HEAVY OIL — A MAJOR ENERGY SOURCE FOR THE 21st CENTURY

VOLUME 1
## Table of Contents

Opening Session ................................................................................................. xxvii
Plenary Session ................................................................................................ xxvii
Technical Program ............................................................................................ xxviii
Messages ........................................................................................................... xxix
Conference Committee ...................................................................................... xxxiv
Organizing Committee of China and Technical Committee ......................... xxxv
Awards for Service ............................................................................................. xxxvi
Dedication of 7th UNITAR International Conference for Heavy Crude and Tar Sands Proceedings to Helga Petri ......................................................... xxxvii
Keynote Address: Douglas J. Lanier, Chevron Petroleum Technology Company, Houston, Texas, USA ............................................................. xxxviii
Plenary Section Lecturers .................................................................................. xxxix

Opening Session Statement:
  Marcel A. Boisard, Executive Director, United Nations Institute for Training and Research (UNITAR), Geneva, Switzerland ........................................ xliii

  Sandra L. Waisley, Deputy Assistant Secretary, Office of Natural Gas and Petroleum Technology, US Department of Energy, Washington, DC, USA ............................................................ xlv

  Manuel M. Pulido, Member of the Board of Directors, Petroleos de Venezuela, Caracas, Venezuela ................................................................. xlvii

  David K. Olsen, Director, UNITAR Centre for Heavy Crude and Tar Sands, Tulsa, Oklahoma, USA ................................................................. xlix

Manuscripts

1998.001
THE IMPACT OF TECHNOLOGY ON THE EXPLOITATION OF THE ORINOCO BELT: RESULTS AND FUTURE TRENDS
Ignacio Layrisse, PDVSA-FAJA, Caracas, Venezuela; and Jesus Chacin, PDVSA-INTEVEP, Caracas, Venezuela ................................................................. 1

1998.002
TAR SANDS — TECHNOLOGY, ECONOMICS, AND ENVIRONMENTAL ISSUES FOR COMMERCIAL PRODUCTION BEYOND THE YEAR 2000
HEAVY OIL — A MAJOR ENERGY SOURCE FOR THE 21st CENTURY

7th UNITAR INTERNATIONAL CONFERENCE ON HEAVY CRUDE AND TAR Sands

Sponsored by:
CHINA NATIONAL PETROLEUM CORPORATION
CHINA PETROCHEMICAL CORPORATION
UNITAR CENTRE FOR HEAVY CRUDE AND TAR SANDS

Co-Sponsored by:
PETRÓLES DE VENEZUELA, S.A.
UNITED STATES DEPARTMENT OF ENERGY

OCTOBER 27-30, 1998
BEIJING, CHINA

RICHARD F. MEYER AND DAVID K. OLSEN
EDITORS
1998.003
SUNCOR ENERGY INC. OIL SANDS MILLENNIUM PROJECT
B.A. Lang, Suncor Energy, Fort McMurray, Alberta, Canada

1998.004
HEAVY OIL AND TAR SANDS RESOURCES IN CHINA
Hu Jianyi and Niu Jiayu, Research Institute of Petroleum Exploration and Development, CNPC, Beijing, China

1998.005
OIL SANDS DEVELOPMENT IN ALBERTA: THE NEW PARADIGM
Paul Precht and Carmen Rokosh, Alberta Department of Energy, Edmonton, Alberta, Canada

1998.006
THE OILSANDS INDUSTRY AND SYNCRUDE CANADA LTD. GROWTH PLANS
Philip C. Lachambre, Syncrude Canada, Fort McMurray, Alberta, Canada

1998.008
THE FUTURE OF THE WORLD'S EXTRA HEAVY OIL RESOURCES — COMPETITION AND POTENTIAL
Ø. Haaland, R. Klovning, and T. Sem, Statoil, Stavanger, Norway

1998.010
ALBERTA OIL SANDS: THE ADVANCE OF TECHNOLOGY, 1978–98 AND BEYOND
Marcel Polikar and Ted Cyr, Alberta Department of Energy, Edmonton, Alberta, Canada; and Keith Sadler, Alberta Energy and Utilities Board, Edmonton, Alberta, Canada

1998.011
ORIMULSION® A FUEL FROM HEAVY OIL, ENGINEERED FOR PERFORMANCE
Cebers O. Gómez-Bueno, Niomar Marcano, and Ana C. Sanchez, PDVSA-INTEVEP, Los Teques, Venezuela

1998.012
OIL SANDS DEVELOPMENT IN ALBERTA — AN EUB PERSPECTIVE
Keith Sadler and Richard Houlihan, Alberta Energy and Utilities Board, Calgary, Alberta, Canada

1998.013
ANALYTICAL MODEL OF DISTILLATION OF OIL AT THE STEAM-OIL INTERFACE
Gunawan Sutadiwiria, Pertamina, Jakarta, Indonesia; and Daulat D. Mamora, Texas A&M University, College Station, Texas, USA

1998.015
MISCIBLE DISPLACEMENTS INVOLVING POWER-LAW FLUIDS IN POROUS MEDIA
Charul Shah, Hooshang Kharabaf, and Yanis C. Yortsos, University of Southern California, Los Angeles, California, USA

1998.016
FLUID ENHANCEMENT UNDER LIQUID PRESSURE PULSING AT LOW FREQUENCY
Jianbin Wang and M.B. Dusseault, University of Waterloo, Ontario, Canada; T.J.T. Spanos, University of Alberta, Edmonton, Alberta, Canada; and Brett Davidson, Subterranean Technologies, Cambridge, Ontario, Canada

1998.017
A STUDY OF HEAVY OIL ASPHALTENE BY NEUTRON SCATTERING
Min Y. Lin, National Institute of Standards and Technology, Gaithersburg, Maryland, USA; and E.B. Sirota and Hu Gang, Exxon Research and Engineering, Annondale, New Jersey, USA
APPLICATIONS OF HIGH / LOW-FREQUENCY ULTRASONIC ENERGY FOR BREAK-UP OF OIL FIELD EMULSIONS
David H.-S. Law and Eddy E. Isaacs, Alberta Research Council, Edmonton, Alberta, Canada

EFFECT OF FRACTURE PROPERTIES ON STEAM EFFICIENCY IN NATURALLY FRACTURED RESERVOIRS
Tayfun Babadagli, Istanbul Technical University, Istanbul, Turkey

ON THE SIGNIFICANCE OF RESERVOIR WETTABILITY ON EXTRACTION AND RECOVERY PROCESSES
Eddy Isaacs, Ross Chow, and Alexander Babchin, Alberta Research Council, Edmonton, Alberta, Canada

EXPERIMENTAL INVESTIGATION OF FLOW IN THE VICINITY OF A STEAMFLOOD HORIZONTAL WELL
M.S. Al-Salhi, Petroleum Development Oman, Oman; and Q. Doan and S.M. Farouq Ali, University of Alberta, Edmonton, Alberta, Canada

EXPERIMENTAL STUDIES OF STEAMFLOODING SASKATCHEWAN HEAVY OIL RESERVOIRS
Q.T. Doan, L.T. Doan, and S.M. Farouq Ali, University of Alberta, Edmonton, Alberta, Canada

THE INTERNAL WITNESS SAMPLE METHOD AND THE EVALUATION OF THERMO-OXIDATIVE REACTIONS ON THE COMBUSTION INFLUENCED OIL
Gabriel Teiçanu, Flavia Teiganu, and Cornelia Çtefan, I.C.P.T., Câmpina, Romania

AN INVESTIGATION OF WAG PROCESS THROUGH HORIZONTAL WELLS
Suat Bagci and Erdal Tuzunoglu, Middle East Technical University, Ankara, Turkey

STUDY OF PHASE EQUILIBRIUM OF MIXED GASES — FENGCHENG BITUMEN SYSTEM
Jingjun Pan, Xingjiang Institute of Oil Technology, Xinjiang, China; and Jie Ke, Guanying Yang, Buxing Han, and Haike Yan, Institute of Chemistry, Chinese Academy of Sciences, Beijing, China

EXPERIMENTAL STUDY OF RHEOLOGICAL BEHAVIOR OF HEAVY OIL UNDER RESERVOIR CONDITIONS
Lu Xue Cheng, Jianghan Research Institute of Petroleum Exploration and Development, Jianghan, China

SUCCESSFUL APPLICATION OF NEW THERMAL CYCLIC TECHNOLOGIES IN HEAVY OIL FIELD GREMIKHINSKOE
V.I. Koudinov, E.I. Bogomolnyi, and N.V. Zubov, Udmurtneft Joint StockCompany, Izevsk City, Udmurt Republic, Russia; and V.S. Kolbikov, RosNIPItmerenefi, Moscow, Russia
1998.031
MATHEMATICAL MODELING OF WAX DEPOSITION IN HORIZONTAL WELLS
M. Evren Ozbayoglu, Birol Demiral, and Mustafa V. Kok, Middle East Technical University, Ankara, Turkey

1998.032
A RATIONALIZED WELL DENSITY STUDY FOR STEAM INJECTION RECOVERY IN HEAVY OIL RESERVOIRS
Xie Peigong, Pu Haiyang, and Xu Xinwei, Research Institute of Petroleum Exploration and Development, CNPC, Beijing, China; and Zhang Xiwen and Lin Yuqiu, Research Institute of Petroleum Exploration and Development, Liaohe Petroleum Exploration Bureau, CNPC, Liaohe Oilfield, China

1998.033
A COMPREHENSIVE EVALUATION SYSTEM OF THERMAL RECOVERY BY STEAM INJECTION FOR HEAVY OIL RESERVOIRS
Pu Haiyang, He Zhong, and Zhang Rui, Research Institute of Petroleum Exploration and Development, CNPC, Beijing, China

1998.034
A STATISTICAL MODEL PREDICTING THE EFFECTIVENESS OF STEAM DRIVE FOR A HEAVY OIL RESERVOIR
He Zhong, Pu Haiyang, and Zhang Rui, Research Institute of Petroleum Exploration and Development, CNPC, Beijing, China

1998.035
NUMERICAL SIMULATION STUDY OF THERMAL RECOVERY BY HORIZONTAL WELLS IN CAOGU 1 BLOCK—A FRAC TURED LIMESTONE HEAVY OIL RESERVOIR
Lei Ping, Zhang Jian, Gao Yongrong, and Wang Xiaochun, Research Institute of Petroleum Exploration and Development, CNPC, Beijing, China

1998.036
OPTIMIZATION OF INJECTION AND PRODUCTION PARAMETERS IN STEAM DRIVE
Pingke Li, Memorial University of Newfoundland, St. John’s, New Foundland, Canada; and Zhang Xia and Yue Qingshan, Research Institute of Petroleum Exploration and Development, CNPC, Beijing, China

1998.037
SOME USEFUL ANALYTIC MODELS FOR STEAMFLOOD PROCESSES
P.J. Closmann, Consultant, Houston, Texas, USA

1998.038
A COMPARISON OF MASS RATE AND STEAM QUALITY REDUCTIONS TO OPTIMIZE STEAMFLOOD PERFORMANCE
G.L. Messner, L M. Castanier, and W.E. Brigham, Stanford University, Stanford, California, USA

1998.039
HEAVY OIL – A MAJOR ENERGY SOURCE FOR THE 21ST CENTURY
Douglas Lanier, Chevron Petroleum Technology, Houston, Texas, USA

1998.040
FOAMY OIL: DETERMINATION OF PRODUCTION MECHANISM AND THERMAL EFFECT OVER IT
Carlos Otero, Paolys Llaguno, Nicolas Charavallo, and Angel Rico, PDVSA-INTEVEP, Los Teques, Venezuela
1998.041
COLD PRODUCTION AND WORMHOLE PROPAGATION IN POORLY CONSOLIDATED RESERVOIRS
Yarlong Wang, Computer Modelling Group, Calgary, Alberta, Canada; and Jian-Yang Yuan, Alberta Research Council, Edmonton, Alberta, Canada .............................................................. 389

1998.042
EFFECT OF RESERVOIR PARAMETER ON OIL RATES AND STEAM OIL RATIOS IN SAGD PROJECTS
Y. Ito and S. Suzuki, Japan Canada Oil Sands, Calgary, Alberta, Canada .................................................. 407

1998.043
OPTIMIZATION OF STEAM FLOODING OF A HIGH WATER-CUT HEAVY OIL RESERVOIR
Brun Tripathy, Computer Modelling Group, Calgary, Alberta, Canada ...................................................... 417

1998.044
FIELD SCALE COMBUSTION SIMULATION STUDIES — INVESTIGATION OF RESERVOIR FLUID AND OPERATIONAL PARAMETERS ON PROJECT PERFORMANCE
Xiaowei Wang and Partha S. Sarathi, BDM Petroleum Technology, Bartlesville, Oklahoma, USA; and C.R. Bidinger, BP Alaska, Anchorage, Alaska, USA ................................................................. 425

1998.045
PREDICTION OF STEAM-FRONT PROPAGATION RATES IN GRAVITY DRIVEN STEAM-WATER COUNTER-CURRENT FLOWS
David H.-S. Law, T.N. Nasr, and Alex Babchin, Alberta Research Council, Edmonton, Alberta, Canada .................................................................................................................. 439

1998.046
GRAVITATIONAL DEPOSITION OF SAND INSIDE A HORIZONTAL WELL

1998.047
A SIMULATION STUDY OF STEAMFLOODING IN A HIGHLY STRESS-SENSITIVE HEAVY OIL FORMATION
Zhengming Yang and Iraj Ershaghi, University of Southern California, Los Angeles, California, USA; and Julius J. Mondragon and Scott Hara, Tidelands Oil Production, Wilmington, California, USA .................................................................................................................. 469

1998.048
DEVELOPMENT AND APPLICATION OF “SAFE TIME” CALCULATION SOFTWARE FOR HIGH WAXY CRUDE OIL PIPELINES ON THE EXAMPLE OF THE KHARYAGA TO UNINSK PIPELINE
K.D. Kaufmann, ILF Consulting Engineers, Munich, Germany ............................................................................. 485

1998.049
MULTIPHASE FLOW METERING EXPERIENCE IN THE VENEZUELA OIL INDUSTRY
Aaron Padron, PDVSA-FAJA, Caracas, Venezuela; and Emilio Guevara, PDVSA-INTEVEP, Los Teques, Venezuela ................................................................. 507

1998.050
MULTIPHASE PUMPING — COSTA BOLIVAR FIELD EXPERIENCES
Emilio Guevara, PDVSA-INTEVEP, Los Teques, Venezuela; and Aaron Padron, PDVSA-E&P, Caracas, Venezuela .................................................................................................................. 515
1998.051
HEAVY VISCOUS OIL CONDITIONING PROCESSES
V. Valer Popp, SNP PETROM SA, Institute for Research and Technology, Câmpina, Romania .................. 519

1998.052
HIGH INTERNAL PHASE RATIO REVERSE EMULSION TECHNOLOGY FOR PIPELINE
TRANSPORTATION OF HEAVY CRUDES IN NORTH CAMBAY BASIN OF INDIA
Avinish Kumar, V.K. Saxena, N.D. Sharma, R.K. Talwar, B.K. Sharma, and R.S. Dinesh, Oil
Natural Gas Corporation, Baroda, India ................................................................. 531

1998.053
EFFECTS OF DROPLET SIZE AND DROPLET SIZE DISTRIBUTION ON THE RHEOLOGY
OF OIL-IN-WATER EMULSIONS
Rajinder Pal, University of Waterloo, Waterloo, Ontario, Canada .................................................. 543

1998.054
PERFORMANCE OF MULTIPHASE SYSTEMS WITH HEAVY CRUDE OILS
R. Gonzalez, PDVSA-Production, Caracas, Venezuela; J.L. Trallero, PDVSA-INTEVEP, Los
Teques, Venezuela; V. Santoro, PDVSA-Production, Caracas, Venezuela; and M.A. Jimenez
and J. Colmenares, PDVSA-INTEVEP, Los Teques, Venezuela ........................................... 553

1998.056
RECOVERY METHODS FOR HEAVY OIL AND BITUMEN IN THE 21ST CENTURY
Eddy E. Isaacs, Alberta Research Council, Edmonton, Alberta, Canada; Ted Cyr, Alberta
Department of Energy, Edmonton, Alberta, Canada; Chu Hsi, Consultant, Edmonton, Alberta,
Canada; and Surindar Singh, Alberta Research Council, Edmonton, Alberta, Canada ..................... 563

1998.057
SWELLING CLAYS IN HYDROCARBON RESERVOIRS: THE BAD, THE LESS BAD,
AND THE USEFUL
Z. (John) Zhou and David H.S. Law, Alberta Research Council, Edmonton, Alberta, Canada ............... 575

1998.058
BITUMEN IN WATER BIMODAL EMULSIONS STABILIZED BY NATURAL SURFACTANTS
Hercilio Rivas, Felix Silva, Xiomara Gutierrez, and Gustavo Nunez, PDVSA-INTEVEP, Los
Teques, Venezuela ............................................................................................................. 585

1998.059
DEVELOPMENT OF THE STEAM AND GAS PUSH (SAGP) PROCESS
Qi Jiang, Roger M. Butler, and Chi-Tak Yee, GravDrain, Calgary, Alberta, Canada ......................... 597

1998.060
STUDY ON A NEW UPGRADING PROCESS OF HEAVY OILS COMBINED WITH SAGD
BY MEANS OF HYDROTHERMAL TREATMENT
A. Kishita, H. Kamimura, C.X. Hong, and H. Enomoto, Tohoku University, Sendai, Japan;
T. Moriya and Y. Saito, Tohoku Electric Power, Sendai, Japan; T. Sugiura, Japan Petroleum
Exploration, Tokyo, Japan; and K. Ohno, Japan National Oil Corporation Technology Research
Center, Chiba, Japan ............................................................................................................ 615

1998.061
ELECTRICAL INDUCTION HEATING OF HEAVY OIL WELLS USING THE TRIFLUX
SYSTEM
Homer L. Spencer, Tesla Industries, Calgary, Alberta, Canada; and Robert E. Isted, Madis
Engineering, Calgary, Alberta, Canada .................................................................................. 627
1998.062
EVOLUTION OF THE PRODUCTION METHODS FOR BITUMEN IN THE AREA CERRO NEGRO OF THE BITUMINOUS ORINOCO BELT — VENEZUELA
Martha R. Espinoza and Luis E. Montefusco, PDVSA-BITOR, Morichal, Mongas, Venezuela ...

1998.063
PRESENT AND FUTURE OF ARTIFICIAL LIFT SCHEMES FOR THE ORINOCO BELT IN VENEZUELA
Jorge Robles and Carlos Guirados, PDVSA-INTEVEP, Los Teques, Venezuela ...

1998.066
OPTIMIZATION OF ELECTROSUBMERSIBLE PUMPS FOR HANDLING HEAVY FOAMY OILS
C. Brunings and L. Toussaint, PDVSA-Corpoven, Caracas, Venezuela ...

1998.067
AUTOMATED DIAGNOSTIC OF PROGRESSIVE CAVITY PUMPS
Esmil Quijada, Carlos Brunings, and Leonardo Mena, PDVSA-Corpoven, Caracas, Venezuela ...

1998.068
STUDY ON INSULATED TUBING AGAINST HYDROGEN DAMAGE
Wang Shihu, Zhang Yi, Zhou Zhiqi, Gai Pingyuan, and Zhai Yong, Shengli Petroleum Administration Bureau, CNPC, Shengli Oilfield, China ...

1998.069
TECHNOLOGY OF ELECTRIC CABLE HEATING BY HOLLOW SUCKER ROD IN THE HEAVY OIL RESERVOIRS
Liu Junrong, Li Chuntang, Wang Qinglin, and Wang Tianpeng, Liaohe Petroleum Exploration Bureau, CNPC, Liaohe Oilfield, China ...

1998.070
FOUR HIGH TEMPERATURE PARAMETER MEASURING TECHNOLOGY AND ITS APPLICATION
Ma Donglan, Zhao Yewei, and Zhou Hongwei, Liaohe Petroleum Exploration Bureau, CNPC, Liaohe Oilfield, China ...

1998.071
TRANSIENT HEAT TRANSFER PROBLEM FOR A PROGRESSIVE CAVITY PUMP (PCP) USED IN THE RECOVERY OF HEAVY OIL
Bruce C.W. McGee, Shane Freeson, and Robert Batt, Wascana, Edmonton, Alberta, Canada; Thorsten Watterodt, DT Systems, Calgary, Alberta, Canada; and Fred Vermeulen, University of Alberta, Edmonton, Alberta, Canada ...

1998.072
ESPS IN CYCLIC STEAM INJECTION WELLS
R. González, C. Brunings, L. Toussaint, and A. Granado, PDVSA-E&P, Caracas, Venezuela ...

1998.073
RESID CONVERSION OPTIONS
B.E. Reynolds, J.L. Rogers, S. Spieler, and R.A. Broussard, Chevron Research and Technology, Richmond, California, USA ...

xi
PARTIAL UPGRADING OF ATHABASCA BITUMEN FROTH BY ASPHALTENE REMOVAL
P.M. Rahimi, R.E. Ellenwood, and R.J. Parker, National Centre for Upgrading Technology, Devon, Alberta, Canada; and J.M. Kan, N. Andersen, and T. Dabros, Advanced Separation Technology, Calgary, Alberta, Canada .......................................................... 727

(HC)3 PROCESS — A SLURRY HYDROCRACKING TECHNOLOGY DESIGNED TO CONVERT BOTTOMS AND HEAVY OILS
Roger K. Lott, Alberta Research Council, Edmonton, Alberta, Canada; and Ted Cyr and Roger T. Bailey, Alberta Department of Energy, Edmonton / Calgary, Alberta, Canada ...................... 735

UPGRADING OF THE PROCESSING RESIDUE OF MORDOVO KARMALSKIAN OIL TO INTENSIFY THE OXIDATION PROCESS AND TO IMPROVE THE BITUMEN QUALITY
A.F. Kemalov, R.Z. Fakhrutdinov, T.F. Ganieva, I.N. Diyarov, and R.A. Ibragimov, Kazan State Technological University, Kazan, Tatarstan, Russia .......................................................... 743

EFFECT OF DIFFERENT VACUUM GAS OILS OBTAINED FROM HEAVY OILS ON FCC PRODUCTS SELECTIVITIES
Jorge Ancheyta-Juárez and Enrique Aguilar-Rodríguez, Instituto Mexicano del Petróleo, Col. San Bartolo Atepehuacan, México; and Felipe López-Isunza, Universidad Autónoma Metropolitana, Iztapalapa, México............................ 749

FRIPP RESIDUUM SLURRY HYDROCONVERSION PROCESS
Li Yuansheng, Wang Jun, Wang Xianti, Jia Li, Zhang Zhongqing, and Han Chongre, Fushun Research Institute of Petroleum and Petrochemicals, SINOPEC, Fushun, China.......................... 757

INVESTIGATION OF COKE FORMATION DURING THERMAL TREATMENT AND HYDROCRACKING OF LIAOHE VACUUM RESIDUE
Wang Zongxian, Aijun Guo, and Guohe Que, University of Petroleum-East China Dongying, Shandong, China .......................................................... 763

A NEW ASSAY METHOD FOR HEAVY OILS AND PETROLEUM RESIDUAL AND THE CHARACTERIZATION OF CHINESE RESIDUALS
Yang Guanghua, Wang Renan, and Xu Chunming, State Key Laboratory of Heavy Oil Processing, University of Petroleum, Beijing, China.......................................................... 773

EVALUATION OF RATIONALITY AND RESTRICTION OF VISCOUS CRUDE AND RESIDUE UPGRADING
Fan Yao, Hua Cheng, Jian Zheng, and Zhong Ping, University of Petroleum—East China, Dongying, Shandong, China .......................................................... 789

DESIGN OF SUPERCRTICAL FLUID EXTRACTION PROCESS TO UPGRADE OIL SAND BITUMEN BY CONTINUOUS THERMODYNAMICS
M. Subramanian and F.V. Hanson, University of Utah, Salt Lake City, Utah, USA ...................... 797

PROCESSING ASPECTS OF JODHPUR HEAVY CRUDE OIL IN INDIA

xii
RESID CONVERSION THROUGH THE AQUACONVERSION™ TECHNOLOGY — AN ECONOMICAL AND ENVIRONMENTAL SOLUTION
R. Marzin, P. Pereira, L. Zacarias, and L. Rivas, PDVSA-INTEVEP, Los Teques, Venezuela; Michael McGrath, Foster Wheeler, Clinton, New Jersey, USA; and Gregory J. Thompson, UOP, Des Plaines, Illinois, USA .............................................825

BOTTOMS CONVERSION — CONTINUED IMPROVEMENT AND BRIGHT OUTLOOK
R.L. Dickenson, F.E. Biasca, A.D. Karp, and H.E. Johnson, SFA Pacific, Mountain View, California, USA ..........................................................835

MOLECULAR DISTILLATION: AN ANALYTICAL TOOL FOR HEAVY AND EXTRA-HEAVY CRUDE OIL ASSAYS
Alain Bellet, PDVSA-INTEVEP, Los Teques, Venezuela .............................................845

H-OIL PROCESS BASED HEAVY CRUDES REFINING SCHEMES
J.J. Colyar and E. Peer, IFP North America, Calgary, Alberta, Canada; A. Billon, IFP Direction Industrielle, Paris, France; and S. Kressmann and F. More, IFP Centre d’Études et de Développement Industriel “René Navarre”, Solaize, France ..........................................................857

THERMAL PROCESSING OF HEAVY PETROLEUM FRACTIONS: COKING AS AN EMULSION PROCESS
Liming Liu, Sanyi Wang, Murray R. Gray, and William C. McCaffrey, University of Alberta, Edmonton, Alberta, Canada .............................................867

SESR — A NOVEL CANADIAN TECHNOLOGY FOR REMEDIATING HIGHLY SALINE PETROLEUM AND HEAVY METAL CONTAMINATED SOILS AND SEDIMENTS
Abdul Majid and Bryan D. Sparks, National Research Council of Canada, Institute for Environmental Research and Technology, Ottawa, Ontario, Canada ..........................................................873

CANADIAN HEAVY CRUDE / BITUMEN MARKETS: DRIVERS AND CHALLENGES
Gareth R. Crandall, Purvin & Gertz, Calgary, Alberta, Canada .............................................877

MECHANISMS OF MASSIVE SAND PRODUCTION IN HEAVY OILS
Maurice B. Dusseault and Mikhail B. Geilikman (Shell USA, Houston), Porous Media Research Institute, University of Waterloo, Waterloo, Ontario, Canada; and Tim Spanos, University of Alberta, Edmonton, Alberta, Canada ..........................................................887

COMMERCIAL IMPLEMENTATION OF A DRY LANDSCAPE OIL SANDS TAILINGS RECLAMATION OPTION: CONSOLIDATED TAILINGS
R.J. Mikula, V.A. Munoz, K.L. Kasperski, and O.E. Omotoso, Natural Resources Canada, CANMET, Devon, Alberta, Canada; and D. Sheeran, Suncor Energy, Fort McMurray, Alberta, Canada ..........................................................907

SOLVENT EXTRACTION PROCESS FOR ASPHALTENIC HEAVY OIL SLOP CLEANUP AND RECOVERY
Frank H. Wu, Integral Energy and Environmental Engineering, Calgary, Alberta, Canada ..........................................................923
THE ENVIRONMENT AND ITS CONSTRAINTS IN THE PROJECT MANAGEMENT, THE INTEGRATED DEVELOPMENT AND THE CASE OF MADAGASCAR
Elisé Raveloson and Etienne Rakotomaria, Université d’Antananarivo, Ampasampiao, Madagascar; and Joëlle Gazetian, François Rigaud, and Jean Michel Ruiz, Université de Droit, Marseille Cedex, France

HYDROCYCLONE MODEL SIMULATION: A DESIGN TOOL FOR DEWATERING OIL SANDS PLANT TAILINGS
A.I.A. Salama, CANMET, Devon, Alberta, Canada; and T. Kizior, Syncrude Canada, Fort McMurray, Alberta, Canada

MARKETING CHALLENGES FOR CANADIAN BITUMEN
Ian C. Walker, Imperial Oil, Calgary, Alberta, Canada

MEANS AND PRACTICE TO IMPROVE THE HEAT EFFICIENCY OF STEAM INJECTION SYSTEM
Zhang Guangqing, Chen Fusheng, Wang Xinmin, and Wu Yadongm, Shengli Petroleum Administration Bureau, CNPC, Shengli Oilfield, China

RESERVOIR MANAGEMENT OF HEAVY OIL RESERVOIRS OF NORTH GUJARAT, INDIA
A.K. Bhatia, Lehmbar Singh, and Daljit Singh, Oil Natural Gas Corporation, Baroda, India

EXPLOITATION SCHEME FOR THE ARECUNA AREA, LOCATED IN THE ORINOCO BELT, BASED ON HORIZONTAL WELLS
Oscar Gonzalez, Hector Rodriguez, Paolys Llaguno, and Carlos Otero, PDVSA-INTEVEP, Los Teques, Venezuela

BUSINESS OPPORTUNITIES IN THE ORINOCO BELT: CERRO NEGRO PROJECT
Manuel Treviño, PDVSA-FAJA, Caracas, Venezuela

DIFFERENT EXPLOITATION SCHEMES FOR HEAVY FOAMY OIL RESERVES IN ORINOCO BELT, VENEZUELA
H.A. Rodriguez, M. Blanco, O. Gonzalez, and C. Otero, PDVSA-INTEVEP, Caracas, Venezuela; and G. Hernandez and M.C. de Mirabal, PDVSA-E&P, Caracas, Venezuela

INTEGRATED RESERVOIR CHARACTERIZATION AND VOLUMETRIC ANALYSIS OF THE ANALYSIS OF THE ARECUNA FIELD (3-D SEISMIC AREA) ORINOCO BELT
José J. Castillo, M. Sanchez, M. Rodriguez, and P. Calderon, PDVSA-E&P, Puerto La Cruz, Venezuela; and D. Hamilton, M. Holtz, R. Barba, S. Akther, J. Yep, R. Nelson, and G. Bullen, Bureau of Economic Geology, University of Texas, Austin, Texas, USA

MONITORING STEAM INJECTION PERFORMANCE IN SHALLOW HEAVY OIL RESERVOIRS
Chang Yuwen, Peng Tongshu, Wang Lisheng, and Liu Yinghui, Xinjiang Petroleum Administration Bureau, CNPC, Karamay Oil Field, China
1998.110
BIOTECHNOLOGY FOR HEAVY OIL RECOVERY
Rebecca S. Bryant, Scott A. Bailey, Anita K. Stepp, Deanna B. Evans, Judy A. Parli, and
Arati R. Kolhatkar, BDM Petroleum Technology, Bartlesville, Oklahoma, USA

1998.112
LOG INTERPRETATION METHOD FOR HEAVY OIL RESERVOIRS
Chen Xueyi, Li Nenggen, Zhang Hui, and Han Zhiming, Liaohe Well Logging Company,
Liaohe Oilfield, China

1998.113
A VERSATILE MODEL FOR EVALUATING THERMAL EOR PRODUCTION ECONOMICS
Scott H. Stevens and Vello A. Kuuskraa, Advanced Resources International, Arlington, Virginia,
USA

1998.114
RECENT ENGINEERING ADVANCES IN STEAMFLOODING
K.C. Hong, KCH Consulting, Irvine, California, USA

1998.115
THE PRACTICE AND ACHIEVEMENT OF STEAM DRIVE PILOTS IN BLOCK 9,
KARAMAY SHALLOW HEAVY OIL RESERVOIRS
Ma Xingming, Wang Jiahuai, and Yang Shengzhen, Xinjiang Petroleum Administration
Bureau, CNPC, Karamay Oilfield, China

1998.116
STEAM FLOODING PILOT FOR SHALLOW AND THIN-BEDDED HEAVY OIL
RESERVOIRS
Hu Changzhong, Liu Xinfu, Song Zhenyu, Wang Jue, and Song Pengrui, Henan
Petroleum Exploration Bureau, CNPC, Henan Oilfield, China

1998.117
EVALUATION OF STEAMFLOODING EFFECTIVENESS OF DU 163 PILOT
Li Xiuluan, Zhang Rui, and Zhang Jian, Research Institute of Petroleum Exploration and
Development, Beijing, China; and Ju Shifeng and Wang Jing, Liaohe Petroleum Exploration
Bureau, CNPC, Liaohe Oilfield, China

1998.118
PRACTICE AND PRODUCTION PERFORMANCE STUDY OF STEAM DRIVE IN BLOCK
SHU 1–7–5
Xing Jingkui, Pei Yubao, Ju Shifeng, Zuo Xiangjun, and Ma Yulong, Liaohe Petroleum Exploration
Bureau, CNPC, Liaohe Oilfield, China

1998.119
RECENT EXPERIENCE IN DESIGN AND MODELING OF THERMAL HORIZONTAL WELLS
Mridul Kumar and William S. Fong, Chevron Petroleum Technology, La Habra, California, USA; and
Mike Basham, Chevron USA Production, Bakersfield, California, USA

1998.120
EFFECTS OF GEOMECHANICS ON STEAMFLOOD IN THE SHALLOW RINDU ZONES,
DURI FIELD, INDONESIA
D. Satriana, W. Budiarto, and J. Peifer, CPI; D.S. Mims, Texaco, Houston, Texas, USA; R. Ewy
and M. Kumar, Chevron, La Habra, California, USA; A. Settari and G.M. Warren, Duke
Engineering, Houston, Texas, USA; and M.S. Bruno, Terralog Technologies, Houston,
Texas, USA

xv
