Explosives & Blasting Technique

Edited by
Roger Holmberg
Dyno Nobel R&D Centre for Initiation Systems, Gylltorp, Sweden
Swedish Rock Construction Committee, Stockholm, Sweden
Table of contents

Foreword XI
Acknowledgement XIII

1 EU directives and harmonisation work

Harmonisation of explosives standards in Europe 3
F.M.Murray

European harmonization of test methods for high explosives in the frame of Directive 93/15/EEC 9
J.A.Sanchidrián

A comparison of methods for thermodynamic calculation of explosives used in Europe 17
J.A.Sanchidrián, L.M.López, N.Fiederling, S.Mencacci & H.J.Verbeek

The preliminary harmonisation work of the blast vibration values in Finland 25
R.Vuolio & P.Sainio

Standards, environmental regulations and consequences for tunnel blasting projects in urban areas in Sweden 33
D.Jonsson & C.Rundqvist

How environmental and transport regulations will affect blasting 41
C.Johansson & J.Svärd

2 Health, safety and environment, HSE

Explosive accidents in the Federal Republic of Germany – An analysis of the accident rate and conclusions for the body of regulations 49
H.Ehnes, G.Friesen & W.Pichl

Emissionen von Sprengstoffen 53
V.Wetzig

Evaluation of the kind of hazards and risks encountered with explosives when blasting in quarries – A simple concept 59
A.A.Maier
Analysis of ground vibrations caused by open pit production blasts
G.Chen & S.L.Huang

Critical evaluation of ground vibrations and consequent structural damage under varying blast configurations
P.Pal Roy & A.K.Chakraborty

Damages to underground openings due to surface blasting
P.K.Singh, M.P.Roy, C.Sawmliana, R.B.Singh & D.P.Singh

Estimation particle velocity on the basis of blast event measurements for an infrastructure excavation located nearby Istanbul
A.Kahrman, S.Gorgun, A.Karadogan & C.Tuncer

The vibration characteristics of a tunnel induced by adjacent blasting
N.Yang, Z.Zhang & H.Liu

3 Recent technical development – Product and processes

Control of construction vibrations with an autonomous crack comparometer
C.H.Dowding & D.Siebert

Fragmentation assessment using the FragScan system: Quality of a blast
J.Schleifer & B.Tessier

The use of electronic blasting systems at the M.I.M. George Fisher mine
G.B.Tucker & D.B.Kay

The effect of timing precision on control of blasting effects
C.V.B.Cunningham

Die Verbesserung des Ergebnisses von Gewinnungssprengungen insbesondere durch Veränderung der Zündfolge
I.Baumann, J.Meißner, B.Müller & Th.Hohlfeld

The influence of delay timing on optimal fragmentation in electronic blasting
H.P.Rossmanith

Electronic detonator technology: Field application and safety approach
D.A.Bartley, R.McClure, B.Wingfield & R.Trousselle

The second generation of electronic blasting systems
J.Petzold & F.Hammelmann

Breakage characteristics in rock blasting
P.Moser, N.Cheimanoff, R.Hochholdinger & R.Ortiz

The influence of rock and rock mass parameters on the blasting result in terms of fragmentation
G.Reichholf & P.Moser

Minimizing blast damage to rock slopes
J.L.Floyd
Drilling equipment selection for optimized surface excavation

P.Koivunen

Technological improvements on explosives for underground work operations

Y.Bleuzen, G.Jauffret & D.Humbert

Einsatz moderner Sprengtechnik beim Bau des Lötschberg-Basistunnels

B.Gugger & Ch.Amstad

Erste Erfahrungen mit gepumpter Emulsion in schweizerischen Tunnelprojekten am Gotthard-Basistunnels

R.Müller

Controlled drifting and estimation of blast damage

U.Nyberg & S.Fjellborg

4 Shot hole development

Reduction of blast vibration by means of sequentially optimized delay blasting

G.Mogi, T.Hoshino & S-Q.Kou

Perimeter blasting in a 130 m road cut in gneiss with holes with radial bottom slots

F.Ouchterlony, M.Olsson & S.O.Båvik

Use of hydraulic coupling for powder factor reduction in secondary blasting

M.F.C.Schmidt & P.N.Worsey

Measured shock pressures in the splitting of dimension stone

C.M.Lownds

A variable density explosive for open pit mining

B.L.Hansen & K.S.Atkinson

Emulsified powdered granulated explosive and its application in underground mines

X.Wang, G.Wang, X.Zhang, T.Kang & Z.Li

Comparison of laboratory and 'in situ' testing of the emulsion and ANFO explosives blasting efficiency

Z.Ester, D.Vrkljan & Z.Deković

The influence of cartridge length and tamping practices on the efficiency of packaged emulsion explosives in development blasting

Effect of air-decking on fragmentation: A few case studies of Indian mining

N.R.Thote & D.P.Singh

Results that may increase efficiency in salt mines when the integrity of the underground mining structures is provided

R.Laszlo, C.Ciocoli, N.Heljiu & K.Fissgus

Blasting of hollow water filled concrete constructions

T.Nielsen
Benefits of blend programs in surface coal mines
*S.G. Giltner & R. Flinchum*

5 Blasting experiences

Explosives solutions for projects in jeopardy
*J.R. Wallace*

Sprengarbeiten dicht an Baukonstruktionen – Was kann schief gehen?, Ursachen, Fehlerquellen, Beispiele
*K. Kure*

Optimal blasting parameters predicted by rock mass properties – Engineering geological approach
*K. Braun & B. Božič*

Optimization and control of blast fragmentation
*S. Strelec, B. Božič & I. Gotic*

Evolution of blasting methodology for natural gas transmission in Canada
*A. L. McAnuff & R. A. Morin*

A preliminary study of explosive selection for optimum perimeter/wall control in development blasting
*M. M. Keegan, P. Bennett & W. Adamson*

Vibration characteristics of blasting in bed rock mass at Sanxia Project
*J. Zhang*

Experiences of drilling and blasting of heavily reinforced concrete
*W. Werner*

The origins and effects of inter-deck pressure in decked blasts
*R. A. Lee, J. A. Rodgers & K. C. Whitaker*

The impact of blasting vibrations on pressurized buried pipeline
*P. S. Sirkkä*

Under water blasting for dredging in ports: Case study of a major port in Southern India
*V. R. Sastry & M. M. Kamath*

Blast vibration limits on a sewer tunnel from direct strain measurements
*A. J. Moore & A. B. Richards*

The role of joints and rock mass quality in perimeter control
*S. P. Singh*

The role of blasting techniques in the demolition industry
*E. K. Lauritzen & J. Schneider*

Selective Blast Mining™ of narrow reef ore bodies
*I. Bock & T. J. Pietrzak*

Blasting techniques and explosives in the German quarry industry
*W. Thum*
Demolition blasting of reinforced concrete structures
R.J. Elliott & R. Woolf

Rückbau der ehemaligen Zementfabrik Liesberg BL, Schweiz
M. Zimmermann

Shocks due to blasts to demolition of bridges of highways
P. Lichte

6 Management of blasting operations

An interpretation model for measurement while drilling in large open pit mines
S-Q. Kou, H. Turtola & P. A. Lindqvist

An integrated control system for blasting and production chain optimisation in open-pit mining and quarrying
R. Chavez, P. Moser & J. Schleifer

Better information about explosives and blasting operations
C. Henrik de Thurah & M. Henrik de Thurah

Data-management aiming towards improved blasting techniques
T. Oberndorfer

Construction blasting in the City of 2004 Olympic Games
E. Baliktsis
