CONTENTS

SPE 62528 Relevant Time Update of an Earth Model With Logging-While-Drilling Data .......... 9

SPE 62884 Natural Gas: The Revolution Is Coming ............................................. 15
  M.J. Economides and R.E. Oligney, U. of Houston, and A.S. Demarcho

SPE 62885 Oil and Gas in the Energy Mix of the 21st Century ................................. 25
  J.R. Fanchi, Colorado School of Mines

SPE 62886 2000 Global Competitive Assessment .................................................. 35
  W.A. Marko, Madison Energy Advisors Inc.

SPE 62891 Factors That Affect the Success of Mechanical Water Shut-off in Wells .......... 49
  Mahmoud A/Fotuh, GUPCO, and Sameh Macary, EPRI

SPE 62892 Gas Shutoff Evaluation and Implementation, North Slope, Alaska ............... 55
  A. Frankenburger, P. Bartel, and G. Roberts, BP Exploration (Alaska) Inc., and D. Hupp,
  Schlumberger

SPE 62937 Reservoir Drainage with Downhole Permanent Monitoring and Control Systems.
  Real-Time Integration of Dynamic Reservoir Performance Data and Static
  Reservoir Model Improves Control Decisions ............................................... 67
  Fridtjof Nyhavn and Frode Vassenden, SINTEF Petroleum Research, and Peter Singstad,
  SINTEF Electronics and Cybernetics

SPE 62938 How To Improve Reservoir Characterization Using Intelligent Systems—
  A Case Study: Toldado Field in Colombia .................................................. 77
  R. Soto B., Ecopetrol-ICP; M.C. Bernal, Ecopetrol; B. Silva, A. Bejarano, and G. Cobaleda,
  Ecopetrol-ICP; and S. Arango and F. Torres, American Geoeexploration

SPE 62939 Integrated Fractured Reservoir Modeling Using Both Discrete and
  Continuum Approaches ................................................................................. 91
  Ahmed Ouenes, (RC)², and L.J. Hartley, AEA Technology

SPE 62940 Gas Cap Monitoring in High Flow Rate, Low Porosity Clastic Reservoirs in
  Colombia Gives Big Economic Returns ......................................................... 101
  David Bullion and Fabio Gonzalez, BP Exploration Colombia, and M.E. Markley,
  Schlumberger

SPE 62941 Conditioning Reservoir Models to Dynamic Data—A Forward
  Modeling Perspective ..................................................................................... 107
  Sanjay Srinivasan, U. of Calgary, and Jef Caers, Stanford U.

SPE 62942 Improved Reservoir Characterization Through Evolutionary Computation .... 123
  C.E. Romero, J.N. Carter, R.W. Zimmerman, and A.C. Gringarten, Imperial College

SPE 62943 Sand Consolidation Using High-Temperature Alkaline Solution .................... 131
  D.D. Mamora, K.A. Nilsen, F.E. Moreno, and R. Guillemette, Texas A&M U.

SPE 62944 Quantitative Analysis of Drag Reduction in Horizontal Slug Flow ............... 139
  M. Duas, C. Kang, and W.P. Jepson

SPE 62946 Pompano Paraffin Calibration Field Trials .............................................. 147
  J.W. Kleinmans, BP-Amoco, and V.G. Niesen and T.S. Brown, Multiphase Solutions Inc.

SPE 62948 Pipeline Bundles Model Implemented Into a Multiphase Flow Model .......... 163
  E. Duret, Inst. Français du Pétrole; E. Lebreton, Stolt Offshore; E. Heintzé and V. Henriot,
  Inst. Français du Pétrole; and J.F. Saint-Marcoux, Stolt Offshore

SPE 62950 The Modeling of Advanced “Intelligent” Well—An Application ................. 171
  S. Yu and D.R. Davies, Herriot-Watt U., and D.W. Sherrard, Reservoir Management Ltd.

SPE 62951 Equipment and Operation of Advanced Completions in the M-15 Wytch Farm
  Multilateral Well ......................................................................................... 185
  J. Algeroy and R. Pollock, Schlumberger

SPE 62952 Using Fibre-Optic Distributed Temperature Measurements to Provide
  Real-Time Reservoir Surveillance Data on Wytch Farm Field Horizontal
  Extended-Reach Wells .................................................................................. 193
Papers not received in time for publication:

SPE 62945  Measurement of Waxy Crude Properties of Live Oils Using Novel Laboratory Techniques
K. Karan and J. Ratulowski, DB Robinson Research Ltd., and P. German, North Atlantic Pipeline Partners

SPE 62947  A Novel Approach for Treatment and Transport of Waxy Crude Oils in Single, Bare Subsea Flowlines

SPE 62949  Performance Evaluation of Coiled-Tubing Applications as Pipelines
W.F. El Laithy and M.E. Kandil, Gulf Suez Petroleum Co.

SPE 62965  Real Options: Moving From Value Assessment to Value Creation
F.G. Koch, Chevron Corp., and B.C. Cotner, Chevron USA Inc.

SPE 62969  Extending the Influence of Real Options: Problems and Opportunities
T.A. Luehrman, PricewaterhouseCoopers

SPE 63004  Multivariate Statistical Analysis Improves Formation Damage Remediation
J.R. Tugue, Chevron Corp.

SPE 63047  Estimation of Bottomhole Pressure in Pumping Oil Wells: Effect of High-Viscosity Fluids and Casinghead Pressure
S.L. Scott, Texas A&M U.

SPE 63056  Where Have All the Profits Gone? Or, Evaluating Risk and Return of E&P Projects

SPE 63102  Developing and Implementing an Integrity Program
R. Lewis, H. Rosen USA Inc.

SPE 63121  Experimental Investigation of the Use of Drag-Reducing Agents in Conjunction With Twin-Screw Multiphase Pumps
S.L. Scott, Texas A&M U.

SPE 63189  Sensitivity Analysis of Transition Boundary to Flow Parameters in Two-Phase Near-Horizontal Flow

SPE 63202  Adapting Probabilistic Methods To Conform to Regulatory Guidelines
H.G. Acuna and D.R. Harrell, Ryder Scott Co.

SPE 64307  Petroleum Engineering Education: The Road Ahead
W.J. Lee, Texas A&M U.

SPE 64308  The 5th Colloquium on Petroleum Engineering Education: An Industry Perspective
H. Kazemi, Marathon Oil Co.

SPE 64309  2000 SPE Salary Survey Results
P.A. Schenewerk, U. of Missouri Rolla

SPE 64310  Worldwide Petroleum Engineering Education Supply and Demand
R.D. Ostermann, U. of Kansas, and L.R. Heinze, Texas Tech U.

SPE 64311  A Petroleum Engineering Education Model Based on the Maureen Field UKCS
A.C. Gringarten, Imperial College
