monitoring and petrographic
analysis at Armco's Mansfield operations
R. J. O'Malley, J. Neal
7.4 Danieli flexible thin slab rolling technology. Peritectic steels from thin slab casting: overview of the technology and first results at Algoma Steel
R. Ackert, S. Buoro, A. Carboni

7.5 High quality ultra-thin hot strip production in Hylsa's CSP plant
A. Fernandez, J. Nakashima, V. Trevino, F. Küper

8 Process Technology of Hot Rolling

8.1 New process technologies and automation systems for hot rolling mills
P. Sixtensson, K. Hedgards, E. Neldemo

8.2 Advanced technology at China Steel No. 2 hot strip mill
S. C. Liang, S. C. Lin

8.3 The Operation of Dynamic Shaperoll® (DSR®) technology in a steel hot strip mill
R. J. Martin Myers, M. La Maire, J. J. Boon

8.4 The development and application of models to improve product flatness
D. Beveridge, A. Richardson

8.5 Practical results with the new heavy plate mill at Oxelösund
B. Persson, H. Wiese
9 Quality Control in Hot Rolling

9.1 Hot-rolled strip cooling: improved cooling systems control quality
G. van Ditzhuijzen, T. Snijders, M. Onink, A. lanos

9.2 A survey of two years experience with VAI-Q strip – an on-line system for controlling the mechanical properties of hot rolled strip
J. Andorfer, D. Auzinger, G. Hribernig, G. Hubmer, A. Luger, A. Samoilov, P. Schwab

9.3 On-line detection of hot strip surface defects and work roll degradation at the SIDMAR HSM
H. Uijtdebroeks, R. Franssen, G. Sonck, J. Moerkerke

9.4 A new automation system optimizes the hot rolling process at Huta im T. Sendzimira, Poland

9.5 Development of HSS rolls in hot strip mill of Cockerill-Sambre
D. Steinier, H. Uijtdebroeks, D. Liquet, J. Lacroix, J.-C. Herman, G. Walmag
10 New Plant Concepts for Steel Making and Processing

10.1 New steelmaking philosophy at Saldanha Steel
G.-H. Feldmann

10.2 The MPS - multi purpose section plant of TXI Chaparral Steel in Virginia/USA
D. A. Fournie

10.3 The casting rolling plant of Thyssen Krupp Stahl AG

10.4 The Hoogovens dual mode mill, a technological break-through
M. C. M. Cornelissen, J. M. Groot, C. Caesar, J. Iwatani

10.5 ACESITA stainless steel making in Triplex-Technology
C. E. Junqueira, J. G. Oliveira Ank, P. R. R. Silva, A. M. Duarte

10.6 The new continuous cold rolling & annealing line of Ugine at Isbergues (France)
J. Henrion, J.-P. Malengriaux
11 Cold Rolling of Steel Sheet

11.1 The new endless cold rolling plant (PLTCM) for Dongbu Steel Company Ltd., Asan Bay, Korea G.-S. Cho, H. R. Barnes, S. Melster

11.2 SDI-CCM – a pilot project for the economical production of cold-rolled products G. Pushis

11.3 Coupling of pickling line and tandem mill at Dortmund cold rolling works of Thyssen Krupp Stahl AG H. Braun, K.-U. Köhler, A. Smilge, P. Stammen

11.4 Boosting the pickling lines by inductive pulses: current state and prospectives J. Crahay, M. Malmendier, S. Wilmotte

12 Cold Rolling of Stainless Steel

12.1 Enhanced efficiency and acid regeneration in stainless steel pickling J. Coenen, B. Schmidt

12.2 Both carbon steel and stainless steel rolled on the most productive continuous tandem cold rolling mill in the world M. Yeakle

12.3 Integration of a mathematical model for a 20-roll Z mill rolling stainless steel in the plant of Ugine Pont-de-Roide F. J. D. Diet

12.4 New 20-roll stand in twin-housing design – Operational experience at POSCO D. Kim, K. Yoo, Ch. Lee, B. Kim, W. Klein, M. Mann

13 Cold Rolling – Mill Technology

13.1 Implementation of a DSR technology to improve strip flatness at the exit of a steel tandem cold mill D. Vallet, G. Fellus, B. Becker, N. Legrand

13.3 The reduction of cold mill chatter F. ter Lingen, B. van den Buijs
ALUMINIUM

1 Aluminium Process Technology 1

1.1 Large units for alumina calcination 369 plants with improved technology
Y. Yetmen, H. W. Schmidt

1.2 Jumbo 3CM® thin strip caster – 376 recent developments
P.-Y. Menet, F. Basson, K. Maiwald, R. Cayol

1.3 Thixoforging of aluminium alloys 381
R. Kopp, G. Winning, T. Möller

2 Aluminium Process Technology 2

2.1 Process models for advanced profile control at the new Alunorf hot strip mill
N. L. Witham, H. J. Herrmann, H. Hof

2.2 The realization of the new hot and cold 394 rolling mill complex for Hulett Aluminium Pty, Pietermaritzburg, South Africa
H. R. Barnes
2.3 Special crown roll (SCR) – inflatable back-up roll and its application on thin strip / foil roughing mills
A. Kramer, D. Greven

2.4 „Three steps in one go“ – the continuous annealing and finishing line at Alcan Nachterstedt
S. Bartsch, C. A. Meyer, H. E. Peltner

3 Aluminium Processing and Application

3.1 Innovative aluminium materials and components for future aerospace applications
A. Heinz, A. Haszler, O. Müller, W. S. Miller

3.2 New aluminium semi-products for airframe application
F. Heymes, P. Lassince, R. Macé, T. Warner

3.3 In-line surface pretreated aluminium sheet: a key success factor for high volume production of car bodies
M. Bloeck, P. Millet, C. Bassi

3.4 Latest developments in materials for marine application in fast ferries and others
A. Haszler, D. Sampath, K. Mechsner, G. Weber
