Scales of Variability along the Columbia River Littoral Cell.................................................................................................................. 1692
Peter Ruggiero, Jessica Côté, George Kaminsky, and Guy Gelfenbaum

Synthesizing Geological Observations and Processes–Response Data for Modeling Coastal Change at Management Scale.................................................................................................................. 1708
George M. Kaminsky, Maarten C. Buijsman, Guy Gelfenbaum,
Peter Ruggiero, Harry M. Jol, Ann E. Gibbs, and Curt D. Peterson

VOLUME THREE

Spits and Nesses

Modelling of Barrier–Spit System Evolution at Decadal Scale.................................................................................................................. 1724
José A. Jiménez and Agustín Sánchez-Arcilla

Analytical Model of Spit Evolution at Inlets.................................................................................................................. 1739
Nicholas C. Kraus

Developing Process–Response Models for Spits.................................................................................................................. 1755
Jonathan Raper, David Livingstone, Charlie Bristow, and Diane Horn

Spits and Nesses: Basic Processes and Effects on Long-Term Coastal Morphodynamics.................................................................................................................. 1770
K.J. Riddell, T.W. Fuller, G.B. Siggers, C.S. Bristow, and D. Livingstone

Interactions Among the Inlet Migration, Spit Extension, and Shoreline Change in a Southern New Jersey Barrier System.................................................................................................................. 1786
Gary A. Zarillo

Storm Impacts

Storm Impacts and Shoreline Recovery in Southeastern North Carolina:
Role of the Geologic Framework.................................................................................................................. 1798
William J. Cleary, Carl D. Johnsen, Marcus K. Johnston, and
Maryellen Sault

Scaling Winter Storm Impacts on Assateague Island, Maryland and Virginia.................................................................................................................. 1814
Asbury H. Sallenger, Jr., Peter Howd, John Brock, W.B. Krabill, R.N. Swift,
S. Manizade, and M. Duffy

Mapping Impacts of Hurricanes Fran and Bertha on North Carolina Dunes.................................................................................................................. 1826
Richard P. Stumpf, Karen L.M. Morgan, Russell Peterson, M. Dennis Krohn,
and Asbury H. Sallenger

What Happens at the Seabed off a Headland during a Tropical Cyclone.................................................................................................................. 1836
Terry M. Hume, Malcolm O. Green, and John W. Oldman

Extreme Storms and Thresholds on Foredune Stripping at Inch Spit,
Southwest Ireland .................................................................................................................. 1852
Julian D. Orford, James A.G. Cooper, Derek Jackson, Gonzalo Malvarez, and
Davina White
Mud Beds

Wave–Mud Interaction: Wave Attenuation and Mud Mass Transport.........................1867
Qing-He Zhang and Zi-Dan Zhao

Hydrology in Managed and Unmanaged Louisiana Coastal Marshes .........................1881
John R. Dingler and A. Lee Foote

Experimental Studies on the Estimation of Deposition and Erosion Parameters of Silty Mud.............................................................................1897
J.S. Lee and C.K. Kim

Abandoned Reclamations as Analogues for Sea Defence Realignment......................1912
Claire E. French, Jonathan R. French, Nicholas J. Clifford, and Christopher J. Watson

Sedimentation Patterns of a Tidal Flat in the Westerschelde Estuary.........................1927
Sabine Schmidt, Jean-Louis Reyss, and Peter M.J. Herman

D. Applications

Shore Protection

Erosion Control at the Entrance to Willapa Bay, Washington.....................................1936
S. Fenical, H. Bermudez, and V. Shepsis

Project Performance Analysis and Monitoring for the Coney Island, New York, Storm Damage Reduction Project.................................................................1946
Jeffrey G. Shelden, Diane S. Rahoy, Stuart A. Chase, and John R. Headland

Beach Nourishment Practice at Mesotidal Coast........................................................1962
Hans-H. Dette

A GIS-Linked Flood and Erosion Prediction System for Lake Michigan......................1978
R.B. Nairn, J.E. Davis, and S.J. Thieme

Analysis of Sediment Transport Processes at Westport, Massachusetts.....................1994
John S. Ramsey

Detached Breakwaters and Groins

Coastal Response to a Detached Breakwater System: Presque Isle, Erie, Pennsylvania, U.S.A.................................................................2010
Michael C. Mohr, Joan Pope, and Jennifer K. McClung

The Influence of Set-Up Currents on Sediment Movement Behind Detached Breakwaters.................................................................2026
John Loveless and Breac MacLeod

Beach Response to a Segmented Breakwater System, Southwest Louisiana, U.S.A.................................................................2042
Steven G. Underwood, Renjie Chen, Gregory W. Stone, Xiongping Zhang, Mark R. Byrnes, and Randolph A. McBride

Unanticipated Response to Detached, Segmented Breakwaters along Raccoon Island, Louisiana.................................................................2057
Gregory W. Stone, Ping Wang, and Charles K. Armbruster
Beach Response to Groins at Westhampton, New York .................................................. 2073
Lynn M. Bocamazo and William G. Grosskopf

Beach Fill

Prospecting for Sand: Offshore New Jersey ................................................................. 2090
Jeffrey S. Waldner, Robert E. Sheridan, Jane Uptegrove, David W. Hall, and Gail M. Ashley

Mitigation of a Beach-Fill Hot Spot, Monmouth Beach, New Jersey ....................... 2102
S. Jarrell Smith and Nicholas C. Kraus

Tracing Sediment Dispersal on Nourished Beaches: Two Case Studies ................. 2118
E. Robert Thieler, Paul T. Gayes, William C. Schwab, and M. Scott Harris

Use of Stable Isotopes for Tracking an Aragonite Beach Fill .............................. 2137
Joan Pope, Thomas H. O’Donnell, Stephen A. Macko, and Douglas Rosen

Towards a Proper Coastal Defence Management of the Belgian East Coast .......... 2153
M. Huygens, R. Verhoeven, S. Verbanck, and B. Lahousse

Integrated Dune/Beach Nourishment on Cacela Peninsula, Portugal ...................... 2165
João Alveirinho Dias, Ana Matias, Óscar Ferreira, and Allan Williams

Morphodynamic Modeling

Statistical Characterization of Nearshore Morphodynamic Behavior .................... 2176
K. Todd Holland, C. Linwood Vincent, and Robert A. Holman

Beach Cusp Formation: Analysis of a Self-Organisation Model ............................ 2190
Giovanni Coco, David A. Huntley, and Tim J. O’Hare

Application of a Multi-Layer Approach for Morphological Modelling .................... 2206
Henk J. Steetzel and Hans de Vroeg

Shoreline Change by Waves, Wind, and Tidal Current: Corpus Christi Bay, Texas ... 2219
Deidre D. Williams and Nicholas C. Kraus

Inlet Engineering

Inner-Bank Erosion at Jetty–Shoreline Intersection ................................................. 2235
William C. Seabergh

Tidal Inlet Stability at Fire Island, the Moriches and Shinnecock Inlets, Long Island, New York .......................................................... 2249
John R. Headland, Chris Rasmussen, Lynn Bocamazo, W. Gray Smith, and Michael Herrman

Impacts of Proposed Improvements to Ponce DeLeón Inlet, Florida ..................... 2265
Rajesh Srinivas and R. Bruce Taylor

Relocation of a Tidal Channel for Shore Stabilization and Protection .................. 2280
Christopher G. Creed and Erik J. Olsen

Automatic Real-Time Coastal Bridge Scour Measurements .................................... 2294
Jongkook Lee, Woonkwang Yeo, and Sunghwan Kim
Navigation Channels

Studies for Groin Design and Dredging of Guanabo River's Inlet:
Playas del Este, Havana City, Cuba
Raúl Martell, Ernesto Tristá, and Hermes Zalazar

Sedimentation and Harbor Hydrodynamics at U.S. Coast Guard Station,
Port Huron, Michigan
Gregory L. Williams and Robert R. Bottin, Jr.

Navigation Channel Deepening and Sediment Containment Strategies
Peter Dunlop and Thomas Wakeman III

Contaminated Sediment Strategies at the Port of New York and New Jersey
Thomas Wakeman and Dennis Suszkowski

Morphodynamic Modelling of Dredged Trenches and Channels
D.J.R. Walstra, L.C. Van Rijn, S.E. Hoogewoning, and S.G.J. Aarninkhof

Sand Transport Through and Around the Main Breakwater at East London
Andre K. Theron and J.S. Schoonees

Evaluation of the Siltation Processes in the Navigation Channel of the Damietta Harbour at the Northeastern Nile Delta Coast of Egypt
Omran E. Frihy, Alfy M. Fanos, Morad F. Lotfy, and Abd El Moniem A. Badr

Remote Sensing

The Development of a Coastal Aerial Mapping System (CAMS) and Its Application to the Study of Coastal Morphodynamics
Cheryl J. Hapke and Bruce M. Richmond

Aircraft Laser Altimetry for Coastal Process Studies
John Brock, Asbury Sallenger, William Krabill, Robert Swift, Serdar Manizade, Andrew Meredith, Mark Jansen, and David Eslinger

Argus-Based Monitoring of Intertidal Beach Morphodynamics
S.G.J. Aarninkhof and J.A. Roelvink

Regional Sediment Management Using High Density Lidar Data
Larry E. Parson, W. Jeff Lillycrop, and Jennifer K. McClung

Dredged Material Fate

Bypassing of Dredged Muddy Sediment and Thin-Layer Disposal, Hauraki Gulf, New Zealand
Terry Healy and Fengming Tian

Modeling the Fate of Dredged Material Placed at an Open Water Disposal Site in Upper Chesapeake Bay, U.S.A.
Allen M. Teeter, Hans R. Moritz, Harry V. Wang, and Billy H. Johnson

Simulating the Fate of Dredged Material: Columbia River, U.S.A.
Heidi P. Moritz, Nicholas C. Kraus, and Mark D. Siipola

Modelling Turbidity Associated with Mining Activity at Elizabeth Bay, Namibia
G. Smith, G. Mocke, and R. van Ballegooien
Stability of Dredged Silt Placed on an Eroding Estuarine Foreshore..........................2520
Jonathan R. French, Christopher J. Watson, and Claire E. French

Storm Erosion

Beach, Dune, and Offshore Profile Response to a Severe Storm Event..................2534
Mark E. Leadon

Compaction of Beaches and Dunes .............................................................................2550
Ryuichiro Nishi, Nicholas C. Kraus, Michio Sato, and Takaaki Uda

Sediment Dynamics and Profile Interactions of a Beach Nourishment Project........2566
Donald K. Stauble and Gregory P. Bass

Profile Development under Storm Conditions as a Function of the Beach Slope....2582
Jürgen Newe, Karsten Peters, and Hans H. Dette

Aeolian Sand Transport and Vegetation in Front of a Foredune .............................2597
Yoshiaki Kuriyama and Norio Mochizuki

Indexes

Subject Index..............................................................................................................2609

Author Index.............................................................................................................2615
