Geotechnical Aspects of Underground Construction in Soft Ground

Edited by
O. Kusakabe
Department of Civil Engineering, Tokyo Institute of Technology, Japan
K. Fujita
Department of Civil Engineering, Science University of Tokyo, Chiba, Japan
Y. Miyazaki
Obayashi Corporation, Tokyo, Japan

A.A. Balkema / Rotterdam / Brookfield / 2000
Table of contents

Preface .................................................................................................................. XIII
Organisation ........................................................................................................ XV

Special lecture
Seismic design of underground structures in soft ground: A review
K. Kawashima ........................................................................................................ 3

Session reports
Bored tunnelling – NATM tunnelling
L. E. Sozio ............................................................................................................. 23
Bored tunnelling – TBM and shield tunnelling
H. Akagi ................................................................................................................ 33
Modelling and prediction
R. N. Taylor .......................................................................................................... 39
Braced excavation – Deformation and displacement of walls
P. W. Day ............................................................................................................... 43
Braced excavation – Excavation in general
T. S. Tan & J. N. Shirlaw .................................................................................... 53

1 Bored tunnelling – NATM tunnelling
Experimental study of the stability of a tunnel face reinforced by bolts
R. Al Hallak, J. Garnier & E. Leca ....................................................................... 65
Geotechnical aspects regarding the construction of Bucharest Subway
V. Beldean, V. Ciugudean-Toma & S. Calinescu .................................................. 69
Ground and structure response to a hand driven decline in London clay
A. G. Bloodworth & S. R. Macklin ...................................................................... 75
Prediction of final displacement of tunnel section during excavation
H. S. Chung, N. Y. Kim & Y. C. Hwang .............................................................. 81
Facing a major geological hazard for a highway tunnel in the French Alps
A. Guilloux

Some deformation observations in underground openings
N. Gurung, Y. Iwao, K. Ishibashi & S. Hongo

An example of a pile–tunnel interaction problem
K. G. Higgins, J. L. Chudleigh, H. D. St. John & D. M. Potts

A design study for a road tunnel: The effects of construction detail
K. G. Higgins, R. Fernie, H. E. Edmonds & D. M. Potts

Shallow compressed air tunnelling: Field measurements and a laboratory test
G. Kammerer & S. Semprich

High-speed railway tunnelling in soft granular Frankfurt ground
R. Katzenbach, U. Arslan, G. Festag & A. Rückert

Tunnels for public services built in wet sand by NATM
M. Müller, A. Harsányi & Z. Csap

The residual stress of a thawed overconsolidated clayey soil
T. Nishimura & Y. Kondou

Tunnels in soft ground for German high speed railway line Cologne–Frankfurt
H. Quick, J. Michael & U. Arslan

Ground water and underground constructions in the City Urban Development
G. Rasula

A compensation grouting trial in Singapore marine clay
J. N. Shirlaw, W. Dazhi, V. Ganeshan & C. S. Hoe

Experiences from the construction of a twin tunnel in a marly formation
A. I. Sofianos, A. Kalkantzi & Ch. Giannaros

Building collapse and ground subsidence in northern section of Calcutta Metro Construction
N. N. Som

Squeezing rock response to NATM tunnelling: A case study
C. P. Tsatsanifos, P. M. Mantziaras & D. Georgiou

Monitoring ground deformation around a tunnel heading in London clay
J. P. van der Berg & C. R. I. Clayton

Evaluation of environmental effects of subway in Nanjing city
Y. Wang

2 Bored tunnelling – TBM, shield tunnelling

CATSBY signal aided boring: Sydney experimentation
P. Aristaghes & V. Blanchet

Monitoring the second Heinenoord Tunnel and the Botlek Rail Tunnel
K. J. Bakker, F. de Boer & J. B. M. Admiraal
The construction of Pinglin tunnel through adverse geology
C.P. Shen, H.C. Tsai, Y.S. Hsieh & B. Chu

Injection/grouting near pile foundations: Full scale test Amsterdam
A.E.C. van der Stoel & A.F. van Tol

Compensation grouting at the Docklands Light Railway Lewisham Extension project

Study on ground behavior by 4-centered slurry shield driving method
H. Yamada, M. Sugimoto, M. Nishio & K. Kayukawa

Construction simulation for the interaction between shield segments and ground

3 Modelling and prediction

Influence of infiltration and groundwater flow on tunnel face stability
W. Broere & A.F. van Tol

Centrifuge modelling of a spile-reinforced tunnel heading
M. Calvello & R.N. Taylor

Three dimensional simulation of slurry shield tunnelling
D. Dias, R. Kastner & M. Maghazi

Segmental tunnel lining behaviour in axial direction
W.H.N. C. van Empel, R.G.A. de Waal & C. van der Veen

Neural networks as a means for predicting convergence in tunnels
K.B. Fifer

Designing shallow tunnel linings upon the action of moving surface loads
N.N. Fotieva, N.S. Bulychev & A.S. Sammal

Evaluating plasticity solutions for the response of clay around tunnels
R.J. Grant & R.N. Taylor

The role of the soil $k_0$ value in numerical analysis of shallow tunnels
P.F.M. Guedes de Melo & C. Santos Pereira

A field case of rock-bolt deformations in pullout tests
N. Gurung, Y. Iwao, K. Ishibashi, S. Hongo & M.R. Madhav

Displacement of saturated sand during slurry shield driving
K. Hosokawa & H. Akagi

Earth pressure exerted on tunnels due to the subsidence of sandy ground
K. Komiya, E. Shimizu, T. Watanabe & N. Kodama

Effects of excavation sequence on the 3-D settlement of shallow tunnels

Prediction and performance: A review of numerical analyses for tunnels
A. Negro & P.I.B. de Queiroz
Numerical solution model for instability of underground cavity
S.A. Sadrnejad

Development of compensation grouting modelling and control system

Development of a ground reaction curve for shield tunnelling
A. Sramoon & M. Sugimoto

Study on shield behaviour by 3-D shield simulator
M. Sugimoto, N. Yoshiho & A. Sramoon

Stress paths around a 3-D numerically simulated NATM tunnel in stiff clay
D. K. W. Tang, K. M. Lee & C. W. W. Ng

Evaluation of active earth pressure on the facing of the shield entrance in a shaft
A. Wakai, K. Ugai & K. Anan

Tunnel face reinforced by longitudinal bolts: Analytical model and in situ data
H. Wong, V. Trompille, D. Subrin & A. Guilloux

Behavior of tunnel face pre-reinforced with sub-horizontal pipes
C. S. Yoo & H. K. Shin

Discussion: Comment on conventional access inaccuracies and advanced general earth pressure model
P. Koudelka

Discussion: Can settlements over tunnels be accurately predicted using advanced numerical methods?
J. N. Shirlaw

4 Braced excavation – Deformation and displacement of walls

Simulation failure mechanism of anchored sheet pile walls in a small centrifuge
H. G. B. Allersma & Y. Toyosawa

Behavior of large-scale cylindrical earth retaining wall
K. Ariizumi, T. Kumagai & A. Kashiwagi

Movement of stabilized coal-ash soil wall during excavation
K. Azuma, S. Noguchi, K. Kurisaki, H. Hyodo & M. Nagaoka

Successful excavation to 15 m depth in clay downtown Oslo, Norway
A. Bye, A. S. Simonsen & N. Bergersen

Informational construction approach for deep excavation
S. Y. Chi, J. C. Chern & C. C. Wang

Behavior and control of cable duct in proximity to ground excavation work
H. Hanakura, N. Sakata & H. Yoshikuni

The use of numerical methods for the design of base propped retaining walls
K. G. Higgins, R. Fernie, D. M. Potts & C. Houston
Displacement control design method of excavation
X.Y. Hou, G.B. Liu & Y.X. Huang

Soil-structure interaction of deep excavations in urban environment
R. Katzenbach, U. Arslan & Chr. Moormann

Behavior of a braced structure for excavation under asymmetrical lateral load
S. Kazama

The Rotterdam sheet pile wall field test: Test setup
D.A. Kort, A.F. van Tol & A. Jonker

A case of a braced excavation in Bangkok clay
K. Matsumoto, K. Horio, Y. Kikuchi & K. Yaegashi

A case of deep braced excavation for subway in Tokyo
T. Okada, T. Hoshino, S. Sakuma & S. Kohda

Behavior of an earth retaining wall during deep excavation in Shanghai
K. Onishi & T. Sugawara

A customised earth retaining system for deep excavation works

Design and construction of deep circular cofferdam in collapsed ground
A. J. Powderham

Behavior and soil resistance of shaped cantilever diaphragm walls
H. Sei & Y. Miyazaki

Particular demands on deformations of building pit side
T. Siemer, S. Herzberg & H. Fricke

3-D finite element modelling of slurry trenching
T.-S. Tan, K.-Y. Yong & B. Hou

Behavior of cantilever earth retaining with buttress type stabilisation
M. Tsuzuki, J. Nakajima, S. Takayama & T. Kanekura

Case studies of buttress-wall type ground improvement in strutted excavations
N. Uchiyama, Y. Katsura & M. Kamon

5 Braced excavation – Excavation in general

Three dimensional analysis of building settlement caused by shaft construction
A. G. Bloodworth & G. T. Houlsby

Stability of excavations in soft clay with floating self supported DMM wall
A. El Nahas, J. Takemura & M. Kouda

Construction of the CTA cofferdam at Heathrow Airport, London
J. D. Findlay

Settlement of sewer pipes in soft clay installed in a trench
G. Franzén, T. Spetz & G. Sällfors
Earth retaining structures under seismic motion of Kobe earthquake
M. Furukawa, T. Tamano, Y. Toyosawa, S. Tanaka, J. Matuura & K. Sekiya

Soil behavior due to freezing and frozen column during excavation of soft ground
T. Hongo, Y. Iwasaki & T. Ohrai

Ground settlement around a braced excavation work
T. Horiuchi & M. Shimizu

Earth pressures acting on a deep shaft and the movements of adjacent ground in sand
S. Imamura, T. Nomoto, T. Fujii, T. Hagiwara & O. Kusakabe

Ground bottom heave due to large and deep excavation

Experimental study of heaving in a cofferdam on soft ground
T. Kawasaki & Y. Shioi

Effect of anchor installation on settlement of nearby structures in soft soils
H. G. Kempfert & B. Gebreselassie

Design of pretensioned soil nailing systems in excavations
H. T. Kim, I. K. Kang, S. W. Park & S. K. Lee

Measures to prevent heaving during the excavation of soft ground
N. Kubota, H. Sako, M. Morota & K. Kojima

Behavior of grout column reinforced clay under lateral compression
H. J. Liao & S. F. Su

Considering time-space-effect’s excavation design software
G. B. Liu, Y. X. Huang & X. Y. Hou

Deformation behaviour and heaving analysis of deep excavation
K. Ohnishi, M. Katagiri, K. Saitoh & K. Azuma

Investigation of groundwater status for deep underground construction
S. Ono, M. Kamon & T. Tamano

Surface settlements due to walled excavation on 200 projects in Tokyo
S. Saji, J. Murata & T. Sugimoto

In situ measurements and FE-analysis of a deep excavation
H. F. Schweiger, M. G. Freiseder & H. Breymann

Seepage failure experiments on sand behind sheet piles
T. Tanaka, A. Verruijt & K. Hayashi

Full scale test on environmental impact of diaphragm wall trench excavation in Amsterdam
J. C. W. M. de Wit, J. C. S. Roelands & M. de Kant

FEM analysis of excavation with soils improved in its passive zone
K. H. Xie, D. J. Zhang & X. Wang
