10th International Conference on Computer Applications in Shipbuilding

ICCAS '99

June 7-11, 1999 at the Massachusetts Institute of Technology in Cambridge, Massachusetts, USA

Volume 2

Edited by C. Chryssostomidis
Massachusetts Institute of Technology

and

K. Johansson
Kockums Computer Systems AB
Contents of Volume 2

Information Technology Infrastructure
Enabling the Shipbuilding Virtual Enterprise
Richard W. Bolton, Paul Horstmann and Thomas Rando

The Industry-wide Intranet for Ships and Ocean Engineering
Jongkap Lee, Wonsoo Kang, Jaeseon Yum, Jaemin Lim,
Byungsae Yoo, Jinhyoung Park, Kyungho Lee and Dongkon Lee

The Design and Introduction of a Company Wide Intranet
Robert Childs, Robert McIlwaine and Carsten Onneken

Web Enabled Management
Greg Diggs, David Helgerson and Mark Koenig

Enhanced Information Flow in a Mid-Size Shipyard: A Case Study
Jonathan M. Ross, Thomas L. Neyhart and Louis A. Manz

A CAD Based Generic Framework for Design for Production
Richard Lee Storch, Smith Sukapanpotharam, Bill Hills
and George Bruce

Detailed and Production Design
Integration of IT Systems in Shipbuilding
Henrik O. M. Hultin and Lars R. Borglum

New Object Oriented CAD Technology and its Impact on
Shipboard Piping and Power Plant Design
Rick Carell

Improving Quality in the Ship Machinery Outfitting Projects
with Efficient Use of Global Computer Networks
Lauri T. Kosomaa

Preliminary Design
RulesCalc - A System for Integrating Classification Checks
with Ship Initial Design Systems
Martin Brooking and Alistair Stubbs

Exchange of Structural Design Models for Rule Approval Based
on STEP
Han-Min Lee, Yong-Jae Shin, Soon-Hung Han, Jong-Hyun Kim,
Jong-Ryol Lee, Ho-Chul Son and Jong-Sung Park
Preliminary Design
Tools for the Assessment of Ship Structural Steelworks – A State of the Art Survey
Robert Bronsart

Seamless Integration of Strength Assessment into a CAD Environment
Arne Christian Damhaug, Elling Rishoff and Are Føllesdal Tjønn

A Study on the Methodology and Procedure for Solid Model Based Ship Structure Design and Product Modeling
H.W. Suh, H.S. Choi and S.G. Lee

Potential Benefits Derived from Integration of Conceptual Design Tools for 3-D Modeling and Simulation
Ron Saber

DIVA3D, a 3D Liquid Motion New Generation Software
Laurent Brosset, Tung Thien Chau and Michel Huther

A Hybrid Agent Approach For Set-Based Conceptual Ship Design
Michael G. Parsons, David J. Singer and John A. Sauter

Reefer Container Transport in Open Top Cargo Holds
Andreas Kraus, Alfred Mechsner, Yves Wild, Hanspeter Raschle and Ronald Horn

Uwe Hollenbach

The Application of Multi-Objective Robust Design Methods in Ship Design
Robert Ian Whitfield, Bill Hills and Graham Coates

Preliminary Design Computer Synthesis Modeling and Cost Estimating
Thomas R. Schiller, John Daidola, John Kloetzli and Jeff Pfister

The Use of Object Oriented Modelling in Through Life Costing of Shipboard Systems
Ian G. Ridley, Ian L. Buxton and G. Hugh Stephenson
Preliminary Design
SafeHull FEM Fatigue Assessment of Ship Structural Details
  Gary E. Horn, Yung K. Chen and Jack M. Chen

Simplified Stress Analysis of Ship Structures
  Xiling Che, Faith K. Lee and Daron H. Libby

Tank Testing vs. Computational Fluid Dynamics (CFD) in Ship Design
  Paul D. Sclavounos and Sungeun Kim

Form Parameter Approach to the Design of Fair Hull Shapes
  Stefan Harries and Horst Nowacki

Parametric Geometry and Optimisation of Hull Forms
  Malcolm I. G. Bloor and Michael J. Wilson

Development of Practical 3-D Lines Faring System for Ship Hull Form (MELFAS) and its Application to CIMS
  Yasushi Eida, Yuichi Sasaki and Yuko Nishikido

Assembly and Construction
Three-Dimensional Numerical Simulation of Plate Forming by Line Heating
  Henrik B. Clausen

An Object-Oriented Control System for an Automated Line Heating Process
  Jong Gye Shin, Cheol Ho Ryu, Sung Won Choe and Won Don Kim

A Finite Element Model for Metal Forming by Laser Line Heating
  Guoxin Yu, Koichi Masubuchi, Takashi Maekawa and Nicholas M. Patrikalakis

An Automatic System for Line Heat Bending Processing Method Utilizing FEM Application
  Morinobu Ishiyama, Yoshihiko Tango and Mikito Shirai

NC Painting Robot for Shipbuilding
  Tatsuo Miyazaki, Yoshio Nakashima, Hiroshi Ookubo, Kenichi Hebaru, Yasunori Noborikawa, Kazuo Ootsuka, Kunio Miyawaki, Tsuneto Mori, Toshiaki Shinohara, Yukio Saito and Hidetoshi Matsumoto
Assembly and Construction
Multi-Robot Welding System for Curved Shell Blocks
Yuji Sugitani, Yoshihiro Kanjo, Kuniteru Ishikawa
and Kenji Susukida

Automating Robotic Arc Welding in Shipyard Panel Shops
Using a Virtual Environment
Avi Eliassaf, Meir Lebel and Oshrat Cohen

Development of a Multi-Robot Welding System for
Subassembly Stages in Shipbuilding
Yoichi Nagao, Hironobu Urabe, Fumihiro Honda,
Masatsugu Takeichi, Toshihiko Yamazaki and
Tsunehiro Yamamoto

Assembly Weld Planning for Work Content Calculation and
Robot Control
Thomas Koch and Reinhard Staebler

Automatic Robot Programming for Welding of Ship Structures:
Weld Data Generation and Usage for Collision Free Robot Paths
Andrea Favretto

Pre-Outfitting Units
Andres Molina, Diego Abal and Fernando Sanchez

Ship Manufacturing - Some Problems of a Hull Shape Simplification
Tadeusz Graczyk and Eugeniusz Skrzymowski

A Collaborative Shop-Floor Planning Tool in Conjunction
with a Product Model
Bob Basu and Rainer Lamping

Index of Contributors
