Proceedings of the
International Conference
On
Advances in Materials
and
Processing Technologies
(AMPT'93)

VOLUME III
On generating solid models (Keynote)
S.K. Ghosh, Y.B. Lai, B. Delves, G. Blount, and X.C. Wang

Fracture in forming (Keynote)
A.G. Atkins

Analytical calculation of forming limit curves
J. Gronostajski and Z. Zimniak

Forming limits from plastic instability
D.W.A. Rees

Hot deformation studies on a low carbon steel: Part 1- Flow curves and the constitutive relationship
K.P. Rao, Y.K.D.V. Prasad, and E.B. Hawbolt

Hot deformation studies on a low carbon steel: Part 2- An algorithm for the flow stress determination under varying process conditions
K.P. Rao, Y.K.D.V. Prasad, and E.B. Hawbolt

Theoretical and experimental studies of structural integrity of dovetail joints in aeroengine discs
S.A. Meguid, M.H. Refaat, and P. Papanikos

Prediction of residual strength laminated composites subjected to impact loading
J.Y. Huang

Buckling and crippling of channel section elements in composite material
V. Dattama, G.P. Demelio, C. Pappalettere, and G. Ponzone

Determination of forward slip in H-beam rolling
W. Zhang, C. Zhu, and G.E.O. Widera

The influence of lubrication on the surface finish of cold forged components
J. Monaghan and M. O'Reilly

Polymer blend under shear flow: A thermodynamic study
M.L. Fernandez, J.S. Higgins, and S.M. Richardson

A first step towards the modelling of thermoforming of plastic sheets
P. Bourgin, I. Cormeau, and T.S. Matin

Predicting the thermoelastic response and relevant material properties of SMC
J.F. Dwyer, J.M.D. Smith, and P. Stanley

Methods of analyzing thermomechanical stress in plastic I.C.'s

Process parameters prediction systems
V. Narayanan

The prototype of an expert system for the selection of high-speed steels for cutting tools
L.A. Dobrzanski, J. Madejski, W. Malina, and W. Sitek

A simple concepts to achieve a rational chip form
M.I. Sadik and B. Lindström

Prediction of surface quality through cutting conditions in grinding process
W. Zhang

Process parameters prediction systems
V. Narayanan

The prototype of an expert system for the selection of high-speed steels for cutting tools
L.A. Dobrzanski, J. Madejski, W. Malina, and W. Sitek

A simple concepts to achieve a rational chip form
M.I. Sadik and B. Lindström

Prediction of surface quality through cutting conditions in grinding process
W. Zhang
Experimental determination of dynamic forces during transient orthogonal cutting
A.A. Hamid and Y. Ali

Temperature distribution in the cylindric Al₂O₃-steel joint during vacuum brazing cycle
D. Golanki

A finite element analysis of sheet metal forming process
T.C. Hsu and C.H. Chu

Elasto-visco-plastic finite element analysis of a cold up-setting test and stress state validation by residual stress measurements
B. Michael and J.C. Boyer

A three dimensional finite element thermomechanical analysis of intermittent cutting process
A.A. Hamid, A.S. Wifi, and M. El Gallab

Finite element determination of workability limits for discs and rings under different upsetting conditions
A.S. Wifi, A.A. Hamid, H. El-Monayri, and N. El-Abbasi

Automated forging centre as renaissance of hammer forging in heavy industry
V.L. Kolmogorov, S.P. Burkin, and N.A. Babailov

Estimation of thermal-deformation in machine tools using neural network technique
M. Hattori, H. Naguchi, S. Ito, T. Suto, and H. Inoue

Elasto plastic formulation using a kinematic hardening model for springback analysis in sheet metal forming
F. Morestin, M. Boivin, and C. Silva

Numerical optimisation of the plasto hydrodynamic drawing of narrow strips
M.R. Stokes and G.R. Symmons

On the use of the upper bound method for load determination in H-beam loading
W. Zhang, C. Zhu, and G.E.O. Widera

The conception of a computer aided decision making system connected with the residual life of the elements of power installations in the conditions of creep
L.A. Dobrzanski, J. Dobrzanski, J. Madejski, and J. Zaxlona

Generation of uniform expressions from CSG non-unique representation
Y.B. Li, B. Delves, G.N. Blount, S.K. Ghosh, and X.C. Wang

Curvature sensing - A new concept in tracing technology

Application of multivariable simplex data analysis system for welding engineers
N. Bruce, S.G.R. Brown, and J.D. Parker

The structure and properties of W-V high-speed steels with increased contents of Silicon (Keynote)
L.A. Dobrzanski

Heat treatment of high-speed steels and the accompanying phase transformations
L.A. Dobrzanski
SFM and SIMS study of tribofilms growing on TiN coatings during an elevated temperature wear test
K.A. Pisdum, A.S. Korhonen, and E.O. Ristolainen

Characteristics of carbide circular saws
M. Sarwar and X.Y. Zhang

Characterization of PECVD deposited silicon carbide, silicon nitride and silicon carbonitride layers
V. Memagh, T.C. Kelly, J. Gerretsen, G. Kirchner, R. Koekoek, and L. McDonnell

Polycrystalline diamond edge quality and surface integrity following electrical discharge grinding

Fatigue strength of bandsaws with hard coatings
D.S. Dugdale and M. Sarwar

The development of a simulation technique to evaluate the performance and life of high speed steel circular saw blades
M. Sarwar, M.P. Keenan, and S.R. Bradbury

The influence of hot hardness on life of carbide tipped circular saws when sawing MS and stainless steel
M. Sarwar and X.Y. Zhang

A fundamental approach to establishing a rule base for the design of tools for pressworking
B. Fogg

Tool life testing in end milling Inconel 718
M. Alauddin, M.A. El Baradie, and M.S.J. Hashmi

Simulation and assessment of the leakage characteristics and suitability of Rhone-Poulenc's 'ISCEON 69' blends as refrigerants
D. Crombie and M.S.J. Hashmi

Cutting fluids: Characterization Part I
M.A. El Baradie

Cutting fluids: Recycling and clean machining Part II
M.A. El Baradie

Bond and bend strength of alumina plasma sprayed coating
A. Koutsomichalis and H. Badekas

Casting of 2024-Al alloy reinforced with Al2O3 particles composite
A.N.A. Azim, Y. Shash, S.F. Mostafa, and A. Younan

Aging behaviour of 2024-Al alloy reinforced with Al2O3 particles composite
A.N.A. Azim, Y. Shash, S.F. Mostafa, and A. Younan

Rate-controlled shrinkage of ZnO varistors
A. Al-Tounsi, R. Puyane, and M.S.J. Hashmi

Characteristics of tribological coatings applied to tool steels under dynamic abrasion test conditions
D.M. Kennedy and M.S.J. Hashmi

6061 Al-base composite materials strengthened with δ - alumina fibres
J.W. Kaczmar and K.U. Kainer

Phase reactions in Ni-base alloys with increased chrome content
The structure and properties of metal and metal-ceramic coatings produced by physical vapour deposition
A.I. Rybnikov, A.A. Tchizhik, A.P. Ogurtsova, I.S. Malashenko, and K. Y. Yakovchuk

Thermal fatigue resistance of gas turbine blades protective coatings
A.I. Rybnikov, L.B. Getsov, and I.S. Malashenko

Voltaire as student of fire science, manufacture and man of business (Keynote)
W. Johnson

Widening the market for advanced PVD coatings (Keynote)
A. Matthews, A. Leyland, and P. Stevenson

Application and product development in varistor technology (Keynote)
R. Puyane

Materials technology and industrial development: An Irish perspective (Keynote)
A.D. Kennedy

Modelling the impact and penetration events of modern engineering materials: Characterization of computer codes and material models
A.M.S. Hamouda and M.S.J. Hashmi

Simple method of analysis for preliminary design of certain composite laminated primary structures for civil construction
D.K. Kim

Mechanical properties of aluminium metal matrix composites under impact loading
A.M.S. Hamouda and M.S.J. Hashmi

Dislocation reduction in GaAs crystals grown from Czochralski process
N. Subramanyam and C.T. Tsai

Identification of transitions through erosion-corrosion regimes using erosion-corrosion maps
M.M. Stack and F.H. Stott

Effectiveness of isotope depleted ZnO to minimize radiation build-up in boiling water nuclear reactors
R. Puyane

The effect of nitrogen on the precipitation behaviour of Nb(C,N) in continuously cooled low carbon structural steels
M.A. Bepari and J.A. Whiteman
