Emission Inventory: Living in a Global Environment

The Proceedings of a Specialty Conference
December 8-10, 1998
New Orleans, LA

Volume II

Sponsored by
the Air & Waste Management Association
and the U.S. EPA
RAPIDS Mobile Source Enhancements for the RAPIDS Air Toxics
Emissions Inventory System 483
Derek Moy, Julie Wagemakers, Mike Donahue, Orlando Cabrera, Chun Yi Wu, David Asselmeier, Gary Baker, Suzanne King, Rob McDonough, John Bates, Peter Wong, Robert Emigh, Mark Young, Suzanne Strasser, James G. Wilkinson, and Cyndi Loomis

Uncertainty in Emission Factors in the California Emissions Model 496
Alison K. Pollack

Analysis of In-Use Motor Vehicle Toxic Emissions Using a New Emission Factor Model, MOBTOX5b 518
Richard Cook, Pamela Brodowicz, David Brzezinski, Phil Heirigs, and Sandeep Kishan

MOBILE6: A Revised Model for Estimation of Highway Vehicle Emissions 526
Daniel J. Brzezinski and Terry P. Newell

EPA’s New Nonroad Mobile Emissions Model 544
Alison K. Pollack and Rich Wilcox

Geographic Allocation and Growth in EPA’s NONROAD Emission Inventory Model 568
Gary Dolce, Greg Janssen, and Richard Wilcox

Thomas L. Darlington, Jeremy G. Heiken, and Dennis Kählbaum

Volume II

Poster Paper Session

EPA’s Global Inventory and Technology Tools 599
Lee Beck

Influences on Volumetric Flow Continuous Emissions Monitoring Systems 600
David L. Mackintosh

Hypoxia in the Gulf of Mexico and Trends in Precipitation Sulfate—Two Contemporary Applications of NADP Data 613
Roger Claybrooke, Gary Stensland, Van Bowersox, and Robert Larson

Application of a Geographical Information System (GIS) to Land Use Mapping for Biogenic Emission Modeling in Germany and Europe 626
Gerhard Smiatek and William R. Stockwell

The Iowa Environmental Air Permitting System 637
Cherity Gabrielle, Peter Hamlin, Robert Emigh, Bill Johnson, Suzanne Strasser, and Mike Kashefska
Session 6 - Projections
Chair: Erica J. Laich, The Penchan-Avanti Group

Projection Methods for Direct Particulate Emitters
William R. Barnard, Janna E. Hummel, Erica J. Laich, James H. Wilson, Jr., James E. Neumann, and Matthew A. Schwartz

Emission Inventory Projection Project
Lyle R. Chinkin, Tami L. Haste, Dana L. Coe, Anil K. Puri, Jane V. Hall, and Stephen Levy

Development of the NOx SIP Call Projections
Douglas Solomon, Gregory M. Stella, and Laurel Schultz

Status and Future Plans for the Economic Growth Analysis System (EGAS)
Andrew D. Bollman and Gregory M. Stella

Regional Economic and Demographic Forecasting with a REMI Model
George I. Treyz and Tom Tanner

New Techniques for Projecting Regional Emissions Estimates for the Southern Appalachian Mountains Initiative
Douglas Solomon, Andrew Bollman, Erica Laich, and Maureen Mullen

Session 7 - Energy Emissions and Greenhouse Gases
Chair: Wiley Barbour, U.S. EPA

How Can Poland Comply with Kyoto and Europe’s Second Sulfur Protocol?
An Analysis of Various Energy Supply Scenarios and Their Implications for Future Air Pollution Emissions
Guenther Conzelmann, Thomas D. Veselka, and Andrzej Kerner
Findings from the U.S. Greenhouse Gas Inventory Process
Michael W. Gillenwater

E-GRID: Development of an Integrated Electric Power Database
Susy S. Rothschild and Richard E. Morgan

Uncertainty in Greenhouse Gas Trend Estimates—A Sensitivity Analysis
Kristin Rypdal

Greenhouse Gas Emissions and Mitigation in Developing Countries: The Case of Lebanon
Mutasem El-Fadel and Elie Bou-Zeid

Non-CO₂ U.S. Greenhouse Gas Emissions Inventories
William N. Irving and Dina Kruger

Nitrous Oxide Emission Factors for Mobile Sources
Harvey Michaels, Carl Fulper, and Bruce Kolowich

Session 8 – Data Management
Cochairs: Chuck Isbell, U.S. EPA and Jeff Colburn, TRC Environmental Corp.

The New CORINAIR System: An Integrated Set of Tools for National Emissions Inventories
Tinus Pulles, Jozef Skakala, Jan Svetlik, and Miro Linek

Emissions Inventory Software Tools for Air Quality Management Plans
Carlo Trozzi, Rita Vaccaro, Roberto Trobbiani, Pierluca Digiovandomenico, and Enzo Piscitello

Acid Rain Program Data: Trends, Statistics, and New Developments
Ketan D. Patel and Martin W. Husk

The Prototype Emission Inventory Improvement Program (EIIP) Electronic Data Interchange (EDI) System for Emission Inventories—A Successful Data Transfer Option
Bruce E. Lane and Rebecca Lee Tooly

Electronic Reporting and the Emissions Inventory Program
David S. Schwarz

VOC Emission Reductions—The Dutch KWS 2000 Programme
Chris Evers and Pieter van der Most

The Colorado Air Inventory System: A Tool for Managing and Reporting Point Source Emission Inventories to the EPA
Jeff Colburn

The Illinois Emissions Reduction Market Computer System
David Kolaz, Dennis Bomke, David Bloomberg, David Asselmeier, Stan Ostrem, Robert Emigh, Bill Johnson, and Suzanne Strasser
Session 9 – Preparing a Source-Specific Emission Inventory—Municipalities to Industries  
Chair: Daniel Wolf, C.K. Associates, Inc.

Estimating Emissions from Water-Based Processes in the Textile Industry  
George M. Woodall

AP-42 Emission Factor Revisions for Condensible Particulate Matter from Coal, Oil, and Natural Gas Combustion  
Roy H. Huntley

Metals Emissions from Taconite Ore Processing Facilities in Minnesota  
Hongming Jiang, Chun Yi Wu, and Todd Biewen

Preparation of Industrial Emission Estimates for Pantex  
C.N. Click, R.K. Roulston, W.A. Bowman, and J.M. Bryan

Estimating Air Emissions from Research and Development Activities  
David D. Skipper

Assessment of Odour Emissions from a Municipal Solid Waste Landfill Site: Experimental Design for the Estimation of a Footprint Flux  
Ujjaini Sarkar and Stephen E. Hobbs

Development of a Lead Emission Inventory for the Greater Cairo Area  
James E. Howes, Jr., Mounir W. Labib, Zeinab Safar, and Hala El-Manakhly

Elaboration on Mexico City’s Emission Factors and Metropolitan Area  
Hugo Landa Fonseca and Dionisio Moreno Rivero

Session 10 – Modeling—The Latest Developments  
Cochairs: Gregory Stella and Norm Possiel, U.S. EPA

Recent Improvements and Enhancements to the EMS-95 Model  
Mark Janssen

Integrating Emission Inventory Processing with a Geographic Information System  
Jo Ellen Brandmeyer, Hassan A. Karimi, and Alison Eyth

Development of Biogenic Emissions for the 1995 Summer Season Using SMOKE-BEIS2  
Jeffrey M. Vukovich

Estimating Hourly Emissions of Atrazine from Agricultural Lands for the Lake Michigan Mass Balance Study  
M.T. Scholtz, B.J. Van Heyst, E.J. Cooter, and J. Pleim
Effects of One-Way Nested Modeling Systems versus Inventories on an Urban Airshed in the Northeast
Saravanan Arunachalam, Chris Salmi, and Panos G. Georgopoulos 1049

Incorporation of the Acid Rain Database into the Photochemical Modeling Emission Inventory: A Case Study
Ronald L. Thomas and James D. MacKay 1061

Emission Inventory Development and Processing for the Seasonal Model for Regional Air Quality
Marc R. Houyoux and Jeffrey M. Vukovich 1074

Hierarchical Emissions Inventory Development for Nested Photochemical Modeling—Part 1: Conceptual Overview
James H. Smith 1086

Session 11 – PM and Regional Haze Issues
Cochairs: Tom Pace and William Kuykendal, U.S. EPA

Ammonia Emissions from a Large Dairy in California’s San Joaquin Valley
Lowell Ashbaugh, Nicole Freitas, Theresa James, and Robert Flocchini 1099

Emission Measurements of Particle Mass from Construction Activities
Chatten Cowherd, Jr., Gregory E. Muleski, and Charles C. Masser 1106

Predicting PM10 and PM2.5 Dust Emissions from Agricultural Wind Erosion
Keith Saxton, David Chandler, Larry Stetler, Candis Claiborn, Brian Lamb, and Bu-Hyun Lee 1119

A New Calculation Procedure for Estimating Particulate Emissions from Concentrate Storage Piles Using Site-Specific Short-Term Wind Speed Data
Navin Tandon, John Hofmann, and Lee Moody 1130

Fugitive PM10 and PM2.5 Emissions from an Urban Intersection in Sacramento, California
Lowell Ashbaugh, Robert Matsumura, and Robert Flocchini 1139

Visibility Measurements and Calculation of the Deciview Metric for Visibility Analyses in Wyoming
Robert A. Zimmer 1151

Gaseous and Particulate Matter Emissions from Two Light-Duty Gasoline Motor Vehicles
Lisa A. Graham 1163

Real-Time Measurements of Particulate Matter and Polycyclic Aromatic Hydrocarbon Emissions from Stationary Combustion Sources Used in Oil and Gas Production

Status of Emissions Inventory Methods for PM2.5
Sheila Holman, Tom Pace, and Mark Saeger 1194
Addendum

The following paper was inadvertently omitted from the 1997 proceedings:

The Use of Continuous Functions for a Top-Down Temporal Disaggregation of Emission Inventories 1209
*Maria Kalchmayr and Rudolf Orthofer*
