Solid Freeform Fabrication as an important and totally integrated approach to design, materials processing and manufacturing research results related to it is contained in this proceedings of the SFF Symposium held in Austin, Texas on August 9-11, 1999

SFF Topics covered in the Symposium include:

Machine Design
Computer Sectioning
Reverse Engineering
Materials Processing
Applications

David L. Bourell, Joseph J. Beaman,
Richard H. Crawford, Harris L. Marcus,
and Joel W. Barlow, Editors

Automated Layer Decomposition for Additive/Subtractive Solid Freeform Fabrication
Y. C. Chang, J. M. Pinilla, J. H. Kao, J. Dong, K. Ramaswami, F. B. Prinz,
Stanford University ------------------------------------------------------------- 111

Automated Planning for Material Shaping Operations in Additive/Subtractive Solid Freeform Fabrication
Jianpeng Dong, Ju-Hsien Kao, Jose M. Pinilla, Yu-Chi Chang, Fritz B. Prinz,
Stanford University ------------------------------------------------------------- 121

Alain Bernard, Stéphane Davillerd, Benoît Sidot, Université Nancy------------------ 129

A Mathematical Description of Layered Manufacturing Fabrication
Feng Lin\textsuperscript{a}, Wei Sun\textsuperscript{a}, Yongnian Yan\textsuperscript{b}, \textsuperscript{a}Drexel University, \textsuperscript{b}Tsinghua University ----------------------------------------------- 139

SALD and SALVI Virtual Laboratory
Zbigniew M. Bzymek, David Ferreira, Harris Marcus, Leon L. Shaw, The University of Connecticut at Storrs----------------------------------------------- 147

A Memory Efficient Slicing Algorithm for Large STL Files
S. H. Choi, K. T. Kwok, The University of Hong Kong-------------------------------- 155

A Minimum Bounding Box Algorithm and Its Application to Rapid Prototyping
C. K. Chan, S. T. Tan, The University of Hong Kong-------------------------------- 163

Slicing STEP-based CAD Models for CAD/RP Interface
Haeseong J. Jee, Byong-Yeol Lee, Hongik University---------------------------------- 171

Representation and Design of Heterogeneous Components
Ashok V. Kumar, Aaron Wood, University of Florida---------------------------------- 179

Heterogeneous Solids: Possible Representation Schemes
Stephane M. Morvan, Georges M. Fadel, Clemson University---------------------------------- 187

Functionally Gradient Material Design and Modeling Using Hypertexture for Solid Freeform Fabrication
Seok-Min Park, Richard H. Crawford, Joseph J. Beaman, The University of Texas at Austin----------------------------------------------- 199

Application of Genetic Algorithms in the Design of Multi-Material Structures Manufactured in Rapid Prototyping
Oliver König\textsuperscript{a}, Georges M. Fadel\textsuperscript{b}, \textsuperscript{a}ETH Zurich, \textsuperscript{b}Clemson University----------------------------------------------- 209

An Ejection Mechanism Design Method for AIM Tools
Sundita K. Jangha, David W. Rosen, Georgia Institute of Technology----------------------------------------------- 219

Fractal Growth Modeling of Electrochemical Deposition in Solid Freeform Fabrication
Jack G. Zhou, Zongyan He, Jian Guo, Drexel University---------------------------------- 229

Residual Stresses in Layered Manufacturing
A. Nickel, D. Barnett, G. Link, F. Prinz, Stanford University---------------------------------- 239

Thermal Effects of In-Bed Rapid Prototyping Metastructures
Jeffery L. Norrell, Kristin L. Wood, Richard H. Crawford, The University of Texas at Austin----------------------------------------------- 247
Materials

Optimization of Powder Layer Density in Selective Laser Sintering

Atmospheric Control during Direct Selective Laser Sintering of Stainless Steel 314S Powder
C. Hauser, T. H. C. Childs, K. W. Dalgarno, R. B. Eane, The University of Leeds .......................................................... 265

Selective Laser Sintering of Stainless Steel 314S HC Processed Using Room Temperature Powder Beds
C. Hauser, T. H. C. Childs, K. W. Dalgarno, The University of Leeds .......................................................... 273

Direct Laser Fabrication of High Performance Metal Components via SLS/HIP
Martin Wohlert, Sunan Das, Joseph J. Beaman, David L. Bourell, The University of Texas at Austin .......................................................... 281

Si/SiC-Ceramic Prototypes via LS\textsuperscript{2}I-Process (Liquid Silicon Infiltration of Laser Sintered C-SiC Parts)
Peter Stierlen, Peter Eyerer, Institute of Polymer Testing and Polymer Science .......................................................... 289

Selective Laser Sintering of Zirconia with Micro-Scale Features
Nicole Harlan, Seok-Min Park, David L. Bourell, Joseph J. Beaman, The University of Texas at Austin .......................................................... 297

Measurement of the Sintering Dynamics of Polymeric Powders at Near SLS Conditions
J. Steinberger, K. Manetsberger, J. Shen, J. Müllers, DaimlerChrysler Research Center .......................................................... 303

Cryogenic Mechanical Alloying of Poly (ether ether ketone) – Polycarbonate Composite Powders for Selective Laser Sintering
J. Schultz, R. Kander, C. Suchicital, Virginia Tech .......................................................... 311

Processing, Characterization and Modeling of Non-Random Porous Ceramic Structures
Ashwin Hattiangadi, Amit Bandyopadhyay, Washington State University .......................................................... 319

Extrusion Freeform Fabrication of Functional Ceramic Prototypes
R. Vaidyanathan\textsuperscript{a}, J. L. Lombard\textsuperscript{b}, J. Walish\textsuperscript{a}, S. Kasichainula\textsuperscript{a}, P. Calvert\textsuperscript{b}, K. Cooper\textsuperscript{c}, \textsuperscript{a}Advanced Ceramics Research, Inc., \textsuperscript{b}University of Arizona, \textsuperscript{c}NASA Marshall Space Flight Center .......................................................... 327

Maximizing the Strength of Fused-Deposition ABS Plastic Parts
J. F. Rodríguez, J. P. Thomas, J. E. Renaud, University of Notre Dame .......................................................... 335

Thermo-mechanical Analysis of Parts Fabricated via Fused Deposition Modeling (FDM)
Manish Bharvirkar, Phong Nguyen, Christoph Pistor, University of Utah .......................................................... 343

Mechanical and Rheological Properties of Feedstock Material for Fused Deposition of Ceramics and Metals (FDC and FDMet) and Their Relationship to Process Performance
N. Venkataraman\textsuperscript{a}, S. Rangarajan\textsuperscript{a}, M. J. Matthewson\textsuperscript{a}, A. Safari\textsuperscript{b}, S. C. Danforth\textsuperscript{a}, A. Yardimci\textsuperscript{b}, S. I. Guceri\textsuperscript{b}, \textsuperscript{a}Rutgers University, \textsuperscript{b}Advanced Engineering Design Center, \textsuperscript{c}University of Illinois at Chicago .......................................................... 351
Novel Ceramics and Metal-Ceramic Composites via Fused Deposition Process
Amit Bandyopadhyay, Raj Atisivan, Susmita Bose, Washington State University

Process Variable Effects on Laser Deposited Ti-6Al-4V
C. A. Brice, K. I. Schwendner, D. W. Mahaffey, E. H. Moore, H. L. Fraser, The Ohio State University, AFRL/MLLM Wright-Patterson Air Force Base

Microstructure and Property Optimization of LENS Deposited H13 Tool Steel
J. Brooks, C. Robino, T. Headley, S. Goods, M. Griffith, Sandia National Laboratories

Process Maps for Laser Deposition of Thin-Walled Structures
Aditad Vasinonta, Jack Beuth, Michelle Griffith, Carnegie Mellon University, Sandia National Laboratories

Coated Feedstock for Fabrication of Ceramic Parts by CAM-LEM
Zhien Liu, N. Suppakarn, James D. Cawley, Case Western Reserve University

Direct Fabrication of Polymer Composite Structures with Curved LOM
Donald Klosterman, Richard Chartoff, Mukes Agarwala, Ira Fiscus, John Murphy, Sean Cullen, Mark Yezzell, University of Dayton

Low Shrinkage Metal Skeletons by Three Dimensional Printing
Emanuel Sachs, Samuel Allen, Costas Hadjiloucas, Jeannie Yoo, Michael Cima, Massachusetts Institute of Technology, Imation Enterprises Corporation

Fabrication of High Quality Ceramic Parts Using Mold SDM

Net-Form Manufacturing of Aluminum Components: the Dependence of Processing Parameters on Component Quality
Melissa Orme, Qingbin Liu, Robert Smith, Charles Huang, John Fischer, University of California at Irvine, Boeing Commercial Airplane Group

Design for Controlled Thermal Expansion Using Anisotropy in Parts Made from Liquid Crystal Stereolithography Resins
Richard P. Chartoff, Jill S. Ullett, John W. Schultz, The University of Dayton, Georgia Tech Research Institute

Comparison of the Curing Process of Epoxy and Acrylate Resins for Stereolithography by Means of Experimental Investigations and FEM-Simulation
J. Eschl, T. Blumenstock, P. Eyerer, Institute for Polymer Testing and Polymer Science

Rapid Pattern Based Powder Sintering with Room Temperature Polymer Infiltration
Zongyan He, Yong S. Kim, Monnappa Kokkengada, Jack G. Zhou, Drexel University
Structural Analysis of Silicon Carbide Deposited by Gas-Phase Selective Area Laser Deposition (SALD)
S. Harrison, H. L. Marcus, The University of Connecticut at Storrs 471

Effect of Hydrogen on Silicon Carbide Deposition from Tetramethylsilane—Raman Scattering Studies
Lianchao Sun, James E. Crocker, Leon L. Shaw, Harris L. Marcus, The University of Connecticut at Storrs 479

Conceptual Design of a Smart Portable SFF System
Zbigniew M. Bzymek, Chandrasekhar Roychoudhuri, Leon L. Shaw, Wojciech Marks, The University of Connecticut at Storrs, Institute of Fundamental Technical Problems of the Polish Academy of Science 487

Processing and Characterization of SALDVI Ceramic Structures
James E. Crocker, Lianchao Sun, Helene Ansquer, Leon L. Shaw, Harris L. Marcus, The University of Connecticut at Storrs 495

Fabrication of Inorganic Material Models with Local Chemical Reaction Heat by Laser Sintering
Takayuki Kamitani, Osamu Yamada, Yoji Marutani, Osaka Sangyo University 503

Electrically Stimulated Bilayer Hydrogels as Muscles
Paul Calvert, Zengshe Liu, University of Arizona 511

Process Development
Intelligent Toolpath for Extrusion-based LM Process
Dan Qiu, Noshir A. Langrana, Stephen C. Danforth, Ahmad Safari, Mohsen Jafari, Rutgers—The State University of New Jersey 519

Solid Freeform Fabrication Using the Wirefeed Process

A SFF Approach Utilizing Condensed Gas Precursors and Pulsed Laser Deposition
Erik Geiss, Harris L. Marcus, The University of Connecticut at Storrs 537

The Laser Microchemical Lathe: Rapid Freeform Part Fabrication from the Vapor Phase
K. Williams, N. Jaikumar, G. Saiprasanna, M. Hegler, J. Maxwell, Louisiana Tech University 543

Cooling Configurations for Rapid Tooling “A Comparison Study”
Vito Gervasi, Christopher J. Urban, Steven E. Gerritsma, Milwaukee School of Engineering 553

A Vacuum Furnace Process for DTM’s RapidSteel 2.0 Material
Klas Boivie, Torsten Kjellberg, The Royal Institute of Technology 563

MSOE TetraLattice™ “Applications and Simplified CAD Representation”
Vito R. Gervasi, Lisa M. Milkowski, James V. Canino, Rebecca J. Zick, Milwaukee School of Engineering 571
Refrigerative Stereolithography for Support-Free and Accurate Fabrication
Akiya Kamimura, Tamotsu Murakami, Naomasu Nakajima, The University of Tokyo

An Experimental and Analytical Study of Ice Part Fabrication with Rapid Freeze Prototyping
Wei Zhang, Ming C. Leu, Guanghua Sui, Zhiming Ji, New Jersey Institute of Technology

Direct Thick Layer Rapid Prototyping from Medical Images
Pater B. Chamberlain, Charles L. Thomas, University of Utah

Rapid Prototyping by Injection Molding
Shaun D. Compton, Charles L. Thomas, Vipul Lotke, University of Utah

Rapid Tooling of Ceramic Parts and Molds Using High-Pressure Slip Casting of Si₃N₄
Rolf Pfeifer, Liwu Wang, Peter Eyerer, Institute of Polymer Testing and Polymer Science, Max-Planck-Institut für Metallforschung and INAM

Rapid Tooling of Al₂O₃ Parts Using Temperature Induced Forming
Rolf Pfeifer, Liwu Wang, Peter Eyerer, Institute of Polymer Testing and Polymer Science, Max-Planck-Institut für Metallforschung and INAM

Fast Ink-Jet Based Process
I. Ederer, H. Seitz, A. Welisch, FGB, FORWISS

Extrusion and Deposition of Semi-Solid Metals
Steffi Finke, William Wei, Frits Feenstra, TNO Institute of Industrial Technology, University of Twente/W.E.I. Consulting

Electrophotographic Powder Deposition for Freeform Fabrication
Ashok V. Kumar, Hongxin Zhang, University of Florida

Direct Generation of Metal Parts and Tools by Selective Laser Powder Remelting (SLPR)
W. Meiners, C. Over, K. Wissenbach, R. Poprawe, Fraunhofer Institute for Laser Technology

Sangeun Choi, Wyatt S. Newman, Case Western Reserve University

Fused Deposition Modeling in Microgravity
Robert Crockett, Dan Petersen, Ken Cooper, Milwaukee School of Engineering, NASA Johnson Space Center, NASA George C. Marshall Space Flight Center

Automated Loading and Unloading of FDM Systems
Øivind Brockmeier, Christopher Westcott, Jan Helge Bøhn, Virginia Tech

Additive/Subtractive Material Processing for Mesoscopic Parts
Yih-Lin Cheng, Jurgen Stampfl, Rudolf Leitgeb, Fritz B. Prinz, Stanford University

The Sand Painter: Two-Dimensional Powder Deposition
Joseph Pegna, Stéphane Pattofatto, Raphael Bergé, Carol Bangalan, Henry Herring, Mathias LeSaux, Jason Engler, Concordia University
Accuracy Study on Laminated Object Manufacturing for the Metallic Functional Parts with Complex Surface
Yi Shuping\textsuperscript{a}, Tamotsu Murakami\textsuperscript{b}, Naomasa Nakajima\textsuperscript{b}, Chongqing University, The University of Tokyo----------------------------------------------------------711

Spin Casting as a Tool in Rapid Prototyping (Centrifugal Rubber Mould Casting)
L. J. Barnard, Technikon Free State----------------------------------------------------------719

Reducing Part Deformation by Inducing Phase Transformation
Gayle Link, Tonya Huntley, Alex Nickel, Rudolf Leitgeb, Tony Nguyen, Fritz Prinz, Stanford University ---------------------------------------------727

Controlling Heat Input, Spatter and Weld Penetration in GMA Welding for Solid Freeform Fabrication
I. Kmecko, D. Hu, R. Kovacevic, Southern Methodist University------------------------------------------735

Contour Crafting—State of Development
Behrokh Khoshnevis, University of Southern California--------------------------------------------743

Applications

The Maitreya Project: Large Scale Prototyping a Case Study
Alair Griffin\textsuperscript{a}, Charles Thomas\textsuperscript{b}, Javelin, University of Utah-----------------------------------------751

Hard Metal Tooling via SFF of Ceramics and Powder Metallurgy
Mukesh Agarwala\textsuperscript{a}, Donald Klosterman\textsuperscript{a}, Nora Osborne\textsuperscript{a}, Allan Lightman\textsuperscript{a}, Robert Dzugan\textsuperscript{b}, Geoff Rhodes\textsuperscript{a}, Christian Nelson\textsuperscript{a}, University of Dayton Research Institute, EMTEC, Crucible Materials Corp., DTM Corp.-----------------------------------------759

Applications of FFF in the Metal Casting Industry
Rui Jiang, Wanlong Wang, James G. Conley, Northwestern University---------------------------------767

Fabrication of Metal Components Using FDMet: Fused Deposition of Metals
Guohua Wu, Noshir A. Langrana, Sriram Rangarajan, Ryan McCauston, Rajendra Sadanji, Stephen Danforth, Ahmad Safari, Rutgers—The State University of New Jersey-----------------------------------------775

Assessment of Environmental Performance of Rapid Prototyping and Rapid Tooling Processes
Yanchun Luo, Ming C. Leu, Zhiming Ji, New Jersey Institute of Technology----------------------------783

3D Welding and Milling – A Direct Approach for Fabrication of Injection Molds
Yong-Ak Song\textsuperscript{a}, Sehyung Park\textsuperscript{a}, Haeseong Je\textsuperscript{a}, Doosun Choi\textsuperscript{b}, Bosung Shin\textsuperscript{a}, Korea Institute of Science and Technology, Hong-Ik University, Korea Institute of Machinery and Metals------------------------------------------------------------------793

Rapid Tooling by Integrating Electroforming and Solid Freeform Fabrication Techniques
Bo Yang, Ming C. Leu, New Jersey Institute of Technology------------------------------------------801

Rapid Tooling for Injection Molding of Rubbers
J. Eschl, T. Blumenstock, P. Eyerer, Institute for Polymer Testing and Polymer Science---------------------809
Investigation of Reinforced Ceramic Molds for Resin Patterns
Shirong He, Hiroyuki Yoshiura, Chiaki Mori, Oita Industrial Research Institute

Direct Manufacture of Spatially Engineered Components for Aerospace Applications by Fused Deposition of Ceramics
Charles Gasdaska, Vikram R. Jumalabad, Daniel Dalfonzo, Thomas Paterson, Liang Xue, Lee Poandl, AlliedSignal Research & Technology

Production Strategies for Production-Quality Parts for Aerospace Applications
J. D. Cawley \textsuperscript{a}, J. E. Best \textsuperscript{a}, Z. Liu \textsuperscript{a}, A. J. Eckel \textsuperscript{b}, B. D. Reed \textsuperscript{b}, D. S. Fox \textsuperscript{b}, R. Bhatt \textsuperscript{b}, \textsuperscript{a}Case Western Reserve University, \textsuperscript{b}NASA Glenn Research Center at Lewis Field

Stereolithography Patterns for Investment Casting: Prototyping to Production
Curtis Wahlgren, Suresh Jayanthi, DSM Somos

Manufacturing High Resolution Parts with Stereolithography Method
Carsten Tille \textsuperscript{a}, Ralf Deuke \textsuperscript{b}, Rico Eiduiri \textsuperscript{a}, \textsuperscript{a}Technische Universität München—Feingerätebau, \textsuperscript{b}Alphaform GmbH, \textsuperscript{c}Siemens AG

Application of Solid Freeform Fabrication Technology to NASA Exploration Missions
Kevin Watson \textsuperscript{a}, Dan Petersen \textsuperscript{a}, Robert Crockett \textsuperscript{b}, \textsuperscript{a}NASA – Johnson Space Center, \textsuperscript{b}Milwaukee School of Engineering

Three-Dimensional Printing, 3DP\textsuperscript{TM}, of Electronic Ceramic Components
S. Uhland \textsuperscript{a}, R. Holman \textsuperscript{b}, B. DeBear \textsuperscript{a}, P. Saxton \textsuperscript{a}, M. Cima \textsuperscript{a}, E. Sachs \textsuperscript{a}, Y. Enokido \textsuperscript{b}, H. Tsuchiyu \textsuperscript{b}, \textsuperscript{a}Massachusetts Institute of Technology, \textsuperscript{b}TDK U.S.A. Corporation

Rapid Prototyping & Tooling in China
Yongnian Yan \textsuperscript{a}, Wanlong Wang \textsuperscript{b}, Renji Zhang \textsuperscript{a}, Lihua Lin \textsuperscript{a}, \textsuperscript{a}Tsinghua University, \textsuperscript{b}Northwestern University

Rapid Prototyping as an Instructional and Recruitment Tool for Attracting Qualified High-School Students to Engineering as a Career Option
R. Umashankar \textsuperscript{a}, C. Choi \textsuperscript{a}, A. Ortega \textsuperscript{a}, R. Vaidyanathan \textsuperscript{b}, G. Artz \textsuperscript{b}, T. Anderson \textsuperscript{b}, A. Mulligan \textsuperscript{b}, \textsuperscript{a}University of Arizona, \textsuperscript{b}Advanced Ceramics Research, Inc.
