Characterization of Polyethylene Blends by Using Novel Techniques Such as the Successive Self-Nucleation and Annealing (SSA) and the Fourier Self-Deconvolution IR Spectroscopy (FSD-IR) (231) 2485
J. D. Sierra, S. Ospina, N. Montoya, Instituto de Capacitacion e Investigacion del Plastico y del Caucho
M. del Pilar Noriega, T. A. Osvald, University of Wisconsin–Madison
Carbon Black (CB) Distribution in Binary Immiscible Polymer Blends (170) 2490
J. Feng, C.-M. Chan, The Hong Kong University of Science and Technology
In-Situ Production of Electrically Conductive Fibres in Polyaniline-SBS Blends (518) 2495
R. H. Cruz-Estrada, M. J. Folkes, Brunel University
Isolating the Effect of Reaction on the Phase Inversion of Model PA/PS Blends (564) 2500
N. D. B. Lazo, C. E. Scott, Massachusetts Institute of Technology
Impact Modification of Nylon 6,6 Resins with Functional Polyolefin Modifiers Based on Conventional and Metallocene Backbone Resins (851) 2505
N. R. Dharmarajan, T. C. Yu, J. R. Schauder, L. G. Kaufman, Exxon Chemical Company

W34—Polymer Blends: Characterization of Performance II
Microstructure and Electrical Conductivity of BR/EPDM/Carbon Black Blends (626) 2514
Surface Enrichment in Polymer Blends Involving Hydrogen Bonding (442) 2518
Y. Duan, E. M. Pearce, Polytechnic University
LCP Droplet Deformation in Fiber Spinning of Self-Reinforced Composites (134) 2523
C. H. Song, A. I. Isayev, University of Akron
A Study on the Poly(ethylene naphthalate)/Poly(ethylene terephthalate)-Poly(ethylene naphthalate) Copolymer Blends (506) 2528
W. Kim, H.-J. Kang, Dankook University
Investigation of the Phase Behavior of Blends of Poly(benzoyl paraphenylene) and Various Thermoplastics (697) 2532
Y.-H. Ha, C. E. Scott, E. L. Thomas, Massachusetts Institute of Technology

TH3—Polyolefin Blends: Performance Enhancements
*Determination of Solvent Independent Interaction Parameters for the HDPE/LDPE Blend by an Improved Inverse Gas Chromatographic Approach (809) 2540
L. Zhao, P. Choi, University of Alberta
*Rheological and Blown Film Characterization of Binary Blends of Metallocene-Catalyzed LLDPEs (217) 2545
R. K. Krishnaswamy, D. C. Rohlfing, B. E. Hauger, Phillips Petroleum Company
*Flexible Polyolefins and Low Density Polyethylene Blends for Film Extrusion Applications (63) 2550
M. M. Castillo, S. J. Grossman, University of Massachusetts at Lowell
*A Study of Surface Haze Formation in Polypropylene/Acrylic Alloys (266) 2555
S. P. Bistany, D. Dong, C. Y. Han, L. A. Struzik, M. D. Wolkowicz, Montell Polyolefins

VOLUME III—SPECIAL AREAS
COLOR AND APPEARANCE DIVISION
M1—Color and Appearance I
Digital Color Communication for Supply Chain Management: The Latest Technological Advancements to Impact the Plastics Industry (616) 2562
P. D. Ruggerio, Datacolor International
Measuring Frosted Glass Effects for Plastics: A Closer Look at One Frosting Agent (681) 2567
T. Phillips, M.A. Hanna Color
Using CMM Data to Quantify Sink Marks (813) 2572
K. Horton, M. Keil, P. Engelmann, D. Lyth, Western Michigan University
M. Monfore, Ralston Foods

*Present in a joint session.
Investigative Analysis of the Influence Reprocessing Has on the CIEL*a*b* Tristimulus Color
Values of Special Effect Thermochromic Polypropylene (675) .................................................. 2577
T. S. E. Duart, Eastern Michigan University
Enhancing Dry-Colour Efficiency in Starve-Fed Injection Moulding (13). ............................... 2582
P. H. M. Elemans, DSM Research

M18—Color and Appearance II

Color Stable, Glass Filled Thermoplastic Polyesters (159) ....................................................... 2588
M. R. Pixton, General Electric Plastics
An Overview of Optical Brighteners for Copolyester Resin Extrusion Paper Coating
Applications (1000) ............................................. 2593
J. F. Suthers, Eastman Chemical Company
Coloration of Polytrimethylene Terephthalate Fibers with Pigments and Polymer Soluble Dyes (917) .... 2599
R. Reinicker, Ciba Specialty Chemicals
Thermoplastic Paint (a.k.a. Film Finish, Paint Film, Dry Paint): A Complementary Technology for
Exterior Automotive Plastic (904) ...................... 2607
T. M. Ellison, S. P. McCarthy, University of Massachusetts at Lowell
A. K. Delusky, ValTek, LLC
Super Phosphorescent Additives for High-Quality Illumination at Low Additive-Loading Levels (682) .... 2611
J. A. Bodi, M.A. Hanna Color Technical Center
A. Burgess, M.A. Hanna Color

AUTOMOTIVE DIVISION

T10—Advances in Materials for Automotive Applications

Designing a TPO Using ETP Modification Technology (126) ..................................................... 2618
Ethylene/α-Olefin Elastomer Based Compositions for Automotive Interior Applications (402) .......... 2623
K. L. Walton, T. Clanfield, DuPont Dow Elastomers L.L.C.
Opportunities for Reinforced Plastics in Automotive Applications (1013) .................................... 2628
G. B. Chapman II, D. A. Vesey, DaimlerChrysler Corporation
Development of Impact Modified Engineering Polyester Resins for Automotive Applications (1011) .......... 2633
M. Lu, S. Nelsen, T. Sinner, S. Leyrer, Ticona Corp.
Requirements for Rapid Growth of All Olefinic Automotive Interiors (1095) ......................... 2638
S. Shah, N. Kakarala, Delphi Automotive Systems
A Study of the Deterioration in the Mechanical Performance of Polymers Used in Multilayer Fuel
Lines with Immersion in a Standard Automotive Test Fuel (758) ................................................. 2646
M. P. McCourt, G. M. McNally, W. R. Murphy, The Queen's University of Belfast
T. McNally, MVC Technology

T28—Novel Automotive Process Technologies

“Class A” Thermoplastic Automotive Part Production without Painting (902) .............................. 2654
S. McCarthy, Q. Guan, C. Makadia, T. Ellison, University of Massachusetts at Lowell
A. Delusky, ValTek LLC
Analysis of Adhesive Properties of Different Engineering Thermoplastics to Elastomers by a
Two-Shot Injection Molding Process (788) .................................................. 2658
S. Patel, C. Makadia, Q. Guan, S. Mehta, S. P. McCarthy, Institute for Plastics Innovation
Recycling PVB Automotive Windshield Interlayer (717) .............................................................. 2663
R. S. Boyd, Collins and Aikman Automotive Systems
D. M. Sullivan, Sullivan Engineering Company
Blend of Post Industrial ABS and PMMA Improves Thermal and Impact Properties (1146) .......... 2667
M. J. Mikulec, T. Brooks, Visteon, An Enterprise of Ford Motor Co.
Light Stabilization for Black and White Glass-Filled Nylon-6 (275) ............................................. 2673
H. H. Chin, J. H. Botkin, Ciba Specialty Chemicals Corporation

MEDICAL PLASTICS DIVISION

M9—Biocompatibility of Medical Plastics

Biodegradable Polymer Blends for Medical Applications (798) .................................................. 2680
P. Canale, S. Mehta, S. McCarthy, University of Massachusetts at Lowell

xl / ANTEC 2000

POLYMER MODIFIERS AND ADDITIVES DIVISION

T18—Polymer Modifiers and Additives Division

*Improving Mechanical and Organoleptic Properties of Polypropylene (1072) ................................. 3476
T. S. Campbell, J. L. Clarke, Pennsylvania State University at Erie, The Behrend College

*Investigating the Effect of Coupling Agent on the Structural Properties of Glass Fiber Reinforced HDPE (1030) ................................................................. 3482
B. P. Duffey, Western Washington University

*Development of Crosslinkable Binder System for Metal Injection Molding Using Urethane Technology (1073) .................. 3486
A. M. Haney, Pennsylvania State University at Erie, The Behrend College

*Color Effects of Modified Rubber on Black Colorant in Polypropylene (1107) .............................. 3491
E. B. Hunt, Eastern Michigan University

*Raising the HDT and Elevated Temperature Tensile Properties of Injection Moldable HDPE by Dry Blending with Small Amounts of Dicumyl Peroxide (1080) .................. 3493
D. Heuer, A. Lawrence, Pennsylvania State University at Erie, The Behrend College

*Comparison of Techniques to Measure Additive Diffusivity in Polymer Films (636) ................... 3497
J. P. McKibbin, S. Y. Sankhe, K. A. Bishop, D. E. Hirt, Clemson University

W11—Fillers and Modifiers I

Novel Ionomer for Nylon Blow Molding Applications (588) ................................................................. 2786
R. T. Chou, C. Y. Lee, DuPont Company

Improved Processing of Highly Filled Calcium Carbonate Compounds (685) ........................................ 2791
M. Fulmer, J. van der Kooi, E. K. Koss, Struktul Company of America

A Biodegradation Study of Co-Extruded Nanocomposites Consisting of Polycaprolactone and Organically Modified Clay (601) ........................................................................ 2796
R. Farrell, University of Saskatchewan
S. Goodwin, University of Massachusetts at Amherst
C. Wirsen, Woods Hole Oceanographic Institution
J. Lucianini, M. Martinez, Bucknell University
J. A. Ratto, U.S. Army Natick Soldier, Biological and Chemical Command

Mixing Silica and Other Fillers into Elastomers and Their Agglomerate Breakdown during Mixing in an Internal Mixer and Their Rheological Behavior (60) .................. 2801
K.-J. Kim, J. L. White, University of Akron

Effects of PP-MMA Alloy and Impact Modification on Weathering Performance of Polypropylene (371) ........................................................................................................ 2806
T. A. Glogovsky, M. Finnegan, Montell Polyolefins

The Effects of Compatibilizers, Polyamide-6 Grade, and Filler Type on the Properties of TPO/Polyamide-6 Blends (331) ................................................................. 2811
L. Saggese, C. M. F. Barry, S. A. Orroth, University of Massachusetts at Lowell

W30—Additives and Modifiers

The Role of Phosphites in Stabilization of Non-Polyolefin Polymers (184) ................................................. 2818
H. C. Ashton, W. Enlow, T. Nelen, GE Specialty Chemicals, Inc.

New Technology for Dyeable Polypropylenes (131) .............................................................................. 2826
V. Flaris, J. Collier, C. Henkee, Huntsman Corp.

New Halogen-Free Fire Retardant for Engineering Plastic Applications (408) ........................................ 2831
S. V. Levchik, D. A. Bright, G. R. Alessio, S. Dashevsky, Akzo Nobel Chemicals Inc.

A Novel Additive for PP Fiber (903) ........................................................................................................ 2836
O. I. Kuvozhinkova, R. E. Lee, N. A. Vafistrisnya, Great Lakes Chemical Corporation

A New Impact Modifier for Toughening Clear APET (799) ................................................................. 2841
E. J. Troy, A. C. Fahey, E. Crook (retired), Rohm and Haas Company, Inc.

New Dialkyl Peroxide for Improved Controlled Rheology Polypropylene Used in FDA Applications (896) 2844
S. Koschmieder, CKWitco Corporation

Utilisation of Fly Ash as a Filler in Plastics (403) ................................................................................... 2848
M. Biagini, A. Paris, J. McDaniel, Industrial Research and Development Institute
V. Kovac, Ontario Power Generation Inc.

*Present in a joint session.
TH5—Fillers and Modifiers II

New Boron Nitride Processing Aids for the Extrusion of Molten Polymer (115) .......................................................... 2852
F. Yip, S. G. Hatzikiriakos, The University of British Columbia
T. M. Clerc, Carborundum Corporation
Die Geometry and Polymer Processing Additive (PPA) Efficiency (20) .......................................................... 2857
C. Lavalié, 3M Canada Company
S. S. Woods, Dyneon LLC
The Effect of Boron Nitride on the Processability of Metallocene Based LLDPE (481) .......................................................... 2862
S. M. Lee, J. G. Kim, J. W. Lee, Sogang University
Influence of Applied Pressure on Erucamide Diffusion in LLDPE Films (915) .......................................................... 2867
L. B. Muire, D. E. Hirt, Clemson University
COF of LLDPE Films as a Function of Erucamide Surface Concentration (634) .......................................................... 2873
M. X. Ramírez, D. E. Hirt, Clemson University
B. Roberts, M. Havens, N. Miranda, Cryovac Division of Sealed Air Corp.
HD Blending Technology for Enhanced LDPE Film Properties (391) .......................................................... 2877
R. F. Tate, G. Landvater, J. V. Krohn, Equistar Chemicals LP
M. Dawe, University of Cincinnati

TH11—Polymer Additives and Modifiers

*Electron-Beam Processing of Plastics: An Alternative to Chemical Additives (15) .......................................................... 1772
M. Stern, E-Beam Services, Inc.
*Effect of Polyolefin Structure on Grafting of Maleic Anhydride (990) .......................................................... 1777
A. V. Machado, J. A. Covas, University of Minho
M. van Duin, DSM Research
*New Thermally Conductive Thermoplastics Offer Freedom of Design in Heat-Management Applications (534) .......................................................... 1782
R. Pastor, M. A. Hanna Engineered Materials
*The Effect of Titanium Dioxide Particles on the Deformation Behavior and Orientation Development in PET Films (693) .......................................................... 1786
A. Taniguchi, M. Cakmak, University of Akron
*Effects of Magnesium Hydroxides on the Physical Properties of a Semirigid PVC Used in Wire Coating (317) .......................................................... 1791
J. A. Torone, Millipore Corporation
S. Petrie, University of Massachusetts at Lowell

PLASTICS RECYCLING DIVISION

M11—Improving Physical Properties of Recycled Thermoplastic Materials

Development of Novel Applications of Crosslinked Elastomer Scrap in Thermoplastics (157) .......................................................... 2884
H. S. Liu, C. P. Richard, J. L. Mead, R. G. Stacer, University of Massachusetts at Lowell
Blends of Metallocene Polyethylenes for Recycling of Xerographic Toners (196) .......................................................... 2889
H. Tang, C. L. Beaty, University of Florida
Linearity and Non-Linearity of Mechanical Properties in Blends of Virgin and Recycled HDPE’s (646) .......................................................... 2893
P. Miller, S. Masood, P. Iovenitti, Swinburne University of Technology
E. Kosior, Visy Plastics
Reclamation of Rubber Crumb from Army’s Discarded Tires (847) .......................................................... 2898
K. R. Sharma, George Mason University
Rheological and Mechanical Properties of Recycled Polycarbonate (476) .......................................................... 2903
R. Liang, R. K. Gupta, West Virginia University
Impact of Fines Separation on Reinforced Thermoplastic Regrind (676) .......................................................... 2908
J. S. Trahan, K. Hayden, P. Engelmann, Western Michigan University
M. Monfore, Johnson Controls, Inc.

M26—Recycling: Composite Blends and Other Aspects

Profile Extrusion of Highly Filled Recycled HDPE (623) .......................................................... 2914
Z. Charlton, J. Vlachopoulos, McMaster University
D. Suwanda, CFR Technologies Group Ltd.

*Present in a joint session.
Recycled Fiberglass Composite as a Reinforcing Filler in Post-Consumer Recycled HDPE Plastic Lumber
S. D. George, S. H. Dillman, Western Washington University

Crushed Recycled Glass as a Stiffening Agent for HDPE Compared to Traditional Plastic Lumber Fillers
N. L. Hoekstra, B. P. Duffey, S. H. Dillman, Western Washington University

On-Line Material Characterization during Extrusion of Recyclates
T. Schubert, G. W. Ehrenstein, University of Erlangen-Nuremberg

A Study of the Tensile Creep Behavior of Recycled High Density Polyethylene in Aqueous Mediums
J. Raybuck, D. Heuer, P. Koch, Pennsylvania State University, The Behrend College

Municipal Plastic Waste: Alternatives for Recycling with Profit
A. C. Eulalio, N. J. Capiati, S. E. Barbosa, PLAPIQUI (UNS-CONICET)

Factors Influencing the Sorting Efficiency of Commingled Post-Consumer Bottles Using an Automated Sorting System
R. Dvorak, P. Iovenitti, S. Masood, Swinburne University of Technology
E. Kosior, Visy Plastics

PRODUCT DESIGN AND DEVELOPMENT DIVISION

M27—Product Design Innovations

A Method for Robust Flexible Design
C. Roser, D. Kazmer, University of Massachusetts at Amherst

Luggage Retention and Automotive Rear Seats Designed Using Finite Element Analysis Tools
M. Lambi, AlliedSignal Plastics

The Development of a Consumable Container for Built up Roofing Asphalt
D. R. Vermilion, Owens Corning
J. A. Marzari, Owens Corning Technology

High Velocity 3 Point Bending Test Using an Impact Tower
F. Barthelat, H. Lobo, Datapoint Testing Services

Load-Carrying Ability of Injection Molded Products with Holes
A. J. Heidweiller, M. J. M. van der Zwet, Delft University of Technology

Simple and Concise Design Rules for Rapid Prototyping
B. J. Arnold-Feret, Fast Heat

Prototype vs. Production Tooling in Rapid Product Development
J. C. Castañeda, Product Development Technologies, Inc.

The Use of Benchmarking as a Design Tool
B. J. Arnold-Feret, Prototyping and Rapid Tooling Services (PaRTS)
J. H. Arnold, ACES Development

T13—The Future of Manufacturing Simulation

Linking Design to Analysis: The Future of Simulation for Injection Molding
A. R. Thomas, P. Kennedy, Moldflow Pty. Ltd.

Computer-Aided Thermoformed Product and Process Design
J. L. Throne, Sherwood Technologies, Inc.

The Challenges Facing CAE of Injection Molding as We Enter the Next Millennium
A. Bernhardt, Plastics & Computer Inc.
G. Bertacchi, Plastics & Computer International s.r.l.
N. Kassa, Consultant

Increased Speed to Market Using CAE Simulation for Injection Molded Plastics Parts
A. L. Duff, Moldflow Corporation

Automatic Design Optimization Molding Simulation for Injection Molded Parts
K. S. Barton, B. Lin, C-MOLD, Inc.
W. G. Ryim, LG Production Engineering Research Center

T14—Rotational Molding and Product Design and Development

*The What, How and Why of Rotational Molding
G. L. Beall, Glenn Beall Plastics, Ltd.

*Present in a joint session.
Aesthetics, Industrial Designers, and Designing for Rotational Molding (182) .......................... 1372
G. Bothun, Design Verks, Inc.

*Design for Rotational Molding (180) .................................. 1377
J. I. Rotheiser, Rotheiser Design Inc.

*Designing for the Process? (Design Details to Avoid) (181) ............... 1382
K. Bather, Diamond Plastics

*Computer Aided Design for Rotationally Molded Parts (179) ............ 1385
J. Fawcett, Fawcett Design Inc.

*Design of Stiffening Features in Rotationally Moulded Plastic Parts (4) ........................................ 1388
R. J. Crawford, The University of Auckland

T32—Material Innovations for the Next Millennium

INDEX™ Interpolymers: New Materials for the Wire and Cable Industry (687) .................. 3012
S. R. Betso, M. J. Guest, R. M. Remenar, The Dow Chemical Company
A. W. Field, F. E. Keen, BICC-General U.K. Cables Ltd.

Biodegradable Plastic Materials in Blends for Cost-Effective Low Temperature Applications (721) .... 3017
A. Komarek, University of Kansas
J. Ulrich, C. C. Ibeh, Pittsburgh State University
P. Sherlock, K-VET Inc.

High-Performance Poly Metal Composites Replace Lead in Many Applications (532) .................. 3023
L. Stover, J. Frankish, M.A. Hanna Engineered Materials
D. Douglas, R. Durkee, Ideas to Market, LP

Poly(phenylene ether) Engineering Thermoplastic Provides Creep Resistance, Toughness and
Fire Resistance Required for High Performance Pallets (745) .................. 3028
A. Adeleye, B. Torrey, L. Baccaro, P. Zuber, G. Diehl, S. MacLean, J. A. Jones, GE Plastics

Energy Absorption in Foam Filled Glass Fiber Reinforced Plastic Sections with Light
Metal Reinforcement (1012) ........................................ 3033
N. Suresh, G. Chapman II, C. Patterson, L. J. Oswald, DaimlerChrysler

W13—End Use and Performance Simulation

Computer Aided Engineering Simulation versus Actual Performance of an Automotive Structural
Component (815) ........................................ 3038
P. Godbole, J. White, AlliedSignal Plastics
G. Hamblin, ADAC Plastics

Attachment Design Analysis of a Plastic Housing Joined with Snap-Fits (584) .................. 3043
D. Q. Lewis, G. A. Gabriele, Rensselaer Polytechnic Institute
B. Brown, Lucent Technologies

Non Destructive Evaluation of Plastic Parts Using 3D Computed Tomography (796) .................. 3048
B. Davis, The Madison Group: PPRC
J. Hanson, Tomotherapy Inc.

Method to Estimate Vibration Behavior of Fiber Reinforced Thermoplastic Parts (208) .................. 3053
T. Yasuzawa, Y. Kanetoh, T. Tachibana, Ube Industries, Ltd.

Anisotropic Properties of Injection-Molded Short-Fiber Thermoplastics (1003) .................. 3058
E. W. Liang, G. G. Trantina, GE Corporate Research and Development

Engine Cooling Performance Optimization Using a CFD Guided Design Modification of a
Centrifugal Plastic Fan (774) ........................................ 3063
L. Reinhardt, E. Homsi, AlliedSignal, Inc.

W31—Resin Transfer Molding

*Enzymatic Template Synthesis of Processable Polyphenol (383) .................. 2336
F. F. Bruno, J. S. Sidhartha, L. Samuelson, U.S. Army Soldier, Biological, Chemical Command
R. Nagarajan, K. Yang, J. Kumar, S. Tripathy, University of Massachusetts at Lowell

*A Geometry-Based Model for Determining the Filling Time in Resin Transfer Molding Process (363) ........ 2341
F. Soltani, S. Manoochehri, Stevens Institute of Technology

*A Rapid Method for Prediction of the Vent Locations in Resin Transfer Molding Process (364) ........ 2346
F. Soltani, S. Manoochehri, Stevens Institute of Technology

*Present in a joint session.
W32—Designing for the Injection Molding Process

*A Study of the Effects of Process Conditions on the Shrinkage of Plastic Parts in Injection Molding by the Taguchi Method (737) .................................................. 3068
T. C. Chang, E. Faison III, Iowa State University

*The Effects of Mold Filling on Living Hinge Performance (373) .................................................. 3074
P. J. Brannon, Polytop Corporation
B. LiPetri, 3D Shapes
C. M. F. Barry, University of Massachusetts at Lowell

*Cover Part as an Application Example for Gas-Assisted Injection Molded Parts (880) ...................... 3079
M. Hansen, Mack Molding Company

*Benchmarking STL-Based Plastic Analysis (410) .................................................. 3084
G. Engelstein, GR Technical Services

*Modeling the In-Mold Coating Process of Thermoplastic Substrates (720) ...................................... 3091
S. Vadlamudi, J. M. Castro, The Ohio State University
E. J. Straus, OMNOVA Solutions Inc.

*Towards Design Guidelines for Injection Molded Biodegradable Plastics Products (474) ...................... 3097
P. Kandachar, R. Koster, Delft University

FAILURE ANALYSIS AND PREVENTION DIVISION

M16—Case Studies of Plastics Failure

Failure Analysis Case Studies, Part II: Effect of Material and End-Use (631) ........................................... 3104
R. H. Elleithy, Polymer Diagnostics Inc.

Plastics Failure Due to Oxidative Degradation in Processing and Service (320) ........................................ 3108
M. Ezrin, A. Zepke, J. Helwig, G. Lavigne, M. Dudley, University of Connecticut

Practical Risk Analysis as a Tool for Minimizing Plastic Product Failures (800) .................................... 3113
S. Medhekar, J. Moalli, R. Caligiuri, Exponent Failure Analysis Associates

Analysis of the Failure of a Polyethylene Natural Gas Service Line (2) ............................................. 3118
D. E. Duvall, Engineering Systems, Inc.

Degradation of an Acetal Plumbing Fitting by Chlorine (110) ................................................................. 3125
P. R. Lewis, The Open University

A Study of the Effect of Chlorinated Water on Engineering Thermoplastics at Elevated Temperatures (123) ...................................................................................................................... 3132
S. W. Bradley, Materials Performance, Inc.
J. El-Hibri, B. H. Bersted, BP Amoco Polymers, Inc.
W. L. Bradley, Texas A&M University

M33—Durability Analysis of Plastic Pipes

Application of the Crack Layer Model for Understanding of the Correlation between Lifetime and Creep Behavior in Polyethylene (238) .................................................. 3138
J. Pan, D. Chen, Y. Shulkin, A. Chudnovsky, University of Illinois at Chicago
N. Jivraj, K. Sehanobish, The Dow Chemical Company

Defect Analysis and High Density Polyethylene Pipe Durability (752) ...................................................... 3143
S. Wu, K. Sehanobish, N. Jivraj, The Dow Chemical Company

*Present in a joint session. 
Ductile Failure and Delayed Necking in Polyethylene (239) .................................................. 3148
W. Zhou, D. Chen, Y. Shulkin, A. Chudnovsky, University of Illinois at Chicago
N. Jivraj, K. Sehanobish, S. Wu, The Dow Chemical Company
Small-Scale Testing for Brittle-Tough Transitions of Rapid Crack Propagation in PE Pipelines (480) ........ 3153
P. Davis, S. Hillmansen and P. Leevers, Imperial College
Notch Sensitivity of Pipe Grade Polyethylene and Polybutylene (243) ............................................ 3158
X. Niu, D. Chen, W. Zhou, A. Chudnovsky, University of Illinois at Chicago
N. Jivraj, The Dow Chemical Company
An Anomaly in the Lifetime-Temperature Relation of a Polybutylene for Pipe Applications (244) ........... 3162
X. Niu, W. Zhou, Y. Shulkin, A. Chudnovsky, University of Illinois at Chicago
N. Jivraj, The Dow Chemical Company
Comparing the Long Term Behaviour of Tough Polyethylenes by Craze Testing (108) ......................... 3167
K. C. Pandya, J. G. Williams, Imperial College

T17—Polymer Durability and Accelerated Test

Durability Study of Conductive Copper Traces within Polyimide Based Substrates (240) ......................... 3174
E. Martynenko, W. Zhou, A. Chudnovsky, The University of Illinois at Chicago
R. Li, L. Poglitsh, Motorola Inc.
Effects of Processing Conditions on the Failure Mode of an Aliphatic Polyketone Terpolymer (367) ........ 3179
N. R. Karttunen, A. J. Lesser, University of Massachusetts at Amherst
Freeze-Thuaw Durability of Composites for Civil Infrastructure (938) ............................................ 3184
J. Haramis, K. N. E. Vergheese, J. J. Lesko, Virginia Polytechnic Institute and State University
True Stress-Strain-Temperature Diagrams of Polyolefins and Their Application in Acceleration
Tests for Lifetime Prediction (241) ............................................................................................................ 3189
J. Liu, Z. Zhou, X. Niu, A. Chudnovsky, University of Illinois at Chicago
Relaxation of Residual Stress in a PPS High Precision Part (173) ....................................................... 3193
L. E. Hornberger, L. A. Sanchez, Santa Clara University

W16—Fractography and Surface Properties

Nylon and Moisture: The Real Story Behind the Effects of Drying Resin and Conditioning
Molded Parts on Final Properties (186) ......................................................................................................... 3198
M. P. Sepe, Dickten & Masch Mfg. Co.
Fractography of ABS (807). ......................................................................................................................... 3205
H. Kita, M. Higuchi, A. Miura, National Institute of Technology and Evaluation
T. Kuriyama, I. Narisawa, Yamagata University
Scratch Damage Mechanisms in Model Polymers (614) ............................................................................. 3209
C. Xiang, H.-J. Sue, Texas A&M University
J. Chu, Visteon Automotive Systems
Surface Delamination of an Injection Molded Medical Device Using Flexible PVC (107) ...................... 3213
T. Yang, S. Shang, J. Booras, M. T. K. Ling, H. Blom, L. Woo, H.-S. Jin,
D. Marcquenski, Baxter Healthcare
Fratography of Metals and Plastics (25) ......................................................................................................... 3217
R. J. Parrington, IMR Test Labs
Solid State Shear Orientation of Polymers via Equal Channel Angular Extrusion (90) ......................... 3222
Z. Xia, C. K.-Y. Li, H.-J. Sue, Texas A&M University
A. J. Hsieh, U.S. Army Research Laboratory
J. Chu, Visteon Automotive Systems

TH7A—Environmental Stress Cracking, Fracture Behavior of Blend and Composite

The Effect of Chemical Degradation on Physical Properties and Fracture Behavior of
Poly(ethylene-co-carbon monoxide) and Poly(1-butene) (242) ............................................................... 3228
X. Niu, E. Martynenko, A. Chudnovsky, University of Illinois at Chicago
S. H. Patel, S. S. Stivala, Stevens Institute of Technology
The Influence of Morphology on the Impact Performance of an Impact Modified PP/PS Alloy (265) ....... 3233
S. P. Bistany, Montell Polyolefins
Understanding the Effects of Weathering Variables on Plastics Using Fractional Factorial
Experiments (779) ......................................................................................................................................... 3236
H. K. Hardcastle III, Atlas Weathering Services Group
Fracture Behavior of Polypropylene Modified with Metallocene Catalyzed Polyolefin

L. A. Fasce, P. M. Frontini, Instituto de Investigaciones en Ciencia y Tecnologia de Materiales
S.-C. Wong, Nanyang Technological University
Y.-W. Mai, The University of Sydney

Resistance of Glass Fiber-Reinforced Thermoplastics to Water Hammer

T. Kawaguchi, H. Nishimura, F. Miwa, Osaka Gas Co., Ltd.
K. Ito, T. Kuriyama, I. Narisawa, Yamagata University

Fatigue Behavior of Discontinuous Glass Fiber Reinforced Polypropylene

M. Sezer, Arcelik A.S.
A. Aran, Istanbul Technical University

THERMOPLASTIC ELASTOMERS DIVISION

M14—Advances in TPE

Effect of Polyamide Grafted Compatibilizer on the Adhesion of Thermoplastic Vulcanizates to Polyamide Substrates

R. Sadeghi, E. Willems, R. Brzoskowski, DSM Thermoplastic Elastomers

Study of the Characteristics of Thermoplastic Vulcanizates of PP/SEPS/SBS Blends

M. Tasaka, S. Saito, Riken Vinyl Industry Co., Ltd.

Clear and High Heat Resistant TPEs

Y. M. Lu, J. Kutka, GLS Corporation

Thermoplastic Elastomers of Poly(ethylene terephthalate) and Grafted Rubber Blends

N. Papke, J. Karger-Kocsis, University of Kaiserslautern

Superstructures in Polyamide Elastomers—The Key for Super Performance?

J. Lohmar, Degussa—Huls AG

Stabilization of TPE’s

L. Davis, Cytec Industries, Inc.

M30—Structure and Properties

Investigations on Stretched Block Copolymers of Poly(butylene terephthalate) and Poly(tetramethylene oxide)

A. Schmidt, C. Alves, M. Soliman, DSM Research B.V.

Evaluation of Thermoplastic Polyurethane Based Thermoplastic Vulcanizates for Interior Automotive Applications

M. Tasaka, N. Masubuchi, Riken Vinyl Industry Co., Ltd.

Rheology of TPV’s

P. Steeman, W. Zoetelief, DSM Research BV

Dynamic Vulcanization of Elastomers in Polypropylene Blends

M. A. López Manchado, Institute of Polymer Science and Technology
J. M. Kenny, University of Perugia

Effects of Varying Strand Length on Shielding Properties of Conductive Elastomers in Near- and Far-Field Experiments

D. Luther, M.A. Hanna Engineered Materials

Specific Features of Dynamic Vulcanization and Properties of Thermoplastic Elastomers

E. V. Prut, N. A. Yerina, Russian Academy of Sciences

Understanding Color Technology

S. A. McCabe, GLS Corporation

W23—Thermoplastic Elastomers and Plastic Modification

Effect of Vinyl Silane Grafted Polypropylene on Foamability of Thermoplastic Vulcanizate Containing a Water Releasing Compound

E. Willems, DSM Research
Y. Wang, DSM Thermoplastic Elastomers

Structure-Property Relationships for Propylene/o-Olefin Copolymers: Effect of Short Branch Length

C. J. H. Cho, J. B. P. Soares, C. Tzoganakis, University of Waterloo

*Present in a joint session.
*A Novel Ionomer for Nylon Modification (498)  
R. T. Chou, DuPont Company

*Effect of Nanosilica on Properties of Segmented Polyurethanes (690)  
Z. S. Petrovic, Y.-J. Cho, I. Javni, W. Zhang, Pittsburg State University

*Structure-Properties of PP-EPDM Thermoplastic Elastomer: Origin of Strain Recovery (928)  
T. Inoue, P. Svoboda, Tokyo Institute of Technology

*Properties of an Oil Resistant TPV (979)  
S. Cook, J. Patel, A. J. Tinker, Tun Abdul Razak Research Centre, MRPRA

*Fundamental Morphology-Property Studies of Reactor Grade Thermal-Plastic Olefins (RTPO) (1042)  
C. K.-Y. Li, J. Wang, C. J. Chen, Formosa Plastics Corporation  
H. Sittertz-Bhatkar, Texas A&M University

EDUCATION AND TRAINING DIVISION

W17—Education

The Plastics Resources for Educators Program (PREP) (839)  
T. E. Weston, Pennsylvania College of Technology

Developing Animations and Simulators for Plastics Education (870)  
K. Cantor, Pennsylvania College of Technology

Virtual Instruments for Polymer Characterization and Processing (199)  
I. R. Harrison, Pennsylvania State University

Product Fabrication Project/Course (414)  
J.-M. Charrier, McGill University

VINYL DIVISION

T25—Flexible Vinlys

Trimellitates—Versatile Plasticizers for the Vinyl Compounder (836)  
R. C. Adams, BP Amoco Chemicals

A Unique Benzoate Plasticizer for Reducing Viscosity and Fusion Temperature (235)  
T. Bohnert, B. Stanhope, K. Gruszecki, S. Pitman, V. Elsworth, Velsicol Chemical Corporation, Velsicol Chemical Ltd.

A New Generation of High-Performance PVC Alloys (136)  
D. Weng, J. Andries, K. Saunders, J. Macaluso, R. Brookman, Teknor Apex Company

High Molecular Weight Flexibilizers in Low Smoke Flame Retardant PVC Compounds (1127)  
E. R. Griffin, E. I. du Pont de Nemours & Co., Inc.

Chemical Crosslinking of Flexible PVC Foam Formulations (862)  
R. Ibarra-Gómez, I. G. Yañez-Flores, O. S. Rodríguez-Fernández, Centro de Investigación en Química Aplicada (CIQA)

M. Gilbert, Loughborough University

Magnetic Materials Based on Polymers and Magnetical Fillers (624)  
O. S. Rodríguez-Fernández, P. Sifuentes, L. F. Ramos de Valle, Centro de Investigación en Química Aplicada

J. Matutes-Aquino, O. Ayala-Valenzuela, D. Rios-Jara, Centro de Investigación en Materiales Avanzados (CIMAV)

W5—Vinyl Performance

Improved Organotin Stabilizers: Continuing Health and Environmental Research (537)  
S. R. Murphy, C. Bertelo, R. Ringwood, M. Cochran, Elf Atochem North America, Inc.

Gloss Control in Rigid PVC—Part I: Techniques for Gloss Assessment of Rigid PVC Profiles (65)  
E. Rabinovitch, D. Harshbarger, The Geon Company

J. Isner, Polymer Diagnostics, Inc.

Gloss Control in Rigid PVC—Part II: Effect of Processing Variables on Gloss of Rigid PVC Profiles (64)  
E. Rabinovitch, D. Harshbarger, The Geon Company

*Present in a joint session.
Influence of Various Molding Conditions on the Uni-, Bi-, and Tri-Axial Impact Properties of Polyvinyl Chloride (PVC)  
J. Summers, The Geon Company

W25—Vinyl Additives

Dynamic Light Scattering Method for Determination of Shelf Stability of Liquid Colloidal PVC Stabilizers (922)  
M. H. Fisch, R. Bacaloglu, CKWitco Technical Center  
Viscosity Effects in Rigid PVC (740)  
M. T. Berard, DuPont Dow Elastomers LLC  
Enhanced Performance via Ester Lubrication of Rigid PVC Formulations Modified with Chlorinated Polyethylene (504)  
L. J. Effler, N. R. MacMurdo, G. R. Marchand, DuPont Dow Elastomers LLC  
Effects of Impact Modifiers on the Properties of Rigid PVC/Wood-Fiber Composites (310)  
F. Mengeloglu, L. M. Matuana, J. A. King, Michigan Technological University  
New Fast Peroxides for PVC (1108)  
K. W. Dixon, Akzo Nobel Chemicals Inc.

Increasing PVC Suspension Polymerization Productivity Using Temperature Programmed Reactions (897)  
G. D. Longeway, D. E. Witenhafer, PVC Productivity Associates

Quantitative Relationships between the Parameters of Thermal Degradation of Polyvinyl Chloride and the Loss of Mechanical Properties (379)  
S. R. Deshmukh, Medtronic AVE  
F. Lai, University of Massachusetts at Lowell

STUDENTS DIVISION

M17—Blow Molding

*Verification of Parison Shape and Diameter with Extrusion and Blow Molding Simulation Software (1074)  
M. Niemiec, K. Montague, Pennsylvania State University at Erie, The Behrend College  
*Verification Studies of Blow Molding Software on Ovalized Parisons in Extrusion Blow Molding (1065)  
T. J. Pfleger, G. W. Munz II, Pennsylvania State University at Erie, The Behrend College  
*Effects of Processing Parameter on Pinch-Off Designs (1062)  
C. Weller, M. Marlowe, Pennsylvania State University at Erie, The Behrend College  
*Intermittent Extrusion Blow Molding Using a Reciprocating Screw (1019)  
N. A. Mancine, Pennsylvania State University at Erie, The Behrend College

M34—Mold Making and Mold Design

*Building Soft Tooling Molds Using Rapid Prototyping and Different Methods of Construction in a University Environment (1031)  
K. Bussard, Western Washington University  
*Modeling Gate Freeze in Hot Runners Using CAE (1087)  
J. J. Chiamardas, Pennsylvania State University at Erie, The Behrend College  
*The Effects of Pulse Cooling on the Molding Cycle and Part Variation (1075)  
A. S. Lamont, C. J. Linden, Pennsylvania State University at Erie, The Behrend College  
*Comparison of Aluminum, Wood, and Epoxy as Thermoforming Mold Material (1055)  
D. Oliver, Pittsburgh State University  
*Sequential Valve Gating for Thin Wall Injection Molding Comparison between Experimental Results and Filling Software (1022)  
R. Shah, University of Massachusetts at Lowell  
*Linear Shrinkage Differences in Plastic Injection Molded Parts (1085)  
D. A. Velarde, M. J. Yeagley, Pennsylvania State University at Erie, The Behrend College  
*Development of a Rotational Molding Machine with Integral Heating and Cooling Passages within the Mold (1089)  
J. A. Sunday, Pennsylvania State University at Erie, The Behrend College

*Present in a joint session.
T18—Polymer Modifiers and Additives Division

• Improving Mechanical and Organoleptic Properties of Polypropylene (1072) 3476
  T. S. Campbell, J. L. Clarke, Pennsylvania State University at Erie, The Behrend College

• Investigating the Effect of Coupling Agent on the Structural Properties of Glass Fiber
  Reinforced HDPE (1030) 3482
  B. P. Duffey, Western Washington University

• Development of Crosslinkable Binder System for Metal Injection Molding Using Urethane Technology (1073) 3486
  A. M. Haney, Pennsylvania State University at Erie, The Behrend College

• Color Effects of Modified Rubber on Black Colorant in Polypropylene (1107) 3491
  E. B. Hunt, Eastern Michigan University

• Raising the HDT and Elevated Temperature Tensile Properties of Injection Moldable HDPE by Dry Blending with Small Amounts of Dicumyl Peroxide (1080) 3493
  D. Heuer, A. Lawrence, Pennsylvania State University at Erie, The Behrend College

• Comparison of Techniques to Measure Additive Diffusivity in Polymer Films (636) 3497
  J. P. McKibbin, S. Y. Sankhe, K. A. Bishop, D. E. Hirt, Clemson University

T36—Polymer Analysis

• The Effects of Long Term Ultraviolet Radiation on the Mechanical Properties of Wood Flour Filled Recycled HDPE (1082) 3504
  D. Heuer, M. Albert, Pennsylvania State University at Erie, The Behrend College

• Predicting Creep in Bottle Design (1084) 3508
  I. McCracken, Pennsylvania State University at Erie, The Behrend College

• A Study of the Tensile Creep Behavior of Wood Flour Filled HDPE in Aqueous Mediums (1086) 3513
  J. Raybuck, D. Heuer, Pennsylvania State University at Erie, The Behrend College

• Non-Destructive Means of Measuring the Glass Density of a Fiberglass Preform (1071) 3517
  F. J. Salusky, Pennsylvania State University at Erie, The Behrend College

• Characterizing Scrap Vinyl Flooring to Determine Feasible Reuse Options (1081) 3521
  A. Lawrence, Pennsylvania State University at Erie, The Behrend College

W18—Engineering Properties and Structure

• Investigation of the Phase Morphology Development in PA-6/PP Blends Using a Reactive Compatibilizer (Glycidyl Methacrylate Grafted Polypropylene) (1033) 3526
  G. De Belder, V. Schiepers, G. Groeninckx, Catholic University of Leuven

• The Effects of Stress Hardening on the Crystallization and Density of Polypropylene (1051) 3531
  D. A. Nichols, Pennsylvania College of Technology

• The Effects of Ultrahigh Shear Rate and Shear Duration on Mechanical Properties of Commercial Polymers (1079) 3536
  J. Smith, P. Wheeler, Pennsylvania State University at Erie, The Behrend College

• A Method to Characterize the Impact Properties of Hand Tools (1083) 3541
  J. Stanko, J. Kennerknecht, Pennsylvania State University at Erie, The Behrend College

• A Comparative Study of the Melting and Crystallization Behavior for a Metallocene and a Narrow Fraction of Ziegler-Natta Isotactic Polypropylene (996) 3546
  W. Huang, R. G. Alamo, FAMU/Florida State University

W35—Injection Molding

• Shearing of Plastic in Runners Causes Property Differences in Parts (1067) 3552
  R. H. Bishop, Pennsylvania State University at Erie, The Behrend College

• An Injection Molding Dimensional Capability Comparison of Three Molding Transfer Modes Each Run under Both a Two- and a Three-Stage Molding Strategy (1069) 3555
  M. J. Christie, M. D. Leatherman, Pennsylvania State University at Erie, The Behrend College

• An Injection Molding Process Capability Comparison between Position and Hydraulic Transfer Modes across Various Degrees of Check Ring Wear (1068) 3559
  J. D. Nicolia, M. D. Roth, Pennsylvania State University at Erie, The Behrend College

• Effect of Heater Band Orientation on Cavity to Cavity Variations (1043) 3564
  A. J. Shuttleworth, R. J. Haylett, Pennsylvania State University at Erie, The Behrend College

• Economics of Plastics Materials over the Last Few Decades (1035) 3569
  N. Chasmawala, University of Massachusetts at Lowell

*Present in a joint session.
**POSTER PRESENTATIONS**

Spanish/Portuguese and General

**Processability and Mechanical Properties of Metallocenic s-PP/Conventional i-PP Blends** (998) 3582
- E. G. Chaves, M. F. V. Marques, *Universidade Federal do Rio de Janeiro*

**Supported Metallocene Catalysts for Ethylene Polymerization** (969) 3586
- A. Conte, M. F. V. Marques, *Universidade Federal do Rio de Janeiro*

**Effect of Disperse Phase Structure on the Optical Properties of Multicomponent PP Blends** (1007) 3589
- D. Ercoli, G. Goizueta, N. Capiati, *PLAPIQUI (UNS-CONICET)*

**Effect of the Crystallization Rate in the Roughness of Polypropylene Films** (971) 3594
- V. A. González, M. Hinojosa, C. Guerrero, E. Reyes, *Universidad Autónoma de Nuevo León*

**Poliimidas a Partir de Bis(o-amino)-Fenoles o Tetraaminas Aromáticas:**
**Síntesis y Transformaciones Químicas** (975) 3599
- D. Likhatchev, S. Granados-Fdcil, D. Guzman-Lucero, B. L. Ruiz-Rojas, *IIM-UNAM*
