TABLE OF CONTENTS

SMT MANUFACTURING AND ASSEMBLY

SMT Sessions organized by Rich Freiberger, GSS Array Technology, Inc.

SMT1: The Art of Solder Paste Printing
Chair: Donald C. Burr, StorageTek
Co-Chair: Ron Boyce, Tektronix, Inc.

- Elements of Stencil Design and Manufacture................................................................. 1
  Edward Hale, Advanced Material Technologies Pty Ltd.

- Stencil Manufacture and Its Effect Upon the Solder Printing Process ...................... 6
  Stanley Dudek and Frank Novielli, UTZ Engineering, Inc.

- Investigation of the Printing Process for CSP Assembling ......................................... 11
  Mei Wang, Kazu Nakajima, Alington Lewis, Murad Kurwa, Ravi Bhat
  and Sammy Yi, Flextronics International Ltd.

SMT2: Reflow Soldering of Through-Hole Components
Chair: Paul Williams, Intel Corporation
Co-Chair: Helen Lowe, Celestica

- Stencil Design for Mixed Technology Through-Hole / SMT Placement and Reflow............. 19
  William E. Coleman, Photo Stencil Inc.;
  Denis Jean, 3Com; Julie Bradbury, Qualcomm

- Pin-in-Paste Solder Process Development........................................................................ 25
  Mark Litkie, George Arrigotti and Raiyo Aspandiar, Intel Corporation

- Reflow Soldering of Through-Hole Components ............................................................ 32
  Phil Zarrow, ITM, Inc.

SMT3: Printing is First
Chair: Dave Watson, Micro Systems Engineering, Inc.
Co-Chair: Tim Ginzburg, Artesyn Technologies

- Model of Process Capability of Solder Paste Printing.................................................... 41
  A. Paproth and K.-J. Wolter, Dresden University of Technology

- Machine and Process Capability Coefficient of Solder Paste Printers .......................... 48
  Wilfried Sauer, Heinz Wohlrabe and Dr.-Ing. Thomas Zerna, Dresden University of Technology;
  Roland Heynen, EKRA; Mathias Keil, Cybertron

- Solder Paste Printing Requirements for CSP Packages ................................................. 58
  Jeff Kennedy and Juan Ros, Manufacturers' Services Ltd.
SMT4: Future Developments
Chair: Helen Lowe, Celestica
Co-Chair: Paul Williams, Intel Corporation

Raising the Speed Limit of Your SMT Process .............................................................. 69
Rick Lathrop, Heraeus Inc.

Enhancing Board Level BGA Assembly and Reliability ............................................. 76
Steven O. Dunford, Puligandla Viswanadham and Curtis Clark, Raytheon Systems Company

SMT5: Component Placement
Chair: Phil Zarrow, ITM, Inc.
Co-Chair: Mike Buseman, Manufacturers’ Services Ltd.

Trends in Electronic Products and Placement Equipment ............................................. 99
Kevin A. Towle, Tektronix, Inc.

High-Speed Second-Level CSP and Flip Chip Assembly Using Flip Chip Shooters .......... 108
Gunter Schiebel, Siemens AG

ADVANCED PACKAGING (DCA, BGA)

DCA Sessions organized by Ajit Trivedi, IBM Microelectronics
BGA Sessions organized by Andrew Mawer, Motorola SPS

DCA1: DCA Applications
Chair: Jeff Kennedy, Manufacturers’ Services Ltd.
Co-Chair: Duy Le-Huu, W.L. Gore & Associates, Inc.

Flip Chip on Organic Substrates .................................................................................. 121
Peter Borgesen, Universal Instruments Corporation

Via-In-Pad (VIP) Substrates for Solder Bumped Flip Chip Applications ....................... 128
John H. Lau, Chris Chang, Chih-Chiang Chen, Ricky Lee and Chien Quyang,
Express Packaging Systems, Inc.; Tsung-Yuan Chen, David Cheng, Tzuy Jang Tseng
and Dyna Lin, World Wiser Electronics, Inc. and UniMicron Technology Corp.

Multi Chip Power Packaging - Reliability Assessment .................................................. 137
Dr. Torsten Hauck and M. Paulasto, Motorola AISL-Europe

DCA2: Advanced Flip Chip Interconnects
Chair: Darrell Frear, Motorola
Co-Chair: Peter Elenius, FlipChip Technologies

Back End Process Development for Wafer Level Chip Scale Packaging ..................... 147
P. Chang and R. Erhardt, Intarsia Corporation

Reliability Analysis of Flip Chip on Board Assemblies Using No-Flow Underfill Materials ................................ 153
Ryan Thorpe and Daniel Baldwin, Georgia Institute of Technology
**Flip-Chip Bonding on PCB with Electroless Ni-P and Stencil Printed Solder Bump**

### DCA3: DCA Reliability

**Chair:** Don Banks, *W.L Gore & Associates, Inc.*  
**Co-Chair:** Rick Eklund, *Dell Computer Corporation*

**Experiment-Based Computational Investigation of Thermomechanical Stresses in Flip Chip BGA Using the ATC4.2 Test Vehicle**

David W. Peterson, Steven N. Burchett and James N. Sweet,  
Sandia National Laboratories; Luu Nguyen, National Semiconductor Corporation

**Room Temperature Adhesion in Silicone Encapsulants**

Kelly Wall and Sharon Goudie, Dow Corning Corporation

**Processing and Reliability of Low Cost Flip Chip Assemblies Implementing Fast-Flow, Snap-Cure Underfills**

Paul N. Houston and Daniel F. Baldwin, Ph.D. and Marnico Deladisma, Georgia Institute of Technology; Lawrence N. Crane, Ph.D. and Mark Konarski, Ph.D., Loctite Electronics

### BGA1: BGA Advancements

**Chair:** Marie Cole, *IBM Microelectronics*  
**Co-Chair:** Leah Miller, *LSI Logic Corporation*

**Reliability Assessment of Thin (Flex) BGA Using A Polymide Tape Substrate**

Trent Thompson, Armando Carrasco, and Andrew Mawer, Motorola SPC

**Design, Analysis and Measurement of a Novel Plastic Ball Grid Array Package**

**High Thermal Performance Tape BGA For Media Processor**

Tatsuya Ohtaka, Osamu Yoshioka, Hiroshi Sugimoto, Tomoo Ohmori and Sachio Suzuki, Hitachi Cable

### BGA2: BGA Reliability #1

**Chair:** Randy Schueller, *Extreme Devices*  
**Co-Chair:** Chris Schmolze, *3M*

**TBGA Reliability in Telecom Environment**

Pennanen Virpi and Tammenmaa Markku, Nokia Telecommunications; Reinkainen Tommi, Nokia Research Center Finland; Zhu Jiansen and Lin Wei, Nokia Research Center USA

**Flexure Induced Failure of BGA Solder Joints**

Mark Gwaltney, Jaime Llinas and Kuan-Shaur Lei, Ph.D., Compaq Computer Corporation

**Second Level Interconnect Reliability of Reworked Packages and Routing Evaluation for High I/O Staggered Array BGA Packages**

Santhana S. Satagopan, Susan Hayes and Rajat Srivastava, Nortel Networks
BGA3: BGA Reliability #2
Chair: Andrew Mawer, Motorola Semiconductor
Co-Chair: Keith Newman, Sun Microsystems Inc.

Advanced CSP and Fine Pitch Ball Grid Array Assembly Reliability........................................ 243
Ed Blackshear, IBM Corporation

Reliability of PBGA Assemblies Under Vibration............................................................................ 249
Q.J. Yang and Z.P. Wang, Gintic Institute of Manufacturing Technology;
G.H. Lim, H.L.J. Pang, F.F. Yap and R.M. Lin, Nanyang Technological University

High Performance Ball Grid Array Assemblies for High Temperature and High Altitude
Applications ........................................................................................................ 255
Puligandla Viswanadham and Mike Spadaro, Raytheon Systems Company

BGA4: BGA Assembly
Chair: Barry Miles, Amkor Electronics
Co-Chair: Greg Evans, Indium Corporation of America

Curtailing Voids in Fine Pitch Ball Grid Array Solder Joints ............................................................. 267
Kevin Lyne and Gary Morrison, Texas Instruments Inc.

In-Line Bonding Cavity Packaging For Glob-Top Replacement ..................................................... 274
Kevin Chung, AI Technologies

Soldering Technology for Area Array Packages .............................................................................. 282
Dr. Ning-Cheng Lee, Indium Corporation of America; William Casey, Micron Technology

BGA5: 2nd Level Interconnect for 1.0mm Pitch Ceramic Ball and Column Grid Arrays
Chair: Randall Krause, NTK
Co-Chair: Chuck Bauer, TechLead Corporation

Process Optimization for 1.0 mm Pitch CBGA ............................................................................... 301
Marie Cole, Mario Interrante, Gregory Martin, Cindy Milkovich
and Lisa Jimarez, IBM Microelectronics; Richard Duchesne, IBM Canada

Ceramic Substrate Thickness, Test Board
Thickness, and Part Spacing: A Screening DOE ........................................................................... 309
Thomas Koschmieder, Terry Burnette and Billy Oyler, Motorola SPS

Development and Qualification Process For
1 MM CCGA Technology Implementation .................................................................................... 315
Ganesh Sure and Daniel Chienhung Lai, Cisco Sytems, Inc.

BGA6: BGA Rework
Chair: Don Spigarelli, Phase 4
Co-Chair: Paul Wang, Solectron

An Overview: Process Enhancements in BGA Rework Systems...................................................... 323
Doug Peck, AEIC
Solder Paste Deposition in BGA and CSP Rework ................................................................. 338
Paul Wood, OK International

Trends in Manufacturing That Affect the Selection of BGA-CSP Rework Equipment ... 343
Patrick McCall, PACE Inc.

SOLDERING

Soldering sessions 1-3 organized by Dr. Paul Vianco, Sandia National Labs
Soldering sessions 4-5 organized by Rich Freiberger, GSS Array Technology, Inc.

SOL1: Understanding the Processing and Long-Term Impact of Soldering Fluxes and Pastes
Chair: Dr. Laura Turbini, Georgia Institute of Technology
Co-Chair: Dr. Paul Vianco, Sandia National Labs

Characterization of Flux Residues .................................................................................... 353
Mary Ann Nailos, Process Sciences, Inc.

Identifying the Chemicals Responsible for Conductive Anodic Filament (CAF) Enhancement ........................................................................................................... 359
Westin Bent and Laura Turbini, Georgia Institute of Technology

Thermogravimetric Analysis Predictions of Reflow Profiles of Solder Pastes ............. 363
Dr. Quan Sheng and Charles Bradshaw, OMG Americas

SOL2: Are You Ready for Lead Free Soldering?
Chair: Bill Hampshire, Hampshire Technical Services
Co-Chair: Les Hymes, Les Hymes Associates

Environmental Issues in Electronics and the Transition to Lead-Free Soldering .......... 371
Kay Nimmo, ITRI, Ltd.

Implementing Lead Free Soldering-European Consortium Research ...................... 378
M. Warwick, Multicore Solders Limited

Sn-Bi-x Solders .................................................................................................................. 399
Zequn Mei, Fay Hua and Judy Glazer, Hewlett-Packard Company

SOL3: Assembly with Non-Pb Surface Finishes
Chair: R. Wayne Johnson, Auburn University
Co-Chair: John Evans, DaimlerChrysler - Huntsville Electronics

A Failure Analysis and Rework Method of Electronic Assembly on Electroless Ni / Immersion Au Surface Finish ................................................................. 407
Zequn Mei, Hewlett-Packard Company; Samuel K. Liem and Allan Shih, Cisco Systems, Inc.

Microstructural Evolution of SM-AG Solder Joints Resulting from Substrate Copper Dissolution .................................................................................................................. 412
Dr. Srinivas Chada, Werner Laub and Raymond A. Fournelle, Marquette University;
Dongkai Shangguan, Visteon Automotive Systems
Solderability of Different Board Finishes Under Nitrogen Atmospheres With Different ROLs
Jens Tauchmann and Klaus Wilke, Messer Griesheim; Karl-Heinz Schaller, Siemens AG

SOL4: Point and Selective Solder Applications
Chair: Jess Baker, Robotic Process Systems
Co-Chair: Len Stepp, Condor Systems

"FlashSoldering" – A New Non-Contact Selective Soldering Process for SMT Components
David Steinmeier, microJoining Solutions; Mike Becker, Teka Interconnection Systems

Selective Soldering with Laser or Mini-Wave
Armin Rahn, Ph. D., SEHO Consultant Canada and Wolfgang Hirt, SEHO GmbH

Simultaneous Laser Soldering for SMDs on 3D-MIDs
Stefan Hierl and M.C. Geiger, University of Erlangen

SOL5: Soldering Process
Chair: Russ Nowland, Lucent Technologies
Co-Chair: William E. Coleman, Photo Stencil Inc.

Optimizing Performance in Reflow Soldering with DynamicFlow Engineering
Kerem Durdag, Conceptronic, Inc.

Inerting the Wave Soldering Process with Membrane-Generated Nitrogen
Chrys Shea

Continuous Improvement Approaches for Wave Soldering Process
Tony Huang and Joe Chu, Adaptec Inc.

PROCESS CONTROL

Process Control Sessions Organized by Gerry Adams, Dade Behring, Inc.

PRC1: Automated Optical Inspection
Chair: Ray Prasad, Ray Prasad Consultancy
Co-Chair: Pieman Amoukhteh, Comtel Electronics

Challenges in Hi-Density PCB Assembly:
New Strategies for Improving Quality, Inspection, and Test
Ana de Marco Del Pozo, Manufacturers' Services Valencia

Ensuring Quality With "In-Process Inspection" For PCB Assembly. Implementing (AOI) Automatic Optical Inspection, When, Where and How?
Mark Norris, VI Technology

Process Control for Solder Paste Deposition
Mark Owen, MV Technology LTD
PRC2: Process Control: Inspection and Surface Analysis Methods
Chair: Lisa Hamburg, Circuits Assembly Magazine
Co-Chair: Dale Lee, Manufacturers' Services Ltd.

Measurement and Analysis of BGA Defects With Advanced X-Ray Inspection Systems ..... 497
Richard Amtower, CR Technology

Solder Paste Inspection for Screen Printing ................................................................. 504
Jeff Woolstenhulme, Cognex

PRC3: Test Strategies for Complex Electronic Assemblies
Chair: Mike Buseman, Manufacturers' Services Ltd.
Co-Chair: Phil Zarrow, ITM, Inc.

Test Strategies for Complex Electronic Assembly:
Evaluating and Implementing Flying Probe Technology ................................................. 509
Bernard McAvinue, Manufacturers' Services Valencia

Test and Inspection as Part of Process Control .......................................................... 520
Stig Oresjo, Hewlett-Packard Company

PCB Manufacturing and Testing of the Direct Rambus™ RIMM™ Modules ............... 526
John Lau, Huabo Chen, Chien Ouyang, Chih-Chiang Chen, and Chris Chang, Express Packaging Systems, Inc.;
Maurice Lee, David Cheng, and Tzyy Jang Tseng, World Wiser Electronics, Inc. and UniMicron Technology Corp.

PRC4: Process Quality Management
Chair: Jeff Cawley, Northwest Analytical Inc.
Co-Chair: Don Swenson, Allied Signal Avionics & Lighting

Process Mapping: A Special Tool for Management and Technical Professionals .......... 537
Dr. Ron Anjard, AIC

Managing Shop Floor Data in PCB Manufacturing ..................................................... 543
Kyle Klatka, GenRad

Choosing and Implementing a Fully Integrated On-line Quality System ..................... 550
Tom Lyons, Manufacturers' Services Athlone
SUBSTRATES

Substrate session organized by Ron Daniels, Circuits Assembly

SUB1: Surface Finishes
Chair: Foster Gray, PC Interconnect
Co-Chair: Ronald Boyce, Tektronix, Inc.

A Root Cause Failure Mechanism For Solder Joint Integrity of Electroless Nickel/Immersion Gold Surface Finishes .................................................. 561
Nicholas Biunno, HADCO Corporation

New Generation Metallic Solderability Preservatives: Immersion Silver Performance Results .................................................. 569
Don Cullen, MacDermid, Inc.

OSPs: Addressing Future Surface Finishing Needs .................................................. 574
Karl Wengenroth, Eric Stafstrom, and John Fudala, Enthone-OMI, Inc.

CONTRACT MANUFACTURING/BUSINESS ISSUES

Business sessions organized by Tim Hodson, Electronic Packaging & Production

BUS1: Electronics Manufacturing in the Information Age
Chair: Susan Crum, Electronic Packaging and Production
Co-Chair: Rich Freiberger, GSS Array Technology, Inc.

Enhancing Quality in Electronics Assembly Through Data Acquisition .................. 583
Ameya Hete and K. Srihari, SUNY Binghamton; Rick Frisbie, Dovatron Manufacturing

The Changing Needs of Manufacturing System Design ........................................ 589
Jim Kane, Universal Instruments Corporation

Using the Internet With Real-time Reflow Data Collection for Process Monitoring and Quality Control ........................................ 592
Mike McMonagle, K*Tec Electronics

BUS2: Managing the Manufacturing Process
Chair: Tim Hodson, Electronic Packaging and Production
Co-Chair: Gary Tanel, Raytheon Systems Company

Linking the Links: Creating the "Value" in the High-Mix Value Chain .................. 601
Brian Tracey, EFTC Corporation

Analysis and Optimization of Manufacturing and Test Process Arrangements with New Cost Models ........................................ 608
Martin Oppermann, Wilfried Sauer and Heinz Wohlrabe, Dresden University of Technology

Economics of Board Testing & Process Cost Optimization .................................. 614
K. Douglas Werner, GenRad, Inc.
BUS3: Improving Productivity by Using Multimedia
Chair: Jim Blankenhorn, SMT Plus, Inc.
Co-Chair: David Raby, Soldering Technology International

The Impact Multimedia Has Had on Productivity ................................................... 627
Belinda Bittner, Jabil Circuits

Multimedia From a Trainer's Perspective .............................................................. 629
Floyd Bertagnolli, Jabil Circuits

Developing Multimedia Training Programs ......................................................... 632
Jim Blankenhorn, SMT Plus, Inc.

BUS4: Environmental Stewardship as a Competitive Advantage
Chair: David Ufford, RMSC Defense Systems
Co-Chair: Dale Lee, Manufacturers' Services Ltd.

Environmental Quality in the Supply Chain:
More than Requirements for Hazardous Substances and ISO14001 ....................... 637
M.H. Nagel, Lucent Technologies, Bell Labs Innovations

Environmental Issues in Electronics Assembly ................................................... 643
G. C. Munie, Lucent Technologies; Dr. L. Turbini, Georgia Institute of Technology;
D. Bernier, Litton Systems Inc.; J. Gamalski, Siemens AG; D. W. Bergman, IPC

Alternate Paper

Photonic Soldering for Rework Applications ....................................................... 653
Erick Russell, Vision Inspection Technology
