Wind Engineering into the 21st Century

Edited by
A. Larsen
COWI Consulting Engineers and Planners, Lyngby, Denmark

G. L. Larose & F. M. Livesey
Danish Maritime Institute, Lyngby, Denmark

VOLUME 3
Table of contents

.Buildings – General

Double modal transformation in continuous modelling
L.Carassale, G.Piccardo & G.Solari

Wind pressure field simulation and comparison with experimental results
M.Gioffrè, V.Gusella & M.Grigoriu

Application of cascade-correlation learning network for determination of wind pressure
distribution in buildings
T.Girma & P.N.Godbole

Dynamic responses and equivalent wind loads of the Jin Mao Building in Shanghai
M.Gu, Y.Zhou, F.Zhang & H.F.Xiang

Structural loads and responses from the integration of instantaneous pressures
T.C.E.Ho, G.R.Lythe & N.Isyumov

Wind tunnel tests of a cable supported roof of a stadium
R.Jóźwiak, J.Kacprzyk & J.A.Żurański

Study on a method to identify external forces and damping parameters of structure
from random response values
M.Kanda, E.Maruta, D.Inaba & T.Matsuyama

Wind tunnel tests on a space grid roof
N.Lakshmanan, S.Selvi Rajan, S.Arunachalam & J.Shanmugasundaram

Resonant and background crosswind response components in turbulent flow
W.H.Melbourne & J.C.K.Cheung

Full-scale measurements of fluctuating wind-induced internal pressures in a high-rise
building
T.Ohkuma, N.Kato, Y.Niihori & T.Kurita

Experimental study of wind effects on flat porous fabric roofs
A.M.Vitale & C.W.Letchford

Wind-induced response control of a slender tall building with active-passive mass damper
M.Watakabe, O.Chiba, M.Tohdo & T.Fujita
Wind action on the new Congress Centre, Lucerne, Switzerland
M.Wieland, N.Isyumov & R.T.Edey

Modelling tuned liquid dampers as sloshing-slamming dampers
S.Yalla & A.Kareem

Wind tunnel study of a building structure incorporating viscous-damping walls
N.Yeung & A.D.E.Pan

Wind pressure distribution on a stadium roof by wind tunnel model test

Bluff body aerodynamics

Wavelet analysis of pressure-velocity correlations on bluff bodies
R.E.Akins & T.A.Reinhold

A wind tunnel study of turbulent flow behind a backward facing step with and without flow underneath the step
O.O.Badran & H.H.Bruun

Quasi-steady models of aerodynamic loads on two circular cylinders in side-by-side arrangement
E.Blazik-Borowa

Wind tunnel and numerical modelling of the wind flow over parallel 2D ridges
A.J.Bowen, S.Koren & E.Arad

An experimental study of the power imparted by wind to a twin cylinder bundle
D.Brika & A.Laneville

Improved blockage corrections for bluff bodies in closed and open wind tunnels
K.R.Cooper, E.Mercker & J.Wiedemann

A general method for the correction of end effects on the aerodynamic drag of bluff, two-dimensional bodies in wind tunnels
K.R.Cooper, S.J.Zan & N.G.Ball

Full scale and model studies of wind loads on a pair of circular cylinders
J.K.Galsworthy & B.J.Vickery

Aspect ratio effects on the aerodynamics of short circular cylindrical structures

Pressure distributions on three circular cylinders in different equilateral-triangular arrangements at subcritical Reynolds Number
Z.Gu & T.Sun

Influence of turbulence on the self-excited forces on a rectangular cross section
F.L.Haan, Jr., A.Kareem & A.A.Szewczyk

Wavelet pattern recognition for bluff body wake characterisation
H.Hangan & G.A.Kopp
Quasi-steady theory developed with experimental verification
R.Hoxey, L.Short & P.Richards

Aspect ratio effect on the near wake of a free-ended circular cylinder in a cross-flow
S.-J.Lee & C.-W.Park

The development of separated shear layers of rectangular prisms in turbulent flows
P.C.Lu & C.M.Cheng

Clearance interference between structures or structural components
K.F.McNamara & T.Mullarkey

Mechanism of the occurrence for fluctuating forces on a circular cylinder
H.Nishimura & Y.Taniike

Wind response behaviour of elasto-plastic structure with rectangular cross section based on time history analysis considering motion-induced wind forces
T.Ohkuma, H.Marukawa & J.Itoh

Flow and dispersion in the wakes of three-dimensional porous obstacles in a deep, turbulent boundary layer
A.G.Robins, P.T.Roberts & L.J.Speirs

Effects of stable stratification on flow and dispersion around a cube
N.Steggel & I.P.Castro

Pressure characteristics for separated flows
H.W.Tieleman, T.A.Reinhold & M.R.Hajj

Flow characteristics in the separated shear layer
P.P.Vlachos & M.R.Hajj

Low-rise buildings

Numerical evaluation of roofing systems for wind uplift pressures
A.Baskaran, S.M.Zahrai & Y.Chen

A 1:50 scale wind-tunnel case study of wind pressure on TTU building
B.Bienkiewicz & H.J.Ham

Detection of along-wind response problems of mid-rise structures using simulation methods
M.Bontea, M.P.Gaus & G.Lee

Local wind pressures on structures in groups
V.Feranec & T.Feranec

Wind-induced peak bending moments in low-rise building frames
M.Gioffrè, M.Grigoriu, M.Kasperski & E.Simiu

Area-averaged pressure fluctuations on surfaces at roof corners and gable peaks
N.Hosoya, S.M.Dodge & J.E.Cermak

Improvement of ventilation in the Honolulu Airport ticket lobbies
Influence of a scaling mismatch on wind induced action and action effects
M. Kasperski & H. H. Koss

Wind loading aspects of buildings in groups: Mass-housing developments in South Africa
M. Kasperski, H.-J. Niemann & A. M. Goliger

Peak suction and conical vortex on a flat roof
H. Kawai & F. Ohnuma

Mean and fluctuating wind loads in built-up areas
H. Kiefer & E. J. Plate

Some effects of roof shapes on housing wind loads
M. Kumamaru, N. Tsuru, A. Miyake & J. Maeda

Application of artificial neural network for determination of wind induced pressures on gable roofs
N. Kwatra, P. N. Godbole & P. Krishna

Detection analysis, and simulation of roof-corner pressure transients
C. L. Pettit, N. P. Jones & R. Ghanem

Full-scale measurements on a low-rise structure
M. L. Porterfield & N. P. Jones

Wind force on canopies attached to low-rise buildings
H. Ueda, H. Hagura & H. Hamada

Discussion and evaluation of a pilot project for computer-based design of low-rise buildings for wind loads
T. M. Whalen & J. S. Yang

Uncertainty in wind pressure coefficients for low-rise buildings
M. S. de Wit

Understanding the conical-vortex flow on roofs
F. Wu, P. P. Sarkar & K. C. Mehta

Wind tunnel techniques

Statistical and spectral comparisons of hot-film and LDV velocity data
M. Chen, T. A. Reinhold & R. E. Akins

Design and experimental verification of a square-to-square wind tunnel contraction
F.-M. Fang, J. C. Chen, Y. T. Hong & T.-C. Liang

Intermittency and coherent structure detection in long time series
X. L. Gilliam, J. P. Dunyak, J. Kwan & D. A. Smith

History of the aeolian wind tunnel in Denmark
J. D. Iversen & K. R. Rasmussen

VELUX A/S wind tunnel
J. O. Jensen
Turbulence and topographic effects in simulated thunderstorm downdrafts by wind tunnel jet 1907
C.W.Letchford & G.Illidge

Simulation of surface-layer velocity fields and their influence on wake 1913
V.P.Mugalev

Physical and numerical modelling of thunderstorm downbursts 1919
G.S.Wood, K.C.S.Kwok, N.A.Motteram & D.F.Fletcher

Industrial aerodynamics
Small scale experiments to simulate the smoke extraction from large spaces 1927
H.J.Gerhardt, O.Krüger & J.Wacker

Internal ventilation study for complex architectural geometry 1933
H.Hangan, F.McKenty, L.Gravel & R.Camarero

Direct measurements of the aerodynamic admittance of large ships 1939
G.L.Larose, K.Agdrup & S.V.Larsen

Modelling the failure of trees in high winds 1945
S.E.T.Saunderson, A.H.England & C.J.Baker

Experimental measurements and computations of the wind induced ventilation of a cubic structure 1951
M.P.Straw, C.J.Baker & A.P.Robertson

Effects of the wind on thermal sensation in a house with natural ventilation 1959
J.G.Tsutsumi

Wind energy
Technical and economic evaluation of the Northern European offshore wind resource 1967
T.T.Cockerill, R.Harrison, M.Kühn, W.Bierbooms & G.J.W.van Bussel

A dynamic stall model for HAWT performance prediction in yawed flow 1973
W.Chen & H.Dexin

Statistics of extreme loads for wind turbines 1979
P.W.Cheng & W.A.A.M.Bierbooms

The wind resources in Cape Kaliakra Region 1985
P.T.Ivanov

Estimating winds in a tropical cyclone hitting a wind farm at a coast 1991
N.O.Jensen & J.C.Hansen

Short-term prediction of local wind conditions 1997
L.Landberg

Estimation of offshore wind resources – The influence of the sea fetch 2005
B.Lange & J.Højstrup
