Picture Coding Symposium '99

April 21-23, 1999

Portland HILTON
Portland, OREGON
# TABLE OF CONTENTS

**Wednesday, April 21**

**KEYNOTE SPEECH 1**

Trends and Challenges in Networked Multimedia  
David B. Johnson  
Director, Media Architecture Lab, Intel Corporation, USA

**VIDEO CODING**  
Chairperson: Mohammed Ghanbari, University of Essex, U.K.

- Adaptive MPEG-2 Coding Systems  
  Philippe Guillotel, Dominique Thoreau, Pierre Ruellou  
  Philippe Bordes, Bertrand Chupeau, Christophe Chevance

- Scalable Multi-Resolution Video Coding Using a Combined Subband-DCT Approach  
  Ulrich Benzler

- An Efficient Very Low Bit Rate Video Coding Scheme Using Warping Prediction And Wavelet-Based Residual Coding  
  Detlev Marpe, Guido Heising, Hans L. Cycon

- Backward Adaptive Motion Vector VQ for Video Coding  
  Luis A. da Silva Cruz, John W. Woods

- Frame-Layer Rate Control for H.263+ Video Coding  
  Jordi Ribas-Corbera, Shaw-Min Lei

**POSTER SESSION-1**  
Chairperson: V. Ralph Algazi, University of California, USA

- The Hierarchical Image Coding and its Video Data Description Methods in Multimedia Scalability Packages  
  Mei Kodama, Hiroyuki Kasai, Hideyoshi Tominaga
Dictionaries and Fast Implementation for Matching Pursuits Video Coding
   Przemysław Czerepiński, Colin Davies, Nishan Canagarajah, David Bull .............................................................. 41

Spatio-Temporal Scalable Video Codecs with MPEG-Compatible Base Layer
   Marek Domanski, Adam Luczak, Slawomir Mackowiak, Roger Świerczynski, Ulrich Benzler ........................................ 45

Fractal-Based Video Coding and Slow Motion Replay
   Jean-Luc Dugelay, E. Majdandzic, S. Roche ................................................................. 49

Joint Rate Control With Look-Ahead for Multi-Program Video Coding
   Lilla Bőrőczky, Agnes Y. Ngai, Edward F. Westermann ......................................................... 53

Efficient Video Coding with R-D Constrained Quadtree Segmentation
   Chia-Wen Lin, Yao-Jen Chang, Eryin Fei, Yung-Chang Chen .............................................. 57

Video Coding Based on Multi-Parameter Motion Estimation and its Reliability
   Toshiyuki Yoshida ........................................................................................................ 61

A Rate-Distortion Optimized Motion Compensated Wavelet Video Coder
   Yan Yang, Sheila S. Hemami ......................................................................................... 61

Space-Frequency Adaptive Coding of Motion Compensated Frame Differences
   Mathias Wien, Wolfgang Niehsen .................................................................................. 65

Motion Vector Size Compensation Based Method for Very Low Bit Rate Video Coding
   Jorge Sastre, Antonio Ferreras, José F. Hernández-Gil ....................................................... 69

Paraunitary Filter Banks for Hierarchical Wavelet Video Coding
   Wolfgang Niehsen, Michael Brünig ........................................................................... 73

A Study on Bit Allocation Method Based on Rate-Distortion Properties for Different Coded Picture Types
   Osamu Mizuno, Yoshiaki Shishikui, Yasuaki Kanatsugu, Yuji Nojiri ..................................... 77

"Incomplete 3D Representation" and View Synthesis for Video Objects captured by Multiple Cameras
   Sila Ekmekci, Jens-Rainer Ohm ................................................................................ 81
Non-Coplanar Multiview Sequence Compression
Ru-Shang Wang, Yao Wang .................................................. 87

3-D Medical Image Compression using an Adaptive Mode
Selection Technique in Wavelet Transform Domain
Hyun Duk Cho, Jong Beom Ra .................................................. 91

Stereo Image Coding with Disparity Estimation Using
Maximum A Posteriori (MAP) Algorithm
Sang Hwa Lee, Jeong-Kwon Kim, Jong Il Park,
Choong Woong Lee .......................................................... 95

Correlation Based Search Algorithms for Motion Estimation
Mohamed Alkanhal, Deepak Turaga, Tsuhan Chen .................................................. 99

Motion Estimation Based on Statistical Features of an Image Frame
Yi-Jen Chiu, John Hartung .................................................. 103

Computational Reduction Using UESA, Adaptive Partial
Sum from Gradient Magnitude for Fast Motion Estimation
Jong-Nam Kim, Tae-Sun Choi .................................................. 107

Global Motion Detection Using Statistical Hypothesis Testing
Munchurl Kim, Jinwoong Kim .................................................. 113

Region-Based Control Points Determination for Multivector
Motion Description
Luis Salgado, Narciso García, José M. Menéndez,
Enrique Rendón .................................................. 117

A High Performance Algorithm for Fast Block Based Motion
Estimation
Alexis M. Tourapis, Oscar C. Au, Ming L. Liou .................................................. 121

STILL IMAGE CODING
Chairperson: John W. Woods, Rensselaer Polytechnic Institute, USA

Lossless and Scalable Coding Scheme of Super High Definition Images
Madoka Hasegawa, Shigeo Kato, Yoshifumi Yamada .................................................. 127

Hybrid Image Coding Using Fractal Prediction
Th. Freina, A. Uhl .................................................. 133
Nonuniform Sub-Sampling Using Square Elements: A Fast Still Image Coding at Low Bit Rate
Olivier Deforges, Joseph Ronsin ...........................................137

A Layered Approach to the Integration of Lossy and Lossless Image Compression
Detlev Marpe ........................................................................141

Window-Based Fast Search Algorithm for Image Vector Quantization
Guobin Shen, Ming Lei Liou ..................................................147

Image Coding for Copyright Protection of ROI Medical Images by Using an Embedded Zerotree Wavelet
Akiyoshi Wakatani .................................................................151

Thursday, April 22

POSTER SESSION-2
Chairperson: Ralf Schäfer, Heinrich-Hertz-Institut, Germany

Identification of Editing Effect in Image Sequences by Statistical Modelling
N. Adami, R. Leonardi .............................................................157

Composite Shape and Motion Coding for Arbitrary-Shaped Video Objects
Michael K. Steliaros, Graham R. Martin, Roger A. Packwood ...........161

Apparent 3-D Camera Velocity Extraction and its Applications

An Interactive Image Segmentation System
Silko Kruse, Xavier Bardella, Frank Schweitzer, Monica Valero ........169

A New Method for Simultaneous Motion Estimation and Segmentation
Mehdi Mostafavi, Véronique Haese-Coat, Joseph Ronsin .................175

Morphological Image Segmentation for Manifesting Ambiguous Homogeneous Visual Objects
Hyun Sang Park, Jong Beom Ra ..............................................179

Facial Expression Synthesis in Model-Based Image Coding
Lu Yu, Fei Yu ...................................................................185
Automatic Extraction of Facial Features Using Deformable Templates
Yunhai Liu, Lu Yu, Qingdong Yao ................................................................. 189

Geometry Compression of 3D Models Using Adaptive Quantization for Prediction Errors
Jeong-Hwan Ahn, Yo-Sung Ho ................................................................. 193

Blocking Artifacts Reduction Using Constrained Least Square Method with Directional Information
Bong Gyun Roh, Nam Ik Cho, Sang Uk Lee ............................................. 199

Adaptive De-Interlacing Algorithm Improving the Edge Based Line Average Method
H.J. Jin, N.K. Park, D.T. Moon, E.J. Yun .................................................. 203

KEYNOTE SPEECH 2

Towards an Intelligent Multimedia, Multimodal Computer
Kai Fu Lee
Managing Director, Microsoft Research, China

SYNTHETIC & NATURAL HYBRID CODING
Chairperson: Joern Ostermann, AT&T Labs, USA

Synthetic Natural Hybrid Video Processings for Virtual Teleconferencing Systems
Jean-Luc Dugelay, Katia Fintzel, Stéphane Valente .................................. 209

Analysis-Synthesis Coding Based on the Source Model of Articulated Three-Dimensional Objects
Geovanni Martinez .................................................................................. 213

MPEG-4 Compliant Calibration of 3D Head Models
Fabio Lavagetto, Roberto Pockaj, Maurizio Costa ................................... 217

Mesh Update Mechanism in Optimal Hierarchical 2D Mesh Representation, Tracking and Compression for Object-Based Video
I. Celasun, Mete Gokcetekin, E. Ilgaz, A. Murat Tekalp .......................... 221
CONTENT BASED PROCESSING/CODING
Chairperson: Edward Delp, Purdue University, USA

Robust Vehicle Detection and Tracking for Traffic Surveillance
Young-Kee Jung, Yo-Sung Ho........................................................................227

Very Low Bit Rate Semantic Compression of Natural Outdoor Images
David P. Gibson, Neill W. Campbell, Barry T. Thomas.................................231

Rate Scalable Object Based Wavelet Codec for Arbitrary Color Image Region
A.A. Kassim, L.F. Zhao..................................................................................235

Direct Estimation of Long-Term Global Motion Parameters
Using Affine and Higher Order Polynomial Models
A. Smolic, T. Sikora, J.-R. Ohm.......................................................................239

Arbitrarily-Shaped Image Segment Texture Coding Based on Correlation Maximizing Extrapolation
SeungSeok Oh, Sang Uk Lee........................................................................243

SEGMENTATION, MODELING & SYNTHETIC CODING
Chairperson: Hiroshi Yasuda, Tokyo University, Japan

Hypotheses-Based Motion Segmentation for Object-Based Video Coding
H. Schwarz, E. Müller....................................................................................249

Recursive Merging for Rate-Distortion Based Image Segmentation
Chae Whan Lim, Sung Chul Jun, Nam Chul Kim...........................................253

Efficient Image Segmentation for Region-Based Motion Estimation and Compensation
Luis Salgado, Narciso García, José M. Menéndez,
Enrique Rendón ............................................................................................257

Video Segmentation Algorithm Using a Combined Similarity Measure for Content-Based Coding
Kun-Woen Song, Eui-Yoon Jung, Jin-Woo Park,
Gi-Seok Kim, Eung-Joo Lee, Yeong-Ho Ha..................................................261

Fractal Animation Metamorphosis Using Decomposition Methodology
Hussein Karam, Aboul Ella Hassanien, Masayuki Nakajima........................265
PRE- & POST-PROCESSING
Chairperson: Jae-kyoon Kim, Korea Advanced Institute of Science and Technology (Kaist), Korea

An Innovative Temporal Post-Processing to Increase the Frame Rate in H.263 Encoding Systems
D. Bagni, V. Riva, L. Albani ................................................................. 273

Blocky Artifacts Reduction by Noise Estimation in DCT Coded Images
Jeonghun Yang, Hyuk Choi, Taejeong Kim ........................................... 281

Optimal Tile Boundary Artifact Removal with CREW
Edward L. Schwartz, Kathrin Berkner, Michael Gormish ..................... 285

Frequency Domain Decimation Using a Modified IDCT Kernel for MPEG-2 Video Down Conversion
Byng Cheol Song, Jong Beom Ra ......................................................... 289

Friday, April 23

MOTION ESTIMATION
Chairperson: Ming Liou, Hong Kong University of Science and Technology, China

Fast Block-Matching Algorithms for High-Resolution Video Compression
Ch. Hufnagl, A. Uhl ................................................................. 295

Automatic VOP Production Scheme for Very Low Bit Rate Video Coding
Kumi Jinzenji, Seishi Takamura, Hiroshi Watanabe, Naoki Kobayashi ....... 299

3D Motion Estimation of Head and Shoulders in Videophone Sequences
Markus Kampmann ........................................................................ 303

Quadrilateral Matching Motion Estimation Using Velocity Information Extracted from Texture Analysis
Fernando J.P. Lopes, Mohammed Ghanbari ........................................ 307

Node Point Placement for an Active Triangular Mesh
Nada Bojic, Khee Pang ..................................................................... 313
Iterative Backward Motion Estimation for Hierarchical Wavelet Video Coding
Michael Brunig, Wolfgang Niehsen

TRANSCODING, IMPLEMENTATION & ARCHITECTURE
Chairperson: Weiping Li, Optivision, USA

Definition of an Optimal MPEG-2 4:2:2 Bitstream Conversion System for a Satellite Link Transmission
E. Frumento, R. Lancini, B. Tonarelli, G. Burzi

Fast Transcoding by Reducing Buffer Sizes
R. Kutka, J. Pandel, G. Leroux

Real-Time, Software MPEG-2 Video Encoding on a PC
J. McVeigh, G. Chen, J. Goldstein, A. Gupta, M. Keith, S. Wood

ERROR PROTECTION & RESILIENCE
Chairperson: Hamid Gharavi, NIST, USA

Error-Resilient 3D Mesh Coding
Zhidong Yan, Sunil Kumar, Jiankun Li, C.C. Jay Kuo

Reversible Variable Length Codes and Their Error Detecting Capacity
Takeshi Chujoh, Toshiaki Watanabe

Real-Time Error Concealment in Compressed Digital Video Streams
Eduardo Asbun, Edward J. Delp

Video Transmission over Wireless Channels Using Unequal Error Protection Method
Sang-ug Kang, Kook-yeol Yoo

POSTER SESSION-3
Chairperson: Masayuki Tanimoto, Nagoya University, Japan

WZD - A Very Low Complexity Wavelet Video Codec for an ASIC Macro
W.C. Lynch, K. Kolarov, W. Arrighi, R. Hoover
An Adaptive Resynchronization Marker Positioning (RMP) Method for Video Transmission
Kook-yeol Yoo, Dong-Seek Park, Jae-kyoon Kim..............................................359

MPEG-4 Image Transmission over Fading Channels Using Hidden Markov Model Estimation
Robert E. Van Dyck, Kun-Chang Yu.................................................................363

Network Friendly Internet Streaming Video with Variable Frame Rate Encoding and Interpolation
Hwangjun Song, Yon Jun Chung, TienYing Kuo,
Jong Won Kim, C.-C. Jay Kuo........................................................................367

Joint Source and Channel Coding using the Laplacian Pyramid
Frank Müller, Bernd Menser.............................................................................371

Joint Source and Channel Rate Allocation with LVQ and Convolutional Codes
Christine Guillemot, Vincent Le Goff, Francisco Garcia Ugalde......................375

Quality Oriented JPEG Coding for Monochrome Still Pictures
Yuukou Horita, Tetsuji Yoshioka, Tadakuni Murai............................................379

Context-Based Statistical Model for DCT-Based Image Coder
Xiaohui Xue, Wen Gao......................................................................................383

A New Hierarchical Low Bit-Rate Coding Scheme Based on Morphological Non Uniform Sampling and Residues DCT Coding
Véronique Haese-Coat, Saeid Saryazdi, Joseph Ronsin....................................387

An Adaptive Transform for Compression of Mixed Con-Tone and Graphics
Michael Gormish, Nekka Matsuura, Takahiro Yagashita................................391

Inverse Pyramidal Image Decomposition with "Oriented" Surfaces
Roumen Kountchev, Joseph Ronsin.................................................................395

Embedded Image Coding Using Adaptive Context Selection
Bernd Menser, Frank Müller..............................................................................399

The Coding Ecology: Image Coding via Competition Among Experts
V. Michael Bove Jr., Bill Butera.........................................................................403
Efficient Algorithms for Control and Optimisation of Distortion or Rate at Wavelet-Subband Image Coding
    Peter Planinšič, Bojan Gergič, Boris Banjanin, Dušan Gleich, Zarko Čučej

Document Image Compression by Binary Subband Decomposition and Zerotree-Based Arithmetic Coding
    Jeong-Kwon Kim, Musik Kwon, Sang Hua Lee, Choong Woong Lee

Region-Based Fractal Image Coding with a New Criterion for Block Merging
    Shin'ichi Usui, Masaki Harada, Toshiaki Fujii, Tadahiko Kimoto, Masayuki Tanimoto

A Markov System for Vector Quantization Coding
    Shen-Chuan Tai, Yung-Gi Wu, Ling-Shiou Huang

An Embedded Image Coder Based on Hierarchical DCT Cosine Transform
    Debin Zhao, Wen Gao, Y.K. Chan

A Motion Criticality Index for Objective Quality Evaluation
    C. Bellodi, M. Caramma, R. Lancini, M. Visca

HUMAN OBSERVER
    Chairperson: Ya-Qin Zhang, Microsoft, Inc.

The Collaborative Evaluation of Coded Picture Quality Using Internet
    Seiichiro Hangai, Takayuki Hamamoto, Hidetaka Takano

Subjective Tests with Animated Talking Faces: What are they good for?
    Joern Ostermann, David Millen, Igor S. Pandzic

Quality Estimation Method Considering Dynamic Variation of Coded Video Quality
    Yasuhiro Inazumi, Yuukou Horita, Kazunori Kotani, Tadakuni Murai

A Multi-Metric Objective Picture Quality Measurement Model for MPEG Video
    K.T. Tan, M. Ghanbari
