</table>
Vibration insulation in urban railway tunnels – Development of design and construction on Hannover subway
S. Kielbassa

Interpretation of deformational behavior and support mechanism of a 35 year-old tunnel subject to extensional excavation
M. Kitada, K. Hayashida, S. Sakurai, S. Akutagawa, T. Sakamoto, Y. Okabe & M. Shinji

The Bologna to Florence high speed railway line: Progress of underground works
P. Lunardi & A. Focaracci

Modern city: Underground transport systems
O. N. Makarov & S. N. Vlasov

The construction of railway culvert by underpinning another railway bridge
S. Miura & F. Takahama

The Bømlafjorden sub-sea tunnel
H. Pedersen

High speed railway line Cologne-Frankfurt: Tunnelling under difficult rock conditions
H. Quick, J. Michael & U. Arslan

Design and site investigation for the rehabilitation of old railway tunnels
J. M. C. Roxo & F. Carrilho

Full scale injection test Amsterdam: Results stage 1 and 2
A. E. C. van der Stoel & A. F. van Tol

Transport tunnels under water obstacles in Russia: Construction experience and prospects
S. N. Vlasov & V. E. Merkin

2nd Beneluxtunnel
J. Van Vliet & R. M. Hoeboer

Development of telecommunications tunnels using a high-performance precast secondary lining
Y. Yamaguchi, T. Torigoe & Y. Yamamoto

5 Miscellaneous including water tunnels

Wandlunge* – Exhaustair purification and control of fires in tunnels
R. Bielecki, D. Liebau & L. Sengbusch

Reducing frost penetration with fans
B. A. Børresen, S. H. Enger, F. Andreassen & A. V. Marken

The SSE bulk emulsion system: A new explosives system designed for tunnelling and blasting underground
A. Fauske

Prediction of surface subsidence due to tunnelling in soft ground
G. K. Greschik & G. Greschik

Tunnel excavation through confined sand aquifer and effective use of seepage water
M. Imazu, N. Mori, M. Okuda, M. Maeda & J. Nishi
Risk mitigation for tunnel projects – A structured approach
*M.T.Isaksson, J.J.Reilly & J.M.Anderson*

Rehabilitation of chimney cavity of river diversion tunnel
*W.R.Jee, H.U.Lim, H.Y.Shin & J.J.Choi*

Stability analysis for underground powerhouse and tunnels of Xiaolangdi Multipurpose Dam Project
*X.Lin & F.Shen*

Robotized reparation of headrace tunnel invert of hydroelectric power plants
*E.Noike, Y.Saito, Y.Aoki & A.Yoshiike*

Vibration control performance of controlled blasting using electronic delay detonators
*M.Okamura, K.Tadano & M.Naito*

The past, the present, and the future of tunneling in Ukraine
*V.I.Petrenko*

Thoughts on the lining structure of an underground river shield tunnel with inner water pressure
*J.Sago, Y.Yuasa, Y.Nishimura & A.Koizumi*

On the use of a tunnel-exit centralized-exhaust longitudinal ventilation system with electric dust collectors to improve the tunnel-exit environment of Tennozan Tunnel on Meishin Expressway
*Y.Sakayama, I.Abe & Y.Era*

Some aspects of adverse physical obstructions or conditions claims in underground works
*Z.V.Solymár*

Western Oslofjord sewerage scheme: Sub-sea breakthrough for the Lysaker Outfall System
*B.Strande & G.Birgisson*

Reduction of blast vibration by drilling slots
*M.Tezuka, T.Seoka, S.Miki & K.Nakagawa*

A study of blasting damage in surrounding rock mass of cavern
*M.Tezuka, A.Hasui, Y.Kudo & K.Nakagawa*

Layout and construction of the underground structures at the Xiaolangdi Multipurpose Dam Project
*X.Wang*

6 Mechanised tunnelling

TBM drives in soft ground – Weak points in process engineering and their consequences
*L.H.Babendererde*

The performance prediction of a TBM in Tuzla-Dragos Sewerage Tunnel
*N.Bilgin, C.Balci, Ö.Acaroğlu, H.Tunçdemir, Ş.Eskikaya, M.Akgiil & M.Algan*

Performance of tunnel boring machines in basalts of the Lesotho Formation
*A.Boniface*
Analysis of the TBM performances for the excavation of the Trasvase Guadiaro-Majaceite, Province of Cadiz, Spain
G. Castello, L. Chantron, D. Fabre & M. Sem

Selection of the right TBM to excavate weathered rocks and soils
A. Fruguglietti, V. Guglielmetti, P. Grasso, G. Carrieri & S. Xu

Construction of shield tunnels by erecting segments into a double helix structure
M. Ishii, T. Sakae, K. Kaneko & I. Dobashi

A long tunnel project by TBM method
T. Iwasaki, K. Miura, M. Kawakita, T. Yamada & N. Sano

Advantages of soil conditioning in shield tunneling: Experiences of LRTS Izmir
S. Jancsecz, R. Krause & L. Langmaack

Tunnelling in soft soil with a high water level and pile foundation: Towards the development of settlement-orientated and settlement-minimizing TBM control
F. J. Kaalberg & V. Hentschel

Report on the construction of the triple circular-face shield tunneling at Iidabashi Station (provisional name) on Metropolitan Subway Route 12
A. Kaijome, M. Kajiyama & N. Yamamori

Tunnel construction with a large-scale TBM in a collapse-prone poor rock condition
T. Kawatani, H. Tezuka, R. Morita & S. Shimaya

Special constructional features at the building engineering of the Wesertunnel
C. H. Lüesse

Subway construction using the removable three-centered slurry shield method
T. Matsuda, S. Yahagi, S. Ujiie & K. Ooishi

The performance of E. P. B. machines in the construction of the Madrid Metro extension
M. Melis, F. Mendaña & I. de Matías

Largest-sized slurry type shield tunneling through extremely soft ground; Trans-Tokyo Bay Highway project
M. Okazaki, T. Goto & T. Funazaki

Vibration experiment and numerical analysis on a bored tunnel in soft soils
W. Soede & F. de Graaf

Plan of full face TBM method for the first time railway tunnels in Japan
S. Takamura, K. Sato, M. Tsukuda & H. Kokubo

Mechanical underground docking method to eliminate the need for joint sealing work
T. Tomidokoro & M. Ohtsuka

High-speed automatic machines for shield work
T. Yasumitsu & A. Tsuchida
