Proceedings of the

TENTH INTERNATIONAL SYMPOSIUM ON AVIATION PSYCHOLOGY

May 3 – 6, 1999
Columbus, Ohio USA

Sponsored By:
The Ohio State University Department of Aerospace Engineering, Applied Mechanics and Aviation
The International Journal of Aviation Psychology
and
The Association of Aviation Psychologists

Edited by:
Dr. Richard Jensen
Brian Cox
Dr. Joseph Callister
Robyn Lavis

Dr. Richard Jensen, General Chair
Dr. Joseph Callister, Program Chair
Neysa Huber, Angela Weir and Robyn Lavis, Technical Chair
# TABLE OF CONTENTS

**Forward** — Dr Richard S. Jensen ................................................................. ii

**Welcoming Remarks** — Kristina Pollack ..................................................... iii

**Workshop Descriptions** ................................................................................ v

**Cockpit Technology**

**Vertical Guidance**

*Flying Complex Approaches Using a Head-Up Display: Effects of Visibility and Display Type* ........................................ 1

Michael P. Snow, WPAFB
J. M. Reising, K. K. Liggett, T. P. Barry, D. C. Hartsock

*A Comparison Three HMD Symbologies For Attitude Maintenance In A Simulated Generic Rotor Aircraft* .................................................. 8

Chris M. Herdman, CACR, Carleton University
G. Youngson, M. Gamble, R. D. Kobierski, R. Thompson

Charles Oman, MIT Man Vehicle Laboratory
A. J. Kendra, M. Hayashi, M. J. Sterns

*Improving the Interface: Alternative Display Formats and Interface Techniques for Enhancing the Human Interface to an Advanced Graphical Flight Management System* ................................................................. 19

Robert A. Faerber, Rockwell Collins

**Warning Systems**

*Application of a Three-Dimensional Auditory Display for Warnings in the Cockpit* ................................................................. 26

Arjen Oving, INO Human Factors Research Institute
L. Van Breda, A. Bronkhorst

*Warning Systems in Commercial Aircraft-Perceptual and Cognitive Problems* .................................................................................. 32

Lena Martensson, The Royal Institute of Technology
G. Singer

*Appropriate Levels Of Alerting System Knowledge And Assertiveness* ...................................................................................... 37

Stuart D. Davis, Georgia Tech
Amy Pritchett

*Pilot Decision Aid Requirements for a Real-Time Turbulence Assessment Systems* ................................................................. 44

Ellen J. Bass, Search Technology, Inc
S. T. Ernst-Fortin

*A Pilot-Centered Turbulence Assesment and Monitoring System (TAMS)* ...................................................................................... 51

William Jones, Search Technology, Inc.
Perspective Displays

*Flight Command-Guidance Indicators or Pathway Displays: My Way or the High Way*... 57
Dennis Beringer, CAMI/FAA

*Perspective Information in the Cockpit to Improve Situational Awareness*... 63
Leo Van Breda, TNO Human Factors Research Institute

*Signal Detection Analysis of a Perspective Display of Terrain*... 69
Doug Peterson, University of South Dakota
J. L. Uhlarik

*Changes in Pilot Behavior with Predictive Systems Status Information*... 75
Anna C. Trujillo, NASA Langley Research Center

Cockpit Display of Traffic Information

*Near Term Procedural Enhancements with a Cockpit Display of Traffic Information: Impact on Controller Performance and Workload*... 82
B. Oscar Olmos, The MITRE Corporation CAASD
Sean Belcher, SJSU/NASA Ames Research Center

*Simultaneous Design of Cockpit Display of Traffic Information and Air Traffic Control Procedures*... 88
Amy Pritchett, Georgia Tech

Cockpit Automation Design

*Perceived Risk And The Human Operator Needs For Cockpit Automation*... 95
Sanjeev Sharma, University of Newcastle, Australia
H. P. Pfister, R. A. Heath

*The Pilots Participation In The Cockpit Design: What Can The Manufacturer Expect From?*... 99
Florence Reuzeau, Aerospatiale, France

*The Evidence for Flight Deck Automation Issues*... 105
Kenneth Funk, Oregon State University
B. Lyall

Cockpit Mode Awareness

*Peripheral Visual Feedback In Support Of Mode Awareness And Attention Allocation On Highly Automated Flight Decks*... 111
Mark Nikolic, University of Illinois at Urbana-Champaign
N. B. Sarter

*The Prediction Of Pilot-Mode Interaction Difficulties Spreading Activation Networks As An Explanation Of Frequential And Inferential Simplifications*... 117
Denis Javaux, University of Liege, Belgium

*Tactile Feedback: A Powerful Means of Supporting Mode Awareness on Automated Flight Decks*... 124
Aaron Sklar, University of Illinois at Urbana-Champaign
N. B. Sarter

Helicopter Technology

Direct Voice Versus Manual Input for Aircraft CDU Operations ................................................................. 210
Phillip S. E. Farrell, Defense and Civil Institute of Environmental Medicine
P. Sarkar, B. Cain, I. Mack, R. Ebbers

Observation of the Opto-Kinetic Cervical Reflex While Piloting a Helicopter Equipped with a Visually Coupled System .................................................................................................................. 216
G. Craig, National Research Council of Canada
Sion Jennings & Carl Swail

A Preliminary Descriptive Critical Incident Analysis Of NVG Helicopter Operations ....................................... 221
Peter Renshaw, University of Western Sydney, Australia

Crew Resource Management

CRM Team Training

Communication, Team Values and Quickstart Teams ....................................................................................... 229
Earl McKinney, USAF Academy
J. Barker

Implementing CRM in Initial Pilot Training Using a Team-Based Program Design ........................................ 235
Mary Ann Turney, Arizona State University East

Integrating Cockpit Resources: A Transition Technique for CRM ................................................................. 240
J. R. Desmarais, Westerlund and Associates
E. J. Westerlund

Enhanced Crew Resource Management for the MC-130P Mission Qualification Course ............................ 243
Steven J. Tourville, Raytheon Training, Inc.
J. S. Thompson, V. A. Spiker, R. T. Nullmeyer

CRM Training

The Migration of CRM Skills Into Corporate America or "As Above, so Below" .............................................. 250
Phil Polizatto, The Boeing Company

The New Airline Captain: Training For Success ................................................................................................. 255
Alan W. Price, Delta Airlines

Implementing CRM Skills Within Crew Training Programs ........................................................................... 260
Thomas L. Seamster, Cognitive & Human Factors
F. A. Prentiss, E. S. Edens

Aviation Human Factors: A "Core Technology" For Flight Operations .......................................................... 267
Harry W. and Linda M. Orlady, Orlady

Evaluating Advanced Crew Resource Management

Evaluating Effectiveness of ACRM Using LOE and Line-Check Data .............................................................. 273
Robert W. Holt, George Mason University
D. A. Boehm-Davis, J. Hansberger
Instructor/Evaluator Evaluations of ACRM Effectiveness................................................................. 279
Jeffery T. Hansberger, George Mason University
R. W. Holt

Pilot Evaluations of ACRM Programs......................................................................................... 285
Kara Incalcaterra, George Mason University
R. W. Holt

Jump Seat Observations of Advanced Crew Resource Management (ACRM) Effectiveness........ 292
Phillip A. Ikomi, George Mason University
R. W. Holt, K. Incalcaterra

Applications of the Theory of Reasoned Action Model of Attitude Assessment in the Air Force CRM Program............................................................................................................. 298
Gary Grubb, Dynamics Research Corporation

Organisational Resource Management: Managing, Meaning and Measurement...................... 302
Harry Holling, Ansett Australia

Do You Know It? Do You Do It? Do You Believe It? The Continuing Challenge Of CRM Evaluation...... 308
Gaham R. Braithwaite, University of South Wales
J. Anca, H. Holling

CRM-Closing the Loop..................................................................................................................... 313
David Rada, DuPont Aviation

Training Instructor/Evaluators to Assess CRM: from Research to Practice

Training Pilots to Classify Aircrew Coordination Behaviors...................................................... 317
Kimberly A. Smith-Jentsch, Naval Air Warfare Center Training Systems Division
D. Milanovich, J. Fowlkes, S. Ziulkowski

Assessing I/E Rater Training Effectiveness: Issues in Measurement........................................... 323
Casey Mulqueen, American Institute for Research
D. P. Baker

Discussion: Issues in Evaluating Crew Performance in Line Oriented Evaluation......................... 329
R. Key Dismukes, NASA Ames Research Division

Pilot Instructor/Evaluator Rater Training: Guidelines for Development...................................... 332
David P. Baker, American Institutes for Research
C. Mulqueen

Fostering Effective Leadership/ Followership in the Cockpit

Developing a Metacognitive Training Program for Followership Skill...................................... 338
Florian Jentsch, University of Central Florida
C. Bowers, E. Salas

Recognizing Errors in the Cockpit: A Test of the Status Generalization Theory......................... 344
Dana Milanovich, Naval Air Warfare Center Training Systems Division
J. E. Driskell, R. J. Stout, E. Salas
Monitoring and Challenging: Crew Attitudes and Strategies

How Do Flight Crews Detect And Prevent Errors? I. Explanation For Failures To Correct Errors........ 350
Judith Orasanu, NASA Ames Research Center
L. McDonnell

Judith Orasanu, NASA Ames Research Center
C. Van Aken

Has CRM Succeeded Too Well? Assertiveness On The Flight Deck...................................................... 357
Judith Orasanu, NASA Ames Research Center
L. Murray, J. Eastman, M.A. Rodvold, L.K. Tyzzer

Effective Communication Strategies to Mitigate Pilot Error............................................................... 362
Ute Fischer, Georgia Tech
J. Orasanu

Flight Attendants

Designing an "In House" CRM for VARIG AIRLINES Flight Attendants: A Field Experience Report....... 367
Capt. Flavio Souza, Varig Airlines, Brazil
Rafael Pires Santos

Improving Air Traffic Control Teamwork

Training Air Traffic Control Teamwork: Current Practices & Future Direction....................................... 373
Dana Milanovich, Naval Air Warfare Center Training Systems Division
K. A. Smith-Jentsch, J. R. Harrison

Safety Culture

Safety Culture

Culture In Aviation: Turning Black Boxes Into Orange................................................................. 379
Daniel E. Maurino, ICAO

Driving an Airline Operations Safety Culture...................................................................................... 382
Trevor Jensen, Ansett Australia

Corporate Culture and the Safety of the Aviation Organization......................................................... 387
Willem Homan, Western Michigan University
W. Rantz, B. Bälden

System Safety Analysis of Safety-Critical Software and the Human User........................................ 392
Ellen Overton

Confidential Reporting Systems and Safety-Critical Information...................................................... 397
Michael H. Rejman, DERA Centre for Human Sciences
Decision Making

Automation and Human Interface for Takeoff Safety................................................................. 402
Toshiyuki Inagaki, Tsukuba University, Japan
Y. Takae, N. Moray

Operational Decision-Making (ODM) and Risk Management (RM): Rising Risk, the Critical Mission Factors and Training................................................................. 408
Ronald J. Lofaro and Kevin M. Smith

Decision Methods

Specification of Training Simulators by Cognitive Work Analysis........................................... 414
Gavan Lintern, Air Operations Division, Defence Science and Technology Organization, Australia
N. Naikar

Challenges Facing Interface Design for Safety Critical Systems............................................... 421
George Galanis, Air Operations Division, Defence Science and Technology Organization, Australia
G. Lintern, G. Sterling

The Cockpit Cognitive Walkthrough......................................................................................... 427
Peter Polson, University of Colorado
Nancy Smith

Collaborative Decision-Making

The Dissemination of Knowledge in the Aviation System: A Case Study on Pre-flight Planning........ 434
Phillip J. Smith, The Ohio State University
J. H. Obradovich, C. E. McCoy, J. Orasanu

Collaborative Decision-Making: A Success Story Of An Airline-FAA Partnership....................... 439
Bill Corwin, Honeywell
R. Beatty, M. Wambsganss

Uncertain Information, Incompatible Goals, And Merciless Incentives: The Dispatch Dilemma........ 445
Kip Smith, Kansas State University

CDM Side of the 2-4-6 Hour Convection Forecast Products..................................................... 452
Eric Nadler, Volpe Transportation Systems Center

Weather-Related Pilot Decision-Making

Three Continents, But a Single Mind When it Comes to Weather............................................... 458
Mark Wiggins, University of Western Sydney, Australia
D. R. Hunter, M. Martinussen

Pilot Information Needs And Strategies For Operating In Icing Conditions.................................. 463
Lawrence Vigeant-Langlois, MIT
J. Hansman
Cooperative Problem-Solving: Coordination and Decision Making in Air Traffic Management

*Impact of Alternative System Architectures on Coordination and Communication in the ATM System* ........................................... 470
Philip J. Smith, Ohio State University
C. Billings, C. E. McCoy, D. Woods

*An Airspace Visualization Tool For Collaborative Decision Making* .......................................................... 476
Jimmy Krozel, Seagull Technology, Inc.

*Alternative Perspectives On Traffic Risk* ......................................................... 483
Jeannie Davison, NASA Ames Research Center
J. Orasanu

*FAA Inter Facility Collaborative Routing* ............................................................. 489
Laurel S. Carlson, MITRE Corp.

Risk Management

*The Different Risks for Pilots and Air-traffic Controllers in Their Daily Work: Does This Lead to Differences in Risky Decision Making?* ........................................ 494
Alois Farthofer, University of Linz, Austria
H. Gschwandtner

*Cockpit Management: Beware of Task Forgetting Even at Moderate Workloads* ................................................. 501
Louis C. Boer, TNO Human Factors Research Institute

*Managing the Safety Risks Related to Significant Organizational Change* ................................................... 507
Terry Kelly, NAV Canada

Air Traffic Control

*ATC Decision Making*

*Situational Awareness for Expert ATS Decision Making* ...................................................... 512
Lisette Prince, NAV CANADA

*Integrated Task Analysis of En-Route Control: A Process Oriented Approach* ........................................ 517
K. Wolfgang Kallus, Karl-Frazen-S-University, Austria
M. Barbarino, D. VanDamme, A. Dittman

*Plan Generation In Air Traffic Control* ................................................................. 522
M. R. P. Dougherty, Scott D. Grunlund, University of Oklahoma
F. T. Durso, J. Canning, S. H. Mills

*Cognitive Models in ATC*

*Effects of a Novel Interface Design on Strategic Planning by En Route Controllers* ......................... 528
John M. Canning, University of Oklahoma

*The Role Of Cognitive Modeling In The Validation Of A Decision Support System: The Case Of Air Traffic Control* .......................................................... 534
Nicole Boudes, Centre d'Etudes de la Navigation Aerienne
E. Tremblay
# ATC Design

## ATC Displays

*Design Evaluation of Information Displays in Complex Control Settings* .................................................. 609  
Deborah Bruce, NTSB Office of Research & Engineering

*Touch Input Screens and Animations: More Efficient and Humanized Computer Interactions for ATC (O)*. 615  
Christophe Mertz, CENA, France

*Your Attention Please: An Evaluation of Animated Visual Signals for ATC Alarms and Notifications*........ 622  
Sylvie Athenes, CENA, France  
S. Chatty, A. Bustico

## Terminal ATC Design

*Trust And Pilot Controller Interaction* ........................................................................................................ 627  
Sophie Dusire, CNAM, France  
P. Falzon

*An Operational Concept for Flying FMS Trajectories in Center and TRACON Airspace* ............................ 633  
Everett Palmer, NASA-Ames Research Center  
D. Williams, T. Prevat, S. Romahn, T. Goka, N. Smith, B. Crane

*Model-based Design and Analysis of ATC-Automation Interaction* ......................................................... 640  
Stephan Romahn, NASA Ames  
E. Palmer

# Human Error

## Human Error

*Error Types and Related Error Detection Mechanisms in the Aviation Domain: An Analysis of ASRS Incident Reports* ................................................................. 646  
Heather M. Alexander, Holloman Air Force Base  
N. Sarter

*Bending the Rules in the Air* ......................................................................................................................... 652  
Patrick Hudson, Leiden University, The Netherlands

*Controlling Error in the Cockpit* .................................................................................................................... 658  
Keith Hendy, DCIEM, Canada  
F. Lichacz

*Countermeasures for Skill, Rule and Knowledge-Based Errors* ................................................................. 664  
Paul C. Schutte, NASA Langley Research Center  
T. S. Abbott, J. R. Comstock Jr., K. A. Latorella, M. T. Palmer, A. T. Pope, M. Rudisill, A. C. Trujillo,  
J. S. Berry

*Application of FRANCIE for the Transponder Landing System Human Error Analysis* ......................... 671  
Lon Haney, Lockheed Martin Idaho  
K. Winner
