CATS 4

Characterisation and treatment of sediments

Antwerpen, Belgium

September 15-17, 1999

Editor: G. De Schutter, Provincial Institute of Hygiene, Antwerpen

Organized by: Technologisch Instituut (Technological Institute)
Koninklijke Vlaamse Ingenieursvereniging
(Royal Flemish Society of Engineers)
Genootschap Haventechniek en Genootschap Milieutechnologie
(Sections on Harbour Techniques and Environmental Technology)
CONTENTS

Keynote lectures

Dredged material Management - From re-active to pro-active
T. Vellinga  
Dredging and beneficial use - impacts on and opportunities for bird populations
W. Woodrow, D. Huggett  
Treatment of contaminated dredged material : is it sustainable ?
C.A. Fletcher, T.N. Burt

Sediment and dredged material characterization

Sediment quality in dredged material disposed to sea from England and Wales
L.A. Murray, R. Waldock, J. Reed, B. Jones  
Advanced sediment characterization : chemical fingerprinting case study
S.E. Apitz, E. Arias, B. Ayers, S.A. Clawson, V.J. Kirtay, M.O. Stallard  
Characterization and contamination of polycyclic aromatic hydrocarbons
in sediments from Taiwan rivers
Prediction of PAH bioavailability in sediments by persulfate oxidation
M.P. Cuypers, L.T.C. Bonten, I.T.C. Groenhuis, W.H. Rulkens  
Time-dependent changes of PCB and Mercury in harbour channel sediment,
Göteborg, Sweden
L.B. Larsson, R.L. Stevens  
Accumulation of organic matter, heavy metals and organic compounds in surface
sediments along the Nervion Estuary (North Spain)
M.J. Belzunce, J. Franco, V. Valencia, A. Borja  
New methodology for the characterization and assessment of potentially
contaminated sediments by trace elements
M. El Zahabi, C. Chambon  
Additional sludge treatment and dumping facilities in the Antwerp Harbour area
W. Mondt, S. Helsen, S. Van Meerbeeck
Treatment and disposal technologies

New treatment of harbour sludge in Bremen and Bremerhaven
E. Biener, T. Sasse, J. Arnold, S. Woltering, N. Binder

Physical simulation of sludge deposits by centrifuge
D. Levacher, F. Saludas, J.C. Blivet

Field monitoring of physical and chemical processes during ripening of dredged sediments in transit deposits with emphasis on acidification
C. Zevenbergen, W. de Haan, A.F. Peekel, H. Folkerts, W.M. Polderman

Prediction of contaminant behaviour during the treatment of contaminated sediments
W.W. van Veen, J.G. Cuperus

New techniques for stabilisation and sanitation of fine grained contaminated sediments
H. De Vlieger, B. Nevejans

Multiparameter normalisation of geochemical data from the Göteborg harbour
L.T. Engström, R.L. Stevens

Sand separation of heavily contaminated (class 4) dredged material. Results of a large scale test program in Rotterdam
J. van 't Hoff, A.H.M. Pepels, P.A. van der Meulen

Sludge treated by cements and additives
D. Levacher, M. Boutouil

Optimising and modelling of flotation techniques for remediation of contaminated sediments
S. Mosmans, G. van Mill

N-VIRO silt, a means of valorising sewage sludge within the new Flemish legislative framework VLAREA
J. De Brabandere, S. Venken

Remediation of heavy-metal polluted river sediments by bioleaching using the percolation principle
C. Löser, H. Seidel, P. Hoffmann, A. Zehnsdorf

Impact assessment, management and control

Environmental impact assessment study Hollandsch Diep/Haringvliet-Oost
P.J. Meesen

Treatment of contaminated sediments : assessment of environmental effects
M. Ferdinandy, A. Weenk, J. Rienks, K. Groen
Impact of contaminated dredged sediment deposits on clean soils: an interdisciplinary study of the mobility and bioavailability of the metallic pollution
C. Tiffreau, F. Marseille, M.P. Isaure, C. Lors, A. Laboudigue, P. Branchu, P. Lecomte

Remedial dredging of the petroleum harbour Amsterdam in the Netherlands
T. Schuhmacher, M. Ferdinandy, J.C. Wensink, V. Schaap

Minimizing the environmental impact of oil exploration and exploitation by remediation of oil-sludge lagoons. Several case studies
I. Pallemans, L. Durt

Source control and sediment management

Sedimentation in a dock harbour of Bremerhaven caused by water input
H. Nasner, S. Woltering

PCB and PAH profiles as source discriminants for contaminated sediments
R. van Zoest

Environmental significance of sediment units and their variability in the Götaverings
K. Brack, R.L. Stevens

Site characterization and remedial design issues for contaminated sediments associated with historical manufactured gas plants
P.A. Spadaro, S. Garbaciak, R.G. Fox, D.W. Matthews, R.M. Weaver, H. Crowser

Role of careening activities in the trace metals contamination of harbour sediments. Les sables d'Olonne (Vendee, F)
L. Le Breton, M. Piron-Frenet, J.P. Perthuisot, C. Amiard-Triquet

Environmental risk and merits analysis

Dumping of dredged material into the North Sea: development of evaluation methods and sediment quality criteria
D. Le Roy, K. Mergaert, P. Vanhaecke

Ecotoxicity tests: an intrinsic part of future sediment quality evaluations
M.L. Vangheluwe, C.R. Janssen, P.A. Van Sprang

Sediment characterisation of rivers in Flanders. The Triad approach
Strategies for sustainable management

Treatment and disposal of contaminated sediments: a cost comparison
J. Rienks, A. Honders, M. Ferdinandy, K. Groen

Managing dredging, dumping and the marine environment in Hong Kong
A. Dawes

Management of contaminated sediments in France. An integrated pragmatic approach
D. Bogusz

Contaminated sediments: removal, treatment or disposal? Policy and strategy
K. Groen, M. Ferdinandy, J. Rienks

Treatment and beneficial re-use of contaminated dredged material within the new VLAREA legislative framework in Flanders
S. Venken, J. De Brabandere, C. David

Sustainable relocation and beneficial use

Treatment and reuse of contaminated sediments: a case study on the Trenton Channel, Michigan, USA
M. Tuchman, A. Ostaszewski, S. Cieniawski

Brackish dredging sludge: possibilities and limitations for afforestation
J. Mertens, S. Luyssaert, P. Vervaeke, J. Van Mieghem, L. Speleers, N. Lust

Disposal of contaminated dredged material and nature development in the former sand borrow pit Kaliwaal in the Netherlands
W. de Haan, M.L. van Lankveld-Meggelaars

Sludge mounds as forested buffer zones between hard to combine landuses
S. Luyssaert, J. Mertens, P. Vervaeke, L. Speleers, N. Lust

Dredged material - raw material for the construction and other industries
H.D. Detzner

High quality sand products from contaminated sediments
S.C. van Winden, J.P. Erven, M.F. Pruijn

Area related reuse of contaminated dredged material: a possibility?
M.J. Dijkman-den Hollander, G.M. Boks

Thermal treatment of contaminated harbour sediments - environmental studies and technical experience of producing bricks at an industrial scale
V. Karius, K. Hamer, M. Bäätjer, J.P. Ulbracht, J. Schröter, H.D. Schulz, H. De Vlieger
