
Proceedings of the
**Eleventh International Symposium on
Nondestructive Testing of Wood**

*September 9–11, 1998
Madison, Wisconsin*

*Sponsored by
Washington State University
College of Engineering and Architecture
Wood Materials and Engineering Laboratory
Dept. of Civil and Environmental Engineering
Conferences and Institutes
Pullman, Washington*

and

*USDA Forest Products Laboratory
Madison, Wisconsin*

*Proceedings published by the Forest Products Society
Madison, Wisconsin
1999*

UB/TIB Hannover 89
120 907 917

Table of Contents

Keynote Address:

Refocusing the nondestructive testing of wood for the Millennium <i>William L. Galligan</i>	1
--	---

Session I

Nondestructive Testing of Wood and Wood-Based Composite Products

Moderator: Kent A. McDonald

Monitoring of resin curing in a laboratory press using acousto-ultrasonics <i>Frank C. Beall and Li-Heng Chen</i>	9
Influence of moisture on stress-wave properties of wood-based panels <i>Qinglin Wu</i>	19
Possibility of defect detection in wood with ultrasound <i>Peter Niemz and Ladislav J. Kucera</i>	27
Nondestructive evaluation of wood-plastic composites <i>Brian J. Tucker, Donald A. Bender, and David G. Pollock</i>	33
Fracture location by NDT in glulam loaded in tension perpendicular to the grain <i>Simon Aicher and Gerhard Dill-Langer</i>	43

Session II

Nondestructive Evaluation of Lumber

Moderator: Donald A. Bender

Infrared detection of knots in southern yellow pine lumber heated with radiant heat <i>Philip H. Steele, Franklin Quin, Jr., and Jerome E. Cooper</i>	57
Dynamic tests of Norway spruce wood: influence of moisture conditions <i>Charlotte Bengtsson and Mikael Perstorper</i>	63
Natural frequency of wood—a reliable parameter for grading timber of all qualities? <i>Ute Seeling</i>	75
Nondestructive evaluation of residual bending strength of wood with artificial defects by stress wave <i>Toshinari Tanaka, Ferenc Divos, and Tamas Faczan</i>	83
Ultrasonic propagation properties of red oak <i>Donald E. Yuhas, Bruce G. Isaacson, Daniel L. Schmoldt, and Gene Wengert</i>	93
Ultrasonic inspection and analysis techniques in green and dried lumber <i>Mark E. Schafer, Robert J. Ross, Brian K. Brashaw, and Roy D. Adams</i>	95

Session III

Nondestructive Evaluation Techniques for Logs and Standing Timber

Moderator: Ferenc Divos

Instruments for detection and evaluation of decay and wood quality in standing trees <i>K. Bethge and C. Mattheck</i>	105
Developments in Pilodyn assessments of tree stems and logs <i>David J. Cown, M. McConchie, and D.L. McConchie</i>	117
A stress-wave-based approach to nondestructive evaluation of logs for assessing potential veneer quality using small-diameter ponderosa pine <i>Robert J. Ross, Susan W. Willits, William von Segen, Terry Black, Brian K. Brashaw, and Roy F. Pellerin</i>	123
Three-dimensional simulation of logs from external and internal description <i>Markus L. Metzger and Udo H. Sauter</i>	127
Tangential scanning of hardwood logs: developing an industrial computer tomography scanner <i>Nand K. Gupta, Daniel L. Schmoldt, and Bruce Isaacson</i>	131

Session IV

In Situ Nondestructive Inspection of Timber Structures

Moderator: Roy F. Pellerin

Inspection and documentation of historic timber constructions <i>Frank Rinn</i>	143
Role of nondestructive evaluation in the inspection and repair of the <i>USS Constitution</i> <i>Robert J. Ross, Lawrence A. Soltis, and Patrick Otton</i>	145
Evaluation of the wooden structure of a Baroque palace in Pápa, Hungary <i>Ferenc Divós, Laszlo Németh, and Laszlo Bejő</i>	153
Stress-wave technique for detecting decay in ancient structures <i>Jun-Jae Lee and Jung-Kwon Oh</i>	161
Integrating nondestructive evaluation tools for the inspection of timber structures <i>Ronald W. Anthony, Arun K. Pandey, and Clyde G. Arnette</i>	169
Nondestructive testing of large bridge timbers <i>Robert N. Emerson, David G. Pollock, David I. McLean, Kenneth J. Fridley, Robert J. Ross, and Roy F. Pellerin</i>	175
Using spatial averaging and relative measurement techniques to improve acousto-ultrasonic decay detection efficiency <i>Markku Tiitta, Jacek M. Biernacki, and Frank C. Beall</i>	185

Poster Presentation Abstracts

Assessment of the potential quality of preservative-treated
pilings removed from service

*Xiping Wang, John W. Forsman, John R. Erickson, Robert J. Ross, Douglas J. Gardner,
Gary D. McGinnis, and Rodney C. DeGroot* 197

Dynamic systems identification of timber bridges

Scott T. Peterson, David I. McLean, Michael D. Symans, and James A. Kainz 199

Experimental studies on the possibility of detecting rot in wood logs and trees
by means of a conventional acoustical technique

Djamel Ouis 201

Nondestructive methods for the structural evaluation of wood floor
systems in historic buildings: preliminary results

Zhiyong Cai, Michael O. Hunt, Robert J. Ross, and Lawrence A. Soltis 203

Comparative studies of properties of Norway spruce using resonance
frequency and sound velocity

Ladislav J. Kucera and Peter Niemz 205

Inline quality control test system for oriented strandboard and
other panel products

Ed Starostovic 207

Noncontact thickness measurement in the production of oriented
strandboard, medium density fiberboard, and particleboard

Frank Lohmann 209

Noncontact measurement of board and plank dimensions

Jens Svensson 211

Temperature corrections for mechanically graded lumber

David W. Green, James W. Evans, James D. Logan, and Jim Allen 213
