CONTENTS

PLASMA SOURCES

Generation

Generation of High Heat Flux Plasmas by High Power RF Heating in the Divertor Plasma Simulator NAGDIS-II
Y. Uesugi, T. Imai, H. Sawada, N. Hattori and S. Takamura (Nagoya Univ.) ............... 1

1-40 kW Steam Respectively Multi Gas Thermal Plasma Torch System
B. Glocker, G. Nentwig and E. Messerschmid (Steinbeis Transferzentrum Raumfahrt) ............... 9

High Thermal Efficiency Type Laminar Plasma Jet Generator for Plasma Processing
K. Osaki, O. Fukumasa (Yamaguchi Univ.) and A. Kobayashi (Osaka Univ.) ............... 17

Deposition

Application of Strongly Ionized AC Tokamak Plasma for Synthesis of TiN Thin Films
M.Y. Ye (Nagoya Univ.), O. Matsuda (TDK Corporate), N. Ohno, Y. Uesugi, M Takagi and S. Takamura (Nagoya University) ............... 23

Propulsion

Continuous-Wave Laser Thruster Experiment
K. Toyoda, K. Komurasaki and Y. Arakawa (University of Tokyo) ............... 29

A Numerical Study for Laser-Supported Plasmas
P. Molina-Morales, K. Komurasaki and Y. Arakawa (University of Tokyo) ............... 37

A Study of Plasma Propulsion System with RF Heating
H. Sou, Y. Takao, T. Noutsuka, Y. Mori, K. Uemura and H. Nakashima (Kyushu Univ.) ............... 45

Diagnostics

Emi-Spectra Diagnostics of Argon DC Discharge Plasma
J. L. Zhang, X. L. Deng, P. S. Wang and T. C. Ma (Dalian University) ............... 51
Properties

Radiation Power Emitted from Ar Torch Short Plasma as a Function of Input Power in Several kW
  T. Iwao, H. Miyazaki, T. Hayashi, T. Hirano and T. Inaba (Chuo University) ............ 59

Influence of Air Flow Velocity Distribution on Current Interruption in Flat-Type Arc Quenching Chamber
  T. Matsumura, Y. Yokomizu and H. Ohno (Nagoya University) .......................... 67

High Temperature Jet Impingement on Material Surfaces
  A. K. Hayashi, M. Haba and N. Endo (Aoyama Gakuin University) ...................... 73

Very Low Power Arcjet Testing
  H. Horisawa and I. Kimura (Tokai University) ............................................. 79

An Attempt to Develop Relations for the Arc Voltage in Relation to the Arc Current and Gas Flow Rate
  R. Ramasamy, V. Selvarajan (Bharathiar University),
  K. Perumel (S. R. M. V. College of Arts and Science), P. Victor and
  G. Chanmuga velayuthan(Bharathiar University) ........................................... 87

Modeling & Simulations

Charged Dusts in Processing Plasma Sheath
  J. Liu, D. Wang and T. C. Ma (Dalian University) .......................................... 95

Helical Instability of Arcs with Electrical Conductivity of Parabolic Distribution under the Electrostatic Approximation
  Y. Gong, J. Liu, X. Wang and W. Lu (Dalian University) ................................. 103

PLASMA PROCESSING

Plasma Sources for processing

The Atmospheric Pressure Plasma Jet (APPJ) : Science and Applications
  G. S. Selwyn, J. Park, H. Herrmann, H. Snyder, I. Henins (Los Alamos National Lab.), R. F. Hicks, S.E. Babayan, J.Y. Jeong and V. J. Tu (UCLA) ................. 111

Reignition Phenomena of Gas Tungsten Arc Discharge by Pulsed Current
  Y. Hirata (Osaka Univ.) and K. Ozaki (National Ind. Res. Inst. of Nagoya) ........... 119

(iv)
Surface Modification

Environmental and Technical Aspects of Plasma Nitrocarburising
T. Bell, Y. Sun and A. Suhadi (University of Birmingham) ..................125

Study on Nitriding of SACM645 Steel Using Supersonic Nitrogen Plasma Jets
Y. Ando, K. Kurosawa (Ashikaga Inst. of Tech), S. Mitsufuji (Osaka Univ.),
S. Tobe (Ashikaga Inst. of Tech), H. Tahara and T. Yoshikawa (Osaka Univ.) ..............133

Welding

Fundamental Research of Micro-Arc for Very Small Size Welding
Y. Hirata, M. Fukushima, T. Sano (Osaka University), K. Ozaki
(National Ind. Res. Inst. of Nagoya) and T. Ohji (Osaka University) ..............139

Deposition

Deposition of Silicon Carbide Films Using ECR Plasma of Methylsilane
T. Matsutani, M. Kiuchi (Osaka National Research Inst.), T. Takeuchi (Nara
Women’s Univ.), T. Matsumoto, K. Mimoto and S. Goto (Osaka Univ.) ......................147

Preparation of Metal Nitride and Oxide Thin Films Using Shielded Reaction Vacuum Arc Deposition
R. Miyano, K. Kimura, K. Izumi, H. Takikawa and T. Sakakibara (Toyohashi University of Technology) .................153

TiN Film Deposition Using Dense Plasma Focus
M.P. Srivastava and R. Gupta (University of Delhi) ....................161

Applications of Plasma Processes in Microelectronics
D. F. Richards, M. O. Bloomfield, S. Soukane and T. S. Cale
(Rensselaer Polytechnic Institute) ......................167

Arc Spraying

Active Electronic Devices Fabricated by the D.C. Plasma Arc Spray Process
H.C. Dickey (Westinghouse R&D Center) and T. T. Meek
(University of Tennessee) .........................175

Plasma Spraying

The Splat Morphology of Plasma Sprayed Particle and the Relation to Coating Property
N. Sakakibara, H. Tsukuda and A. Notomi (Mitsubishi Heavy Industries) .................181

Optimizing Plasma Sprayed Alumina Coatings Using Design of Experiments
P. Saravanan, V. Selvarajan (Bharathiar Univ.), M.P. Srivastava,
S.V. Joshi and G. Sundararajan (Univ. of Delhi) .........................189
Development of Composite TBC Coatings Exhibiting Anisotropic Microstructure
S. Sharafat (UCLA), A. Kobayashi (Osaka University)
V. Ogden and N. Ghoniem (UCLA) ..................197

Oxide Ceramics Plasma-sprayed on Steel
M. Vural (Istanbul Tech. Univ.), S. Zeytin (Sakarya Univ.)
and A. H. Ucisik (Bogazici University) ..................205

A Study of Erosive and Abrasive Wear of Plasma Sprayed Coatings
T. Hejwowski (Technical University of Lublin) ..................211

Thermal Fatigue Resistance of Plasma Sprayed Coatings
T. Hejwowski and A. Weronski (Technical University of Lublin) ..................217

Effect of Heat Treatment on High Hardness Zirconia Coatings Formed
by Gas Tunnel Type Plasma Spraying
A. Kobayashi (Osaka Univ.) and T. Kitamura (College of Industrial Tech.) ..................223

Plasma Reactive Spraying

Formation of TiN Coatings by Gas Tunnel Type Plasma Reactive Spraying
A. Kobayashi (Osaka University) and M. Yanagihara (Kansai University) ..................231

Development of an Electromagnetic Acceleration Plasma Generator for
Titanium Nitride Coatings
T. Shibata, H. Tahara, T. Yasui, Y. Kagaya and T. Yoshikawa (Osaka Univ.) ..................239

ENVIRONMENTAL APPLICATIONS

Treatment of Hazardous Materials

Destruction of Polychlorinated Dioxins/Furans in an Electrodeless
RF Plasma Torch
A. Y. Wong and A. A. Khan (UCLA) ..................245

Polymer Film Deposition

CFx Polymer Film Deposition in DC and RF Fluorinert Vapor Plasmas
C. P. Lungu, A. M. Lungu, Y. Sakai, H. Sugawara, M. Tabata, M. Akazawa
(Hokkaido Univ.) and M. Miyamoto (Fuji Electric Corporate R&D) ..................253

A DC Arc Heated Water Steam Plasma Plant for CFC Decomposition
B. Glocke, G. Nentwig and E. Messerschmid (Steinbeis Transferzentrum
Raumfahrt) ..................261
**Exhaust Gas Treatment**

Transformation of CO₂ into Resources by High Energy Type Plasma Jet  
A. Kobayashi (Osaka University) .................................................. 269

NOx Treatment by Electrical Discharge Techniques  
R. Gasparik, Y. Tebira, N. Mine, S. Ihara, C. Yamabe and S. Satoh (Saga Univ.) ........... 277

Treatment of NOx in Exhaust Gas by Corona Plasma over Water Surface  
T. Fujii, H. Kitamura (Kobe City College of Technology) and  
M. Rea (University of Padova) .................................................. 283

**Water Treatment**

Spectroscopic Measurements of Discharges inside Bubbles in Water  
T. Miichi, S. Ihara, S. Satoh and C. Yamabe (Saga University) .................................................. 291

**Treatment of Plating Sludge**

Plasma In-flight Treatment of Electroplating Sludge  
K. Ramachandran and N. Kikukawa (National Institute for Resource and Environment) .................................................. 297

**ADVANCE MATERIALS**

**Thin Films**

Search for Single Crystal Substrate Material for Growth of Epitaxial Diamond Films  
J. C. Shuster, U. Gruber and R. Haubner (University of Wien) .................................................. 305

Formation and Physical Properties of Al Base Alloys by Sputtering  
M. Naka, T. Shibayanagi, M. Maeda, S Zhao and H. Mori (Osaka University) ............. 311

Synthesis of Fe-N Gradient Foil by Nitrogen Plasma Irradiation  
K. Niizuma and Y. Utsushikawa (Nihon University) .................................................. 319

High-density Microwave Plasma for High Rate and Low Temperature Deposition of Silicon Thin Film  
H. Shirai, Y. Sakauma (Saitama Univ.) and H. Ueyama (Nihon Koshuha) .............. 325

**Compounds**

Homoepitaxial Growth of GaN Thin Layer by Molecular Beam Epitaxy with an RF Nitrogen Plasma  
S. Kubo, S. Kurai and T. Taguchi (Yamaguchi University) .................................................. 331
Effects of Sputter-Deposited Materials (W, Ti and SiC) on Interfacial Reaction between MoSi2 and Nb
K. Kurokawa, G. Ochiai, H. Takahashi, S. Ohta and H. Takahashi (Hokkaido Univ.) ..........................337

CHARACTERIZATIONS

Interface

Tensile Strength of Nitride/Polyimide Interface and Its Degradation due to Moisture Segregation with Implications for Device Reliability
V. Gupta, R. Hernandez, J. Wu, P. Charconnet (UCLA), ..........................343

Helium Bubble Formation in YAG Laser Weldment of Helium-Implanted Stainless Steel
T. Kuroda (Osaka University) ..........................351

Ceramics

First Principles Calculations of the Electronic Properties of β-Silicon Nitride
B. Rasid (Osaka Univ.), M. Kohyama (Osaka National Research Inst.), T. Shibayanagi and M. Naka (Osaka Univ.) ..........................359

Reaction Phases at SbN4/TiAl Interface
A. Inoue, T. Shibayanagi and M. Naka (Osaka University) ..........................367

HIGH ENERGY PROCESSING AND OTHERS

Ion Beam

Study on Smoothing of Titanium Surface by Intense Pulsed Ion Beam Irradiation
Y. Hashimoto (Kobe City Col. of Tech.) and M. Yatsuzuka (Himeji Inst. of Tech.) ..........................375

Pinhole Defect Evaluation of TiN Films Prepared by Dry Coating Process
M. Yamashita and H. Uchida (Himeji Inst. of Tech.) ..........................381

Enhanced Corrosion Resistance of TiN Prepared by Plasma-based Ion Implantation
Laser Beam

Application of Atomic Absorption Spectrometry to Laser Plume Analysis
X. Han and M. Futamata (Kitami Inst. of Tech.) ..........................395

Laser Oscillation Using an Inductive Energy Storage Pulsed-Power Generator with POS
M. Kamatani, S. Ihara, S. Satoh and C. Yamabe (Saga University) .................403

Elucidation of Laser Welding Phenomena and Porosity Formation Mechanism
S. Katayama, N. Seto, J-D. Kim, M. Mizutani and
A. Matsunawa (Osaka University) ..................................409

Electron Beam

A Simple Electron Gun by Obstructed Discharge
M. Fukao, Y. Ohtsuka and H. Matsuo (Shizuoka Univ.) .......................417

Properties of WC-Co Layers Produced by Electron Beam Cladding Method
J. Morimoto (Kinki Univ.), N. Abe (Osaka Univ.), M. Tomie and
C. Doi (Kinki Univ.) ........................................425

Modeling

Modeling of Heating of Composite Powder Particles in Plasma Spray Processing
M. D. Demetriou, A. S. Lavine and N. M. Ghoniem (UCLA) ....................431

General Review

From Basic to Applied Plasma Science
A. Y. Wong (UCLA) ........................................439

ABSTRACT

Multiscale Modeling of Thin Film Growth
H. Huang and G. H. Gilmer (Hong Kong Polytechnic University) .............447

AUTHOR INDEX ........................................449
