## CONTENTS

**R&D in an European Perspective with Reflection on the Pulp and Paper Industry** ............................................ 9
  Jorma Routti, European Commission, DG XII, Belgium

**STRATEGIC ISSUES**

**Importance of Intellectual Property Rights to the Pulp and Paper Industry** ................................. 13
  Kenneth E. Payne, Finnegan, Henderson, Farabow, Garrett & Dunner, L.L.P., USA

**Importance of Intellectual Property Rights to Pulp and Paper Industry**

**Trademarks - A Valuable Asset** ........................................ 22
  Laurence R. Heeter and Faye M. Hammersley, Finnegan, Henderson, Farabow, Garrett & Dunner, L.L.P., USA

**Corporate Performance through Technology** .................................. 35
  Markku A. Karlsson, Valmet Corporation, Finland

**Is the Future More of the Past?** ........................................ 39
  Alf de Ruvo, Svenska Cellulosan Aktiebolaget
  SCA, Sweden

**DISTRIBUTED CONTROL SYSTEMS**

**Are Intelligent Field Devices in Combination with Fieldbus Technology Ready to Use in the Paper Industry?** ........................................ 44
  Jens Riedel, Sigma Benima AB, Sweden

**Smart Technology Development in Control Valves** .................................. 56
  Markku Simula, Neles Controls Oy, Finland

**The Solution-Centric DCS - Next Generation Factory Automation** ................................. 59
  Glenn H. Baines, Fisher-Rosemount AB, Sweden

**A Portable Framework for Advanced Process Control and Its Java Implementation for DCS** 65
  Petri A. Jokinen, Neste Engineering, Finland
  and Mika Vanne, Valmet Automation, Finland

**PROFIBUS-PA: Optimized for the Process Industry** .................................. 74
  Ludwig Winkel, Siemens AG, Germany

**Towards a Cost Effective Procurement Process - In Search of New Strategies** ................................. 81
  Mikael Eriksson, Magnus Haglind, Johan Helander and Joakim Peterson, KTH, Royal Institute of Technology, Sweden

**FINISHING**

**Trends and Developments in Cut-Size Production** ........................................ 89
  Hans Konheiser, E.C.H. Will GmbH, Germany

**Ultra High Pressure Water Jet Technologies in the Paper Industry** ........................................ 93
  Jerry Kramer and Ed Brossard, Beloit Corporation, USA

**Proven Results from New Generation Multistation Winder** ........................................ 97
  Jyrki Strengel, Valmet Corporation, Finland

**New Millennium of Roll Protection** ........................................ 104
  Esko Nieminen, Valmet Corporation, Finland

  Will Pedersen, LAMB AG, Sweden, Fredy Hauser, LAMB AG, Switzerland and Peter Lath, LAMB AG, Sweden

**COATERS**

**SpeedFlow - First Free Jet Applicator in Film Presses** ........................................ 111
  Martin Tietz and Martin Kustermann, Voith
  Sulzer Papiermaschinen GmbH, Germany

**Excel™ Coater Technology** ........................................ 116
  Boni J. Kuhbacher and Xuekui Lan, Beloit Corporation, USA

**New Opticoncept in Coating Technology** ........................................ 122
  Kari Sorsa, Valmet Corporation, Finland

**PIANQ - a New System for Regulation of Coat-Weight Cross-Profiling** ........................................ 127

**Simultaneous Two-Sided Blade Coating in Fine Paper Production** ........................................ 131
  Lennart Westman, Susanne Ohman and Åke Olsson, Stora Grycksbo AB, Sweden and Tore Eriksson, BTG Pulp and Paper Technology AB, Sweden

**Effect of Mixing on Coating Color Quality and Coated Paper Properties** ........................................ 137
  Tapio Järvensivu, Ilkka Roitto and Mika Leiritie, Valmet Raisio Oy, Finland

**COOKING AND BLEACHING**

**Ozone Bleaching Systems** ........................................ 143
  Nils Hartler, KTH, Royal Institute of Technology, Sweden

**Improved Softwood Pulp Quality by Alkali Profile Control** ........................................ 148
  Kaj Henricson, Auvo Kettunen and Hannu Rämäk, Ahlstrom Machinery Corporation, Finland

**RDH Cooking Technology - New Developments** ........................................ 153
  Bertil Fagerlund, Beloit Chemical Pulping, USA

**Selective Hydrolysis of Hexenuronic Acid Groups in Mill Scale Bleaching of Hardwood Pulp** ........................................ 158
  Pikka Olavi, Kaj Henricson, Markku Kauppinen, Ahlstrom Machinery Corporation, Finland

**On-Site Production of Cryogenic Oxygen for Ozone and Oxygen Bleaching** ........................................ 164
  Sture Norèus, MoDo Paper AB, Sweden
**Bleach Plant Presses Reduce Chemical Consumption and Facilitate Closure** .......... 166
Bertil Ernerfeldt, Per-Ake Södersten, Hans-Olof Eriksson and Ann-Sofie Nåsholm, Sunds Defibrator AB, Sweden

**PULP MILL CLOSURE**

The Ecocyclic Pulp Mill - A Vision or Future Reality? .................................................. 171
Peter Äxegård and Birgit Backlund, STFI, Swedish Pulp and Paper Research Institute, Sweden

Membrane Filtration - How will it Affect the Bleach Plant? ......................... 181
Fredrik Fälth, Ann-Sofj Jönsson and Roland Wimmerstedt, University of Lund, Sweden

Managing Calcium and Manganese in Closed-Loop TCF- Bleaching.
Two case studies from AssiDomän, Sweden 189
Jan Lidén, Bo Johansson and Agneta Jönsson, AssiDomän AB, Sweden

A Method for Decreasing the Risk of Calcium Oxalate Scaling in Bleach Plants. Mill Trials and Flow Sheet Simulations ................................. 194
Torbjörn Jönsson, Per Tomani, Rune Rådström and Per Ullgren, STFI, Swedish Pulp and Paper Research Institute, Sweden

Does an Environmental Management System Really Improve the Environment? ........ 200
Marie Berglund, MoDo Corp Staff Technology, Sweden

**SENSORS**

Noise and Vibration Control - Benefits to Productivity and Quality .................. 203
Sven Tyrland, Ingemansson Technology AB, Sweden

Technology Extension Transforms Control Valves into Flow Meters .................. 205
Ismo Niemelä and Markku Simula, Neles Controls Oy, Finland

Wet End Stability by Controlling Consistencies, Ash and Chemistry ............... 209
Timo Rantala and Jukka Nokelainen, Valmet Automation Kajaani Ltd., Finland

Fläkt Dryer™ Remote Surveillance System 221
Roland Mårtensson and Ola Larsson, ABB Fläkt Industri AB, Sweden

Web Form™ - a Novel On-Line Formation Measurement System ...................... 223
Kenny W Corscadden and J R Parker, Messmer Instruments Ltd., United Kingdom

New Tools for the Papermaker to Improve the Printability of Paper ............... 230
Tomi Erho and Jukka Perento, Tapio Technologies Oy, Finland

**PAPER CHEMISTRY**

New Monitoring Tools for Microbial Control Programs that Optimize Paper Machine Performance and Minimize Environmental Impact ................. 237
Linda R. Robertson, NalcO Chemical Company, USA and Jayne Walker, NalcO Europe, UK

Biocide-Free Slime Control - a Practical Reality in Pulp and Paper Mills .......... 243
Mariana Björklund, BIM Kemi AB, Sweden

Impact of Centre Press Roll Adhesion on Paper Machine Runnability and Sheet Quality ............ 247
Mats Berg, Hercules Pulp and Paper Division, Belgium and Pasi Hayrynen, UPM-Kymmene, Shotton Paper, U.K.

Improved Machine Efficiency Through Control of Press Roll Adhesion .......... 254
Mikael Perdin and Peter Wällberg, BIM Kemi AB, Sweden

The Use of a Nanoparticle System and White Water Characterisation for Successful Production of Wood-containing Paper .................. 257
Susanne Johansson and Sarah Redeborn, EKA Chemicals, Sweden

An Inorganic Nanosize Particle - Part of a new Retention/Dewatering System under Commercial Development .......................... 264
Alessandra Gerli, Frits Oosterhof, NalcO Chemical Company, The Netherlands and Bruce A. Keiser, NalcO Chemical Company, USA

**ENERGY**

Our Future Energy Supply - will it be enough and from where will it come? .......... 270
Gunnar Tärnvik, SCA Corporate Research and Technology, Chairman of Environmental and Energy Committee, Swedish Forest Industry Association

To Reduce Energy Losses - A Challenge to Refiner Plate Designers .................. 274
Robert Gyllenberg, Bruno Lönnberg, Stefan Emet and Göran Gros, Åbo Akademi University, Finland

Fuzzy Quality Control of TMP Refinery Line. 280
Jaakko Myllyneva, University of Oulu, Juha Kortelainen, Tampere University of Technology and Raimo Sutinen, ABB Industry Oy, Finland

Optimization and Control of Reinforcement Pulp Refining .......................... 284
Harri Nystedt, Esa Luntta and Juha Kortelainen, Tampere University of Technology, Finland

Overall Energy Balances for Bleached Kraft Pulp Mills with a High Degree of Systems Closure ........................................ 291
Lars Ledung, Torbjörn Jönsson and Peter Äxegård, STFI, Swedish Pulp and Paper Research Institute, Sweden
STOCK PREPARATION, WHITEWATER AND BROKE

Analysis and Dimensioning of the Broke System, an Important Part of the Stockpreparation ........................................... 298
Göran Gros and Göran Högnäs, Åbo Akademi University, Finland

Control Performance Monitoring - A Holistic Perspective .......................................................... 306
Krister Forsman, ABB Corporate Research, Sweden

Thick Stock Screening for Fine Debris Removal ............................................................... 311
Ken Coffey, Beloit Corporation, USA

Sylvain Renaud and Bertil Olsson, BTG Pulp and Paper Technology AB, Sweden

A Compact Papermaking Process with Centrifugal Deaeration ................................................ 326
Paul Olof Meinander, POM Technology Oy, Finland and Lars-Hugo Olsson, MD Albruck Papier, Germany

PM Water Loops Partly Closed with CR Filter System - Experiences from a Fine Paper Mill in Finland .............................................................. 332
Tlimo Sutela and Henrik Damén, Metsä Serla, Finland, Milan Teppler and Jan Kastensson, Valmet Flooteck, Sweden and Pasi Nurminen, Valmet Flooteck, Finland

PULP CHARACTERIZATION

Pulp Evaluation for Modern Papermaking .............................................................. 343
Ulla-Britt Mohlin, STFI, Swedish Pulp and Paper Research Institute, Sweden

Fracture Mechanics as a Tool to Predict Runnability in Pressrooms ........................................... 351
Inger Eriksson, Bo Westerlund, Anders Gannå, Lena Pettersson, Marcus Edborn and Peter Sandström, SCA Graphic Sundsvall AB, Sweden

Zero-Span Tensile Testing for Better Papermaking Quality Control of Pulp .................................. 362
Joffrey Cowan and Lori Balint, Pulmac Instruments, USA

STFI FiberMaster .............................................................. 367
Håkan Karlsson and Per-Ivar Fransson, FiberTracker AB, Sweden and Ulla-Britt Mohlin, STFI, Swedish Pulp and Paper Research Institute, Sweden

On-Line Characterization of Pulp - Stock Preparation Department ........................................... 375
Erik Dahlquist and Håkan Ekwall, ABB Automation Systems, Sweden, Jan Lindberg and Stefan Sundström, AssiDomän Corporate R&D and Henrik Antti, Umeå University, Sweden

SPECIAL SESSION

Rosenthal - Germany's First Kraft Pulp Mill Coming on Stream ........................................... 379
Ron Aurell, ZP Rosenthal GmbH, Germany

SIMULATION/PRODUCT QUALITY PREDICTION

Simulation in Design and Control: Application to Pulp and Paper Equipment, Mill Systems and Capital Expenditures ........................................... 382
Lou Edwards, University of Idaho, USA

Wood and Pulp Characterization Using Multivariate Sensor Systems ......................................... 382
Lars Wallbäcks, AssiDomän Corporate R&D and Henrik Antti, Umeå University, Sweden

The Bestwood System - A New Product for On-Line Quality Measurements ............................... 389
Kjell Sjöberg, Christer Björklund, Mikael Karlsson, Ralf Olsson and Jonas Thelius, Bestwood AB, Sweden

Quality Improvement, Process Optimization and Uptime Increasing with a Pulp and Paper Simulator ........................................... 392
Carl-Fredrik Lindberg, ABB Corporate Research, Sweden, Erik Dahlquist and Håkan Ekwall, ABB Industrial Systems AB, Sweden

Implementing Control Strategies for Hydrogen Peroxide Bleach Reactors .................................. 396
Tom J. L. Gustavsson, Bertil Olsson and Gerdt H. Fladda, BTG Pulp & Paper Technology AB, Sweden

A Study of Intelligent Methods in Production Optimization of the Pulp Bleach Plant .................. 402
Jarmo Keski-Säntti and Kauko Leiviså, University of Oulu and Kari Lampela and Matti Sarantola, Valmet Automation Inc., Finland

PRESS SECTION

Future Board Concepts Utilizing the Shoe Press Technology ........................................... 409
Carl Zotterman and Anders Leandersson, Valmet AB, Sweden

Press Layouts for High Speed Runnability .............................................................. 417
Ian Binns, Beloit Corporation, Europe (UK)

OptiPress - Challenging the Speed Potential .............................................................. 421
Juha Kivismaa, Heikki Ilvespää and Petteri Halme, Valmet Oy, Finland

Press Fabric Performance - The Step Change .............................................................. 426
Kjell Karlsson, Sweden, Tim Ashworth (UK) and Steve l’Anson (UK), Scapa Paper Machine Clothing

Tamfelt’s Answer to the Most Demanding Needs for the Press Fabrics .................................. 435
Jukka Lehto, Tamfelt Corporation, Finland
Impulse Technology - A New Way to Manufacture Paper .......... 442
Mikael Rigdahl, Marie Bäckström, Clas-Göran Hedström and Bo Norman, STFI, Swedish Pulp and Paper Research Institute, Sweden, Malin Kilian, Valmet-Karlstad AB, Sweden and Risto Talja, Valmet Corp, Paper and Board Machines, Finland

FORMING SECTION

Forming Technology Today and Tomorrow .... 450
Joachim Moser, Voith Sulzer Paper Technology, Germany

Forming Process Requirements Set by a Furnish Type in Linerboard Production .... 454
Kari Räsänen and Jyri Paananen, Valmet-Karlstad, AB, Sweden

A Headbox Design which Minimizes MD Fiber Orientation Streaks while Maintaining High Resolution Basis Weight Control .... 458
Scott B. Pantaleo, Beloit Corporation, USA

DuoFormer Base - Compact Concept for Increased Board and Packaging Paper Production ........................................... 446
Günter Halsmacher, Voith Sulzer Papiermaschinen AG, Austria

Experiences of the New Forming Technology .................................. 471
Lauri Verkasalo and Juha S. Kinnunen, Valmet Oy, Finland

Gap Former Performance at High Speeds with 2- and 3-Layer Fabrics ........ 478
Riitta Kilpeläinen, Tamfelt Corporation, Finland

RECYCLED FIBRES

Flotation Deinking - State of the Art, New Applications and Technologies ........ 485
Martin Kemper, Voith Sulzer Stoffaufbereitung GmbH & Co. KG, Germany

Recycling of MOW for Tissue Production - System Technology Review .......... 494
Goda Rangamannar and Craig Calvert, Beloit Corporation, USA

Experimental Study into the Influence of Various Parameters on De-Asheing Generated by the Mac-Cell .................. 500
Alain Serres and Philippe Colin, E. & M. Lamort, France

Success of the Fibreflow ® Concept, Experiences from a Mill .................. 505
Johan Lindström, Ahlstrom Machinery Corporation, Finland

Avoidance of Adhesive Impurities by Mechanical Separation in Pressure Screens and Cleaners ........... 509
Hubert Gassmann, Heinrich Fiedler GmbH & Co. KG, Germany

Upgrading Recycled Fibres by Compact Dispersion; A Novel Approach to a Well Known Task ........... 514
Pål B. Bendiksen, Kværner Pulping a.s., Norway and Christoph Thümmler, Kværner Pulping GmbH, Germany

Enzymatic Deinking - From the Laboratory to the Industry .................... 522
Karl-Erik L. Eriksson, University of Georgia and Jan L. Yang, Enzymatic Deinking Technologies, LLC, USA

Catalase in De-Inking - Not a Problem any more ..................... 527
Per Sundblad and Pertti Mattila, BIM Kemi AB, Sweden

KRAFT RECOVERY

Advanced Recovery Boilers Reduce Odorous Gases Cost Efficiently ........ 531
Kauko Janka, Kari Haaga and Ari Tamminen, Kværner Pulping Oy, Finland and Erik Wallin, Kværner Pulping AB, Sweden

Novel Furnace Method and NOx Scrubbing to Minimize Recovery Boiler NOx Emissions .................. 536
Tuomo Ruohola and Ari Tamminen, Kværner Pulping Oy, Finland

On- Site Internal Sulphuric Acid Production at a Kraft Pulp Mill .............. 541
Peter Björklund, Kværner Chemetics AB, Sten Valeur, AssiDomän Kraftliner, Sweden and Daniel Lawler, Kværner Chemetics, Canada

Use of CFD-Modelling for Boiler Furnace design ....................... 546
Matti Ylitalo, Kværner Pulping Oy, Finland

Experience from Operation of the World’s Largest Single Line Evaporation Plant ....................... 552
Peter Kinell, Bengt Lofroth, Hans Sjödin and Sture Noréus, MoDo Paper AB, Sweden

Tubel ® - A New Black Liquor Concentrator Technology ................... 557
Anders Wernqvist and Lars Olaussson, Kværner Pulping AB, Sweden

Gasification of Black Liquor and Biomass in a Pulp Mill for Increased Power Generation ....................... 566
Gunnar Svedberg and Katarina Maunsbach, KTH, The Royal Institute of Technology, Sweden

Black Liquor Gasification .......................... 574
Lars Stigsson and Niklas Berglin, Kværner Chemrec AB, Sweden
DRYER SECTIONS FOR PAPER AND PULP

Advancements in Paper Drying .......................... 585
Gregory L. Wedel, Beloit Corporation, USA

OptiDry - A Concept for a More Efficient Drying .......................... 594
Hans Sundqvist, Valmet Corporation, Finland

Air Impingement on Paper Dryer Cylinders .......................... 601
Gregory L. Wedel and John D. Breiten, Beloit Corporation, USA and Rajendra D. Deshpande,
Consolidated Paper, USA

Dryer Expert System for Dynamic Optimization of the Dryer Section .......................... 610
David B Hall, Johnson Corporation Ltd., United Kingdom and Daniel Maltais, Johnson
Ciagnosys, Canada

Modeling and Control of the Process Air in a PM Hood .......................... 614
Krista Forsman, ABB Corporate Research and Jonas Birgerson, ABB Fläkt Industri AB, Sweden

Decoupled Control of Pulp Drying .......................... 621
Roland Mårtensson and Ola Larsson, ABB Fläkt Industri AB, Sweden

Recent Experiences and New Developments in the Fläkt Dryer .......................... 624
Ola Larsson, Torbjörn Lindgren and Krista Sandblad, ABB FläktIndustri AB, Sweden

POSTERS

Micro-Mechanics and Micro-Optics of Paper 628
Wolfgang P. Weinhold, Innowep GmbH, Germany

Multivariate Regression Applied on Process Data for Quality Control of a Paper Mill .......................... 629
Michael Byström, Rolf Bergman and Frank Westad, CAMO ASA, Norway

Alkaline Delignification without Sulphur .... 630
Lina Håkansdotter and Leelo Olm, STFI, Sweden

Separation Methods for Closed-Loop Technology - Overview of an “EU-Project” ... 631
Per Tomani and Anu Seisto, STFI, Sweden

Thierry Van Beckhoven and Annie Renders, Solvay, Belgium

Kappa Number Prediction Based on Cooking Liquor Measurements .......................... 633
Sakari Murtovaara, Esko Juuso and Kauko Leiviskä, University of Oulu, Finland and
Antti Lemmetti and Raimo Sutinen, ABB Industry Oy, Finland

Segregation of VOCs from the Cooking Process and Black Liquor Evaporation .......................... 634
Johan Olsson and Guido Zacchi, Lund University, Sweden

Membrane Bioreactors for the Treatment and Reuse of Pulp & Paper Wastewater .......................... 635
Jan Wessberg, Purac AB, Sweden

Nikolai Beletski and Hannu Linna, VTT Information Technology, Finland and
Jorma Virtanen, Valmet Automation Inc., Finland

Parenchyma Resin and Canal Resin, Characteristics and Removal in Kraft Pulping .......................... 637
Ernst L. Back, Feedback Consulting E&E Back KB, Sweden

Precipitation of NPE from Acidic Bleaching Filtrates .......................... 638
Karl-Johan Westin and Åke C. Rasmuson, Royal Institute of Technology, Sweden

Analytical Pyrolysis-Gas Chromatography - A Valuable Technique for Product Control of Pulp and Paper .......................... 639
Inger Ericsson, PYROLAB, Sweden

Dislocations in Wood Fibres .......................... 640
K. Nyholm and P. Ander, Swedish University of Agricultural Sciences, Sweden
