# TABLE OF CONTENTS

<table>
<thead>
<tr>
<th>SESSION</th>
<th>TITLE, AUTHOR</th>
</tr>
</thead>
</table>
| P-1     | Kinetics of Dissolution and Precipitation of Air in Pulp Suspension  
Tuomas Stoor, Rauli Virkkala, Laura Husu, and Jouko Niinimäki / 1 |
| P-2     | Effects of Caustic Addition on Black Liquor Rheology and Thermal Characteristics  
D. D. Euhus and W. E. Rochefort / 3 |
| P-3     | Chemical Recovery from Non-Wood Fiber Black Liquors by Lignin Precipitation and Wet Oxidation  
Alfred Abächerli, Frank Doppenberg, and Jairo H. Lora / 5 |
| P-4     | Oxalic Acid Formation in Oxygen Chemical Bleaching  
Juha Fiskari / 7 |
| P-5     | Effect of Impregnation Conditions on Kraft Pulp Properties  
Anja Leminen, Marcus Nyman, Leif Robertson, Osma Pekkala, and Bruno Lönnberg / 11 |
| P-6     | Optimum Place of Chelation Stage in the TCF Bleaching  
Tapio Tirri, Jouko Niinimäki, and Olli Dahl / 13 |
| P-7     | Rapid Analysis of Inorganic and Organic Anions in Kraft Pulping Liquors by Capillary Zone Electrophoresis  
Joseph Sullivan and Maurice Douek / 15 |
| P-8     | Scanning Electron Photomicrographs of Refined Kraft-AQ Kudzu Vine Pulps  
Katherine Anne Doyle, Maureen Dever, and Medwick V. Byrd, Jr. / 17 |
| P-9     | Atmospheric Pulping of Non-woody Fibers  
Takanori Nomura, Makato Takada, Masato Oka, Hirokazu Matsubara, Taketoshi Ohira, and Shunichi Shinagawa / 19 |
| P-10    | Improved Bleach Plant Economics through H₂O₂ Substitution for ClO₂⁻/Oxidation Equivalence and Mill Experiences  
Annie Renders, Richard Presley, and Alastair McNeillie / 27 |
| 1A      | Pulp Quality Tutorial - The Impact on Papermaking Fundamentals and Mill Experiences  
Douglas W Reeve |
|         | Fundamentals of Pulp Fiber Quality and Paper Properties  
Göran Annergren / 29 |
|         | Market Pulp: A Finished Product  
Dave Hillman / 41 |
| 1B      | Pulp Quality Tutorial - The Impact on Papermaking Fundamentals and Mill Experiences  
Douglas W Reeve |
|         | Fundamental Processes in Stock Preparation and Refining  
Joseph M. Genco / 57 |
|         | Principles of Stock Preparation and Refining Refiners and Refiner Systems  
William V. Stevens / 97 |
| 1C      | Pulp Quality Tutorial - The Impact on Papermaking Fundamentals and Mill Experiences  
Douglas W Reeve |
|         | A Closer Look at Fiber Characteristics and Laboratory Evaluation of Pulp  
Patricia Hurter / 113 |
|         | The Paper Mill View of Pulp Refining  
Dan Coughlin / 129 |

1999 TAPPI Pulping Conference / iii
SESSION | TITLE, AUTHOR
--- | ---
2 | Pressurized Peroxide Bleaching Experiences Panel Discussion
   Annie Renders / 131
3 | Suppliers — Invent us a Interactive Discussion Session
   James R. Thompson and Douglas E. Butler / 133
4-1 | Effect of Sodium Sulfide Pretreatment on Kraft Pulping
   Idelfonso Lopez, Hou-min Chang, Hasan Jameel, and Wolfgang Wizani / 135
4-2 | Extended Oxygen Delignification for Increased Yield
   Donna A. Johnson, Seongkyung Park, H. Kwon, Joseph M. Genco, Lewis D. Shackford, and D. Patrick Sullivan / 147
4-3 | Effect of Sulfidity and Anthraquinone on Modified Batch Pulping Processes
   S. Chivukula, Hasan Jameel, H-m Chang, and Wolfgang Wizani / 161
4-4 | A Model for Predicting Yield in Oxygen Delignification of Softwood Kraft Pulps
   Thomas J. McDonough, J. Thomas Burton, and Andrew E. Yethon / 171
5-1 | Chemical Treatment in Mechanical Pulping Part 4: H₂O₂ Bleaching and Pulp Property Development
   Eric C. Xu / 183
5-2 | Breakthrough in Peroxide Bleaching of Mechanical Pulp
   Satish Salgar, Jim Constantacos, John Karagiannis, Ken Malcolm, and Bob Dowaniuk / 189
5-3 | Removal of Manganese from Pulp Fibers with MgSO₄ in a Displacement System
   Z. Li, Y. Ni, and A.R.P. van Heijningen / 197
5-4 | Blending of Brightened and Unbrightened Mechanical Pulps as a Means to Improve Mill Performance and Flexibility
   Dan Davies, John D. Kronis, and Gerhard Arnold / 207
5-5 | A Comparison of Bleaching Sequence Configurations of Aspen CTMP with Respect to Brightness Gain and Stability
   George X. Pan / 213
6-1 | Chemical Recovery in an NSSC Mill — Startup Experience with a New Process at Mead’s Stevenson Mill
   John S. Lovelady, Douglas W. Wynn, Tracey Cline, and Venki Venkatesh / 221
6-2 | Upgrading Spent Liquors from NSSC Process: III. Separation of Spent Liquors Components by Ultrafiltration
   Maria C. Area, Maria S. Martos, Fernando E. Felissia, Alberto D. Venica, and Jacques L. Valade / 237
6-3 | Upgrading Spent Liquors from NSSC Process: IV. Utilization of Spent Liquors as Papermaking Additives
   Maria C. Area, Fernando E. Felissia, Dora Bengoechea, Alberto D. Venica, and Jacques L. Valade / 249
6-4 | Alkaline Sulfite Pulping of Jack Pine
   Al Wong / 263
6-5 | Black Liquor Gasification: Is it for Sulfite and NSSC Pulp Mills Too?
   Wm. James Frederick, Kristiina Iisa, and Viboon Sricharoenchaitkul / 269
6-6 | Papermaking Properties of Aspen NSAQ Pulp
   Al Wong / 279
7-1 | Biomechanical Pulping of Kenaf
   Aziz Ahmed, Gary C. Myers, Masood Akhtar, and Gary M. Scott / 285
<table>
<thead>
<tr>
<th>SESSION</th>
<th>TITLE, AUTHOR</th>
</tr>
</thead>
</table>
| 7-2     | Production of Refiner Mechanical Pulp from Kenaf for Newsprint in Developing Countries  
Dinesh Mohta and Dibyendu N. Roy, and Phil Whiting / 291 |
| 7-3     | The Response of Kenaf Woody Core to Chemimechanical Treatments: 1. The Effect of Water and Alkali Soaking on Water Retention Value and Yield  
Medwick V. Byrd, Jr. / 303 |
| 8       | The Future of TMP Panel Discussion  
John Wasshausen / 313 |
| 9       | Operational Issues in Brown Stock Washing  
Joseph Wilson, Jr. / 315 |
| 10-1    | Acid Treatment Under Pressurized Oxygen Gas  
Yosuke Uchida, Takahiro Miura, and Makoto Iwasaki / 317 |
| 10-2    | Pulp Properties Influencing Oxygen Delignification Bleachability  
Michael Zawadzki and Arthur Ragauskas / 323 |
| 11-1    | Reed Canary Grass Pulp Produced on Mill Scale  
Leena Paavilainen, Jorma Tulppala, Michael Finell, and Ove Rehnberg / 335 |
| 11-2    | Modern Bagasse Pulp Mill in Egypt  
Mohamed Naga and Mahmoud Ali Elbatouty / 343 |
| 11-3    | Pulp and Paper Properties of Kudzu Vines Pulped with the Kraft-AQ Process  
Katherine Doyle, Maureen Dever, and Medwick V. Byrd, Jr. / 359 |
| 12      | Tutorial: Recycling and Deinking 101  
Loreen Ferguson / 375 |
| 13      | Communication Between Mills and Suppliers Panel Discussion  
James R. Thompson / 385 |
| 14      | Mill Experiences in Training their Operators Interactive Discussion Session  
Gene Peterson / 387 |
| 15-1    | High Performance Reactor for Polysulfide Production  
H. Nishijima, S. Hirohama, and H. Nakamura / 389 |
| 15-2    | New Process of Producing Highly Concentrated Polysulfide Liquor by Electrolysis of White Liquor  
Keigo Watanabe, Masahiro Shimizu, Yasunori Nanri, Tatsuya Andoh, and Tetsuji Shimohira / 397 |
| 16-1    | Reducing Kappa Number Variability: Controlling 2-Stage O₂ Delignification  
Lee Harrell / 407 |
| 16-2    | Extended Oxygen Delignification with the OxyTrac™ Process  
Monica Bokström / 419 |
| 16-3    | Two-Stage Oxygen Delignification Design and Operation at Weyerhaeuser Canada Ltd. in Kamloops, British Columbia  
D. Patrick Sullivan, William J. Miller, Joseph M. Genco, Donna A. Johnson, and Gary Berndt / 427 |
