International congress ____________________________

STAINLESS STEEL '99
SCIENCE AND MARKET
__________________________ 3rd European congress

PROCEEDINGS - Vol. 2
Innovation in Processes and Products

Supported by:
Acciai Speciali Terni
Avesta Sheffield
European Coal and Steel Community

Organized by:
AIM - Associazione Italiana di Metallurgia
ICDA - International Chromium Development Association
IMOA - International Molybdenum Association
NiDI - Nickel Development Institute
INDEX

Metallurgy I

Effect of compositions on the precipitation behavior of sigma phase in duplex phase stainless steels
T. Ito, R. Matsuki, H. Aoyama

Ageing phenomena of a 22Cr duplex stainless steel weld metal at 325°C
S. Hertzman

Quantitative assessment and thermodynamic modelling of microstructural stability in a new nitrogen-rich super duplex weld metal
A. Gregori, J.-O. Nilsson

The influence of martensitic transformations on selected mechanical and corrosion resistance properties of austenitic Cr-Ni-steels
Chr. Eckstein, A. Weiß, D. Janke, D. Peisker

Work hardening and microstructure modifications in some austenitic stainless steels
M. Magrini, I. Calliari, E. Ramous, G. Barba

Role of second phase in superplastic deformation of metastable austenitic stainless steels with ultra fine grains
S. Takaki, T. Suzaki

Recrystallization and grain growth in low nickel austenitic stainless steels
I. Salvatori, G. Abbruzzese, A. Di Schino

Metallurgy II

Effect of C,Ti,Nb on recrystallization behavior after hot deformation in 16%Cr ferritic stainless steel
H. Fujimura, S. Tsuge

Influences of heating and coiling temperatures on recrystallization during hot-rolling process in Ti added high-purity ferritic stainless steel
K. Kimura, M. Abe, M. Tendo, T. Senuma

Effect of steel chemistry on ridging property of Ti-stabilized ferritic stainless steels
Y. Kato, Y. Yazawa, T. Yokota, T. Ujiro, S. Satoh
Effect of microstructure on the ductile to brittle transition of ferritic-martensitic 7-12% Cr steels
D. Preininger

The effects of chemical composition and hot rolling on the tempering kinetics of 12Cr stainless steels
J.A. Koskineniemi, J.M. Prozzi, L.P. Karjalainen

Influence of cooling rate on solidification structure of stainless steels
W. Nicodemi, N. Lecis, E. Gariboldi

Evolutionary development in nickel and stainless steel metallurgy for meeting the industry's corrosive challenges: the last 50 years
D.C. Agarwal, W.R. Herda

Effect of Ni addition on softening behavior during tempering in martensitic stainless steels
T. Tsuchiyama, S. Takaki

Effect of the ageing heat treatment on the environmental hydrogen embrittlement in 17-4 ph martensitic stainless steel
F. El Hilali, M. Jerome, M. Habashi

Process technologies for specific properties

Development of technology for REM additional austenite stainless steel at Naoetsu Works
Y. Ohyabu, H. Kuma, H. Kato, K. Arai, M. Yamazaki

Strand casting of stainless steel: experience and critical analysis
B. Mukhopadhyay, S.K. Ray, P.C. Das

Effects of hot band annealing and cold rolling reduction on texture and plastic anisotropy of 12Cr-Ti ferritic stainless steels
P. Juntunen, P. Karjalainen, A. Kyröläinen

Softening behaviour of austenitic stainless steels in simulated continuous annealing
M-S. Kantanen, P. Karjalainen, T. Kauppi

Influence of thermal processes on increase of stainless steels service properties in processing by surface plastic deformation
Y.I. Barats, F.Y. Barats, S.Y. Tormanov

The (R) evolution of the surface finishing on cold stainless steel
R. Ferrari
Innovation in production technologies I

Mechanically bonded pipes for off-shore application. A new approach to cost saving application of stainless steels
K. Schäfer

Stainless steel explosion bonded clads. Example of application: Fabrication of gas separators and compressors, heads and shells with alloy 825 clad plates
A. Nobili, P. Corbeaux

Nitridic acid - free pickling process for stainless steels coils industrial development at Acciai Speciali Terni Spa
G. Demertzis, S. Trasatti, S. Fortunati, F. Mancia, A. Musso

Contribution of a booster device on tube rotary draw bending: experimental and finite element analysis
N. Rodriguez, D. Schlatter

Ultra rapid heat treatments of stainless steels by transverse flux induction heating
I. Salvatori, G. Abbruzzese, W.B.R. Moore, N. Wright

Innovation in production technologies II

A new stainless steel rolling mill at Ugine Savoie
E. Schandl, B. Cadot

Optimal control of a VOD process
J. Reichel

Up-to-date wire rod finishing lines for stainless steels
M. Lestani

VAI-CON® Temp - Application of the VAI continuous temperature measurement on the AOD converter at Acciaierie Valbruna Italy
J. Schwelberger, N. Ramaseder, S. Gaugl, J. Steins, G. Battan, G. Alghisi, A. Sacchi, S. Pellizzari

The newly developed mannesmann cluster mill. Experience gained on application at Krupp Thyssen Nirosta
J. Beindorf, S. Buhl, Kallabis, Lindenberg, G. Kulessa, M. Mann, H.-J. Quante

Danieli united Steckel Mills - innovative technical solutions for cost-effective production of stainless steel
R. Borsi, M. Cecotti, M. Rotti, R. Zorzi

VAINOX - Latest developments in stainless steel casting technologies
H. Hödl, K. Frauenhuber, E. Schwarz
Innovation in product I

Ugine's aluminized F12T: a high-performance, durable aluminium coated 12% Cr stainless steel for today's exhaust lines
R. Craen, L. Antoni, J. Ragot, J-Y. Cogne, V. Dusseque

Stainless steel for bulk solids handling
K.R. Ananthanarayanan

Processing and application of vanadium stainless steels
R. Paton

High nitrogen and low nickel austenitic stainless steel
M.G. Mecozzi, M. Barteri, A. Di Schino

Influence of chemical composition on cell parameters, mechanical properties and corrosion behaviour of high nitrogen austenitic stainless steels

Innovation in products II

Non-standard autenitic stainless steels, with high nitrogen content: influence of alloying elements on phase equilibrium (γ-δ) during solidification and heat treatments
R. Sánchez, T. Fernández, C. del Campo, J. Botella, R. Gamboa

A new family of weldable soft martensitic stainless steel
J-J. Dufrane

Alloy 33 / Nicrofer 3033, a new high strength austenitic material for marine applications
M. Köhler, A. Houghton

Nicrimphy B66 - A 0.5% N super austenitic stainless steel optimized for heavy section forgings
B. Mayonobe, F. Roch, R. Cozar

A new non-magnetic stainless steel for very low temperature applications
S. Sgobba, G. Hochörtler

A new developed duplex stainless steel with a very high wear resistance
W. Prechtl

Advances in grain boundary engineered stainless alloys
G. Palumbo, P. Lin, K.T. Aust, U. Erb
Innovation in processes and products

Grain growth phenomena in AISI 304 austenitic stainless steel
A. Lopez-Moreno, A. Alvarez de Sotomayor, E.J. Herrera 415

Less common aspects of solid-solid phase transformations in martensitic stainless steels
C. Garcia de Andres, L.F. Alvarez 417

Metadynamic and static recrystallization of 304 stainless steel
S.-I. Kim, S.-H. Cho, Y.-C. Yoo 423

Improvements of mechanical pickling for stainless steel hot coils
J.A.N. de Carvalho, M.S. de Castro, R.B. Brandao, R.C.R. da Silva 429

Studies on the compactness of the sintered materials from austenitic stainless steels powder
V. Candea, S. Lapusan, V. Constantinescu, C. Popa 435

About the repressing of the stainless steel powder sintereds
S. Lapusan, Z. Sparchez, V. Candea, C. Popa 441

Effect of solute alloying elements on creep deformation behavior in high Cr martensitic steels
K. Iwanaga, T. Tsuchiyama, S. Takaki 447

Microstructure and pitting corrosion resistance of laser deposited duplex stainless steels clad layers
F. Fouquet, J.P. Millet, J.D. Wagniere 453

State of the art in the chemical management of the pickling process
M. Zavattoni, A. Morrissey 459

Laser surface hardening method for austenitic stainless steel
S.M. Levcovici, V. Munteanu, D.T. Levcovici, M.M. Paraschiv, A. Preda, B.G. Levcovici 467

A new carbon alloyed Nickel-free corrosion resistant austenitic steel grade: metallurgical design and properties
J. Bernauer, G. Hochörtler 473

Stainless steel layers on metallic materials manufactured by electrical discharges
D. Pop, F.-D. Pop, I. Petreus 477
