| 3A11         | 381  | Reducing the fresh water consumption for the feed of retention aids  
K. Ryoso & H. Manner |
| 3A12         | 387  | Developments in air flotation drying - case study - Australian Papers Mills.  
Wesley Vale  
A. Rankin |
| 3A13         | 395  | Consistency management concept  
J. Vehmas & J. Niemela |
| 3A21         | 399  | Improving paper machine operations with coated belt technology  
J. Mead & J.R. Gray |
| 3A22         | 403  | The printability of Condebelt dried linerboard  
E. Retulainen, J. Kangas, A. Kunnas & P. Oittinen |
| 3A31         | 409  | Tissue quality - function of many factors  
J. Lemman & J. Carlsson |
| 3A32         | 415  | Simulation of initial fibre retention by forming fabric  
C. Barratte, J.-C. Roux, C. Voillo, J.-F. LeNest, J.-C. Lonjon & P.J. Mangin |
| 3A33         | 421  | Runnability analysis systems improve papermaking efficiency  
T. Hjort & H. Rautiainen |
| 3A41         | 429  | Effect of air on the performance of certain unit processes in stock preparation and means for reducing disadvantages  
T. Stoor, R. Virkkala, O. Dahl & J. Niinimaki |
| 3A42         | 437  | VHD™ formation system  
D. Evans & S. Fielding |
| 3A43         | 443  | Pulsating suction during vacuum dewatering and its effect on the rate and extent of water removal  
C. Mitchell & R.E. Johnston |
| 3B11         | 449  | Screening of recovered paper stock for the production of graphic papers  
R. Rienecker & D. Bergfeld |
| 3B12         | 459  | Use of wetting agents to improve flotation deinking with magnesium oxide  
K. Stack, M. Clow, M. Kirk & S. Maighan |
| 3B13         | 465  | The effect of pH and different alkalinization sources on brightness in flotation deinking  
H.U. Stuess, M. Del Crosso & B. Hopf |
| 3B21         | 471  | Towards infinity: a new standard for quality. The National Archives of Australia introduces a new trademark for archival products  
J. Batterham |

</table>
| 3B22         | 473  | A new and efficient test procedure to measure the internal bond of paper and board  
|              |      | T. First       |
| 3B31         | 479  | A comparison between static and cyclic humidity compression creep performance of linerboard  
|              |      | I.R. Chalmers  |
| 3B32         | 485  | The effect of network variables on the ring crush strength of handsheets  
|              |      | I.H. Parker, A. Conn & T. Jackson |
| 3B33         | 495  | Use of an image orientation analysis technique to investigate sheet structural problems during forming  
|              |      | M.D. Lloyd & I.R. Chalmers |
| 3B41         | 503  | Off-line analysis of properties of paper web: a diagnostic tool to improve variability  
|              |      | A.K. Ghosh, C. Rae & J. Youdan |
| 3B42         | 513  | Paper test lab automation  
|              |      | S.B. Keil     |
| 3B43         | 519  | Effect of relaxation during drying on the final sheet properties  
|              |      | G. Zhang, K. Niskanen, J.E. Laine & H. Paulapuro |
| 4A11         | 527  | Effect of calendering speed on sheet structure and paper properties  
|              |      | M.D. Lloyd & A.R. Dickson |
| 4A12         | 535  | The benefits of high temperature induction heated calender rolls  
|              |      | K. Fujimoto   |
| 4A13         | 545  | A new calendering concept  
|              |      | U. Gabbusch  |
| 4A21         | 551  | Ecological risk assessment: a new approach to effluent management in the pulp and paper industry  
|              |      | D. Richardson, B. Hart, M. Jones, C. Nixon & P. Kearney |
| 4A22         | 559  | Silvichemicals from pulp mill wastes - biosorption of metal ions on ellagic acid  
|              |      | H. Yu, G.H. Covey & A.J. O’Connor |
| 4A31         | 567  | Factors affecting the deposition of wood resin  
|              |      | K. Stack, E. Stevens, D. Richardson, T. Parsons & S. Jenkins |
| 4A32         | 571  | Enzymatic control of wood extractives  
|              |      | J. Buchert, A. Mustranta, R. Spetz, R. Ekman & B. Holmbom |
| 4A33         | 575  | Resin extraction and effects on pulp quality  
<p>|              |      | S. Harper &amp; M. Grengg |</p>

| 4A41         | 581  | New water based barrier coatings for paper and paperboard  
Vähä-Nissi, J. Lahti, A. Savolainen, K. Rissa & T. Lepisto |
| 4A42         | 591  | A new high rate flotation clarifier for the modern paper industry  
P.S. Woollen & R. Kalichev |
| 4B11         | 595  | Flow phenomena and paper forming  
R.J.N. Helmer, G.H. Covey, W.D. Raverty & N. Vanderhoek |
| 4B12         | 605  | Heat transfer coefficient - a new way to monitor wood pulp fibre quality  
G.G. Duffy, M.S.N. Kazi & X.D. Chen |
| 4B13         | 615  | The influence of molecular weight on mechanical properties of pulp fibres  
U. Molin & H. Lemsholm |
| 4B21         | 623  | A matrix structure to describe anisotropic paper  
R.J.N. Helmer, G.H. Covey, W.D. Raverty & Y.-L. Yeow |
| 4B22         | 635  | The deconvolution of wide angle x-ray scattering patterns from paper within the  
two phase model  
G.J. Garvey, H.P. Parker & G.P. Simon |
| 4B31         | 639  | Blockface sectioning of paper in the MD/CD plane  
R.J.N. Helmer, G.H. Covey, W.D. Raverty & G. Bristow |
| 4B32         | 645  | New insights into the flow of pulp suspensions  
S.T. Paul, G.G. Duffy & D.X. Chen |
| 4B33         | 655  | Some dimensional relationships among wood tracheids, TMP fibres, and kraft  
and other chemical pulp fibres  
R.P. Kibblewhite & R. Evans |
| 4B41         | 663  | Optimising simulated commercial paper for pulp quality analysis  
R.J.N. Helmer, G.H. Covey, W.D. Raverty & N. Vanderhoek |
| 4B42         | 671  | Effect of grammage and concentration on paper sheet formation of Pinus radiata  
kraft pulps  
U.W. Winters, G.G. Duffy & R.P. Kibblewhite |
